"I don't think they can get an injunction issued," said Mr. Baldwin, "and if they should it could be as easily dissolved. The lands up to the present time have been left by Congress in the hands of the Territorial government, and what Congress may or may not do in the future is but a matter of guesswork. The United States statutes do not, in the first place, recognize squatters at all, and any recognition they do receive is purely a matter of concession, as in certain cases where they have entered and made substantial and bona fide improvements, their names are sent in by the agent, and when the lands in question are to be advertised and sold according to law, they are assumed to have made application and get their legal possession in due form. Nothing analogous to that process is the case here."

MORE PUBLIC LANDS TO BE OPENED FOR AGRICULTURE IN KONA.

Nearly 2,000 acres of public land in North Kona, Hawaii, are to be opened up as soon as the government can complete arrangements to that effect. Governor Dole and Land Commissioner J. F. Brown have personally investigated the matter there. The prospect for roads to the tract was looked into carefully. The land lies at an elevation of between 2,000 and 3,000 feet above sea level and is considered splendid property. The road site will be surveyed by W. W. Bruner, who has been requested to go ahead with that work without delay. The appropriation for the road is available, and nothing stands in the way of the tract being connected with the seaports.

A tract of land in South Kona was also investigated for opening to the public. Nothing definite in this matter was reached.

SEEKING LABORERS FOR HAWAII—REPRESENTATIVE OF THE PLANTERS COMPLETES HIS MISSION.

SAN JUAN, P. R., *August 2.*

T. Alexander, the representative of the Hawaiian Planters' Association, who has been here for some time, sailed for New York yesterday. Mr. Alexander, who has traveled all over the island and persuaded many Porto Ricans to emigrate to Hawaii, said that he believes they will prove good workmen and creditable citizens of Hawaii. He left local agents, with power to contract with emigrants. His plans, however, seem to be undeveloped, as transportation for those whom he has engaged has not been arranged.

EXHIBIT 25.

[Pacific Commercial Advertiser, Honolulu, August 20, 1900.]

SQUATTERS OF OLAA WILL BLOCK SALE.

HILO, HAWAII, *August 17.*

The squatters of Olaa, known as the American Settlers' Union, have not been sleeping so far as the question of their rights to their claims in Olaa are concerned, and Mr. Ryan, the president of the association, went down to Honolulu by yesterday's kinau to present to Commissioner J. F. Brown a notice of application for hearing in the Federal courts as to questions of law and fact for the sale or otherwise final disposition of any portion of the public domain of the United States in the Territory of Hawaii subsequent to June 14, 1900, and up to the present date. The contestants are Fred R. Giddings, M. Porter, H. Peyser, O. T. Shipman, H. A. Gerlach, W. A. Carpenter, H. M. Giddings, R. D. Junkin, J. N. Brown, E. P. Greeney, T. J. Williams, F. E. Hime, G. J. Giddings, E. L. Radcliffe, N. Russel, T. J. Ryan, J. E. Staples, Louis Horner, J. L. McComber.

The papers are dated at the Department of the Interior, Washington, D. C., before the honorable Commissioner of the General Land Office, and directed to J. F. Brown.

A similar notice is issued by the same parties, through the same attorneys, relative to the sale of leases of public lands within the domain of the United States, the eighth count of which is—

That the said J. F. Brown, commissioner, erred in offering to lease at one time, in one body, and to any one person such a vast area of public domain of the United States, to wit, 25,000 acres on the island of Maui, the same being against public policy, not conducive to the public welfare, subversive to the rights of citizenship, and detrimental to the best interests of the Territory of Hawaii and of the United States.

"We are going to bring this matter to an issue right here and now," said Mr. Ryan, "and find out whether any coterie or compact can cause the public lands of the United States to be disposed of for their particular benefit, without any reference to constitutional and statutory law upon the matter. We have no kick against legitimate plantation enterprise and progress, but when plantation interests try to control all the forest lands that they do not own and can not use as a reservation to insure them waterheads and water supply we do kick, and we do demand that when these lands are disposed of it shall be under the straight and legitimate land laws of the United States."

EXHIBIT 26.

Estimated returns from an acre of sugar cane for two crops, which embraces a period of four years on such lands as are located on the windward side of the island of Hawaii at elevations ranging from 1,000 feet to 1,700 feet.

Above 1,700 feet, or thereabouts, it is impracticable to try to raise cane, as the atmosphere is too cool, especially at night and during about four months of the winter season.

Below 1,000 feet it is almost impossible for an individual planter to procure an acre of land, for the reason that practically all the low lands in any way fit for the raising of cane are in the hands of the sugar corporations.

PROCEEDS.

First two years:

Average crop is scarcely 35 tons; average price per ton paid by the mill is about \$4.40, making the total proceeds about \$154.00

Second two years:

Proceeds same as above..... 154.00

Total..... \$308.00

EXPENSES.

First two years:

Plowing, harrowing, etc.....	\$5.00
Seed.....	35.00
Planting.....	5.00
Fertilizer and fertilizing.....	20.00
Cultivation and stripping.....	60.00
Tax (\$1 each year).....	2.00
	<u>127.00</u>

Second two years:

Fertilizer and fertilizing.....	20.00
Cultivation and stripping.....	60.00
Tax.....	2.00
	<u>82.00</u>

Total..... 209.00

Net gain per acre for four years..... 99.00

Net gain per acre for each year..... 24.75

This does not take into consideration the cost of the land, cost of clearing, wear and tear, high prices for everything bought at the sugar company's store, high rates of interest, not receiving pay for your crop for about three months after delivery, and many other matters not encountered by farmers on the mainland. It is clear enough to any thoughtful person that the individual cane planter on the uplands is not to be envied.

Eight tons of good cane will make a ton of sugar. After the two crops are taken off the ground should be replowed and replanted, which amounts to starting anew.

EXHIBIT 27.

The following recently appeared in Town Talk, published in San Francisco:

"A decision rendered by Judge Humphreys, of Honolulu, recently, is in the nature of a warning against investing in Hawaiian securities.

From the language of the court it appears that Hawaii is a fertile field for stock manipulators and crooked promoters, and that it is extremely hazardous to invest in sugar securities, particularly in those of new and undeveloped sugar properties. The decision was rendered in the case of A. W. Carter, who had asked for the approval of his annual account of the estate of Annie Parker, a minor. Judge Humphreys not only refused to approve the account, but removed the guardian for having invested his ward's estate in the bonds of the McBryde Sugar Company, Limited, of the Oahu Railway and Land Company, Limited, of the Waialua Agricultural Company, and the American Sugar Company, of which he was the treasurer. The court found that the investments were improvident and reckless, and constituted a breach of trust. In discussing the conduct of Carter, Judge Humphreys took occasion to declare that during the three years following the annexation of the islands the community was sucked into a maelstrom of speculation by land sharks and unscrupulous promoters whose professed knowledge of the secrets which lay hidden in the womb of the future entitled them to be classed as prescientists. Many of the enterprises started by them, and which by the way allured victims in San Francisco, are now, according to Judge Humphreys, 'bitter memories, mere speculative tombstones.' By way of illustration he cited the case of the American Sugar Company, the history of which appears in the testimony in the case. The company was incorporated with a capital of a million and a half dollars. A fine wharf was constructed, a number of costly pumps were erected, railroads were built, 800 acres of cane were planted, and a corps of laborers employed, yet the water from the wells from which it was expected to irrigate the cane held such quantities of salt in solution that it was death to animal life, and the property had to be abandoned. Nevertheless, in the madness of speculation the stock of the company, of the par value of \$100 per share, sold for \$200. Judge Humphreys declared that he could mention other evidences of acute speculative mania, but he referred only to the Maunalaï plantation, upon which a half a million was spent, and which was sold by a receiver of the court. Judge Humphreys' opinion should be read by every person who entertains the notion that investments in Hawaiian sugar stock are good things. He declared that it was little less than a crime to permit the custodians of trust funds to invest the moneys of their wards 'in securities that pending events might cause to be swept into the wastebaskets of finance.' The decision is a remarkable one, for the case opened up an inquiry into conditions in the sugar market to such an extent that the court found it apropos to predict that the price of sugar will soon take on a lower range of values. Moreover, Judge Humphreys found that the companies in which Carter invested his ward's money, and in which many San Francisco people are interested, are far from being substantial corporations. The McBryde Company has a bonded debt of three-quarters of a million and can not under the most favorable circumstances pay dividends within three years. It was revealed upon the trial that the artesian wells sunk on the plantation yielded salt in excessive quantities, a condition that drove the American Sugar Company from sugar planting to stock raising, but in the last report of the company to its stockholders no reference was made to that impressive fact. Judge Humphreys' decision will undoubtedly have a tendency to affect the sugar stock market."

EXHIBIT 28.

COOPER FOR CHINESE.

The following is a Washington, D. C., dispatch published through the press:

"WASHINGTON, *October 18.*—Henry E. Cooper, Territorial secretary and for several months prior to his departure for the United States acting governor of Hawaii, has discussed with Secretary of Agriculture Wilson the conditions in the Territory. One of the main aims of Mr. Cooper's trip here is to acquaint the Administration with the actual situation in Hawaii. In his conference with Secretary Wilson he emphasized the seriousness of the labor problem. The natives are dying off rapidly, the mortality being in the neighborhood of 40 deaths to the thousand, and foreign laborers are getting out of the country much more rapidly than they are coming in. The encouragement of Chinese labor, said he, is regarded as the most promising solution, and the Territorial government is anxious that large numbers of laborers should come in from China. The sugar crop that should have been harvested at the beginning of July, he said, is not yet off the field and will not be harvested before next month. The coffee industry is languishing, and many things that should be raised there have to be bought outside the islands.

Mr. Cooper called at the Interior Department to-day and finally revised his annual report which he had submitted to Secretary Hitchcock. He says all experiments have shown that the Americans are not fitted for labor in the islands, and that there is nothing to do but to get foreign labor. Mr. Cooper says this in no wise will affect the labor conditions in the United States, as the entrance of foreign labor already is sufficiently guarded against here. He points out that \$20,000,000 worth of machinery and similar supplies had to be bought from the United States for use in Hawaii during the last year, and said that improved conditions there would advance commercial relations here. He will leave for Hawaii next Thursday."

Note: See governor's report (1901), pages 5, 63, 64; also governor's testimony before the House Committee on Territories, United States Congress, April 18, 1902, pages 9-12.

EXHIBIT 29.

HILO, HAWAII, *June 20, 1901.*

T. J. RYAN, Esq.,
Mountain View, Hawaii.

MY DEAR SIR: I have the honor to acknowledge the receipt of your letter of recent date and respectfully advise that I have acted upon your suggestion. Went up to Mountain View and along the Pepee road and carefully observed conditions, crops, climate, etc.

I very much appreciate your thoughtfulness in writing me and begin to realize the variety of crops possible in this island owing to the diversity in climate.

Permit me to express to you my thanks for assisting me in getting a fair idea of Hawaii.

Very truly, yours,

W. L. STARK.

EXHIBIT 30.

[The Pacific Commercial Advertiser, Honolulu, November 21, 1899.]

**THE BIG SURPLUS—HOW TO GET IT INTO THE CHANNELS OF BUSINESS—
REDUCE POSTAL BANK INTEREST—MONEY MIGHT BE DEPOSITED IN
THE BANKS ON APPROVED SECURITY—VIEWS OF PUBLIC MEN.**

The surplus fund which is rapidly increasing in the Treasury Department has given rise to many conjectures and theories as to what are the best means of using it for the welfare of the community, inasmuch as it does not appear that legislative action can be counted on to make appropriations for public necessities or even for the payment of usual governmental expenses.

Business men, when asked what ought to be done with the funds, were at first prone to believe that there was no legal way to use them, and that Congressional action must be awaited before the local government could make a move to circulate the money. They deplored the fact of so much money being tied up, thus laying the basis of a future strident money market. An opinion prevailed that there might possibly be a means by which some of the money could be deposited in the banks if proper securities could be offered in exchange. Such a custom is resorted to by the National Government, which has even accepted New York municipal bonds as safe security.

Another feeling is noted among the business houses that it is time to discontinue the Postal Savings Bank. Financiers state that a government controlling such a large surplus fund as at present is lying idle in the treasury does not need to pay interest on money borrowed of depositors. The minister of finance is already working upon several plans and suggestions, and if any method can be followed legally, much of the surplus fund will be started on its travels. Among the general suggestions which have been advanced is one quite strongly indorsed that the minister of finance reduce the rate of interest paid by the Postal Savings Bank from $4\frac{1}{2}$ per cent to 3 or $3\frac{1}{2}$ per cent. A great deal of money is being locked up in the Postal Savings Bank that goes to swell the surplus amount held in the treasury. If this money were taken out and deposited in the local banks, it would soon get into general circulation. A consensus of opinion seems to indicate that the minister of finance ought to make this move by January 1, giving at least thirty days' notice, which is the time usually given for withdrawals. When the Postal Savings Bank was inaugurated, the government was a borrower at 6 per cent issuing bonds. Now it has a surplus fund on hand and has no need for these deposits at all, and instead of borrowing it is paying off its 4 or 5 per cent bonds. The need of a postal savings bank is so much less than it was, the government could well afford to discourage further deposits by lowering the rate of interest.

The following interviews speak for themselves:

HON. W. O. SMITH.

Well, in regard to handling the surplus funds of the government, I should think that the following suggestion, which I heard advanced a few days ago, is a feasible one: that is, to furnish to the banks money up to 90 per cent of the government bonds which they should deposit as security, say, \$100,000 in bonds to allow a withdrawal of \$90,000 in cash, to be used for a time limited by agreement with the bank.

I am inclined to think that could be done without further legislative action. I think that steps should be taken with the approval of the Washington Government so there could be legislation upon the subject of appropriations, if upon no other subject. The provision in the joint resolution that "the civil, judicial, and military powers heretofore exercised by the Republic of Hawaii should be exercised by such persons and in such manner as the President shall direct" would seem to imply that he would have the power to direct that legislation might be had upon the subject of appropriations to the exclusion of other subjects if it was unwise for the Hawaiian legislature to enter upon general legislation pending the action of Congress in framing the government of Hawaii.

It is also possible, in a limited way, the powers of the council of state might be invoked. The provision in regard to its powers is as follows:

"The council of state may, upon the request of the executive council, appropriate public moneys when, during the time intervening between the sessions of the legislature, the emergency of war, invasion, rebellion, pestilence, or other great public necessity shall arrive."

We may arrive at a point where the means of carrying on certain public works, as for instance, harbor improvements, shall become a great public necessity.

HON. P. C. JONES.

I think the government funds now swelling the treasury to a big surplus would be just as safe in the banks as in the vaults of the treasury department. If this public money can not be touched without legislative action—and I don't think it can—I believe that the minister of finance should reduce the rate of interest in the Postal Savings Bank, say, to 3 per cent or $3\frac{1}{2}$ per cent; this reduction would tend to discourage people from continuing to deposit in the Postal Savings Bank, and either this money would circulate, or be deposited in the banks, which, in turn, would circulate it. At any rate, the government would be relieved from paying interest on moneys, when it has a big surplus of the same in its treasury. After January 1 I think it would be a good idea to reduce the Postal Savings Bank interest. As to the surplus, however, I don't think it can be handled without proper legislation.

H. E. WAITY.

I do not see how the surplus funds in the government treasury can be legally brought into circulation. It certainly is true enough that it ties up a whole lot of money which ought to be out in the public market.

It is my belief, however, that the minister of finance is considering some scheme which will shortly be broached. The money will have to get out in a short time. This surplus money question also brings it strongly to my mind that the Postal Savings Bank deposits should be discouraged, and this could undoubtedly be accomplished by putting down the interest to a very low rate and giving depositors several months' notice. There certainly is no need of the government paying interest on money in one branch while it has such a great surplus of moneys in its treasury vaults and money steadily pouring in. The Postal Savings Bank will become useless when Congress takes action on the Hawaiian bill, and it would do no harm to begin winding up its affairs now.

However, I don't incline to the opinion that the surplus in the treasury is so bulky as some people try to make it appear. I do not think it is feasible to distribute the money to the banks. The banks as a rule have not on hand such securities as the government would expect as against deposits, such as Hawaiian government bonds, and to go into the market and buy such securities would be to do so at a great premium, because they would have to buy from people who in reality have no desire to sell. For example, if the treasury department were to make an attempt to place the surplus funds with the banks it could only be a temporary measure at best, and they would, in recognition of prudence, certainly have to require securities no less stable than government bonds. If this were to be carried out, the securities bought up and placed with the government, it would simply be money put in the hands of the present bondholders and substituted for the bonds which they hold.

Referring again to the Postal Savings Bank proposition, the government is, in my opinion, warranted to be allowed to draw from the general unappropriated fund to whatever may be necessary for the payment of money deposited in the savings bank. It does not disburse its deposits; simply holds them. If that money were deposited with the other banks, they would disburse it to the same extent they would their other deposits. A large proportion of the money in the treasury comes through the Postal Savings Bank.

HON. L. A. THURSTON.

I think that the government has the full right, without legislation, to deposit surplus government moneys in any bank which it may select. I think that confusion has been imported into this question by proposing that the government should "loan" money to the banks. I don't think the government has any power to loan money to a bank or to anyone else without legislative authority. A deposit by the government in a bank, however, is no more a loan than is a deposit by a private citizen of his surplus moneys a loan to a bank. It would do little good, however, if the government should deposit money in the banks and make it subject to call without notice. My suggestion would be that without there being any legal, binding agreement there should be a tacit agreement or understanding between the government and the banks that the government would deposit a given amount in a bank for say six months, and that it would not be withdrawn from the bank during that period unless exceptional requirement compelled it. Whether or not interest should be paid by the bank on the deposit is a question of detail. I should think that precedent on the mainland should govern somewhat in this respect. I know that national, state, city, and county governments make deposits in banks of their surplus funds, but I don't know whether interest is charged therefor.

As to whether or not security should be required it seems to me entirely proper that the government should ask it, although in this respect I should think precedent can be consulted. If securities are to be taken, naturally government bonds would be the ones which would afford the best security to the government.

I think the chances are that the present stringency will not last for more than six months, for the reason, first, that by that time dividends from the next crop of sugar, which will be the largest on record, will be coming in; second, the legislature will probably have met and provided for the expenditure of the surplus and probably reduce some of the more burdensome of the taxes which are now producing more money than the government needs; and, third, additional foreign capital is constantly coming into the country relieving the financial stringency, which is caused simply by an attempt to develop the plantation industry more rapidly than local capital could well take care of.

L. E. PINKHAM.

It is certainly a serious matter in an isolated country to have a great idle sum of money tied up in the public treasury with no prospective relief except forced expenditure on public works, for the temptation is to enter into ill-advised projects and expenditures that later prove a waste of public funds. Public works should not be an expediency to get rid of an unexpected accumulation of money and return it to circulation; besides it is too slow in its operation.

We have before us the example of the United States Government, which has its banks of deposit in the various money centers of the country, in which Government funds are deposited, thus enabling those banks, by loans, to keep in circulation vast sums of money that otherwise would be locked in the Treasury vaults. In times of stringency the United States Treasury makes special efforts to increase its deposits in these banks. The security usually exacted from those banks are United States Government bonds, which are deposited with the United States Treasury to cover the deposits. The United States Treasury has even gone farther and accepted municipal bonds of the city of New York as security.

I suggested to a local banker the other day a similar means of relief here, but the reply was the banks practically held no Hawaiian government bonds.

It occurs to me, in case of severe stringency, the confidence of the public and holders of securities in general in our banks is so firm that the holders of Hawaiian government bonds would willingly loan them to our banks at a low rate of interest, say 2 per cent per annum or even 1 per cent, and thus the banks would be in position to tender the Hawaiian government its own bonds as security for deposits of government funds. Thus an additional income would accrue to both bondholders and banks and the financial pressure be relieved. No man or government can ask better security than his own obligations. The present situation is one never anticipated, but undoubtedly is and should be within the scope and power of the cabinet to meet, certainly if with the concurrence of the advisory council.

In the United States it would be simply an Executive matter.

B. F. DILLINGHAM.

In my opinion the holding of the surplus government funds in the treasury and the small prospect for an early appropriation of them, is a blocking up of the working capital of the community. I believe that it is possible for the money to be

deposited in the banks, if proper security can be offered—government bonds, for instance. If there should at any future time be a stringency in the market and the legislature be without power to meet and make necessary appropriations, that if the banks could offer government bonds as security the government could put out some of the money. This plan, I believe, is somewhat generally believed to be easy within the scope of the powers of the government.

W. W. HALL.

It is a very serious matter to withdraw so much money from general circulation but it seems to me a graver matter that with so much surplus in the treasury it cannot be used to build public roads, widen our streets, and make many public improvements which are absolutely necessary. Since the president decided that no election could be held, and there is no prospect of the legislature meeting, I am of the opinion that the members of the last legislature should hold over, and appropriations be made by it of this surplus. I don't think the council of state has any authority in the matter, for there is no emergency such as war or pestilence, by which the money could be taken from the treasury and thus put into circulation. It is certainly a shame that public moneys received into the treasury should be the means of causing a stringency in the public money market.

HON. J. A. M'CANDLESS.

I don't see that anything can be done with the big surplus. In my opinion the council of state has absolutely no authority to appropriate any of it, and therefore will have to remain in the treasury until the legislature, whenever it meets, can make its regular appropriations. Of course, if anything extraordinary happens which calls for a sudden appropriation, the council of state would then exercise its power. As it is, I am afraid no one can touch it for public uses.

A. S. HUMPHREYS.

It certainly would be a good thing if the surplus in the treasury could be loaned to the banks and thus reach the public market, but I do not think it can be done by any warrant of law. As for legislative action, of course that would be different, but the old legislature can not hold over to make appropriations. We must await Congressional action.

E. D. TENNEY.

How can the surplus money in the treasury be made available? Well, I don't see how it can be legally touched under any pretext, except for some great emergency. Even though the legislature fails to meet, I don't see how anything can possibly be done except to let it lie there indefinitely until some Congressional action gives the Hawaiian government authority to make the necessary appropriations. Of course, tying up so much money will eventually cause a stringency in the money market, but for all that, it doesn't appear quite clear to my mind that the money can be handled—just keep taking it in, that's all. Now as to loaning the money to the banks, I do not believe that such a course would be legal. No; I consider that the only feasible plan to get the money out of the treasury would be to break into it and carry it off.

It is claimed by many, if there had been no surplus in the treasury there would have been no buildings burned in Honolulu on account of the bubonic plague.

EXHIBIT 31.

COMMITTEE ON RAILROADS,
UNITED STATES SENATE,
Washington, D. C., December 6, 1900.

AMERICAN SETTLERS' ASSOCIATION,
Olaa, Hawaii.

GENTLEMEN: I am in receipt of yours of November 11 in relation to the lands and land laws of the Territory of Hawaii. I think I realize, to some degree, the difficulties already encountered and which will be

emphasized in the future regarding the proper and equitable distribution and disposition of the lands of the Territory. I foresaw more than a year ago that the present system was incompatible with the American view (which I deem to be the right one—that of giving or securing homes to the great majority of the people), and have been trying as best I could to get an investigation made at the expense and in the interests of the government of the public land system and of the public lands of the Territory. Unfortunately, Congress at the last session made no appropriation for anything of this kind, and so nothing has been accomplished. I hope at this session of Congress that an appropriation will be made for that purpose. I beg to assure you that I am much interested in seeing a proper solution of the land question in the islands. Ever since my last visit there I have been convinced that the most important question to be solved was the land question, and that it must be solved in such a manner as to give homes to the largest possible number of people.

Yours, truly,

C. D. CLARK.

EXHIBIT 32.

DEPARTMENT OF THE INTERIOR,

Washington, July 14, 1900.

Mr. E. A. HORAN,
Oahu, Hawaii.

SIR: Your letter has been received, inquiring as to whether an appeal will lie under the act of April 30, 1900, from the official action of the commissioner of public lands for Hawaii to the Commissioner of the General Land Office or the Secretary of the Interior at Washington, D. C.

In response thereto, I have to state that hypothetical questions of this character are not considered by the Department. When the question presented by you arises in some particular case and is brought before the Department for consideration and action, the question presented therein will be determined.

Very respectfully,

THOS. RYAN, *Acting Secretary.*

DEPARTMENT OF THE INTERIOR,

Washington, March 26, 1901.

Hon. NICHOLAS RUSSEL,
President of the Senate, Honolulu, Hawaii.

SIR: Your letter of the 11th instant has been received, inviting attention to the disposition of unoccupied public lands in Hawaii, whereby the settlers thereon have been dispossessed, and suggesting that provisions should be made to permit them to perfect entries for the lands on which they settled, to the extent of area as might be determined by Congress.

In response thereto, I have to advise you that the same will receive consideration.

Very respectfully,

E. A. HITCHCOCK,
Secretary.

1135, 1142.—[Note: These figures relate to affidavits filed in the Interior Department. Your committee should see them.]

EXHIBIT 33.

REPUBLICANS IN CONVENTION, MAY, 1900—PROCEEDINGS AT TI
LENGTHY EVENING SESSION—PERMANENT OFFICERS AND DELEGAT
ELECTED AND A PLATFORM ADOPTED.

Progress Hall was brilliantly illuminated last evening. * * *

A. G. M. Robertson, chairman of the committee on resolutions, th
read the following report:

Be it resolved, We, the Republicans of the Territory of Hawaii, in conventi
assembled, do hereby declare our adherence to the principles of the Republican par
of the United States, and, in so far as we can, pledge our hearty support to the pa
and its policy.

We indorse the foreign policy of the Administration of President McKinley, a
congratulate the Republican party and its leaders on the position taken whi
resulted in the annexation of Hawaii.

We appreciate and are thankful for the liberal terms of the act whereby Hawaii
constituted a Territory of the Union.

We look forward with eager interest to the laying of a cable that will connect th
Territory with the mainland and the world, and to the speedy completion of th
Nicaragua Canal, whereby Hawaii will become in fact the crossroads of the Pacific

We favor the speedy enactment of laws for the establishment of such county a
municipal governments as may be necessary to bring the conduct of our local affai
into full accord with the theory of American institutions and the principles of hom
rule.

We declare ourselves in favor of the extension of the homestead principle and th
enactment of such laws as will, with the least difficulty and expense, provide hom
for the many.

We call upon all citizens and voters of the Territory who are in sympathy wit
the principles of the Republican party, and in favor of good government, to join o
ranks and associate themselves with the party that has ever stood for liberty an
progress.

We believe the interests of Hawaii can best be trusted in the hands of the par
that gave to the country a Lincoln and a Grant, a Garfield and a McKinley.

Respectfully submitted.

A. G. M. ROBERTSON,
GEO. W. SMITH,
C. P. LAUKEA,
A. B. LOEBENSTEIN,
A. N. KEPOIKAI,
Committee on Resolutions.

The Hawaiian version having been gracefully read by C. P. Laukea
the platform was adopted amid prolonged cheering.

Delegates were present from every part of all the islands.

BY MR. A. HERBERT—VETERAN AGRICULTURIST MAKES A POINTE
REPORT—VIEWS ON LAND HOLDINGS—FREIGHT RATES OF THE COM
MON CARRIERS—LEASED TRACTS—DESTRUCTION OF FORESTS.

To the Bureau of Agriculture and Forestry:

In accordance with your request to examine into and report upon
the condition of the Government forest land, water courses, and springs
I submit the following report:

I have for the past ten years called the attention of this forestry bureau and of ou
Government to how our once beautiful native forests are destroyed by cattle and
horses. [Herbert's Cry in the Wilderness.—Editor Advertiser.]

Thousands of acres of forest have been destroyed, hundreds of thousands of fores
trees dead and dying. This is particularly noticeable on Government land unde

long and short leases. Something should be done at once to stop the destruction by logging in the forest and removing the worthless cattle and horses. Your attention is called to Chapter XXX, section 4, on forestry law.

In tours of inspection I notice with regret how the holders of small areas, say from five to fifty acres, are decreasing and are being absorbed by the sugar promoters and land speculators. The decrease of small areas is particularly noticeable among the native kulianas on Oahu and within the environment of Honolulu, which have passed into other hands. This is a stubborn, undeniable fact. We find the small, native homesteads deserted; the young and middle-aged people have come to our sea ports, only the aged and some children remaining.

This bureau should be the most important department under our Government; even the paramount board of health should be subordinate. In Washington, D. C., when a hospital or a site for a schoolhouse is desired the Agricultural Department makes the selection for a location.

The three most progressive nations in agriculture in the world—the Germans and the Americans, and following them the English—have their agricultural bureau their leading department.

The Wahiawa, Oahu, and American homestead associations were organized a year ago under our homestead laws, and settled on barren, unimproved land 16 miles from Pearl City and 10 from Waiālika. In one year these sturdy farmers have done much with very, very limited capital but determined to make for themselves and family a permanent home in our genial climate. Mr. Kellogg, one of the twelve settlers, said a few days ago that he had cleared \$200 from one acre of land in watermelons, tomatoes, and small vegetables. Also that he saved \$19 in freight by hauling one load of produce from his place to Honolulu and a return load of lumber in place of having it sent by rail.

A number of complaints come to this bureau from small producers of all the islands, complaining of the extortionate charges of our transportation companies; our two large island steamship companies in particular. We claim that our island steamship and railroad companies are not justified in taking the position that their business is to extract as much as possible out of the producer in order to show a credit balance.

We have on the island of Oahu alone over 20,000 acres of Government land on which the lease expires in less than two years. This land fronts on the ocean, has Government road, railroad, and telephone line running through it. Hundreds of American and European farmers could settle on this land—such men as we have at Wahiawa. There can be no injustice in having this land divided into small holdings, as the present lessees have had the land for the past fifty years for less than 6 cents per acre per annum. But settlers on such land must cooperate. Cooperation is the German farmers' stronghold. It is of various kinds. There are cooperative credit banks, cooperative steam plows, drainage, and irrigation. Cooperation is the key to success, and has started and saved many poor farmers.

Looking over the whole field of Hawaii's marvelous and varied industries, I feel an unshaken faith in the future prospects of our horticultural industry. In the next report I will call your attention to the silk, rubber, and other important industries.

It is of importance to this island that the truth should be told regarding the actual conditions here and the opportunities for a white immigration. A large number of Japanese are coming to these islands, mostly as contract laborers, for the nominal purpose of entering on the plantations in the sugar industry, but who subsequently find their way to the towns of our sea ports and enter into serious competition with the American and European artisans and small tradespeople. This is clearly undesirable; the Japanese, like the Chinese and Portuguese, are not agriculturally inclined.

A. HERBERT.

MEAT FOR HAWAII—HEAVY BEEF AND MUTTON HUI FOR THE BIG ISLAND—A RANCH CHANGES HANDS—COL. SAMUEL PARKER AT THE HEAD OF THE NEW COMPANY—SUPPLY FOR THE FUTURE.

One of the largest land deals ever chronicled in the records of the islands will be consummated on the return of Col. Samuel Parker from the mainland.

For some time past Colonel Parker has held an option of purchase over the Humuula and Kaoha sheep stations on the island of Hawaii, comprising an acreage of 237,000 acres and immediately adjoining his

present ranch of about 300,000 acres, and was only prevented from completing the purchase before his departure through a difficulty in obtaining a complete inventory of the stock carried.

The lease of this great property, which expires in 1908, is held by August Hanneberg, manager of Olowalu plantation, his brother Armin, of Honolulu, and Manager Gramberg, who together hold the whole of the 1,000 shares of the Humuula Sheep Station, which is capitalized at \$100,000.

With the real estate there is sold about 30,000 head of sheep, 7,000 lambs, 600 horses, and also 2 shares in the Metropolitan Meat Company.

The purchase price is said to be \$70,000. It is understood that H. Waterhouse & Co. were the brokers who brought about the transfer but upon inquiry there, beyond admitting that Colonel Parker held an option, they declined to give any information.

The Humuula Sheep Station is the ranch from which heavy drawing of mutton are made for the local market, and the object of the new ranch company, of which Colonel Parker is the reputed head, is to place a check on the present heavy drafts from that island and to conserve the present stock to supply the rapidly increasing demand in Hawaii.

This action will of course affect the local supply.

Grazers, landowners, and business men generally of the big island have for a long time been considering or expecting precisely the step that has been taken by Colonel Parker. The population of Hawaii is increasing very rapidly, and with the extension of established ranch fields and the establishment of new plantations the pasturage area is contracting. At the same time the call from this place for live stock from Hawaii has become stronger and stronger from month to month. The agitation on Hawaii for "protection" of the meat supply of the big island has resulted in the formation of the proposal to form a corporation that will be a factor of the caliber of the Metropolitan Meat Company of this city, upon the same lines, but probably a "closer" corporation.

No less a personage than United States Senator Clark is a member of the new company.

HAWAII WANTS A HOMESTEAD LAW AND MUST HAVE IT.

The two-column circular herewith is taken from the Hawaiian Gazette of November 3, 1899. (The Gazette has always supported the official acts of the Hawaiian land department and the officers of the Republic of Hawaii.)

The report of A. Herbert to the bureau of agriculture and forestry plainly shows that the very small holdings are failures and the very large leases are frauds.

The second column, headed "Meat for Hawaii," is nothing short of an Hawaiian meat trust, and in the deal it gets control, by assignment of lease, of 237,000 acres of public lands, now the property of the United States.

That the deal as above stated was consummated is shown by the fol

coming from the Evening Bulletin, May 4, 1900. (Published at Honolulu):

FRIDAY, MAY 4.

Hon. Sam Parker said this afternoon that the deal for the Humuula ranch was consummated and the papers would probably be signed this afternoon or to-morrow. The purchase is of the leasehold, which has about eight years to run and covers 5,000 acres of fine pasture land on which are 30,000 sheep and upward of 600 head of horses. The purchase price is \$70,000.

With this purchase and the lands already secured by Mr. Parker, he will control nearly 1,000,000 acres of land on the island of Hawaii. The Humuula property will be run separate and distinct from the Mana estate. On being questioned, Mr. Parker said that the new purchase would have more or less bearing on the reorganization or extension of the Metropolitan Meat Company, in which he was quite a heavy stockholder. He denied the often-heard statement that a new meat company was to be organized, but said that the reorganization and extension of the present company would take place at once and the new markets contemplated would be in working order very soon.

"I am now through with Hawaii," said Mr. Parker, "and shall next turn my attention to securing desirable lands on the island of Maui; from there I shall go to Oahu, Oahu, and Kauai in succession to secure whatever good land I can for the company."

"What will you do then?" was asked.

"Well," said Mr. Parker, with a straight Republican smile, "you may state that I will probably branch out toward Niihau."

To the everlasting disgrace of the Fifty-sixth Congress the following provision, relative to the public lands of Hawaii, which passed the House of Representatives April 9, 1900, was allowed to be stricken out by the conference committee:

SEC. 73. That * * * Provided, however, that all sales, grants, leases, and other dispositions of the public domain, and agreements concerning the same, shall be reported in writing each month to the Secretary of the Interior, who shall have authority to confirm, reverse, modify, suspend, and annul any of said transactions. That all of said transactions so reported upon which no action shall be taken by the Secretary of the Interior within sixty days from the filing of such reports in his office, shall thereupon and thereby be confirmed and ratified.

The Secretary of the Interior is hereby authorized and required to provide and promulgate the rules and regulations relative to all contests on the disposition of the public domain and appeals to him.

Can any sane member of Congress give any good reason why this provision was stricken out?

The Hawaiian Territorial bill, as passed by the Senate February 27, 1900, contained the following:

That the sum of fifteen thousand dollars, or so much thereof as may be necessary, be hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available, to enable the Secretary of the Interior to examine the laws of Hawaii relating to public lands, the proceedings thereunder, and all matters relating to public lands, including the selling, granting, leasing, or other disposition of the public domain, and agreements or franchises concerning the same granted by the Hawaiian government prior to the eleventh day of September, eighteen hundred and ninety-nine, and subsequent to the twelfth day of August, eighteen hundred and ninety-eight.

And to enable the Secretary of Agriculture to examine into all matters concerning agriculture and forestry and public roads in said Territory, which duties shall be performed with all convenient speed; and each of said officers shall report to the President of the United States with recommendations upon the matters concerning which he is herein charged. The appropriation herein provided for shall be divided equally between the Department of Agriculture and the Department of the Interior, to the necessities of the investigations of each shall demand.

Can any sane member of Congress explain why this proper and necessary provision was not included in the report of the conference committee and made a part of the organic act?

There is no answer, other than carelessness on the part of some and duplicity on the part of others.

By a provision inserted in the organic act at the request of the special agent or representative of President Dole at Washington the President of the United States is requested to approve of the official acts of the Hawaiian land department from the 7th day of July, 1893 to the 28th day of September, 1899; among other things to approve 22 separate deals whereby the public lands of the United States in the Hawaiian Islands is disposed of to Japanese and Chinese, none of whom were at any time either citizens of Hawaii or of the United States even the Hawaiian land law provided against such transactions (secs. 31 and 58, land act of 1885, qualifications of applicant)—and also asked to approve of as many more disposals to corporations. It is clearly evident that the land department of Hawaii did not want an investigation of “land laws of Hawaii or the proceedings thereunder” hence the untiring efforts of their lobby at Washington to have such provisions stricken out. In place of which, wholesale approval is provided for without investigation. American citizens here in search of homes on the public domain would like to know if it is the intention of Congress to have all the public lands in the Hawaiian Islands disposed of to corporations and to Japanese and Chinese, while they are almost wholly prohibited by reason of appraisement so high for poor land covered with almost impenetrable jungle, high up on the mountain side, and by entering into conditions and terms of payment that would make Shylock blush.

This association will send the land laws of Hawaii to any person applying for the same. (Write to American Settlers' Association, Olaa, Hawaii.) When you get the law you can judge for yourself.

The land law for the disposal of the public lands in the Hawaiian Islands, the property of the United States, remains much the same as it existed under the Republic of Hawaii, and so thoroughly is it repudiated by the people in the islands that the Republican party in convention assembled at Honolulu, May 30, 1900 (which was the only representative body of men that assembled in the Hawaiian Islands during the past five years, if not more, the legislature not excepted), adopted the following plank in its platform:

We declare ourselves in favor of the extension of the homestead principle and the enactment of such laws as will, with the least difficulty and expense, provide homes for the many.

This alone should be enough to convince any reasonable man that change must be made. It would have been useless for the Republicans to put a ticket in the field without such a guaranty in the platform.

A uniform homestead law for Hawaii is necessary and without delay. We therefore ask Congress at the second session to reconsider section 73 of the act approved April 30 and repeal the same, enacting in its stead a homestead law that will give an honest white man a chance to live in Hawaii; a law that will tend toward the development of the country; a law that will not turn back from our shores the practical American farmer, which has constantly been the result in the past.

Respectfully,

AMERICAN SETTLERS' ASSOCIATION.

EXHIBIT 34.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., October 16, 1900.

The AMERICAN SETTLERS' ASSOCIATION,
Olaa, Hawaii.

GENTLEMEN: I have your letter of September 8, with inclosures. The trip which Professor Stubbs made to Hawaii was for the purpose of making a preliminary survey, and, as you accurately state, he could not possibly visit all the islands in the limited time at his disposal. He did the best that could be done under the circumstances, and the Department is well satisfied with the results of his trip. It is the intention to establish a well-equipped experiment station in the islands, with a competent director at the head of it. I am giving the most careful consideration to the selection of this officer, and when he takes hold of his work all the agricultural needs and capabilities of the islands will have close and attentive study. The question of the revision of the land laws is, of course, a matter for Congress to consider, and lies wholly outside the jurisdiction of this (an executive) Department.

Respectfully,

JAMES WILSON, *Secretary.*

United States Supreme Court decision.

EXCLUSIVE POWER OF CONGRESS TO LEGISLATE AS TO PUBLIC LANDS.

(*Gibson v. Choteau*, U. S., 13 Wall., page 92. Opinion by Justice Field.)

With respect to the public domain, the Constitution vests in Congress the power of disposition and of making all needful rules and regulations. That power is subject to no limitations. Congress has the absolute right to prescribe the times, the conditions, and the mode of transferring this property or any part of it and to designate the persons to whom the transfer shall be made. No State legislation can interfere with this right or embarrass its exercise; and to prevent the possibility of any attempted interference with it a provision has usually been inserted in the compacts by which new States have been admitted into the Union, that such interference with the primary disposal of the soil of the United States shall never be made.

T. J. RYAN.

EXHIBIT No. —.

MOUNTAIN VIEW, HAWAII,
September 24, 1902.

Hon. J. H. MITCHELL,
Chairman United States Senate Committee.

SIR: I learn by the press that E. S. Boyd, commissioner of public lands, stated before your committee that "about 600 homesteads had been taken up since annexation, and that three-fourths of them were

bona fide settlers." Even if this was true, what is the matter with the other one-fourth who are not bona fide settlers? Why is it that their claims are not promptly canceled?

No contest law is one reason. But Boyd's statement is not true. On one tract of 1,400 acres, taken under a settlement-association plan in this vicinity there are only two of the men who ever lived on the land at all, and even these two are not residing on the land as they should under any law requiring residence.

On the New Oloa tract of about 18,000, most of which is taken under what he terms homesteads, there are not more than twenty actual bona fide residents. There are about as many more who partially reside there, but who are so poor that they must go down on the plantations to find work. I have nothing against these poor fellows as they would do my best to help them hold their land. However, those who can best afford to live on their land are not there at all, and I am quite certain they never intend to live there. There is not 20 per cent of the land taken since annexation on which the entrymen are living in good faith to comply with any law whatever.

Yours, respectfully,

T. J. RYAN.

EXHIBIT No. —.

MOUNTAIN VIEW, HAWAII,
September 24, 1902.

Hon. J. H. MITCHELL,
*Chairman Subcommittee Pacific Islands and Porto Rico,
United States Senate.*

SIR: If this paper reaches you before leaving Honolulu, it is important for your committee to investigate the large amount of money sent out of this Territory by Japanese and Chinese. They send to China and Japan practically all their savings, which in the aggregate amount to a large sum every month. I was deputy postmaster at Mountain View for two years—1897, 1898—and even at this backward place the amount sent out every month was astonishing.

White laborers of any kind, Portuguese, etc., keep their money in Hawaii—invest it here and spend it here. Japanese and Chinese are a great drain upon the currency of the country.

The Japanese Government pays more interest on deposits from Hawaii than in Japan, i. e., the Government there to a large extent controls the banks, and the amount of savings by a Japanese here has so much more purchasing power in Japan, compared with Hawaii, that it pays all Japanese here to send their money to Japan. I know this from actual experience, and have conversed freely with Japanese sending money and they explained to me the advantage.

No one can possibly deny this, as everyone in Hawaii knows it to be true. I consider this statement as under oath, and would swear to it before a notary public if there was one anywhere near here; it is 8 miles from here to the nearest notary. Even this matter of the appointment of notaries public should be investigated, as partiality is shown by Attorney-General Dole, which we can and will prove later. After annexation the United States postal authorities were surprised

and find that the money-order department as to Hawaii far exceeded their expectation, and found that it was by reason of so many Japanese and Chinese sending money to China and Japan.

Ask almost any witness appearing before you, and you will find they agree with this, and at most they can not deny it.

Yours, respectfully,

T. J. RYAN.

UNITED STATES SENATE COMMITTEE,
Honolulu, Hawaii.

In addition to what I have said about Chinese and Japanese sending their earnings out of the country, it is important for your committee to obtain an opinion from United States District Attorney Breckons to show why the United States statutes regarding leases and sales of land to Japanese and Chinese are not enforced in this Territory—I mean private lands. They can only own or hold land for actual business purposes, but not for agricultural purposes, under the United States law, and it should be enforced. The Japanese and Chinamen buy and lease agricultural land and engage in agricultural pursuits in competition with the farmer and small planter. This should be stopped, and promptly, too. The law is on the books to do it.

Yours, respectfully,

T. J. RYAN.

EXHIBIT No. —.

TERRITORY OF HAWAII, ISLAND OF HAWAII,
Fourth Judicial Circuit, ss.

T. J. RYAN, being first duly sworn, deposes and says:

That he is the identical T. J. Ryan who testified before the United States Senate Subcommittee on Pacific Islands and Porto Rico, at Mountain View, Hawaii, September 20, 1902.

That he has, since that date, taken the statements of some 23 or more persons who are now holding public land in Olaa, district of Puna, island of Hawaii, under various forms of entry through the local land office at Hilo, Hawaii. And at the instance and request of said claimants, has reduced the substance of their several statements to writing. Some of said statements are extended at length and signed by the claimant making the same, and all the statements are reduced to abstract form on two pages of schedule, all of which are hereto attached.

That he took the data concerning each claimant from their land-office papers presented by them so far as the same relates to number of entry, number of lot, date of entry, and number of acres. The other information was orally given by each claimant and extended upon the abstract above referred to.

That this deponent is personally acquainted with all these claimants, with the lands they occupy, with the character of the soil, with the heavy growth of worthless timber, and with their circumstances, financial, social, and otherwise, with their statements as to the number of children in the settlement without school and the distances stated by them to the nearest schoolhouse at Mountain View; and this deponent avers that all said statements are substantially true. And that, besides

the number of children stated by these claimants, this deponent know of other children in the settlement which would, altogether, number upward of 65 without any school privileges whatever. These people as well as in other localities throughout the Territory, are not permitted by law to retain the school taxes paid in the locality to maintain a school for their children. All such blessings must flow from the source of grace (?)—the centralized oligarchy at Honolulu.

Deponent further deposes and says:

That the statements extended at length, viz, J. R. Souza, Andre Nielson, Theodor Chorny, Nicolas Golovaty, and Martin Nielson, would have been sworn to if there was any officer in the vicinity authorized to administer oaths, the nearest of such officers being about 14 miles distant, which, going and returning, would necessitate a trip of about 28 miles. The willingness of each to make such statements under oath was in each case expressed to deponent by the person signing the same.

That in Hawaii the people of any locality are not permitted by law to elect even such petty officers as school director, road supervisor, or justice of the peace; and to the personal knowledge of this deponent a qualified citizen, residing near Mountain View, whose character, responsibility, and capability are above reproach, has applied several years ago to the oligarchy, and renewed his application again and again, for appointment as notary public, and that all of said applications have been refused and neglected by the attorney-general, who controls such appointments.

That the statements signed by eight claimants concerning a public land sale at Hilo, September 20, 1900, and on the abstract referred to as "special agreements" (five pages, typewritten) are all familiar to this deponent, having been foreman on a part of said road during the time of its construction, and having resided upon lots 211, 212, and 213 of said New Olaa tract since June 9, 1899, and am residing thereon at the present time. As such settler and continuous resident, I am familiar with every detail of the settlement of the whole tract of about 20,000 acres. I prepared said typewritten instrument with great care, having consulted the land laws of Hawaii, the report of the commissioner of public lands to the legislature, as well as all other matters therein referred to, and have fully explained every detail to the persons signing the same, which with their personal knowledge of the facts (conclusions of law excluded) renders said document worthy of very careful consideration.

That the eight signers of said typewritten document constitute a majority of the purchasers at said sale (September 20, 1900) who have settled upon the lots so purchased at said sale, or who have made the payments according to the terms of said sale, thus proving conclusively that said sale was a mere speculative freak, accelerated by the booming tactics of the local public-land officials. Of the 86 lots purchased at said sale (see report of the commissioner of public lands for the year ending December 31, 1900, pp. 29-31), the conditions as to payments and improvements on 15 of said lots have never been made. Not 20 per cent of said purchasers acted in good faith. More than 70 of said lots have never been improved or payments made thereon.

That this deponent has fully explained to all the signers of all the papers hereto attached the provisions of Senate bill No. 1344 introduced in the United States Senate by Senator Mason, and now pending before the Senate Committee on Pacific Islands and Port

Rico, showing that by the provisions of section 8 their entries may be exchanged with credit for payments heretofore made to the local land officers in Hawaii on account of lands entered by them, provided they remain settled on the land now occupied by them; also, the further provision allowing the settlers who had settled upon unoccupied public land prior to April 30, 1900, to perfect entry upon the tracts so settled upon by them not exceeding 160 acres. To the personal knowledge of this deponent there will be no conflict between the actual bona fide settlers in either case if said Senate bill should pass and become a law as section 8 thereof now stands. All the signers of said papers are unanimous in this last-stated opinion that no conflict can occur.

T. J. RYAN.

Subscribed and sworn to before me by the said T. J. Ryan this 9th day of October, A. D. 1902.

[SEAL.]

W. S. WISE,
Notary Public, Fourth Circuit, Hawaii.

MOUNTAIN VIEW, HAWAII,
October 8, 1902.

This is to certify that I am the identical J. R. Souza, who appeared, was sworn, and testified before the United States Senatorial committee at Mountain View, Hawaii, on September 20, 1902.

That in addition to my testimony given there, I state that I have given the information set opposite and after my name signed on a schedule hereto attached, and directed Mr. T. J. Ryan to forward this information to the subcommittee of the United States Senate on Pacific Islands and Porto Rico.

I further state that about the month of September, 1901, I built a frame house 20 by 20 feet, one story, at about \$350, and put up a water tank costing \$60. That when I filed upon said land I had, in cash, about \$900, and I felt confident that I could put up the necessary buildings, make payments, and do clearing enough so that by the time my money was exhausted I would be getting something back out of the land to continue the payments and support my family. However, after putting up my house, tank, and expenses of moving, and commencing to clear, and after having made three payments of interest, I found that my money was entirely gone, and the land being so much harder to clear than I at first anticipated I could get nothing in return for my labor. I have a family consisting of myself, wife, and six small children, and am now in arrears for payment of interest to the Territorial government for this small tract of public land. A copy of the conditions which I am to fulfill is hereto attached, from which it can be seen that the officers of the Territory may at any time sell this lot at auction and drive myself and family out penniless through no fault of mine. I have endeavored to find employment outside, on the plantation and elsewhere, and have during the past year found some work to do at small wages and for short jobs; but all I can do is not sufficient to support my family and make the payments of interest semiannually in advance.

It may be asked, "Why did you buy this land at such a high price and on such conditions?"

No one who has not lived, or tried to live, in Hawaii can fully understand why, even though I should give a full explanation. I tried work-

ing on the plantations when my family was small and I found that from year to year I could gain nothing, although I worked all the time and practiced economy. I then tried it in town. I went to Honolulu about eleven years ago and the \$900 which I had when filing on this land represented my savings during all that time. Naturally I thought, as my family grew larger, I could not stand it in town and that, perhaps, I could do better in the country if I could get some public land, so that I attended the sale at Hilo September 20, 1900 and bid for land. At that sale there were quite a number of public officers, policemen, lawyers, doctors, and other professional men and speculators bidding, and they run this lot up on me to \$1,100. I had no choice. I could not go backward, and as they were bidding such high prices I thought that perhaps the land was worth the price offered. Even a clerk in the land office was allowed to bid at the sale and a lot was knocked down to him at something like \$1,150. After the sale I went to work honestly and in good faith, but I soon found that all the professional men, public officials, and speculators did not show up on the lands bought by them, and that many of them never made any payment whatever on the lots bid off by them, not even the amount due at the time of the sale according to the advertised conditions. I was thus led to believe, and I do believe, that a job was put up by the public-land officials with other officials of the government to bid the lots up to such high prices and catch all the unwary as victims; at any rate it has turned out that way. In Hawaii there are only small tracts of land opened to settlement at one time, and this causes people who really want land to undertake the payment of large prices per acre than they should. On account of the government being in the land business for revenue only, speculators can buy, and in fact are encouraged to buy, while they are not compelled to live on the land even though the conditions of the law require residence. So long as they keep up the payments they can and do hold the land, no matter where they live.

Therefore I hope Congress will act without delay and change the public-land laws for Hawaii. So far as I can learn I believe that Senate bill No. 1344 will afford all the needed relief to settlers like myself, and in future will guard against such land practice as has been heretofore in Hawaii.

It will prevent speculation and will secure to the honest settler land at such a reasonable price without interest, and the final payment after he has had time to get something out of the products of the land.

All the largest expense falls upon the settler when he first begins and he should not be required to pay interest. Besides, all persons who take land should be compelled to move onto the land in a short time, and all tracts where the entryman fails to reside should be open to contest and cancellation by another settler who wants the land for a home and who will honestly comply with the law. If no such relief comes to me, and if it does not come quickly, I am sure I will lose the land which represents a lifetime of hard work, and I and my family will have to go out without a dollar.

J. R. SOUZA.

SPECIAL AGREEMENT.

This agreement, made this 20th day of September, A. D. 1900, between J. F. Brown, commissioner of public lands, on behalf of

the government of the Territory of Hawaii, party of the first part, and J. R. Souza, of Hilo, island of Hawaii, party of the second part, witnesseth:

That whereas, under section 17, of the Land Act, 1895, as continued in force by an act to provide a government for the Territory of Hawaii, the lot of land hereinafter described was offered for sale at auction by the commissioner of public lands, under terms and conditions approved by the governor of the Territory of Hawaii, July 23, 1900, and endorsed herein; and whereas, at such auction sale, held September 20, 1900, in Hilo, Hawaii, the said party of the second part, being the highest qualified bidder, became the purchaser of lot No. 23 of public lands map, No. —, and has made payment to the commissioner of public lands in the sum of thirty-three dollars, being six months' interest in advance on \$1,100 purchase price.

Now, therefore, the said party of the first part, in consideration of the above payment and the covenants of the said second party of the second part to fulfill the conditions of sale endorsed hereon and made a part hereof to be performed by him, hereby authorizes and empowers the said party of the second part to take immediate possession of said premises and to occupy and use the same, subject to all the conditions herein referred to.

And the said party of the second part for himself and his heirs and assigns hereby covenants and agrees with the party of the first part and his successors that he will observe and perform and hold himself subject to all the conditions of sale herein referred to.

In witness whereof the said parties have hereunto set their hands and seals as of the day and year first above written.

[L. S.]

J. F. BROWN,
Commissioner of Public Lands.
J. R. SOUZA.

The land hereinbefore referred to:

Lot No. 23; location, Olaa new tract; area, 49 $\frac{1}{4}$; purchase price, \$1,100.00.

TERRITORY OF HAWAII,

Island of Oahu, ss:

On this 17th day of December, A. D. 1900, personally appeared before me, J. F. Brown, commissioner of public lands, known to me to be the person described in and who executed the foregoing instrument and who acknowledged to me that he executed the same freely and voluntarily and for the uses and purposes therein set forth.

[L. S.]

E. S. BOYD, *Notary Public.*

TERRITORY OF HAWAII,

Island of Oahu, ss:

On this 14th day of January, A. D. 1901, personally appeared before me, J. R. Souza, known to me to be the person described in and who executed the foregoing instrument, and who acknowledged to me that he executed the same freely and voluntarily and for the uses and purposes therein set forth.

[L. S.]

E. S. BOYD, *Notary Public.*

THE CONDITIONS OF SALE HEREINBEFORE REFERRED TO AND UNDER WHICH THIS AGREEMENT IS ISSUED.

The purchase price of the land to be paid within ten years, either in full at any time within said period of ten years or in installments of one or more tenths of the purchase price on any interest date.

Interest at the rate of six per cent per annum from date of agreement on unpaid balance of purchase price, payable semiannually in advance.

Purchaser shall substantially improve his holding within one year from date of agreement, and shall from the end of the second year have under cultivation at all times not less than 10 per cent of the premises.

To entitle him to patent grant, giving fee simple title, he shall continuously maintain his home upon the premises for a term of six years and have at the end of such term 25 per cent of the premises under bona fide cultivation, or shall have maintained his home continuously upon the premises for four years and have under cultivation at the end of such period 50 per cent of the premises; such maintaining of home to begin at any time before the end of the fourth year from date of agreement.

He shall plant, if not already growing, and maintain in good condition from the end of the second year, an average of not less than ten timber, shade, or fruit trees per acre.

He shall allow the agents of the government at all times to enter and examine the premises, and shall pay any taxes that may become due on the same.

At the end of the tenth year or earlier, if all the conditions thereto have been substantially complied with, the purchaser shall be entitled to a land patent conveying fee simple title to the land described in agreement of sale.

In case of default or failure to perform the required conditions, the commissioner may take possession of the premises and may sell the same at auction, either as a whole or in parcels, for cash or on terms of time payments; and if such sale results in advance on the original price, the original purchaser to receive therefrom the amount of his payments to the government on account of purchase, without interest and a pro rata share in such advance in proportion to the amounts of his payments. If such sale shall result, however, in a less price than the original, the amount returned to him shall be charged with a pro rata amount of such decrease proportioned to the amounts of his payments.

An agreement of sale covering such conditions shall be made with the government and no assignment of interest under such agreement shall be made without the written consent of the commissioner of public lands.

MOUNTAIN VIEW, HAWAII,

October 7, 1902.

This is to certify that I am the identical Andrew Nilson who appeared, was sworn and testified before the United States Senate Subcommittee on Pacific Islands and Porto Rico, at Mountain View Hawaii, September 20, 1902.

That owing to the short session at that place and the large number

of witnesses there appearing to give their evidence concerning the administration of the public lands in Hawaii, and other public matters, I was not able to set forth all the matters which I wished to lay before the Senatorial committee.

In addition to my evidence then and there given I wish to add, that I am now and was then settled upon lot No. 38, Olaa New Tract, containing 50 acres. Appraised by the Territorial officers at \$450 or \$500 per acre. That I made said entry September 9, 1901, under right of purchase lease; containing the condition that I should pay 8 per cent interest semiannually in advance. I went upon said land September 9, 1901, and afterwards on January 16, 1902, I commenced residence in the house which I built. Said house is 14 by 24, two stories high (frame), and cost for material about \$450, and being a carpenter I built it myself. Since that time I have cleared about one acre of land and planted various kinds of vegetables. I find that the soil is extremely poor and unproductive, and unless a man should have something like 160 acres of such land at a nominal price of from \$1 to \$2 per acre, so that he could partially clear large portions of it, fence it and raise cattle, hogs, and other stock, he could not make a living in any other way. Being a carpenter I could work at my trade and in that way, perhaps I could succeed if I could obtain such work, but that is nearly impossible for the reason that the sugar plantations almost exclusively employ Japanese as carpenters, and refuse work to white men. The few other settlers who are allowed public lands are (like myself) very poor men, having little or no means to erect buildings, only the smallest and cheapest kind, therefore there is practically no carpenter work among the settlers. Even contractors on public works, such as schoolhouses, bridges, etc., are allowed to hire Japanese. The competition of Asiatics against white men as to both skilled and unskilled labor is equally deadly to the white man.

For instance, the house I built on my land I find none too large for my family, but such a house would afford ample room and accommodations for fifty Chinese or Japanese. It is the same when I undertake to raise any products of the soil. On every hand those white men who have lived in Hawaii for a great many years, and who own lands in fee, rent the same to Chinese and Japanese at a higher rate of rent than a poor white man can afford to pay. Then these Chinese and Japanese tenants are in open competition with the white man as to every product of the soil, and they are beginning to raise cattle, hogs, chickens, and every kind of meat stuff in competition with the white man.

Added to all this, the Territorial land officers arbitrarily fix an extortionate price on the small pieces of public land allowed to settlers at a usurious rate of interest. Then, with practically no markets, no work outside, poor soil, heavy clearing of worthless timber, no schools, few roads, excessive rains, and for want of room, inability to keep cows and other stock to obtain fertilizer with which to improve your soil, the white settler is driven out by poverty ever increasing.

In view of those conditions which do exist, and which should not exist, and which will not long exist if Congress does its duty, I trust the administration of the public lands will be promptly taken over by the United States under the United States land department. I respectfully ask your careful consideration of Senate bill No. 1344, "to provide special land laws for the Territory of Hawaii."

Its provisions have been fully explained to me, and after a residence of more than twenty years in Hawaii I say that such provisions will go far toward settling up the country with independent white farmer and stock raisers, besides its provisions will afford relief to all the settlers now on the public land, such as myself, for the reason that we would be allowed under its provisions to transmute our present entries with credit for payments heretofore made, abolishing all further rate of interest, and establishing a uniform price of all lands of each class within the ability of the settler to pay, and making the final payment in the future sufficiently far to enable us to earn something out of the land with which to make final payment. I have directed Mr. T. J. Ryan to write down this information and my statements to be forwarded by him to your committee.

ANDREW NIELSON.

[Copy—Right of purchase lease.]

TERRITORY OF HAWAII—RIGHT OF PURCHASE LEASE—FIRST LAND DISTRICT.

No. 246.

Whereas Andrew Neilson, of Hilo, island of Hawaii, has made application in accordance with the provisions of Land Act, 1895, as continued in force by an "Act to provide a government for the Territory of Hawaii," passed by the Fifty-sixth Congress of the United States of America on the 27th day of April, and approved on the 30th day of April, A. D. 1900, for a right of purchase lease of the land hereinafter described, appraised at the value of \$450, as hereinafter set forth, and has paid the statutory fee in relation thereto, amounting to \$18, the receipt of which is hereby acknowledged;

And whereas the said applicant has complied with the provisions of the Land Act, 1895, as aforesaid, and it appears expedient to grant the said right of purchase lease on the terms and conditions herein after set forth;

Now, therefore, in pursuance of the powers vested in me as subagent of public lands for the first land district, with the approval of the Commissioner of Public Lands, and in consideration of the said fee and of the conditions herein contained to be performed by the said Andrew Neilson and the successors to his right, herein referred to and included in the term lessee, I do hereby demise and lease to the said lessee the premises hereinafter described for the term of twenty-one years, from the 1st day of October, 1901, upon the terms and conditions following:

The annual rental to be paid in respect of the said land shall be the sum of \$36, payable in equal installments half yearly, in advance, to the subagent of the first land district, on the 1st day of April and the 1st day of October of each year during the continuance of this lease.

The lessee herein shall pay all taxes that may become due on said premises. He shall not make or suffer any waste of the said premises or the improvements that may be placed thereon during the continuance of this lease. He shall allow the agents of the Territory of Hawaii and the United States at all times to enter and examine the said premises.

And it is hereby declared and agreed that these presents are intended to take effect as a lease, with right of purchase, under the provisions of Part VII, of the Land Act, 1895, as aforesaid, and the provisions of said Part VII and all other provisions of the said statute applicable to such leases, and shall be as binding upon the parties hereto as if such provisions had respectively been set forth herein.

In witness whereof I have hereunto set my hand and seal, this 9th day of September, A. D. 1901.

E. D. BALDWIN,
Subagent, First Land District.

Received the above lease this 9th day of September, 1901.

A. NILSON.

The within right of purchase lease is hereby approved as of the 9th day of September, 1901.

E. S. BOYD.
Commissioner of Public Lands.

NOTE.—Conditions referred to are sections 61 to 70 of Part VII, and section 15, Part III, of Land Act, 1895.

MOUNTAIN VIEW, HAWAII,
October 6, 1902.

This is to certify that I have personally requested Mr. T. J. Ryan to write down the information concerning my entry of public land in the New Oloa tract, district of Puna, island of Hawaii, for lot No. 97, containing 50 acres, and I further request that the same be submitted by him in my behalf to the subcommittee of the United States Senate investigating public affairs in Hawaii. In addition to the information thus written in the schedule hereto attached, say: That I am a very poor man, with a family of wife and seven children; that I came to Hawaii as a contract laborer, under contract dated April 3, 1897, which contract was canceled by operation of act of Congress approved April 30, 1900. My house is 10 by 16 feet, and cost about \$90. I am unable to earn enough to support my family on the land taken, and am compelled to work on the plantation all the time, so that I can not make improvements on the land. Being required to pay 8 per cent interest semiannually in advance is an extreme hardship, and I am wholly unable to do so. The soil is very poor and the clearing very difficult. There is no market for anything a man can raise, and therefore I hope some relief may be granted by Congress. If not, many will be compelled to abandon their lands.

THEODORE CHOENYI.

MOUNTAIN VIEW, HAWAII,
October 6, 1902.

This is to certify that I have personally requested Mr. T. J. Ryan to write down the information I have this day furnished him on a certain schedule hereto attached and directed him to forward it to the subcommittee of the United States Senate investigating public affairs in Hawaii, concerning my entry of public land in the Now Oloa Tract, district of Puna, island of Hawaii, viz: Lots 98 and 99, consisting of about 100 acres; and I further state that these statements would be

made by me, under oath, only that the nearest notary public is about 14 miles distant, and no one nearer authorized to administer out of my house, 15 by 20, cost about \$250. No other buildings. I am unable to raise enough to support my family on the land, and am obliged to seek employment wherever I can find it, and it is very hard for a white man to obtain employment, as he is in competition with Asiatics in everything he attempts to do. It is quite impossible to pay 8 per cent interest semiannually, in advance, and such a high price for such poor land, so hard to clear, without schools or market. It is 2 miles from my land to road. I hope Congress will, without delay, pass a public land law for Hawaii and furnish the needed relief to myself and other poor men.

NICOLAS GOLOVATY

I, Leo Allmann, of Aloa, being the holder of right-of-purchase lease No. 239, in consideration of transferring lots 321-325 to me by deed dated November 19, 1901, recorded liber 225, pages 493 and 494, hereby transfer to Nicolas Golovaty, of Aloa, all the right, title, and interest which under said right-of-purchase lease No. 239 I have in the following-described land: Aloa, new tract, lots No. 98-99. This transfer, however, being upon express condition that the written approval of the commissioner of public lands be given to the same.

LEO ALLMANN.

By his attorney in fact.

NICHOLAS RUSSELL.

Dated April 8, 1902.

I, Nicolas Golovaty, of Aloa, hereby accept the transfer made above and agree to perform all the stipulations and conditions of said right-of-purchase lease No. 239 as far as the same apply to the land and rights hereby transferred.

NICOLAS GOLOVATY.

The foregoing transfer by Leo Allmann, of Aloa, to Nicolas Golovaty is hereby approved upon the following express conditions: That the said Nicolas Golovaty shall perform all stipulations and conditions of said right-of-purchase lease No. 239, and that no further transfer of all interest under said right-of-purchase lease No. 239 shall be made without the approval in writing of the commissioner of public lands.

EDWARD S. BOYD,

Commissioner of Public Lands.

TERRITORY OF HAWAII,

Island of Hawaii, ss:

On this 8th day of April, 1902, personally appeared before me Nicholas Russell, attorney in fact for Leo Allmann, and Nicolas Golovaty, known to me to be the persons described in and who executed the foregoing instrument and who acknowledged to me that they executed the same freely and voluntarily and for the uses and purposes therein set forth, and as the act and will of Leo Allmann.

[SEAL.]

E. D. BALDWIN,
Notary Public.

[This mixing of public and private land transactions should not be allowed at the public land office. Mr. Baldwin, who acts as notary public in this case, is public land surveyor, and is practically sub-agent of public lands at Hilo. It is true he resigned some time ago, on account of complaint made at Washington, but he does the business just the same as before.—T. J. RYAN.]

MOUNTAIN VIEW, HAWAII, *October 7, 1902.*

This is to certify that I have directed Mr. T. J. Ryan to write down the following information, which I wish to be forwarded to the sub-committee of the United States Senate on Pacific Island and Porto Rico.

There is no notary public or other officer empowered to administer oaths in the vicinity of Mountain View, the nearest of such officers being about 14 miles distant from Mr. Ryan's house, where this is written; otherwise I should have sworn to the statements herein made.

I am a single man; 21 years old; born in Hawaii, of Scandinavian parents. I have worked at all kinds of plantation work in the cane fields, and have never found the work so hard but what the white laborers could stand it better and do more of it than the Asiatics. Any statements of planters and others that white men can not stand the work are false and untrue. About all that white laborers can not stand is the filthy camps and crowded quarters furnished by the plantation and the low wages they pay, no matter how much work you do.

I have tried to get some public land where I could find work outside to earn some money to make improvements, as I am a poor boy, but I have been unable to get land to any amount worth taking care of, as will be seen from the following copy of receipt I received from the land office at Hilo:

No. 8.

PUBLIC LANDS OFFICE, 1ST LAND DISTRICT,
August 12th, 1902.

Received from Martin Nelson two and 35/100 dollars for statutory fee, lot No. 99, Oloa Ham. Ris.; also rent from July 28th, 1902, to April 1st, 1903.
\$2.35.

WM. RAGSDALE KANANAO.

This lot contains 5½ acres of heavy-timbered land and very rocky. You can readily understand how much of an inducement there is offered to a young man by this proposition.

Right near me the land has been taken up, mostly by officers in the employ of the Government who reside in Hilo—have their homes in Hilo—do not reside upon the land taken by them and in all probability will never comply with any residence conditions. Such men as Thomas E. Cook, surveyor in the employ of the Territorial land department; Judge Hopai, district magistrate, similar to what would be called police justice of Hilo—he has to hold court about every week day at Hilo; John Brown, senator in the legislature; he resides at Hilo and never did and never will reside on the land entered by him.

It is almost impossible for a poor white boy to get work of any kind in Hawaii at the present time. The plantations hire only Japs and Chinamen, as they want to make it appear that only Asiatics can stand the climate.

MARTIN NIELSON.

MOUNTAIN VIEW, HAWAII,
September 24, 1902.

To the United States Senate Committee on Pacific Islands, Washington, D. C.

GENTLEMEN OF THE COMMITTEE: We beg to respectfully represent that we, the undersigned, were purchasers in good faith of certain public lands in the Territory of Hawaii at a public sale thereof held in the city of Hilo, island of Hawaii, on September 20, 1900, and with one year thereafter erected our houses upon the lands so purchased since which time of erection we have continuously resided therein at continued clearing the forest to the best of our ability and means.

That we were led to believe by the local land officials that the terms and conditions on which said lands were sold was in accordance with the public land laws of Hawaii and that said land laws were continued in force by the Congress of the United States, but after purchasing and commencing residence and improvements, upon investigation we find that there are no such terms and conditions provided in the public land laws of Hawaii, a copy of which is hereto attached. (See Exhibit 1—Ryan, Mountain View.)

That pages 28, 29, 30, and 31 of the report of the commissioner of public lands to the Territorial legislature for the year ending December 31, 1900, covers all this land sale and names all the purchasers, are of each lot, and the price to be paid according to the conditions in the notice. A copy of the commissioner's report is hereto attached. (See this report among exhibits submitted to United States Senate subcommittee in evidence at Mountain View, Hawaii.)

The representations of J. F. Brown, then commissioner to the legislature, is prima facie evidence of the representations made to us as prospective purchasers previous to the sale.

The commissioner says (see p. 31 of his report):

The foregoing sales in Olaa, Puna, Hawaii, were made in accordance with section 201 of Civil Laws, etc.

Section 201 of the Civil Laws is identical with and is the same as section 17 of the land act of 1895, hereto attached, and we respectfully submit to you whether or not there is anything in this section and whether or not Congress conferred any power whatever upon the commissioner to legislate any such law, terms, and conditions as appears on page 28 of his report, hereto attached.

We have reason to believe and do believe that said terms and conditions were promulgated by the said J. F. Brown, then commissioner without authority of law and in excess of his authority as commissioner; that said terms and conditions are void, and that said sale is void, in this, that it was not made in accordance with the public land laws of Hawaii.

The commissioner says:

The land was sold in lots of about 50 acres each, and is covered with heavy forest and jungle growth characteristic of the wet district of Hawaii.

This statement we not only find to be too true, but we find that it costs at least \$100 per acre in cash or its equivalent in labor to clear this land ready for plow. But in this connection the commissioner further says:

Being suitable after clearing to cultivation of coffee, sugar cane, citrus fruits, and general products.

Which last statement we find, from bitter experience, to be almost wholly false. The cultivation of coffee in the Oloa district has been almost wholly abandoned, and thousands of acres formerly planted to coffee are now converted to the production of other crops or allowed to grow wild without care, attention, or harvesting.

That it is adapted to the cultivation of sugar cane is equally untrue. A great majority of the settlers who sign this petition are located at an elevation exceeding 2,000 feet and up to an elevation exceeding 3,000 feet, while the conceded average limit for the successful raising of sugar cane is about 1,000 feet elevation, slightly varying in different localities. It is very doubtful if the limit of 1,000 feet can be successfully exceeded on the wet side of the island, where it rains almost constantly, and even when not actually raining the sky is almost continually clouded. Hence, both the ground and the atmosphere remains too cold for cane, and heat can not be artificially supplied. Heat is an absolute necessity in the successful growth of sugar cane. Citrus fruits may possibly grow, but there is no market whatever for such fruit in Hawaii; besides it takes at least five years before a crop can be raised. As to "general products," we scarcely know what is meant. It is extremely difficult to raise any product on these lands on account of constant wet weather at all times in the year, there being no regular dry or nearly dry season. If there is any distinction in this matter it could only be properly described as "the wet season" and "the very wet season."

The soil is extremely poor, as is generally the case where heavy forest has grown and been removed. This is especially true of tropical and semitropical countries. At any rate it is undoubtedly and visibly true as to these lands, it requiring a liberal use of fertilizer to raise even the first crop. There is no school maintained for our children, although there are many children (upward of 50) of school age in the settlement, the nearest schoolhouse being more than 5 miles away from the children living nearest to it; at least 7 miles away from the majority of them.

The commissioner says:

* * * (Referring to the whole tract): Upon which an expenditure for surveys and the building of roads has been made by the local authorities to the amount of \$30,000 to \$40,000.

The recklessness of this statement is apparent from the fact that he does not give the exact amount or nearly the exact amount. The cost of survey should appear, and undoubtedly does, from the records of his office, as the survey was conducted under him. There is only one road running part way through this land, scarcely 7 miles in length, and a few inexpensive trails for pack animals, which can be by no means termed roads. We are all familiar with the cost of the only wagon road for 6 miles. It is as follows:

Contract price for building 3 miles was 47 cents per linear foot, and for the other 3 miles 97 cents per foot, an average cost for the 6 miles of 72 cents per linear foot.

As there are 5,280 feet in a mile, there would be 31,680 feet in 6 miles, which, at an average cost of 72 cents per foot, would amount to \$22,809.60; and the cost of the remaining portion of a mile, which we will call a mile for convenience, was not materially more or less, or \$3,801.60, making a total cost for 7 miles of road of \$26,611.20.

The frontage of the lots which abut on this road is about 750 feet

(on such lots a majority of the settlers signing this petition are settle Therefore, if the whole cost of the road was taxed up to the abutting lots on each side, the entryman on each lot would only have to pay half the road along such frontage, or for each lot \$270.

A great number of the lots in the whole tract remote from the road were appraised by these local land officials at from \$1 to \$3 per acre and the upset price fixed at that, yet it is just as good land and as just as much to survey, while they appraised the lots abutting upon the road invariably, except in a few instances, at \$12 per acre and fixed the upset price at \$12 per acre.

Suppose the land was all appraised in its wild state at, say, \$2 per acre (which is about that much more than it is worth), each 50-acre lot would be \$100. Now if the cost of the road was to be collected from the abutting lots alone, which would be manifestly unfair, those lots along the road would only come to \$370 each, but according to the appraisement they are rated at \$600 each, and by tricks which would need investigation, and which could easily be proven, the price was bid up by "official tools," so that it cost us the several amounts shown by the commissioner's report.

This road was paid for out of the Territorial loan fund, for which the bonds of the entire Territory have been issued, and the taxable property of the entire Territory of Hawaii is now being assessed and will continue to be assessed for the retirement of these bonds until they become due and are paid. This road is a public one, and built for the benefit of the public and not for the exclusive use or benefit of a few poor settlers who have entered small lots of poor, wild, jungle-covered land along it or in its vicinity. There is no authority in the land laws of Hawaii, so far as we can learn, which would justify the action of the local land officials in raising the upset price of these lands to such exorbitant figures on account of abutting or being in the vicinity of this very ordinary public wagon road.

We are also credibly informed, and we believe, that the cost of the survey (whatever it may be, and which Commissioner Brown should have reported to the legislature, and thereby to the public, in exact figures) was paid out of the Territorial loan fund in the same manner as was the road above stated. We admit that the cost of the survey should go with the land, and should be apportioned to all lots in the whole 20,000-acre tract equally and alike, for the reason that the survey cost of each lot is practically the same, and only nominal, as the committee will readily understand without further showing on our part.

The commissioner says:

These lands are connected by good roads with the town of Hilo, and lie from 10 to 20 miles from the same.

The whole truth could have been stated quite as briefly by stating that these lands are substantially connected with the town of Hilo by one fairly good wagon road about 25 miles in length; the nearest lot to this road being about 18 miles, and the average center of the whole tract being about from 23 to 24 miles from Hilo.

Hilo is a small town of largely Asiatic population, furnishing little or no market for whatever the entry man can raise on these lands, and we can not understand that a few miles more or less near or remote from such a town is of any material importance.

All the settlers who sign this petition are poor people, and with the

exception of a very few are very poor. After hard work for the past year we find it impossible to raise enough to pay the interest at 6 per cent per annum, which is payable semiannually in advance; with the condition that "in case of default or failure to perform the required conditions, the commissioner may take possession of the land and may sell the same at auction, etc." Thus at any moment ourselves and our families may be turned out of our little homes. Humble though they be, they represent all we have on earth, and are the accumulations of a lifetime of toil for each one of us. If we are thus treated, which will in all probability be the result of the past and present land monopoly in Hawaii, we will go forth without a dollar, to commence life over anew by labor in competition with hordes of Asiatic coolies, while we have families to clothe, school, and support.

We respectfully ask you to earnestly and promptly consider and favorably report the Senate bill No. 1344, introduced by Senator Mason, "To provide special land laws for the Territory of Hawaii," as the last part of section 8, commencing at line 22 on page 11 of the printed bill, and ending with section 8 on page 12 thereof, will furnish us the necessary relief to enable us to hold our homes and continue our improvements with the hope of being able to make the final payment at the end of five years. But an additional proviso should be added, substantially as follows:

All settlers referred to in this section as having settled prior to the approval of this act, who had declared their intention to become citizens of the United States prior to entry or settlement, may transmute any entry under which they are holding in the same manner as if final naturalization papers had been issued to them, if such persons are otherwise qualified to make homestead entry under the provisions of this act.

The reason for this is apparent. When we purchased at the sale above described an entry man was only required to have declared his intentions to become a citizen of the United States to be allowed to enter these public lands, and many of your petitioners have not yet obtained their final naturalization papers.

So far as we are able to learn, Senate bill No. 1344, with the amendment above suggested, is admirably adapted to every condition in Hawaii, and is a departure from the harsh and arbitrary laws and administration heretofore in force in Hawaii, which will be hailed with thankfulness and complete appreciation by the poor citizen homeseeker in this Territory. All of which is respectfully submitted.

MOUNTAIN VIEW, HAWAII, October 6, 1902.

To the United States Senate Committee on Pacific Islands and Porto Rico:

We respectfully represent that we are entry men of public lands in Hawaii at various times during the years 1901 and 1902; that we have directed Mr. T. J. Ryan to write down on schedule hereto attached the information given him, and directed him to forward the same to the said United States Senate committee and ask that

some relief be given to us as such settlers by reduction of price and abolishing the rate of interest, making any payment final, so that we may be enabled to get something out of the products of the land before we are obliged to pay. There are schools and few roads. The soil is poor and covered with a heavy growth of worthless timber at elevations from 1,500 to 3,000 feet.

EXHIBIT No. —.

LEPROSY.

MOUNTAIN VIEW, HAWAII, *November 1, 1902.*

Hon. J. H. MITCHELL,

Chairman Subcommittee, Pacific Islands and Porto Rico.

SIR: Herewith I transmit some evidence relating to the leper settlement on the island of Molokai, Hawaii.

I feel confident that a perusal of the same will raise in any fair mind a reasonable doubt that the affairs of the settlement are far from right. That there are strong reasons to believe that there are persons confined in that prison for life who are not lepers, and others who as lepers are allowed to roam at large by the hundreds.

I advise that the whole affair be put under Federal control to the end that the taxpayers of this Territory be relieved of the enormous expense of furnishing funds with which the members of the board of health and their friends speculate in trade at the settlement and otherwise, and to the end that the good name of the United States may be spared the blush of shame for longer continuing the incarceration of political prisoners in such a place when the whole truth about Hawaii is fully made known to the public and to the world.

I advise that any private property on the island of Molokai outside of the leper settlement be condemned by the United States and purchased, so that the whole island of Molokai may be devoted to the use of lepers. It is, for the most part, a barren island, but there is sufficient water in the mountains to irrigate the land, perhaps all over the island if it was economically used and properly distributed. These unfortunate people should be the wards of the nation, and the whole island of Molokai is none too large and could be made none too beautiful by forestry and irrigation for their sad lot during the remainder of their lives upon this earth.

Very respectfully, yours,

T. J. RYAN,

President American Settlers' Association.

Mr. W. O. SMITH,

President of the Board of Health, Honolulu.

SIR: I have the honor to submit the following suggestions to improve the efficiency of the law of segregation.

According to the conclusions of the leading physicians who attended the Berlin Leprosy Conference, segregation will remain the most reliable means of combating leprosy, until we find a specific remedy against the disease; but isolation will not efficiently prevent the spread of leprosy if it is not thorough, complete, and continuously enforced.

Our law of segregation may be classed with those measures which not meeting with public approval, fail to produce all the desired results.

This law has been in force over thirty years, and has undoubtedly served to keep leprosy in check; but, owing to its unpopularity among the native Hawaiians, has not always been properly enforced; consequently it has failed to stamp out the disease.

This subject was thoroughly discussed at the recent Leprosy Conference, and the system of isolation now in force in Norway was warmly recommended.

The results obtained in that country are very satisfactory. In less than forty years the number of lepers has been reduced from 3,000 to 200. The Lungegaard hospital for lepers was found to be no longer necessary. It is now used for consumptives.

Dr. Hansen, the discoverer of the bacilli of leprosy, and one of the highest authorities on this subject, thinks that by following his system of isolation we could obtain the same satisfactory results in Hawaii.

The Norwegian method of segregation consists of voluntary isolation for lepers who can afford to have a room with separate bed and eating utensils for themselves; and forced isolation in the asylums for all lepers who can not, or will not, live separately from the rest of the family.

I will not discuss the system of voluntary isolation, because it is not adapted to the habits and customs of the Hawaiians, consequently it would be a failure here.

Dr. Hansen has overcome the opposition to segregation in Norway by going from district to district lecturing to the people. He convinced them that leprosy is a contagious disease and that by keeping lepers in their families they were merely helping to spread the dread malady.

I believe that we would find it profitable to follow the example of Dr. Hansen. A man well acquainted with the Hawaiians and capable of speaking their language fluently could overcome, to a great extent, the prejudices of the people against the law. This could be done by means of lectures, illustrated with projection lantern slides representing the bacilli of leprosy now acknowledged by all as the cause of the disease. He could relate to them some of the numerous cases of undoubted contagion, particularly the one reported by Dr. Benson, of Dublin, Ireland, showing how a man who had never left the United Kingdom acquired the disease by sleeping with a leper brother and wearing his clothes.

Segregation will not stamp out leprosy until we secure the cooperation of the people, or at least overcome their hostility to the law.

Every case of leprosy concealed in a family serves to nullify the salutary effects of prolonged segregation. Hawaiians should be taught that the Government devotes a large portion of the revenue to carry on segregation chiefly for their benefit; that patriotism and love of their race, as well as self-interest, demand their cooperation with the efforts of the board of health to rid these fair islands of the disease, even when this cooperation involves the sacrifice of family ties.

Were it generally known that leprosy is curable in its earliest stages, the seeking of medical aid would not be delayed until the disease has invaded the system to such an extent that it becomes impossible to effect a cure.

Leprosy is easily cured radically when the bacilli are, as we frequently find, localized in a small spot of the skin, and before they have had time to form new colonies in other parts of the body. There are many cases on record to prove this assertion, but for the sake of brevity I will mention only one. A child from the Republic of Colombia had a single reddish spot on his forehead. His parents took him to the Hospital St. Louis, Paris, where a microscopic examination of the skin revealed the bacilli of leprosy. Thereupon the whole spot was removed and the wound covered with healthy skin, was quickly healed.

Over four years have elapsed since the operation and the child remain free from leprosy.

The main objection that Hawaiians raise against the law of segregation, is the fact that once their dear ones are taken from them at Molokai, they must relinquish forever the hope of seeing one another again. The parting under such circumstances of those who are bound together by the closest ties of relationship must necessarily be most sad and affecting.

It must not be wondered at then that a people naturally kind and affectionate should strive to conceal their afflicted ones as long as possible, so as to delay the dreaded and final parting.

To avoid this, petitions were sent to the legislature several years ago, asking that asylums for the isolation of lepers be established in all the districts. The petitions were denied because the country could not afford the enormous expense of maintaining so many asylums, and besides to establish so many foci of leprosy would lead to the spread of the disease.

The following plan would mitigate the rigor of the law of segregation without diminishing its efficiency:

To separate from the rest of the leper settlement with a double fence a few feet apart, a piece of ground near the landing to be used by visitors only. To build a shed over a portion of this double fence to serve as protection from the rain both visitors and lepers who conversing together. To allow any one having relatives or friends at the settlement to visit them under the above conditions once in six months, when the board of health makes the semiannual visit.

To avoid overcrowding and expense to the government visitors should be required to pay their own fare to the steamship company.

This plan has the following advantages:

I. It will put an end to the accusations of favoritism brought against the board of health for allowing a few to visit the settlement while refusing the great majority of applicants.

II. It will add to the efficiency of segregation by preventing the mingling of visitors and lepers which takes place now whenever a few obtain permission to accompany the board of health.

III. The sight of so many distorted forms and faces may serve to awaken in the minds of the visitors a wholesome dread of the disease and rouse them to the necessity of protecting themselves.

If this plan would help to diminish the opposition to the law of segregation it would in time be worth more than the small expense involved in its execution. It would be advisable to have some model hospital in Honolulu, where cases in which the disease is not sufficiently developed could be kept under observation until a positive diagnosis could be made.

The practice at present in vogue of sending suspects to their homes may lead to the perpetuation of the disease among us. These people should not be kept one or two months while waiting for an examination by the board of examiners, in the same rooms where confirmed lepers are kept.

When a person detained in these rooms is finally declared "not leper" the wrong becomes more apparent.

We need a hospital built according to modern ideas with well ventilated rooms capable of easy and thorough disinfection. The apart

ments at present used for the accommodation of people who are waiting to be examined for leprosy can not be properly cleaned or disinfected.

I am of the opinion that many lepers who are now at large would voluntarily enter such a hospital in Honolulu if they were given the privilege of being treated for one year.

Of course this privilege should be given only to mild cases coming to the hospital of their own accord and not to those who are arrested by the authorities.

Before closing this report I would beg to suggest that the mail coming from the leper settlement be disinfected by inclosing in the mail bag a mixture of 100 grams of formaline with 200 grams of sawdust, and recommended to me by Dr. Kinyoun of the United States Marine Hospital.

I would also suggest that the houses from which lepers are removed be disinfected with formalin, or if not suitable for formalin disinfection, they should be cleaned and whitewashed. The bedding, clothing, etc., of the lepers should not be used by others, at least, not without previous disinfection.

Respectfully submitted.

L. F. ALVAREZ, M. D.

*Superintendent of the Hospital for the treatment of Leprosy
and Bacteriologist to the Board of Health.*

HONOLULU, January 25, 1898.

Dr. N. RUSEL,

President of the Senate.

SIR: In reply to your request for my views of the reforms needed in our methods of dealing with leprosy, I send you a copy of my unpublished report to the board of health, submitted shortly after my return from the lepra conference held in Berlin, and which I attended.

This report contains some suggestions to improve the efficiency of the law of segregation, but as it does not cover the whole ground of needed reforms, allow me to point out an outline for the plan that, in my opinion, ought to be followed in dealing with this difficult problem.

The repeated statements to the effect that leprosy is "almost stamped out" are not borne out by the facts. On the contrary, it may be said that the law of segregation, signed by the King January 3, 1865, after thirty-five years of trial, has failed to stamp out the disease.

The following table shows the number of lepers at the settlement at the end of each year:

Year.	Number of lepers.	Year.	Number of lepers.
1866.....	106	1882.....	649
1867.....	143	1883.....	785
1868.....	228	1884.....	717
1869.....	284	1885.....	656
1870.....	279	1886.....	590
1871.....	402	1887.....	698
1872.....	439	1888.....	1,035
1873.....	749	1889.....	1,187
1874.....	671	1890.....	1,213
1875.....	706	1891.....	1,142
1876.....	677	1892.....	1,095
1877.....	710	1893.....	1,155
1878.....	802	1894.....	1,124
1879.....	717	1895.....	1,087
1880.....	606	1896.....	1,115
1881.....	706	1897.....	1,100

These figures prove that in 1866, with a population of 60,000 Hawaiians, we had 105 lepers, whereas, at present, with a population of 30,000 Hawaiians, we have 1,100 lepers in the settlement and perhaps 550 at large. Of course the exact number of lepers at large is not known. The last official estimated number that I have at hand gives 684 as the probable number of lepers outside of the settlement.

If we add 50 as the probable number of lepers at large in 1866, we will have 155 lepers out of a population of 60,000 Hawaiians or 1 leper for 387 Hawaiians. As we have 1,650 lepers out of a population of 30,000 Hawaiians or 1 leper in every 19 Hawaiians.

These figures are not in accord with the statements often made in the public press that "We have nearly succeeded in stamping out leprosy among our people."

All the leprologists who have come to this Territory to investigate leprosy, left us with a feeling of disappointment as to the supposed benefits of our law of segregation.

Dr. Prince A. Morrow, of New York, one of the highest authorities on leprosy in the United States, expressed the opinion that segregation is a failure and that the disease is on the increase.

Dr. J. Ashburton Thompson, of Sydney, who spent some time on these Islands in 1896, expressed himself as follows:

It is thought at the present time by those at Honolulu who are in the best position to judge that the outbreak is now declining. The evidence that this is so is not yet such as can be easily apprehended by the foreign visitor; and it is the case that during the last thirty years a similar opinion has been expressed from time to time only to be contradicted a little later by acknowledged facts.

Dr. J. Souton, of Paris, a priest and physician who has devoted his life to the study of leprosy, visiting nearly every place where there are lepers, left us about a year ago very much disappointed as to the results of our law of segregation and the manner in which it is carried out. He criticises the lack of medical treatment for leprosy in the following terms:

No attention is paid to the treatment of leprosy; there is a physician at Kalawao but his time is taken up with treating accidental maladies.

In another part of his report he adds:

I have met in Molokai many persons who formerly were believed to have leprosy but who for several years past have not shown any symptoms of the disease.

He concludes his report as follows:

The Government spends a considerable sum every year to maintain the two leper colonies of Molokai (Kalawao and Kalaupapa). Every leper costs about 450 francs a year, thus imposing an appropriation of 500,000 francs. If we admire this generosity we can not help regretting the form under which it is applied, and the insufficiency of the results obtained.

Dr. Souton underestimates the annual cost of maintaining the leper settlement. According to the last statement that I have seen in the press, the sum of \$112,200 is spent annually, or over 561,000 francs.

Many other leprologists have expressed similar opinions as to the unsatisfactory results obtained by the act of segregation at so great a cost.

Before suggesting measures to remedy the failure of the law of segregation, it will be necessary to inquire into the causes that tend to perpetuate the disease among us. While incomplete segregation is doubtless an important factor, it is not the most important one. We should gather every leper in these islands under the present system.

of segregation, the board of examiners would probably make a diagnosis in two thirds of the cases, sending the other third to their homes as suspects.

Since many of these suspects would be lepers, they would continue to spread the disease among the healthy population, thus producing new cases. The failure to make a diagnosis in a large proportion of cases is not due to incompetence of the examiners, but to the fact that leprosy, in the beginning, is one of the most difficult diseases to recognize by mere inspection.

These suspects, or lepers, live in every district of these islands, Honolulu itself containing a large number of them, and in my opinion they are the most potent factor in spreading the disease, thus nullifying the salutary effects of segregation.

Dr. Thompson, before quoted, states in his report that there were 60 cases of suspects on the list to appear for examination at the public dispensary, but that owing to some misunderstanding only five or six appeared at the dispensary. These were examined, together with two new and recognized cases in women. He says:

All the rest appeared to me to be simple cases of leprosy in either the smooth or tuberculous form. There appeared to me to be no doubt at all about their nature.
* * * In relation to isolation, these facts should not be lost sight of.

He also says that these cases were not in any way selected.

As the schools are closed to all children classed as suspects, they spend most of their time on the streets or in Chinese stores and coffee shops, endangering the health of all those with whom they come in contact, while they grow up in total ignorance.

At the present we have not a hospital in the whole Territory devoted to the treatment of leprosy. Neither are lepers allowed to receive treatment for leprosy at their own expense. Hence, many afflicted with the disease exile themselves rather than go to Molokai.

Again, some fear that the board of examiners may make a mistake, from which there is no appeal. I believe that the law ought to provide some safeguard to prevent such mistakes. You will see by the report of Dr. Souton that there are people in Molokai who are not lepers.

Were those persons sent there by a mistake in diagnosis? Since the decision of the examiners that a person is a leper carries with it the sentence that such a person is to be deprived of his liberty for the rest of his life, we can not be too careful to avoid a dreadful mistake.

To remedy the evils above enumerated, it will be necessary to build a well-appointed hospital, with laboratory facilities, on large grounds near Honolulu, where all doubtful cases could be kept under observation; and by bringing to our aid the recent discoveries in biology and bacteriology, the nature of the disease could be determined. By treating those found to be lepers at this very early stage of the disease a cure would result in many cases. All children of school age, detained in the hospital, could be taught reading, writing, gardening, etc.

Having disposed of this numerous and dangerous class of people hitherto called "suspects," by gathering them in the hospital and determining whether they are lepers or clean people, it remains for us to deal with another large number of people who also spread the disease daily among their families and friends, namely, the unsegregated lepers.

To isolate the large number of lepers now at large is the most difficult problem that we have to deal with, for all our efforts to stamp out leprosy by segregation have failed and will continue to fail until isolation is made complete and thorough.

The importance of this subject was well recognized at the Berlin Leprosy Conference, and much time was devoted to discussing the methods to be employed in order to obtain the best results.

You will see by the inclosed report that the Norwegian system of segregation received much deserved praise from the delegates to the conference.

The main obstacle to the success of isolation here is the hostility of the people both to the law and to the manner of its execution, hence our efforts must be directed to overcome this hostility.

During my thirteen years' practice among Hawaiians I have often asked them this question, "What is your principal objection to the law of segregation?" The answer is almost invariably this: "When they take our dear ones to Molokai they do not allow us to see them again, hence our grief in parting with them could hardly be greater if we lost them through death."

It has been my misfortune to witness many heartrending scenes enacted at Kalihi when lepers were removed to Molokai, and I assure you that their grief is intensified by the thought that they will never see each other again, at least in this world.

All methods of segregation involve the infliction of much grief and pain which can not be avoided, but we should not have added unnecessary cruelty to our law by depriving the families of lepers of the right to see and converse with their dear ones at the settlement.

It seems that in order to atone for the infliction of this unnecessary hardship, some people are allowed to accompany the board of health to Molokai once in six months and are given the freedom of the settlement, mingling with the lepers without any restriction. This practice can not be too strongly condemned.

Several years ago I recommended to the board of health that a portion of the settlement near the landing be separated from the rest by a double fence a few feet apart, to be used by visitors only, and that the families of lepers be allowed to visit their afflicted relatives.

Having failed to obtain the desired reform at the board of health, I submitted the same to the Hawaiian Medical Association where it met with unanimous approval, and a resolution was passed urging the board of health to put it in practice, but nothing was done.

Let us, then, alter the segregation law so as to guarantee the right of visiting the settlement to the families of the lepers under proper restrictions. This amendment would have better effect than board of health resolutions, which might be set aside at the next meeting of the board.

But to achieve success in segregation we must follow the Norwegian system as far as it can be adapted to the conditions in these islands.

As you will see by my report, Dr. Hansen, the discoverer of the germs of leprosy, advised me to urge the board of health to adopt the methods that he has tried in Norway with the most happy result.

He said that if the district physicians of Norway, who have been educated in a country where leprosy prevails, are not always able to make an early diagnosis without his assistance, we certainly could not

expect our district physicians, who came from countries where leprosy is unknown, to recognize the disease in its early stages.

Dr. Hansen advises us to employ a physician of experience who would visit the outer districts, assisting the Government physicians in arriving at a diagnosis in difficult cases and, at the same time, lecturing to the people on the danger of keeping their leper relations or friends in their families.

CONCLUSIONS.

We must arrive at a correct diagnosis in the numerous cases called "suspects." Treat all mild and recent cases of leprosy in the hospital to be established for that purpose, sending to Molokai only those whose cases are incurable. Mitigate the severity and harshness of the present law so as to make it less objectionable to the people.

We should not persist in the attempt to deceive ourselves into the belief that we have been stamping out the disease from these islands while the number of lepers is increasing among us in spite of the rapid diminution of the native population; and finally, let us not postpone this difficult problem when prompt action is demanded.

Sincerely, yours,

L. F. ALVAREZS, M. D.

HONOLULU, *February 15, 1901.*

REPORT OF JOINT COMMITTEE OF HAWAIIAN SENATE AND HOUSE OF REPRESENTATIVES ON LEPER SETTLEMENT.

KALAUPAPA, MOLOKAI, HAWAII,
Saturday, March 2, 1901.

Members of committee: Representatives Prendergast, Gilfillan, Hoogs, Haaheo, Beckley, Emmeluth, Puuki, Kawaihoa, Wilcox; Senators Russell, Kalauokalani, Kaohi, Kaiue, Baldwin, Nakapaahu, Carter, Kahilina. Stenographers, McMahon, Avery.

Also present: Justice Galbraith and W. O. Smith.

Meeting at Baldwin Home, Kalawao, 10 o'clock a. m. Present: Senators Baldwin, Kaiue, Kahilina; Representatives Gilfillan, Kawaihoa, Beckley, Wilcox, and Puuki; Justice Galbraith and W. O. Smith.

Meeting called to order in the band room at 10.15 a. m. by Mr. Beckley.

Mr. BECKLEY (addressing lepers present). This is the occasion when you should present your petitions for claims.

(Mr. M. K. Nakuina was sworn as Hawaiian interpreter.)

JOHN KEHUEWA (a leper) was here called forward and made the following statement:

Representatives and senators of the first legislature of the Hawaiian Islands: First, for myself, I ask for a doctor that will be sent here to doctor and cure this leprosy. Dr. Lutz, I think, can cure the leprosy, but somebody found fault with him and he was dismissed. Second, there was Dr. Goto; everybody knows him. All those who were diseased some were cured by him, but the Government did not help him. He was two months in and two months out, but he could not keep steadily at it and finally left. So I insist that a doctor that can cure the leprosy be sent here.

JOHN KANANI (a leper) being called forward, made the following statement:

(Addressing the members.) I have one petition to make; it is this. When anyone dies the board of health steps in and seizes his effects, public auction, and I ask that this be stopped. Two people live together as man and woman, but not married, and acquire personal or other property. When the man dies the board of health takes all the property, and no consideration whatever is given to the woman that the man lived with. I wish this to be prevented if it can be done. There was a father and mother and child; the father married a new woman and the father died, and when the woman died the board of health took all their effects and sold them at auction, though the son and heir and the woman tried to stop them. There were two cousins, but the sister died and the brother is still living. When she died her property was taken by the board of health under the direction of the superintendent here. Those two actions have troubled me some because I am living here. I own horses, houses, and wagons and brakes, and I have a wife and child. I do not know when God will call me to come back to Him, and when I die I do not want the board of health to take the property which belongs to my wife and child.

Mr. KAWAIHOA. I would like to ask who takes the money realized from the sales?

A. What I wish to state is that the money realized was to be taken by the board of health and given to the heirs. I take Hawaiian papers but I do not see anything in them about it. It may be in the English papers, but as I do not read them I do not know. There are others with the same trouble, and that is why I speak for myself and them.

Mr. KAWAIHOA. Who has the property of that woman who died?

A. The property of Konikeni? His name is Hiwi.

Q. While you are living here are you living as a *kekua* (helper) or leper?—A. As a leper. I have been here eleven years. While I have lived here I have acquired property. That is why I am asking this to be considered, so that my property will not be taken by the board of health.

Q. If there are other persons who died and the property has been seized by the board of health, please report to us later in a few days.

(Witness makes same statement as on preceding page, at the commencement of his testimony.)

Q. Will you try to get Puaakuni and Hiwi to come down here to Kalaupapa this afternoon?—A. (Witness does not answer question directly, but makes the following statement:) I want the horses belonging to the lepers; I want these horses to be brought here to the settlement from other places for this reason: Most of the people living here have no horses; and if food is to be got at Waikolu these people who have no horses can not get there and get their food. Some people have horses of their own outside the settlement, but they are not allowed to send for these horses to be brought here. What I ask is that each person who has any horses may be allowed to bring in a male horse. The objection to the mare is because it will increase, and there is not pasture enough for the increase of horses. If anyone's horse dies under his carelessness it is his own fault. Perhaps there are people here who own plenty of horses. I have seven horses, but I won't sell them. I am not asking this for my own benefit because I have horses, but for those who have no horses. I am the spokesman for them.

Q. If there are plenty of horses here, and you are asking that those who have no horses will bring their horses here, and if there are 900 horses here and they want horses, these horses, with the horses already here, will be hurtful to your own interests, because your own cattle are running here and there will be a shortage of pasture.—A. We have had no meat which is fit for anyone to eat for the last few years, but before that we always had good meat. From 1891 to date I have eaten this meat, which is not fit to be eaten.

A REPRESENTATIVE. Is that the only meat that the board gives you?

A. Beef and salt salmon; in 1900 meat and salt salmon and corned beef from California. The beef I said before is not fit to eat is fresh beef. From the first of this year we have had tinned beef. I have these tins in my house yet. It is not fit to eat. The fresh beef comes in different seasons. The meat keeper when he goes to cut the meat always has trouble, because there is such a jam of people coming together and the stronger ones always trample the weaker ones. If you want salmon and ask for salmon, they will not give it to you until all the beef is disposed of. Sometimes the poi is good; sometimes it is not good. When I came here first the poi used to come from Wailuku. When it came there were worms in the poi 3 inches long. That was in 1890.

Mr. KAIUE. At a meeting held here and according to a petition which was sent to the house, were you at the meeting?

A. I was not there at the first meeting. At the second meeting I was there.

Q. Did you sign this petition?—A. No; this petition in some parts I do not understand.

Q. This work is merely referred to us and we have come here to find out what you really need. You must confine yourselves to this petition, and after that we will take up anything else outside of the petition.—A. Some of the necessities required by us are already stated in this petition, but I do not think there are some not included in it.

Q. I am sorry to say if you bring in any complaint outside of this petition we will waste time on that, and we can not do anything on the petition that is signed.—A. The first petition here is against the quarter claim of the board of health in the taro produced at Waikolu, and we want that to be passed; but there are others that they are trying to work around in such a way, trying to win others and to prevent the enforcing of this. I am one of the planters in the valley, and I do the planting myself and pay my own expenses myself, and I do not see the reason why the board of health should claim a quarter share in the production of it. One of the committees is circulating a petition to stop the planting of taro in those places where it is planted.

Mr. KAWAIHOA. What are you eating now?

A. We are eating flour now—flour poi and flour in all forms. The petition is to stop the planting, so that the board of health shall do the planting themselves under their own direction—not here, but in America, where they can raise the flour and send it down here for poi.

Mr. BALDWIN. During the drought how are the horses? There is not feed enough for the horses in the past year, and if each and every owner owned a horse during this dry weather how can you feed those horses?

A. I will admit that there are two seasons during the year. There is one where the grass grows and a season where the grass dies. Of

course, during dry weather the horse dies. I am sure during a drough the cattle die more than horses. I know this for a fact when I was luna for the board.

Mr. BECKLEY. We are here to help you as members of the legislature. It has been brought to our notice that more than 100 voters here during the last election were not given a chance to cast their vote.

A. I propose to have two persons for the elections instead of one—one man to stay in the booth two hours. There was but one man who had charge of the booths for two hours at the last election.

GEORGE KAAPA (a leper) was here brought forward and made the following statement:

I ask that we be given 50 pounds of raw taro for each person, in place of 35 pounds as now, per week. Sometimes some of the taro is no good, and in taking away what is no good there is very little left. If you can not supply us with 25 pounds of paiai, give us 50 pounds of the raw taro per week.

PALIKAPU (a leper) was here brought forward and stated as follows:

The board of health can not give us taro only from Waikolu. The taro at Wailoku should be cooked and made in paiai, and there is not enough taro there to supply the settlement for a month.

KELIKAPUNI (a leper) was here produced and stated as follows:

I want to present a petition to the members of the legislature. You already had the petition, but there are a few explanations I would like to make to you personally. We are still here living in exile. I have been living here for the last fifteen years, but the treatment from the doctors is not sufficient. In reference to Dr. Goto, I can say that he did good to us. Doctors have been sent here to treat any other disease except leprosy. There are lepers living here weak and sick, but they are not treated. We have food and meat and houses, yet the people suffer from weakness. I would like to have an increase of meat from 7 to 8 pounds per week. When they cut up the meat one will get just all bones and another will get all meat, and in that way everybody does not get the same. Some will get more meat than others. I would like to have the supply of matches, which is now 4 bunches a month, increased to 8 bunches per month. Those who smoke, 4 bunches will not last them more than two weeks. It is all right for those who have money; they can get some with it, but for me and others who have none it is very hard. I want to ask that we have \$15 a year instead of \$10, as now—\$5 for clothing and \$10 cash—and it all be given at one time instead of twice, as now. If this money that was to be given to-day, and there was a person who was weak at the time and would die the night after, that man would not be given his share; that is, he would simply be bundled up in a coffin and buried, and that money would go back to the store.

There are 4 kukuas doing the butchering. Formerly they received \$9 a month, and last year they got \$10. I would like to have it increased to \$15. They are doing good work here and we can not do the work ourselves, and we would not get our meat if it were not for these people. The regular day for butchering is to-day, but notice was sent that the members of the legislature were coming and the kukuas were ordered to do their butchering last night.

Mr. BECKLEY. Are there any of you that have been employed by the board of health here, but are now dismissed?

Mr. KANANI. November 7 last I was dismissed, after serving the

board of health for four years as "luna." I was dismissed during the election.

Q. If through that election that is the cause of your dismissal, who dismissed you?—A. Feary, for this reason: Before, I was a Republican; a few days before the election I was told that I was going to be dismissed because some people had worked underhand and reported that I was working hard for the Democrats. On the 2d, 3d, and 4th this rumor of dismissal was given to me. On the 6th of November I went in to cast my vote. I decided for myself, if I vote for the Republicans I will be dismissed now; if I vote for the Independents I will be dismissed, and if I vote for the Democrats I will be dismissed, but on a due consideration I chose to vote for the Democrats, with the exception of voting for Mr. Beckley. On the 7th I went to the assistant superintendent, and he spoke to me about the vote and found fault with it and finally dismissed me.

Q. What words did he use?—A. He said, "To-day you're pau," and never gave any reasons.

Q. Were you asked by Feary to be a runner for the Republican party?—A. He did not directly do so, but he asked me to give him my support. I have executed the work for the board of health, while an employee of it, favorably, and there is no fault found.

MR. BALDWIN. What were you doing under the board of health?

A. Boss carpenter; boss for the wharf, and blacksmith, and other work.

Q. Who is the superintendent you spoke about? Is it Reynolds or Feary?—A. It is Feary.

MR. BECKLEY. Did you see any money going around during election time for bribery?

A. I do not know. I never saw it.

Q. During the last two weeks I received two letters stating that the employees or those working for the board of health should work for and support the Republican party; otherwise they would be dismissed.—A. That is so; I am one of those dismissed, and there are others also dismissed. In regard to the meat, the complaint is made on account of using axes for cutting the meat. If they use a saw, as in Honolulu, the bones can be equally divided all round.

MR. BALDWIN. Before you were brought here were you a leper?

A. Yes, I was a leper; but now you see how I am. I was under treatment of Dr. Lutz. After I was treated by him I got better, and have remained so up to the present time, as you see me now. I am living here. I have property of my own, and horses; I have a wife and children and am well to do. My wife is a leper, and I want to stay here.

Q. Do you want to go out?—A. No; because there are so many things here I have to leave. There is my wife, my children, and my property. I have two children born as lepers, and the other is all right.

Q. Who owns the land at Waikolu?—A. The board of health.

(MR. KAIUE here questions the lepers in general regarding the petition they sent to the members of the legislature, reading the petition sent from No. 1 to No. 26, inclusive, asking them if it was their wish to have these things granted as prayed for, to which they unanimously answered "yes." Additional matters on the first object of the petition were then read.)

Mr. BALDWIN. Is there not fresh water?

A. We are asking for an increase of water because there are certain spots at Kalaupapa where taro can be planted, but as there is no water we can not utilize them. This water we are asking for is for planting purposes.

Q. How about planting potatoes or other plants?—A. If we are allowed to do it, we will do it. Some people plant dry taro and water it by sprinkling. Formerly we had little patches, but that is stopped. There was enough water for household purposes. This extra water we ask is for planting taro.

Q. Are there plenty of places to plant taro there?—A. Yes; there is a good area there. (To question by Mr. BALDWIN). If a man who has charge of the people here is not suitable to the people, we must have power to put him out or in. The present assistant superintendent does not give satisfaction; he extends special privileges to his own friends. The treatment given to the Hawaiians and the whites here must be equal. The whites are given the privilege of drawing one-half of their rations at one time. There are two days when the beef is given out, Wednesdays and Saturdays. The natives took their allowance at once, they are forced to do so, but the whites take theirs twice a week, 3½ pounds each time. Some of the houses are owned by the board and some are owned by private parties, though lime has been furnished and the expense of laying it on borne by the board of health, but in some other places they send a man to do the whitewashing and charge the people living in the house.

Q. Is that the only thing you object to, the difference between the natives and the whites?—A. Yes.

Mr. PALIKAKU (leper). The first thing I have to say is that some people are weak, and own no horses. They can not go and get their paiai; there are other people that the board could employ to make paiai.

ADAM PUALOA. Lepers are made to work eight hours per day, and paid 50 cents per day. I want it increased to \$1 per day. For whose benefit is the work performed? All of the work is ordered by the board of health—that is, the taro patch, waterworks, etc.

Mr. POIKI. Is not the board of health supporting you, and do you want the board of health to pay you a dollar besides?

A. The board of health is supporting us and also paying us 50 cents per day for the work we are doing. The helpers are given an allowance of food and meat and also 50 cents per day for the work performed, and the same as we are doing, but they are not entitled to it. We are the ones entitled to that allowance, because we are the ones who were brought here under the board of health, and we do not want the same privilege given to the helpers.

Q. I think to allow 600 lepers to bring one horse each will be a detriment to the good of the people, but I propose this: Would it not be better to bring imported horses here and use them for the general public?

Mr. KANANI. The superintendent sends donkeys for the food supply to the homes, but the same privilege is not given to outsiders.

Mr. PALIKAKU (re petition 12). One of the reasons is, I object, the weak ones could not get their own paiai unless they have money to pay others to get it for them, and if they can not get it they are obliged to take rice or flour instead. Regarding rule 26, he said: Helpers should be provided, for this reason: First, as long as a leper

patient is strong he can look out for himself or herself, but when afflicted with some other disease, which prevents them going for their rations, they can not get them unless they have money to pay others to go for them, and if they have not money then they are left to do it themselves; sick and hungry and nobody to care for them, and they have need of a helper.

Mr. BALDWIN. Is there a hospital for the weak ones?

A. No; there is not. There is a house built recently, but not occupied. We do not know the purpose for which that house is built.

Mr. KAWAIIHOA. Is it true that leper patients have to pay 25 cents to those who bring their paiai from Waikolu?

A. Yes. Sometimes the taro is already pulled, but when there is so much of it the lepers themselves have to go in the taro patch and pull it.

(Conversation was here taken up about the matter of divorce.)

Mr. PALIKAKU. If a leper is born here and leaves a wife outside of the settlement, and they want a divorce, they should be allowed to have it by mutual agreement, through the courts, without any costs.

(The question was here brought up of petition No. 3, on the front page of petition: That a steam vessel be purchased for the board of health, to be used for the transportation of freight from the other islands to the settlement. The lepers were unanimously in favor of this.)

Mr. BECKLEY. Mr. Reynolds has tendered his resignation, and we wish to know if he has encroached on your rights.

PETITIONERS. No; Mr. Reynolds is all right, but the assistant superintendent (Feary) is the one who is making all the trouble. The road that runs through the settlement to Waikolu has been inclosed by a fence, and gates put at both ends. The cattle are brought in and penned in during the night, but they jump out on the "mauka" side and destroy and eat up the plants—the cane, and other things planted by us. We ask that the practice of putting the cattle in there during the night be stopped. We are obliged to tie our horses before our houses, and if by chance a horse breaks a rope and gets away he is taken up by the superintendent, and we are charged for it and have to pay the damages, and we do not want to do this.

Mr. KEHA (leper) said:

Mr. President and honorable gentlemen, I take and build a house with my own money, and am living there. If I get poor and in trouble and the house wants repairing and I ask the board of health to help me pay for the repairing, and I to pay the board back, the board will not help me. If the board of health puts just one shingle up and I live there as a tenant of theirs, at my death the house goes to them, and my wife or child has no claim to it; the board of health takes it all. Second. Our water pipes. We pay our money for the laying of the pipes, those pipes that run to the house. The tools are supplied by the board. We pay for the pipes and the taps, but when I die the board of health takes all of those, and I have no right to give to anybody, wife or child, or anyone else. These are things I want to state for your consideration.

A REPRESENTATIVE. Is anybody treated that way?

A. I am one of them.

Q. Anybody died and their property taken?—A. Yes. I came here as a helper, but in 1888 I was counted in as a leper; I am diseased in

my body. They say that we stay here because we love the place, but it is not so. It is because we have sold all that we owned when we came here, and it is no good to us to leave here and go out again.

Mr. KAIUE. Where is the leper you were helper for?

A. She is dead; she died in 1890; it was my wife. I married again and got another wife, and have a big boy.

Mr. PAUAKA (leper). We ask that the payment for labor performed must be at the end of the month, if possible, instead of three weeks after the end of the month.

BERETANIA HALL, KALAUPAPA,

Saturday, March 2, 1901—7.45 p. m.

The meeting of joint committee held. Mr. Kalaupokalani, chairman. Dr. RUSSELL spoke as follows:

There is certainly one thing which the board of health omitted to present to you, and that ought to have been presented to you long ago in some public pamphlet or a series of articles; that is the character of the disease on account of which you are isolated here in this settlement. I am satisfied in the near future that will be done, but until it is done I will try in a few words to explain what may be explained more extensively by the board of health.

From your petitions presented to the legislature I see you are not quite clear on that point. For instance, one of those petitions mentions that you want to have a thorough specialist in the treatment of leprosy to have a residence here and treat you. You seem not to realize yet that leprosy is incurable. Leprosy is as old as the world. China, India, Palestine, Egypt, Greece, that have lived thousands upon thousands of years, from the earliest times have in their histories recorded the disease of leprosy. There are two ways of finding the cause of the disease and the remedy for it. The one way is blindfolded to try this, that, and the other thing; to try one thing after another, sometimes finding something accidentally, sometimes finding nothing; that is one way of finding the cause and the remedy for the disease. This method of proceeding we call empirical; but there is another method—the scientific method. That means, with our modern complicated tools and instruments, to find first the germ of the disease, then in the laboratory to study the ways and means, the circumstances of life, the hurtful conditions for this germ, and then slowly, slowly, methodically, and truly come to the result. The empirical method has had in leprosy a trial of many thousands of years. There is hardly a method of treatment which has not been tried either in India, China, Palestine, Greece, Norway, or somewhere else. We are still trying; you have yourselves been the object of such empirical experimentations for long years. Once in a while, I should say several times a year, there springs a report somewhere in a distant country, Brazil or Russia, that so many have been cured, and, of course, it is taken up and it comes to us and we try it on you.

To this kind of empirical medicine belongs the "Goto" treatment. When you go to that place where they say that the lepers have been cured by some medicine, and investigate truly and deeply, you will find there is nothing in it; it is only a soap bubble. Of course, every physician knows half a dozen remedies which relieve the conditions, which help a little, sometimes make it disappear, but then in a year or two comes back again.

This temporary disappearance for a few months, or for a year, or for two years, is usually taken for a cure, but it is not a cure. Still, nature has a secret cure for leprosy, for there are undoubted cases on record in every leper settlement in the world that a man was a leper and then somehow he cured himself. The disease disappeared and never came back. When we discover this secret of nature and how it effects a cure we shall be able to cure every leper; but we must abandon this empirical method of trying blindfolded to effect a cure by the tail of a rat or the eye of a crab, or something like that, and we will have to abandon this method that has been overdone with no good results for thousands of years by experimentation. We have to adopt the second method, the slow, patient, scientific, methodical way of experiment. Unfortunately in the case of leprosy it demands such a scientific method of investigation, demands such complicated instruments, and so many expenses, that practically there is only one institution in Europe which is fully supplied with everything that is needed for that kind of study. This institution is the Pasteur institution in Paris. It has cost over a million dollars to put it up. Our little country can not afford so much money to put up something of the kind. It is the purpose of the present legislature to vote something like \$25,000 for a small laboratory of that description in Honolulu, but that will not be sufficient to start in the study of leprosy. The only use of this institution in Honolulu for the lepers will be that when it is in good running order and a proper man put at its head, there will not be a single man in this leper settlement who is really not a leper—because in the near future we will not satisfy ourselves by an external examination, but we will take a man to this laboratory and find the germ of leprosy in him, if he has any, and if he has none he will go free. Of course we do not put up that laboratory in Honolulu only for this purpose, because there are really a great many new diseases on these islands which are not investigated at all, and which require a thorough investigation, and this investigation will be accurately taken in this little laboratory of ours. As for the treatment of yourselves, of all lepers properly, I am very sorry that the board of health never has listened to my advice, which I gave them some seven or eight years ago, and that was that some sum of money, say a sum of \$5,000, or something like that, should be appropriated and put to the credit of the Pasteur institution in France, in order to institute a special branch of that institution for the study of leprosy, and invite all of the governments of the world who have leprosy in their midst to contribute in the same way. In such a case a good branch of the institution, a special branch for the study of leprosy, may be started there, and perhaps in a few years will really find the cause and the true remedy, and we will discover the secret of nature on which so much depends. Until this is done the only scientific measure against a spread of leprosy is segregation. The disease is contagious, and unless this idea is put into effect regarding isolation or segregation, it will spread all over the natives of these islands, who seem to be specially sensitive to it, and will destroy the Hawaiian race as such. That is the reason why you are here, and you are here not for the benefit of yourselves, but for the benefit of the whole country. The country is more in debt to you than you are to the country; whereas on the one hand you must patiently reconcile and submit to your isolation, to your condition, the country on the other hand tries and will do the best it can for you.

Now, we have heard that there is some trouble here and some complaint, some deficiency in food, and we have hurried this way to you to find out what is the matter and see what we can do for you. As far as we can see we have found that it is not so much to any individual or individuals that the whole trouble is laid, but mostly to the system of government, to the system of running the leper settlement. In my opinion the worst self-government is better than the best of paternal government. Nobody can help a man better than himself. If you hear of some king, or some governor, or of somebody, who, with great success, administers and runs a country or a state, don't you believe that. Recently I have spent three years on 100 acres of land on a coffee plantation with only a dozen Japanese to run it, and my head was full from morning to night, and I was always afraid I did not do the right thing. If I missed one day from this little farm the next day everything was topsy-turvy. The larger the thing that a man claims to administer and rule the worse it is ruled and administered.

The best illustration is perhaps the government of this country for the last few years. It is a very, very small country, and it has lots of officials, and they receive lots of money, but there is no order or rule at all. The administration of this small country, with 150,000 inhabitants, costs more than the administration of the State of Wisconsin with a million and a half. Why? Because in Wisconsin they govern themselves, and here we are governed by a paternal government; that I think the best we can do for you is to give you the same self-government as is given to everybody in the United States, and which we propose to give to all the people here, on this ground: That you are just as good citizens as ourselves; perhaps the intelligent class of people among you is a little more frequent than among the ordinary crowd outside of Molokai.

"The plan is this: To incorporate you as a town or village, under special charter, under a special act of law. By this act you will elect your aldermen and your council; you will have your mayor; you will elect your judge; you will elect your policemen. If necessary, you can put up among yourselves a little militia, composed of a dozen or two men, which will enforce all the rulings of your councilmen. You will get so much a month, what the Government provided for you, so much a month credited to you to be drawn from some bank in Honolulu, and you will do with it what you please. [Great applause.] You will appoint your own purchasing agent in Honolulu or elsewhere. I would recommend Hilo; Hilo is the better place. You can change him every day, if it amuses you. If sometimes you find that this Government money, which the Government gives you every month, is not sufficient for you, perhaps you will put half of you capable of working, perhaps you will put them to work. We can not put those of you to work except those who can work, because it would be hard labor, but if you wish more coffee or more sugar, and a little dance and a little music if you put yourselves to work, that will be all right. Anyhow, let us try, for you are tired. By and by you will be better; then you will go and ask for somebody to rule you, and we will give you a ruler. [Loud applause.]

Senator Kalauokalani here introduced Senator Baldwin, who spoke as follows:

"Friends in misery, I greet you. I do not think it is right to talk too long to you, as there are others who would like to say something, and

perhaps there may be some of you that may want to say something, and I will make but a few remarks. I want to thank you for the honor you have given us by trusting us, by electing us—myself and Mr. Beckley and others—as representatives for you. [Cries of “Pololei.”] I went as a Republican and others as Independents, but you trusted us to do what is right by you. Though we are divided in party lines, we are one in doing what is right for you. In some Government questions we may differ, but in others we may be of one opinion. We all want to have the occupancy of the land preserved. I advise you to do what is right, to keep to what is right, and God will help you to do it. In this I do not think the two different parties differ, because all of us are combined to do what we can to alleviate your troubles and miseries, so I thank you now for electing us. You have my heart and all our hearts.

“I was up at the boys’ home, and they drew tears from my eyes to see them there. I went to the home of the girls, and it also drew tears from my eyes. It shows you my heart is with you. [Cries of “Pololei.”]

“You have heard what Senator Russell has spoken of. If that is true, what the Government proposes for you as the best, we will try to pass it and use our best ability to do so. What you want us to do we will try to do for you as best we can.

“A few years ago I tried hard to find a way for the curing of this disease. When Mr. Treadwell was afflicted, I sent him to Germany. I assisted in sending him to Germany to be cured, because I heard of an eminent physician there who claims that he has a medicine to cure this disease. This information was published in books, so I helped Mr. Treadwell there. I did not care for the expense of that; what I cared for was for him to be cured. After he left he got there, and he always wrote me saying he was not cured. There were others there who had hoped they would be cured, but were disappointed. He wrote to me that he thought it best to go to Japan to the Japanese doctor, I think Dr. Goto. He stayed there for some time and always wrote me, and finally he wrote and said that he was not cured. Of course he was helped a little, but no such thing as a cure. He asked to be transferred to the receiving station at Kalihi. Then he stayed there for some time, and thought he ought to go back to Japan again. We helped him again and sent him back, and he is there now. I have not heard that he is cured.

“If there is a remedy for this disease, we will surely find it for you. We will always be on the lookout for the doctor who has a medicine that can cure this disease. There is a garden in Honolulu, and a little tree is growing there which is claimed to be curing leprosy in India. We are waiting until it is a little bigger, to see what the consequences will be. I am sure and confident that such a remedy can be found, because the physicians are advancing in the science of medicine and other sciences, and a few years hence I hope they will succeed in getting a medicine that will cure everyone who is here in America.

“With these few remarks I will surrender my place to others. I want this impressed on you, that I will try my best endeavor to do what is for your good.”

The following witnesses were then called and were sworn and duly testified as follows:

W. NOTLEY:

Mr. EMMELUTH. Mr. Notley, are you a leper or a kokua?

A. A leper.

Q. What is your age?—A. Forty-two.

Q. How many years are you a resident of this settlement?—Thirteen.

Q. Are you married or single?—A. Married.

Q. Were you married at the settlement?—A. Married outside.

Q. Is your wife living with you now?—A. Yes.

Q. Have you any children born of wedlock in the settlement?—Neither in the settlement nor outside.

Q. Have you any resources outside the board of health appropriations?—A. Yes.

Q. Have you any daily work?—A. Yes; I have an occupation myself, such as interested in the coffee business, and the taro planting and fishing business.

Mr. NOTLEY. I want to ask you some questions that are not asked the nature of a desire to inquire into your personal affairs, but with view to solving some of the problems we have before us on the settlement here.

Q. How many years have you been in the coffee business?—A. I am not raising coffee; it is a coffee shop—an interest in a coffee shop.

Q. I want to ask you a question. To what extent is the coffee shop patronized in this community; do many Hawaiians patronize a place of that character?—A. Yes.

Q. What would you say is the average attendance there daily?—Well, it is according to the state of the weather that they will come; you see; when it is cold weather the business increases, but if not a day it is fine they do not come. Sometimes I may say twenty or thirty at a time.

Q. In running a coffee shop, do you pay a license for the same?—A. No; it seems the control of the license is in the board of health and the board of health has control of the license.

Q. Do you pay any license?—A. Pay no license.

Q. What other occupation have you?—A. Taro planting.

Q. Where is your taro planting operation conducted?—A. Waikolu.

Q. How long have you been conducting that business?—A. If I remember rightly, it is four years.

Q. I would like to ask you under what conditions do you plant taro there. The property belongs to the board of health.—A. Of course, the property, the land, belongs to the board of health, and we are under the control, as there are regulations of the board of health.

Q. Do you plant on shares, or on what arrangements do you conduct that business?—A. The arrangement is on shares, as the board takes one-quarter of all the proceeds that I make out of that taro business. That is a regulation made between us taro planters with the superintendent—the assistant superintendent.

Q. How long has this arrangement been on?—A. Well, it only commenced—that quarter sharing has only commenced since Superintendent Reynolds took charge of the settlement.

Q. That is about how long?—A. Four years; I do not remember exactly.

Q. What arrangements began first between the planters and the

board of health in regard to the remuneration, if any, for labor? Do you get from the board of health any remuneration for labor on these taro patches?—A. It is according to the contract made by the board with the outside parties. We get remuneration for what we produce; that is all.

Q. I mean you put so many days' labor in on a taro patch before that taro becomes ripe. Does the board of health pay you for any of that labor?—A. No.

Q. In working these lands where do you get water from?—A. From the valleys there, streams there.

Q. Have you any trouble in planting that taro, having it bad from any cause?—A. I have not had in my own plantation; I have had no trouble. I have found that the taro I have planted is giving satisfaction to all the parties who had taken and made use of it.

Q. To what do you attribute the diseased condition of the taro in the other parts of the valley?—A. Well, since I took a planting interest, with the encouragement of the board of health, I have studied the matter well, and find that a good many of the troubles caused to these patches is where the people has taken them and run too much cold water; they never allow it to stand. The still water warms the ground and gives maturity to the taro.

Q. In order to insure the utmost capacity of the valley being utilized for taro raising, what would you advise in the manner of a rule in that respect, in respect to the raising of taro at its maximum? In other words, what the committee would like to find out is whether by a systematic cultivation of that valley or areas outside it would be possible to supply the needs of the entire settlement without going outside the settlement.—A. I do not think the valley would supply the whole settlement.

Q. About what number do you think it would supply the staff of life to?—A. From four to six months I could supply the settlement.

Q. Would you say from four to six months, or would it be possible to supply the amount referred to for six months?—A. Well, yes.

Q. I want to ask you what price have you been realizing for your taro, and under what arrangement has it been sold?—A. Well, the arrangement, of course, is according to the tender the board gives outside to outside parties; that is, 57½ cents, if I remember rightly, for a bundle, and for that we receive for it full remuneration given to the board for that amount, but there is one-quarter, as I say, that the board shares out of that.

Q. Is this price that you name, the 57½ cents, is that the base of the price fixed by the board of health calling for tenders for paiai from other sources?—A. That is for the last tender that I understood.

Q. That is, at Honolulu the board advertises tenders for paiai, and the price fixed by that tender is the price you are paid, less 25 per cent, or one-quarter?—A. Yes.

Q. What is your opinion as to that arrangement between yourselves and the Government?—A. Do you mean my own personal opinion?

Q. Yes; in all these matters we want absolutely your free opinion.—A. Well, I think, of course, I would rather see the full amount than to see it shared.

Q. Now, Mr. Notley, supposing we, as will be referred to us, give to your community here a self-government; this only means that we will have to provide for and give you those rights which under the

constitution you can claim. Supposing we give you these rights, do you think that as a member of this community it would be right for the community to allow you to occupy that land without some return for it to the Government, which will offer to the settlement all the lands from Waikolu to the beach line over here?—A. (No reply given)

Q. I will put that question in another way. Suppose you have cattle and another man has cattle, and horses, possibly, and is pasturing them on those lands, would you as a member of this community think that man was entitled to pasture them when you had none to pasture, and pay nothing for the pasturing?—A. Well, I would say under the circumstances we are in, I think we are entitled to the full value of the use.

Q. If we give you here self-government aside from providing for your existence, as has been done in the past, you will have to provide for the management of the place, for the direction of its affairs, for various incidentals that go to make up the expense of community living, and how are you going to meet these things? You have the land to live on, and will have to meet your expenses out of the resources from this land.—A. I can not answer this question, as I think you have more knowledge of this and can satisfy yourself.

Q. Mr. Notley, were you aware of the petition that was sent to Honolulu.—A. (No reply.)

Q. The first question in the petition relates to the taro in Waikolu which you have answered. The second is that the board of health be made to pay for the carriage of freight for the lepers, sent from the islands of the group. What is your thought on that? Do you think it is a proper expenditure on the part of the board of health?—A. I dare say under the condition we are in here, by the wish of the community outside, I dare say it is proper.

Q. I will pass over the next question and ask you regarding question 4, which says that the children born of leprous women be given full food and fish allowance as well as wearing apparel, not to exceed the value of \$10 per year. I would like to ask you right there, can you give me any information, a reasonable reply, as to the number of women that give birth to children yearly in the settlement here?—A. I can not give you that, because I do not look into those matters myself.

Q. Have you any idea at all?—A. Well, at the present time I may say there may be six or seven or ten.

Q. Are you in favor of this allowance of \$10 per year for them?—

A. An allowance of \$10 for each child of a leprous parent born in the settlement here.

Mr. BALDWIN. Does that not refer to the clothing? I think you made a clerical error there.

Mr. EMMELUTH reads the question again.

A. Well, I will answer that; I think it is reasonable enough.

Mr. KALAUOKALANI. Would this ration be given at the birth of the child after five years?

A. I think after one year.

Mr. EMMELUTH. Now, the next is No. 5, which says that the clothing allowance of the value of \$10 be made in coin. How can the board of health or anyone under the direction of the Government yield this allowance in coin to the child and know that it will be spent for the benefit of the child?

A. Well, in that matter it is this way, the child is here and the parents may appear. They can not supply them with their own means, but they will use their own clothing, rations, etc., for these children, and that has caused, if I remember rightly, a contest to bring this question to the majority for that purpose.

Q. The next question is a question that relates to the matter of stores; that is, not of Government stores, but storekeeping. What, in your opinion, is the character of conduct of the present Government store; do you think it is economically conducted?—A. Well, it is not: in time past I would say it is not properly conducted.

Q. It has not been properly conducted?—A. No.

Q. Are the goods that are termed "standard," that is, a good quality of goods, sold in the store, canned goods or cloth, etc.?—A. No; there are many goods that go in that store which I will say are "rot;" many goods, of course, have come of very good quality.

Q. Are those goods that you complain of of a character that if you had that store yourself and were selling goods you would return them to the person who sold them to you?—A. I would, as in my personal business have applied to the parties who sent me inferior goods than what I wish.

Q. The conditions existing at the settlement as they are, and a general merchandising company allowed on the part of the people to live at the settlement here, would not you think it desirable for the Government to establish an inspectorship of goods that come to the settlement before they are shipped from Honolulu or from whatever source they come, with a view of insuring their quality; the rule of the company would be that goods can not be returned from here.—A. I dare say that would be a proper way.

Q. In order that that work should be done with as little possibility of pressure from the people selling goods as it were possible to create, the Government would have to charge a small percentage of the price of the goods for inspections; that expense would naturally fall to the person buying the goods. On the other hand, there is an experienced person inspecting who knows when he receives them they will be goods of proper quality. Would you consider that a desirable arrangement?—A. I think it is.

Q. I will pass the next two questions as irrelevant, having been sufficiently answered during the day, and go on to the ninth one, that the importation of awa into the settlement be permitted, but not to exceed two stumps at each sending. Within your experience in the settlement here, what has been the greatest cause for disturbance among the population?—A. Well, the greatest cause is there is a lot of beer makers and swipe drinking here.

Q. How largely is the practice of beer making and swipe drinking a custom among the people at the present time? In other words, about what proportion of the population are addicted to that?—A. It is very hard for me to answer, as I have never looked into such matters so that I could fully state that.

Q. How do you know anything of that kind is going on?—A. Because I see it proceeding days in and days out.

Q. What do they make swipes of?—A. They make it out of sugar and hops and out of a lot of things which I dare say a good, experienced man would not touch.

Q. Well, I would like to ask you again that same question, and I

would like for you to answer it, telling me everything that you know they will make swipes of. What else besides sugar and hops do they make swipes of; what do they use in making swipes?—A. Well, they are getting into the settlement here from other sources—there is gin there is alcohol; and not only that, they make it out of *papaia choop* up and steeped with sugar and hops. Not only that, they make it out of pineapple roots; and not only that, they make use of other materials growing in the valley here. They make it even of *ti* root. All the combined together will make a strong drink, which will affect the sooner than a mild drink.

Q. Now, would you consider this demand for extra sugar a demand for sugar to make swipes? When your first demand for sugar was legitimate, we have a request for more sugar?—A. Well, I think the use that for proper use.

Q. And they buy the sugar that they want over?—A. For making the swipes they buy that.

Q. Where do they get the hops?—A. They come in through the settlement here. There are other sources. They are smuggled in. That is the right thing.

Q. Do you drink *awa*?—A. No.

Q. Have you any idea of how much of it is used in the settlement at the present time?—A. There is a great many people in the settlement who are great *awa* drinkers.

Q. Would you attribute the excessive drinking of swipes to the inability to get *awa*?—A. Oh, no.

Q. Would you advise, with your experience in the settlement here to allow an indiscriminate use of *awa* and the bringing in of it?—A. I would do so.

MR. BALDWIN. I would like to ask about the taro. You say you are in the taro cultivation. The upland taro grows here. I understand there is some in this valley.

A. Waiilae Valley.

Q. I understand this is the first time at raising upland taro here. Have they tried upland taro in the valley here or have you done it here?—A. Oh, yes; we have. I have for my own private use. I have a small piece there when I am in *pilikia* for poi. I prepare that specially for my own stomach and for my wife.

Q. Is it good taro, as good as the wet taro?—A. It is not so good as the wet taro, because the wet taro you can improve on that, and on the dry land it is very hard to improve on. If you miss the proper time to have it pulled, it will be caked; and now, as we have a heavy shower of rain, it will increase the growth and the taro is not good to eat then because the growth will turn it to water; but leave it alone at certain times it is very good.

Q. You are an old surveyor. That used to be your business, I believe?—A. No; that is my brother.

Q. About how much upland taro has the board of health in that valley? It is raised by the board of health, I understand.—A. Yes now.

Q. They hire people to work it?—A. I am not sure of my word how many acres are there. Of course, to make a broadcast guess on it, I dare say it is about 20 acres.

Q. About how much have you got there; how much upland taro, about, in Waiilae?—A. Perhaps Mr. Reynolds would say.

Mr. A. REYNOLDS. We have none in Waiilae. We have in Waikolu. We have about 20 acres in, but have only recently commenced in Waihanau.

Q. Does that taro get diseased like the water taro?—A. They have taken some, and it has turned out very good.

Mr. NOTLEY. In Waikolu some parts will turn out well, and as you are a sugar planter yourself, it is according to the cultivation that you carry that dry-land taro will be good at all.

Q. You say one of the great evils here is making and drinking swipes of various kinds. Why do you say this to be a good thing for the settlement to introduce a large quantity of awa here?—A. Well, it is this way—the awa don't disturb you; they take it easy, lay down and take it at ease, while with swipes they will visit other people's houses and be noisy, making a disturbance. I would be pleased to have a regular saloon here where a person could have his regular drink, and that is enough, than have swipes, which is killing us as well outside as inside.

Mr. KALAUOKALANI. Is 21 pounds of paiai enough for one person?

A. No; 21 pounds is not enough. That is my opinion, and I am sure you can judge for yourself.

Mr. BALDWIN. We want to get at the truth of it. I asked one man, and he says it is enough, and another man says it is not enough. Now, if you had 21 pounds, full weight, and you gave none of it to your child or anyone else, would that be enough for you?

A. No.

Q. Do you get full weight in your paiai, 21 pounds full weight?—A. Full weight? Of what do you mean?

Q. I mean is it full 21 pounds?—A. Of course it may be sometimes; sometimes it is 21, sometimes a little over, half a pound or so. I may say 21 pounds received of good "grub," I can get away with that in four days.

Mr. KAWAIIHOA. When you are planting at Waikolu was your taro pulled?

A. Yes; I pulled the taro as an accommodation to the board of health; at their request I did.

Q. The patches that you planted there, were they formerly planted as taro patches?—A. That place was new broken ground, and I spent \$2,000 in it, and my money has not come back yet.

Mr. KALAUOKALANI. Is not 7 pounds of meat enough for each person for a week?

A. Yes; of meat it is sufficient; but if bone together, why, it is not enough.

Q. Is 12 pounds of flour enough?—A. Yes; that is enough.

Q. Is 9 pounds of rice enough per person per week?—A. I never mentioned rice—to eat rice. I do not take rice, I am a Kanaka and take poi, so I can't tell you how much rice is enough for one patient.

Q. How many pounds of rice go to each patient for a week?—A. I think it is 9 pounds.

Q. How many pounds of hard bread per week per patient?—A. I don't know.

Q. How many pounds of salmon?—A. Five pounds of salmon per week; I never measured it.

Q. Don't you take salmon rations?—A. Yes; I take it, but don't measure it.

Mr. EMMELUTH. If it was good salmon, would it not be enough?

A. Yes; when it is good it is enough, but when it is bad you all throw it away.

Mr. KANUHA. In the store does that refer to crackers, rice or bread or flour?

A. Clothes and canned goods are the rotten goods.

Q. Are some of these bad canned goods going to you?—A. Yes.

Mr. KALAUOKALANI. Is the patient satisfied that one quart of oil is enough?

A. No; it is not enough. If you use a lamp, say, two hours every evening, that one quart of oil won't last more than 15 days.

Mr. KANUHA. Regarding clothing rations, where do you draw from?—A. I draw it from the store; that is, the board of health store.

Mr. KALAUOKALANI. If you appoint a district judge for this settlement, do you think it will reduce drunkenness?

A. I can not say; perhaps it may.

Q. Your petition says that you want a judge and a sheriff.—A. There are many cases in this settlement, and we want to get justice as soon as possible, instead of waiting for a long time before the judge comes to hear the cases.

Mr. CARTER. Mr. Notley, there are two questions here that were passed by; I would like to have your general ideas on them. The first is a request that all the buildings be whitewashed and painted generally by the board of health that are owned by the people here. Do you think that is a good plan; that is, do you think it will do well to do that; also, whitewash and paint the buildings owned by the individuals?

A. Well, personally, for my own experience, I think it is not right.

Q. Well, you live here; you know and see the condition better than we do who come here.—A. Yes; of course, this way it remains that those here to use their judgment on that; for my part I would refer that to those who use their judgment on that matter.

Q. What is your answer with reference to the same idea of digging the graves?—A. In that matter I think the board of health ought to undertake the digging of the graves.

Mr. EMMELUTH. If the custom were established, or a regulation made that would contemplate that a person putting up a house in the settlement should own that house and have the right to sell it, he having supplied all the material and labor for it, would you consider such a house should be taken care of by the government or the board of health?

A. No; I do not think so.

Q. Do you consider that if the settlement here is given a form of government under which it can operate, that you would be willing under the conditions of owning the improvements, that you would be willing to pay the settlement some rental that would assist in paying the expenses of running that settlement; that is, for the magistrate, for the policeman, and incidentals?—A. Well, it remains—I can not understand.

Q. Well, are you willing to pay a tax for the use of the land, a tax sufficient to pay the expenses of these accommodations that you like to have? Each other element in that community must do likewise. It is merely a question of serving your community. Understand, you do not want people to get drunk, running around and smashing your

house, or run over your plants. In the interest of every good, you would want to yield something toward the benefit of the community, with the privilege of at any time selling out what you have got. These questions are asked for information, to find out what thoughts you people have on these things. To put it in another way—would you be willing to pay ground rent, the money that is realized to be spent in the settlement and for the good of the settlement?—A. This would only ask us to leave the settlement then?

Q. No; it would not. It might amount in your case to over \$1 per year, but it would be a dollar that proportionately everybody else would pay something similar in the ratio as you have land.—A. Yes; but I—I do not think I can answer that.

Mr. KALAUOKALANI. If anybody builds on anybody else's land, do they have to pay rent?

A. No.

Mr. KANUHA. You said that you have a coffee saloon.

A. Yes.

Q. Please state how much you make per month.—A. Sometimes \$200; sometimes less.

Q. Out of that realization was a quarter taken by the board of health?—A. No. In the petition for the board of health to pay for the freight I admit that some goods are brought in specially for speculation—smoking tobacco, for instance; that is, Hawaiian tobacco, oranges, dry fish that comes in large quantities, I use for speculation.

Q. Do you think that there will be one case a week in court?—A. Yes.

Mr. BALDWIN. How many cases do you think there will be?—A. I think there will be four or five cases per week.

Q. I think the people here live peaceably.—A. Yes; it is so; it appears so; but of course sometimes things will come up, fighting, for instance, or any other trouble that we get into, as where there are a great number of people congregated there must be some kind of trouble, which would be brought before the court.

Q. Then you think it is right for you to have a judge?—A. I think so.

Mr. CARTER. In question 25 in the petition is the request that the lepers who have no horses be allowed to import one horse each from the outside. You have been here during the dry season; do you think that the land could support a horse for each person?

A. I think persons could have horses, but of course not more than one.

Q. Well, if everybody was allowed one horse only, would there be enough pasture then?—A. No; it would not; if every person had a horse apiece, that would be more than the pasture here would supply.

Mr. BALDWIN. How many horses have you?

A. I have 9 horses, on account of the work I do here.

Mr. KANUHA. I think there are plenty of horses running around in the pasture.

A. In the last few years plenty of horses died through sickness, glanders, not from drought.

Mr. KAIUE. Who ordered you to put up a coffee saloon here?

A. Through the consent of the board of health to the application made by me, and it was decided to establish one here and one in Kala-wao. They let us run a coffee shop on the license, because if we have

a license we will bring in goods that will compete with the board of health's store.

Dr. RUSSELL. Do you know any case of suicide among lepers since you have been here?

A. Suicide? Well, I know there has a couple been suicided; that is, I can put it they have gone out of their minds and committed suicide.

Q. For how many years is that?—A. One for just lately, the last month, made away with himself, that has not been found; that is Chinaman—Ah Pat.

Q. And another?—A. Is a native.

Q. How many years ago?—A. I think it is an old native, and it is pretty near eight years ago.

Mr. L. RAY (leper), being duly sworn, testified as follows:

Mr. EMMELUTH. Mr. Ray, we would like to ask you what your opinion is as to the rations now received of food in such lines as the white element of the community are usually supplied with. Do you usually call for flour and rice?

A. So far as my own experience is concerned I do not take it myself. My rations I give to the chickens; as to the flour, I make my own bread, because I am not a Chinaman and can not eat rice. Hard bread I never take, and rice is the only thing I take as a ration, but I feed it to the chickens. If I lived on it I think, perhaps, it might be enough so far as the quantity is concerned. Some foreigners who are dependent on their rations have been in the habit—the rations were given in the store—been in the habit of selling their rations for a quarter in the store, so that the consequence was that the amount of the ration was 25 cents, but nine-tenths of the rice has been fed to chickens.

Q. You say that practically all the white element here does that?

A. They have done; that is, those who have no means to buy other things, they have been glad to do it. No white man can live on rice continually.

Q. Well, I should judge if that were a practice it would be far better for the Government to give the element that does that the money straight to live on, and it would be a matter of economy.

A. The foreigners have never asked for money. For a number of years I got a ticket on the store to the amount of the ration, usually 50 cents—this is allowed them to buy all they choose in the store at cost price to the extent of 50 cents.

Q. How about the matter of beef?—A. Well, the beef it has been of very poor quality. It will be enough if it was not so bony; in fact it has been more than enough for me for the last two years. I generally throw it away or it is not eatable, and the butchering is bad. There has been 98 cattle per month and they would be put in a pen and never let out until they are all killed, and by the time the last one was gone it was nothing but bone and black meat, not eatable.

Q. You say "What with the butchering and the bad condition of the cattle." What do you find fault with in the butchering of the cattle?—A. Generally they do not properly bleed them, and again instead of sawing and cutting it up decently, it is cut with a wide ax. You get bone sometimes in splinters and bruised up badly.

Q. Have you any remedy to suggest in this part of the matter?—

A. No; unless when the butcher is a little overworked they go to a little more expense, have an extra helper. It may be they are cutting down the expense too much. You know a butcher can cut it if he has time.

Q. Are you familiar with the place where the butchering is done?—

A. I have not been inside it. I hire a man to do all my chores, so I do not know much about it.

Q. Did you ever try any ration of salmon?—A. Not above once or twice a year. I generally import my own salmon if I want it.

Q. As to supplies of vegetables; in matters of that kind how do you fare?—A. I scarcely know what they are; we fare very badly on them. The store for the last year or so got one to two bags of potatoes a week. A year ago it would be two bags of potatoes in two weeks and they would be all gone in two hours after landing, and the others were left out. About two weeks ago I went for potatoes and they were all gone. I have not seen a potato for over two weeks. It is perhaps once in two months they get one crate of onions. Four weeks ago I got onions from May & Co. or I would not have seen one of them.

Q. What is your observation regarding this matter of swipes drinking; is it on the increase or does it continue a matter of about an equally regular consumption?—A. That is something I really can not answer. I am at home most of the time. I know as little of these people as any of you almost. I could not name 20 men's names. I know there is considerable drinking from hearsay, but I do not see it myself.

Mr. BALDWIN. How many cattle are killed a day here—how many butchered?—A. It is according to the size. I think about 5 or 6 a day.

Q. Then the 98 bullocks brought here, how many days would they last?—A. Forty-five about a month; and 90 would last two months.

Q. Do they feed them in the pen?—A. Yes. The pen simply is, I understand—I have never seen it—but they tell me it is a very large place in there, and the fodder is trampled down. At the time of the long drought there was no food. That was when the pen was first occupied, but now there is plenty of food; that is why I think they are wrong in keeping them there.

Q. You heard the question asked this evening about some form of self-government in the settlement here. You are a thinking man; what would be your opinion of that; would it work successfully or not?—A. My opinion is that it would not work.

Q. Why do you think it would not work?—A. Judging from the people continually quarreling, each one would be jealous of the other; if one had a little office and the other did not, they would be kicking at him. I think it is a man, a superintendent, what we want. A man coming here, it don't matter who, if he is a leper he is as low as the lowest one here, and they would not submit to any authority from him, so that if I am a leper I am no better than anybody else. They would say, "Who are you? You're a leper and no better than any of us." Everyone would want a say in the self-ruling affair. We are each not very well people; we are all sick here. To-day I may feel capable of doing a great deal of work; to-morrow I may be on my bed and somebody else has to take my place. So it is with all of us. The least

change of weather upsets us, so we are never all just alike. We are like a thermometer.

Mr. CARTER. Mr. Ray, would you like to be governed—rather, would you think that the majority, if they had self-government, would be willing to contribute toward their government? If they have a house, pasture for a horse, and taro lands—if they cultivate taro—would they contribute toward the support of the whole?

A. Speaking for myself, yes; but for the others, I think a great many of the others would not contribute anything.

Q. I do not mean for yourself, but for others in the community.

A. I do not think they would agree to do it. A great many of them have not a cent of income whatever. There are a number of foreigners here—I do not know anything about the native affairs, but I do of the foreigners. A number of foreigners here are dependent upon charity. How can a man dependent upon charity contribute anything of the kind?

Q. Do you think it would be practicable to, instead of having a board of health here, say have a committee of three elected by the people here to serve as a board of appeal, and to take general charge?—A. The lepers or three outsiders?

Q. Three lepers.—A. That may be possible.

Mr. BALDWIN. Not necessarily lepers, but three belonging to the settlement.

Mr. CARTER. They may be kokuas or others.

A. There are so few to choose from.

Q. Do you think it would be a good thing if you made all the lepers manage the settlement, to which all petitions would be submitted and they pass on them, approve or disapprove of them, then if not approved to have it further appealed to Honolulu in case the local board refused it?—A. That might possibly work if you got three proper men. There are so few to pick from and it is very doubtful, I do not know myself.

Q. In regard to justice, the inability to secure any decision here—don't you think that would assist in the matter, such a board of appeal?—A. Well, in an appeal case it might, but so far as trying cases, we have a judge comes here whenever there is occasion for it.

Q. I mean in place of that judge would not that board of three decide any petty cases that come up?—A. Yes; if you got three men capable. Those that are capable here are unable to do it on account of their health, and those who are healthy are not capable.

Dr. RUSSELL. You have stated that you hardly believe in the possibility of self-government in this community on account of the lack of moral authority and being lepers and on the same footing. Do you think that the physical authority, I mean actual force, to the orders of these commissioners or aldermen would be sufficient to supply the deficiency of moral force? They would have a certain police force and there would be no necessity, I think, of moral authority. Very few governments in the world are based on moral authority; it is mostly by sheer force.

A. We can not be compared to any other place in the world; we are a different people altogether. You will find them different to govern. Each one wants his own way, and if he does not have it he won't have anything to do with it. Of course, they may work better than I think. Like the Kilkenny cats, they will be all fighting. I think a commission would be better.

Mr. BALDWIN. You know this petition that went to the legislature? A. No, sir; I knew nothing about it.

Q. Well, there is one request that there be a resident judge. Would there be enough business to keep a resident judge going? Do you think it would be advisable having a resident judge?—A. Well, it would be a soft thing for the judge.

Q. You people think you are good enough to do without a judge?—A. Well, I don't want to be judge. I may say this—I have been here close to eleven years and never saw a fight here yet amongst any of the people. It is the quietest community I ever saw in my life. A little quarreling, perhaps, among the beer drinkers.

Q. There is another request in the petition, that they have a right to appeal to the circuit judge—a question you would not care to tackle?—A. No.

Mr. EMMELUTH. I want to ask you a question in regard to the agent of the board of health. Within your knowledge, at any time during the continuance on the settlement here of Mr. Reynolds, do you know of any breach of the rules of the board of health by him?

A. Well, I don't know that I have. I am not very observant that way. I am not looking for trouble. What I say is, I take very little interest in the jail. I buy all the things I want from the outside because I can not get what I want at the store. Things do not trouble me here, except meat, because I have to get meat here—I can get it nowhere else.

Q. You have known no case where he has acted in a way other than in a proper spirit towards this settlement?—A. So far as I am concerned he has acted a good deal better than the former superintendent acted. He has been a great improvement on the former one. I do not say he is perfect, but it seems to me it is an improvement on the old administration.

Mr. KAIUE. How does he take his beef ration?

A. Twice a week. You can please yourself—either take at once a full ration, or twice. I always take it twice.

Q. Does that same privilege extend to you and also to the natives?—

A. Yes, I believe so.

Mr. BALDWIN. Do the natives have theirs twice a week or at one time?

A. I think they can please themselves; I was always under the impression if they want to get half a ration they can get it. If a man takes his full ration on Wednesday he has not to go on Saturday. It is according to their wish that they get the 7 pounds I think at one time. It may be so, I do not know.

Mr. PRENDERGAST. How is it about your mail service?

A. Well, it is not so good as it used to be.

Q. In former times your mail service was better than now?—A. In former times I got my mail pretty regular; now I do not get it in time. I only got one paper this week and one paper last week. There is a miscarriage somewhere.

Q. Was that on account of the bad road going up the pali?—A. I do not think so. I do not see that that could lose a paper out of the bag. I do not know whether it is the fault in Honolulu or this place here. It has certainly not improved since the United States took it over. There is another thing—I saw a letter the other day that had been misdirected and all the corners were cut off. It is bad enough

for us to have our letters delayed, but if they are all served like this it is not right. There is no necessity to cut off an inch off each corn for fumigating.

Proceedings here closed.

WAIKOLU VALLEY, MOLOKAI,
Sunday, March 3, 1901.

Present—Senators Kalauokalani, Kaiue, Kaohi, and Representative Emmeluth.

E. KAANAANA (leper), a taro planter in the valley, under the board of health, interrogated by Mr. Emmeluth, stated as follows:

There are about 50 acres of taro under cultivation in the valley. There are 300 acres of land at Kalawao suitable for taro cultivation. If the conditions were such as we would outline, the settlement could take care of itself so far as the supply of taro is concerned. If the conditions were created, there would be a saving of rice and flour, far as rice and flour are concerned in the requests from the board of health now. If the Government would provide the means for cultivation of taro at Kalawao the probabilities are inside of three or five years the settlement would be self-sustaining as regards its chief food supply.

At an elevation of about 600 feet above the sea level we came to the reservoir, and found a pipe leading therefrom running about two-thirds full of water, with obstructions over the mouth of the main reservoir leading into the supply basin sufficient to create this condition of the pipe, being only two-thirds full; the main reservoir being on an overflow. This condition should be obviated by some better strainer.

The opening going into the supply basin from the main reservoir is about 5 by 7 inches. The pipe from the main basin was an 8-foot one. When the strainer collects matter it passes into the main pipe, there being sufficient matter collected on the strainer to cause an obstruction. Every time the pipe rises in its course through the valley the water is caught in a trap, owing to the air in the pipe, so that the pipe would only give one-fifth or one-eighth of its actual possible pressure at the other end. The pipe would take three times the water it is taking at the present time if it were not for the backward pressure of air in the pipe.

Notes by Mr. Emmeluth.—The overflow instead of being placed in the middle of the reservoir ought to be placed over the screen near the pipe. The screen should be made self-cleaning. There was sufficient water flowing through the overflow to fill a 4-inch pipe, which was consequently wasted.

Mr. J. K. Waiamau, second luna for the board of health on the settlement, stated that he had sent men at one time to examine the stream above the reservoir, and they returned, finding nothing above the reservoir but the vegetation. He also stated that some of the water here came through clefts in the rocks, and that an engineer who was here at one time, Mr. ———, had blasted one of the openings there and the flow was increased. There was some water coming down in the summer time, but not so much. Water was also coming over some of the spaces in the rocks. Mr. Emmeluth thought that with the pali in the condition it is that a drill or two of giant powder in the valley would give more water.

Mr. EMMELUTH. Have you had an opportunity to come here from time to time regarding this water during the wet and dry seasons?

A. Yes. It was supposed to be cleaned every month. Mr. Kaanana was supposed to be in charge of the work. As there was much water seeping through the walls, his idea was that if the water was run off and the place cemented in places that the water would be saved which is now running to waste. I do not think it is desirable to go back for any further water to the source of supply.

We visited another water supply closer to the entrance of the valley, from which there are two 4-inch pipes connecting with the 8-inch pipe already mentioned below. The elevation here Mr. Waiamau thought was about 25 feet less than the previous source of supply. In this we found the strainer choked with vegetation, the same as in the other one. Mr. Emmeluth carefully examined the strainer and pipe and found that loose stones went down the pipe here, choking it up down below. He spoke about automatic valves being provided.

Mr. Waiamau stated that there was plenty of water here all the time, and the only reason he did not take the water supply from here all the time was it would not go over the hill. They found this out when the pipe was broken. The water did not flow from this pipe into the reservoir. Mr. Emmeluth thought they might have been using the water at Kalawao in the daytime when he looked at it, but the pipe there is lower than at Kalaupapa. The best time to examine that was in the night, when the water would not be used at Kalawao.

This water flowing down the precipitous rocks might be laid at a point above across to another point above, where the basin could be made and all of it preserved. There is water running through also at that point. At times about half the water flows through the pipes that is flowing here now. Mr. Emmeluth thought that at the present time this flowing water would fill an 18-inch pipe, whereas there were but two 4-inch pipes to carry it away.

About half a mile up the valley a reservoir might be easily made so that the water could be stored and used for any purpose.

The pipe line requires to be strengthened at the point of the land slide.

At points crossing gulches accumulations were noticed above the pipe line, which would indicate that sufficient provision had not been made for the water way below the pipe.

The pipe line should be trussed either on timber or otherwise, leaving sufficient water way below to carry the débris through.

An emergency house should be so situated as to be convenient for the purpose of placing tools and other materials therein for repairs.

Check valves are required at both inlets from the lower reservoir in order to prevent the water from the upper reservoir escaping through the lower one.

Provision should so be made for a suitable strainer.

AT THE BALDWIN HOME—PRIVATE CONVERSATION WITH MR. DUTTON.

Mr. EMMELUTH. I want to ask you what nationality you are, Mr. Dutton.

A. I am an American.

Q. What age?—A. I am nearly 58.

Q. How long have you been at the settlement here?—A. In July it will be fifteen years.

Q. You came here voluntarily to assist in the work of the settlement, if I remember rightly?—A. Yes; voluntarily to work for the lepers.

Q. As conducted in the past, and judging by that solely, what would your idea be as regards the departure from the past—Americanizing this community in the terms that the Constitution contemplates, having given the lepers a right to a vote, the same as we are able?—A. I would like to have your opinion as to what course should be pursued in doing that.—A. That would be in view of the supposition that the lepers would always have the right to vote?

Q. Yes; I do not see that that would be denied them either. I think once given implies that it would have to be by some glaring defect and some absolute evidence of race prejudice to the extent that it could not be eradicated; although, speaking in a general way, I hardly think that would be a matter for consideration at all.—A. If there is a property privilege being taken, why, it would affect much the plans you speak about.

Q. I am satisfied we are facing that condition that requires us to give the leper settlement a degree of self-government, and that can be given to it and hold it under health regulations. The only condition I feel we can apply other than the franchise of self-directing government is that they shall remain on this place.—A. Yes. Well, as an American having American ideas, I would say that I would be glad to have these American ideas of government privilege wherever it is expedient; whether it is expedient here really I have not studied the matter well enough to speak definitely. I suppose there will be some outside control. It could not be in such a way that everything regarding the special administration and everything regarding lepers would be governed by the community here. Would not there be any outside check?

Q. Hardly that we could apply.—A. Dr. Russell was here. His ideas seem to be to give a certain amount of money into the bank and let them do the best they can with it.

Q. That is a fact we are almost confronted with. We are speaking now between us here, and I want to give to you my fullest confidence and I want you to give us your fullest confidence. As I view it, the lepers here can demand that of us, that they be given a right to regulate their own affairs, we giving them the means of livelihood.—A. Though in public institutions generally I have never heard of that being done.

Q. Well, we are able to regulate the conditions here in the manner that is common to the public institutions. In other words, we are taking all the lepers and housing them, and it may come to a construction of that thing yet—housing them under circumstances that they would have absolutely nothing to do. There would be provision made for dormitories that would hold so many, and they so placed that collectively there would be a square, that a central portion of it would be taken up with sanitary and culinary departments. It would have complete in itself a dining room and equipments.—A. Well, you have described exactly this home here.

Q. And from the central supply station the food would go to the dormitories at meal times?—A. That is what we do. Of course, we have the dining room connected, but the people like to have the food in their houses. Those who like to have it in the dining room do so

those who like to have it in their houses take it in their houses. That is exactly how we operate this home.

Q. This is a feature that we will have to give consideration to finally.—A. But now the idea of giving them control; but it seems to me that whatever is done in that should be as a trial.

Q. It is done as a view to give them their full privileges.—A. And curtail any misuse of the privileges given—yes; that is what we have to keep track of for the next two years.

Q. As they abuse their privileges, we will have to curtail it. We will have to go forward in this step; it is a community interest.—A. A government on the American plan is what I am used to, and it seems to me it would be good every way, and I don't know why it would not work here.

Q. Let me outline what we contemplate doing. We contemplate one thing which will be an active agent in creating right conditions, with a different way of party lines in the methods of voting. There would be approximately 500 voters in the settlement electing the number of 5 commissioners to have charge of the settlement's affairs; each of these commissioners would be elected by 100 voters.—A. One hundred separate to vote. For 100 some one to fill one place?

Q. Yes; well, we will say there is a board who will control and carry on the affairs of the community here.—A. Well, a body of 500 voters for 5 men altogether?

Q. Yes, yes; each hundred voters elects 1 man. Not physically separated, but by the system of ballot. The ballot used at the last election will be the same ballot as used in the future elections, with this difference, whereas the ballot has heretofore been marked with five "x's," in the case of the new system it is "5"—1, 2, 3, 4, 5. Nominations are made by petition. We will say 100 voters being required to elect, 20 per cent of the voters, or 20 men, could sign a petition for any man to run, and that petition so signed would be his nomination. He must be put on the ticket, but the 20 names signing that petition can not be signed to another petition for a man to run; in other words, it prevents a duplicating power in the hands of any one set of men.—A. That is, each hundred elects 1 man?

Q. Yes; a portion of the system explained is simply this: There being, we will say, 10 men running and 5 men to be elected, as fast as the ballots come in from the voting precincts, the voting precinct having determined that the number of ballots is correct compared with the number of voters, then the ballots are sealed and taken to the place where they will be counted as to the vote. The package is opened and the ballots distributed over the files of the 10 men, and the ballots having been filed on these 10 files, it is found Smith has a hundred or more ballots; what is in excess is simply taken off his file and the hundred ballots elects Smith. The remainder of the ballots are divided over the remaining files on the second choice. So by the filing of the ballots on the one hand and the throwing out of consideration the man having the least number of votes, and his votes being distributed over the remainder, in this way the election is obtained of the 5 members.—A. There is to be a board that will show—

Q. That you will have supervision of the settlement, the direction of its affairs, and elect a magistrate. It will probably be in the hands of a justice of the peace, with powers to call a jury. We have not decided what the method will be yet, but want to make a law that will

make final a decision of any case involving \$100 or less right here at the settlement, as in every other township.—A. Well, I think the lepers ought to have the right to appeal to the same extent as the others have.

Q. In no other communities will they have any rights that the lepers won't have. It is merely to prevent a trial by jury. A call of the voters to try the case should be a satisfactory means of deciding it. The contending parties, of course, would have the right to declare themselves as to any of the jurors called and have any other one called.—A. There is one thing I would want to know about before I could say anything; that is about liquor.

Q. We must make the same law apply to the settlement as to the rest of the community, in everything that does not subvert the contemplation of their being segregated here.

Q. Have you read the dispensary act that we are going to pass?—A. I have read about the fact of it.

Q. This law carried with it this provision: There being no license at the leper settlement and the law going into effect at the settlement what would you vote, as to whether they wanted a dispensary or not? If the majority are in favor of it, the dispensary would be placed here and operated under those conditions. A reliable person being found to act as the dispenser, he would be given a stock of liquors, bottles sealed, and marked on the outside with the quality, kind, and price of the contents, that bottle as sold from the dispensary not to be opened on the public highway or in the house in which it is bought.—A. The no government will be successful here if that is adopted. Of course they will vote for it, but if that privilege is given no government could be organized or thought of that would be successful. It would be pandemonium, a hell upon earth. You can put that down in big letters. Anything that gives them liquor brings hell here, I tell you that. The first petition you would have would be for the transportation of the sisters and the brothers, too; of course, I mean the four helpers. I myself am not bound as they are. Of course I never expected to die anywhere but here when I came, and I certainly hope I will die here. I have worked here fifteen years to make amends for my past life, but I do not know how it will be if you give them liquor here. I may tell you how hard it is when they do drink here. Weeks and weeks we would watch them all the time to save our children. I will never say a word in favor of having liquor here. If you think of allowing it to come here I shall denounce the whole concern. I have a right to say something; I am the oldest white settler here; no white person has lived here as long as I have; every person, leper or not, has come here since I have, and I tell you it will not do. If I speak too warmly you will please excuse me. I do not do it with any ill feeling; it is partly from my being weak; I have had a pretty good sickness, but I speak from my heart, I assure you that.

Mr. EMMELUTH. That is perfectly right, Mr. Dutton, and unless we get your opinions freely stated we can not be in a position to use them. If you tell us your views in the way to give us light, that is all we want.

Mr. KALAUOKALANI. Are you a minister?

A. No, I am not; I am not a priest or even a brother. I am called a brother through courtesy. Father Damien gave the name to me. I am a convert. Forty years ago I was received at the Catholic Church.

at Memphis, Tenn., April 27, 1863, and was given the name of Joseph. I was received into the church under that name. My name was Ira B. Dutton before. I was in the Army fourteen years in the one department, and I had still Government business on hand; I was then investigation agent of the War Department; then when I came here I dropped that name.

Mr. EMMELUTH. As to yielding self-government, you think you would be willing to have the experiment made if you would bar liquor?

A. Yes; I think it could then be done, but there is one point: I think it would be difficult for the Homes; of course I would never leave this home. I have not been away for seven or eight years from Kalaulapa, but I will say that in regard to speaking for the whole settlement, I think my people very good; but there would be one difficulty for the homes. The people of the settlement, although I can not say they have ever been opposed to our homes, still they have always felt that the homes were a sort of choice place where they were given some things they can not have outside. There is a little feeling, perhaps jealousy. Oftentimes we have had inmates enticed out. We lost 20 through these late political conditions.

Q. Let me ask you right there, Mr. Dutton, what character of enticement was offered to get them away?—A. I will tell you what happened; just the origin I do not know. There was some difficulty among the employees of the board, particularly those who worked in the taro field at Waikolu, and the whole lot quit work because they were told they must sign a paper declaring they would vote for the Republicans, and they would not do that, and left.

Q. Do you know who the person was who asked them to do that?—A. I do not know, but I was told it was Feary. That is but hearsay; I do not doubt it myself, you know.

Q. And it is only in harmony with what we have repeated time and again in the methods taken last year.—A. Yes; and then there were no more men to work, so we had then a pretty good lot of young men, more than we generally have, able to work. They wanted to get men to replace those who quit work in Waikolu; and just then a young man who used to come here and work amongst our inmates, meeting them, decided he did not like to come in, although I gave him permission to come in. He was the young man who left the home here; went off with the idea to have more freedom. He was a Portuguese boy named Antone Gellespo; a smart young fellow, but a boy who was of very high spirits in Honolulu, a great deal; and came here in a bad fix. When first he came I told him, "Of all the people I have had to do with under 15 years, you are the first one I ever found in that fix." I got him fixed up here all right, and he seemed grateful.

Q. I want to ask you was he affected with leprosy?—A. Yes; and with venereal disease, too. And when I got him fixed up he seemed grateful. He was a strong boy, but he always had that desire to go out, and I knew he would be a wild boy. I kept him right under my finger and thumb until finally temptations came, and he had to go; so he located right there with ———. I think it is right in Feary's yard, if I am not mistaken. He bought a house of Feary's wife, I know. That was what I was told, at least, by several people. This young man came and proselyted some of the boys; yes, and succeeded very well, and took about fifteen boys, making promises they would have

houses and one thing and another. He has two names, Antone and Albert Gellespo.

Q. I know the boy; he came here about five years ago.—A. Yes, that is Frank Gellespo; that is a younger brother. He is in the home a half-witted boy.

Q. Did he take these boys away, and they have not returned?—A. Only one has come back. Several others were coming back, on that new concern started in Kalaupapa, and they were promised such good accommodations there and freedom. That was the putting of this new building, the new home, they call it, at Kalaupapa.

Q. As I understand, that is intended for the accommodation of persons so afflicted that they can not help themselves. Are you of that impression?—A. I do not believe they will have that clause in the law. I do not know, but we will take care of them.

Q. I was led away with that idea, having had him there.—A. Yes, active people like him thought they would try it for a while anyway. The one that has come back is named Peter Richards. That is one of the two boys who are on the "doubtful list" to-day. Eight were examined, it being doubtful as to whether they had leprosy. They are to be kept under treatment for a while in our sight.

Q. Have you anything more you would like to state?—A. No; I do not know that there is anything.

Q. Then, in regard to the matter of liquor, I want to ask you as to this promiscuous making of swipes which, I understand, is going on?—A. That is terrible. Of course there never has been any whisky, regular liquors here, except the very small quantity some one would bring in their pocket. It has always been the swipes, and it is from that I judge, and we all judge, how it would be. When the swipes are prevalent it is not pleasant for us here.

Q. What is the percentage outside of the two homes to-day using swipes?—A. For some time there would be hardly anybody making the swipes. It depends on their ability to make swipes. It is only when they can get sweet potatoes, and sometimes they do not have any for a while, then there will be a regular deluge of it. There are parties close by who will have swipes when it can be had. There are some always skillful in making swipes. This man is a skillful swimmer.

Q. He does not give it to the other parties?—A. As a general thing I suppose, they sell it, but our inmates they entice to drink; it is generally given to them. I have three men who will testify they bought swipes of this man here I speak about. He generally does give to the inmates in a treating method; and then there is that kind of feeling that it is a good joke to get the inmates of the home drunk. Still I am on good terms with the outside people, but there is that feeling they have that the home is a little set apart, you know. They think that the home gets things that they can not get.

Q. I want to ask you a few questions about the home within the walls. Mr. Kalauokalani would like to inquire. How many inmates have you at the present time?—A. Only 120 now. Our average number is about 140, but, losing inmates as I spoke of, it has been lowered.

Q. At what ages are they usually taken in?—A. We will take in the boys who have no parents. That is, we are guardians for the boys for the orphan boys, strictly speaking—and they come as young as

in the settlement. We have had them as young as 5 or 6 years; the youngest now is 8 years.

Q. Are you in favor of a boys' home for children, the "get" of leprous parents, to be situated outside the settlement?—A. Oh, yes; I do not see how you can help having that, the same as the girls have it all along, and I believe the girls who are —— for the Kapiolani home that has been condemned —— I think if they would build something adjacent they can be operated together, one side for the boys and the other side for the girls, but they should only be kept here until a certain age, about 7 or 8 years.

Q. In your knowledge, during your fifteen years' experience here, has it developed among the children living here, male or female, the get of leprous parents, that they have shown the disease?—A. Well, only a few; in proportion only a few.

Q. Would you attribute that result from actual hereditary taint, or possible contraction through constant contact?—A. Constant contact, I think. I am losing faith in heredity.

Q. In other words, your opinion, amid these conditions and surroundings, is that leprous parents may produce clean children?—A. Yes.

Q. And if they are removed at a tender age and cared for, that they would make clean persons?—A. Yes, entirely.

Q. When you mentioned about the Peter Richards boy, you stated he was put in the "doubtful class."—A. Just to-day he was put in the "doubtful class."

Q. How many of such doubtful patients have you?—A. Two of these in the home.

Q. Then, what is true of the home here in regard to the boys is true of the home in regard to the Kalaupapa girls?—A. Well, it is not exactly the same. There has been two instances, I think, of their taking in leprous women who have been taken from their husbands and given birth to child after they came in the home. That is the only way they get in, but I think they have been sent to Kalihi.

Q. Have you any further suggestions that you would like to make?—A. Kawehi is a doubtful one, and Peter Richards is the other one. Peter Richards came to the home in 1899. The other boy came to the settlement on October 28, 1898. He was then 12 years old.

Q. Now, Mr. Dutton, let me ask you, you say these boys were examined to-day and were declared doubtful?—A. Yes.

Q. That they were brought here as lepers?—A. Yes.

Q. And put under treatment?—A. No; not of late years.

Q. Any regular treatment?—A. No; simply kept in the home.

Q. How frequent have the examinations been?—A. This is the first one, I think, we have ever had; there have been sometimes examinations of a few in past years, but for several years I do not remember any.

Q. What are the duties of the doctor at the settlement?—A. To look after the ordinary sick; I mean by that those sick with fevers and acute attacks of everything, even those who became very low and helpless from leprosy. A good many call upon the doctor; some do not call upon him.

Q. Your statements on the face surprise me. I had an idea that they would, for a time at least, until it was absolutely known that they had developed leprosy, that there may be no doubt of it, I would have

thought they would keep a constant check on each person's physical condition.—A. Well, when we have here so far as I know—well, in fact, we know what the regulations have been at Kalihi. There are examinations; I believe they have to have three, and when they are examined and found to be lepers, that is final, and they come here finally and irrevocably, and we take them as such.

Q. How did it happen that at this time they had examinations?—

A. I spoke of it, I think, here. They were taking examinations at Kalaupapa, and I thought we had some here who might stand an examination, too, and when the doctor went out I asked him to tell one of the brothers to tell the boys to come here who would like to be examined, and they examined eight of them.

Q. They probably saw from evidences that it was needless to examine the rest.—A. Yes; these eight were expecting to be examined, the others came to look on.

PETER RICHARDS (a doubtful leper) was here produced and examined as follows:

By Mr. EMMELUTH:

Q. What is your name?—A. Peter Richards.

Q. How old are you, Peter?—A. Fifteen years.

Q. Where were you born?—A. At Puaalu, Kolauloa.

Q. When did you come to the settlement?—A. Early last year.

Q. Who committed you? Who were the doctors that examined you when you were sent here?—A. Dr. Wood, Dr. Day, Dr. Howard, and Dr. Emerson. Those are the only doctors that I remember.

Q. You say you were examined at different times?—A. Yes; three times.

Q. Those same doctors examined you three times?—A. Yes, sir.

Q. How long was the second time after the first time?—A. About two months.

Q. You went home and stayed home?—A. No; I stayed at Honolulu at the time with friends.

Q. The second time you were examined and they let you go?—A. Yes; this time I didn't take medicine.

Q. You took medicine the first time?—A. No, sir.

Q. You were told to go the first time; stayed out two months and then examined and given medicine; and then you came to the third examination?—A. Two months more.

Q. And at the third examination they sent you here?—A. Then stayed at Kalihi one year and three months; then they examined again and bring over here.

Q. And you have been here ever since?—A. Yes.

Q. And has the doctor seen you while you have been here?—A. The doctor never look at me over here; only stay in the home here and the doctor never come to look us.

Q. How did you come to be examined to-day? Who came here to examine you?—A. The doctor.

Q. Dr. Russel?—A. Yes, sir; Dr. Oliver, too.

Q. And no one else has examined you from the time you came here until to-day?—A. No, sir.

Q. You have a brother here, have you?—A. No, sir.

Q. Have you been one of the boys taken out of the home here who went to Waikolu to work?—A. Yes, sir.

Q. Who asked you to go to Waikolu?—A. I been go outside and stay three or six months and then I come in the home again.

Q. How long ago was that?—A. Only last month I come in.

Q. When did you go out?—A. I go out in April last year.

Kawehe (a doubtful leper) was here produced and interrogated as follows:

By Mr. EMMELUTH:

Q. What is your name?—A. Kawehe.

Q. How old are you?—A. Thirteen years.

Q. Where were you born?—A. Hanapepe, Kauai.

Q. When were you examined the first time? You were examined for leprosy, were you? How did you come to leave Hanapepe?—A. I came to Honolulu with my parents.

Q. How did you come to be examined in Honolulu?—A. I was examined by the doctor on account of my feet being sore.

Q. Who was the doctor that examined you?—A. I don't know who it was.

Q. (Addressing the brothers of Kawehe.) Can't he tell us some of their names?

The WITNESS. One was a Spanish doctor. There are four doctors examined me. I was mistaken at Kalihi. I stopped at Kalihi three months and was not examined again.

Q. You are sure of that?—A. Yes.

Q. Do you remember what year that was in?—A. No.

CONTINUATION OF PRIVATE CONVERSATION WITH BROTHER DUTTON.

By Mr. EMMELUTH:

Q. I want to ask you, Brother Dutton, if there is any further statement you would like to make regarding this matter?—A. One or two little points. I heard Peter Richards say he went away from here in April. He went away in August. That causes me to think I must explain more clearly about these hands being taken out. They were enticed out, all of them, and perhaps some indirectly. It was the 27th of August, 1900. I didn't see Gillespo entice them away, but he started the ball and got the excitement up, and at the very same time it became known, so that all our people were apprised of it, that the local superintendent, who has been ready to sustain me before, was working against me and saying that I would not get any favors from him, etc.; saying that they would not return at all when they would want to go. They had at least taken work at Waikolu, and three or four went out expecting to get jobs, but were not taken because they were too young. That boy was one of them. One point occurred to me just now. Of course, we have been talking about the boys, but the home is not filled up with them. Few of our boys are advanced cases. We have had several blind. There are several blind now. At one time there were 11 blind ones, and when this rough weather came on a good many of the old commenced dropping off. There is nearly half of our cases here well-advanced old cases.

Q. Would you consider it desirable for us to condemn anything like an institution of the character usual to American customs for the leprous patients?—A. You can not.

Q. Not as treatment of the character as insane asylums. There are a good many cases beyond treatment and others again susceptible of treatment, having wards for the various stages and keeping them under immediate supervision.—A. I don't think I can recommend anything better than we have here. All the bad cases are separated. The further house commences with the smallest boys, and the house next to myself is the sick house, the helpless cases, and the next about two-thirds helpless, and the others not so much.

Q. Do you believe that, like conditions being created for the uneasy element in the settlement to-day, with the moral discipline, that the general condition of the patients would be bettered in any degree?—

A. The moral conditions would be much better if they were put under the control we have here.

Q. Do you think such a system would be much more expensive than the methods in vogue?—A. I don't know that they would be much more. Well, the board of health reports will give you a good deal of information on that point. There has been the expense in the past years to figure out.

Q. In considering a step of that kind, what would you recommend regarding a building—buildings of concrete, or buildings of less substantial character?—A. I think the wooden buildings would be most desirable.

There is one point I would like to speak on. In speaking of the practicability of shaping that plan, I see where there would be one advantage for the home. I was explaining about the sort of ill-feeling about getting our supplies. At present we are not reduced to any ration. Those who carry on the home are supposed to know what is best for the inmates, and we get everything we use in bulk. It comes from the general supply here. If we depended on the community, afterwards they want to make a prodigal of us, inasmuch as every inmate is entitled to just what he gets, and the results will be identical. We would feel absolutely committed to say to that, so far as the home is concerned, that that is protected in whatever arrangement is made.

Q. I will correspond with you before we get to that stage and get from you further suggestions, by which we will make it obligatory that those entering the home shall be treated with all of the regulations of the home, and you may enter as one of your regulations that any supplies to which he is entitled shall go to the general fund, he to get the benefit through that fund, or whatever it may be. One thing I forgot: In your opinion, would it be desirable to bring water for irrigation purposes to cultivate taro, or other commodities that can be used at the settlement here at Kalawao?—A. I think it would make it unwholesome here. There is too much dampness here now, being huddled up near the pali so close, and we get more rain here than anywhere else in the settlement, as the clouds in the pali discharge here.

Q. The proposition would be not to attempt it in the immediate vicinity where they are living here, but above the point where the doctor lives?—A. Somewhere there it would be good. I think Dr. Russel asked about sheep. That would require a large paddock. If they had sheep they would take the grass from the other animals.

Brother VAN LIL was at this point brought forward and interrogated as follows:

Mr. EMMELUTH. Brother Van Lil, in connection with your work at the home what are your duties?

A. I am here as a general overseer.

Q. How long are you at the settlement?—A. I will be here six years on the 25th of next July.

Q. During your intercourse with the present officials what has been your experience?—A. My experience has been with the present officials entirely unpleasant with some of them.

Q. How long has Mr. Reynolds served? He has been superintendent for four years?—A. Somewhere about that.

Q. And Feary?—A. About three years.

Q. Since when has this unpleasantness made itself evident?—A. On the part of Reynolds, about two years ago.

Q. In what way did it develop?—A. It developed, as far as I can see, in the refusal of Mr. Dutton to O. K. bills that were for goods misrepresented; inferior goods; that were of inferior quality.

Q. In what quantity were those goods?—A. One was quite a large bill of lumber and the others small articles—dry goods; sometimes wearing apparel and hardware.

Q. And it started with that and has kept on?—A. Well, it got intensified during the political campaign by Feary, because Mr. Dutton would not have anything to do with politics. He said he didn't come here for politics; and after election—it was particularly after election—we were told that Feary had said Mr. Dutton could not expect any favor from him on account of his not joining the Republican party. My experience in connection with politics is that Feary has discharged several men working for the board of health because they would not promise to support the Republican ticket. I don't know the names; but he told me so personally.

Q. That he had discharged many of them for refusing party allegiance?—A. Yes, sir; and one man was discharged after election for voting the Democratic ticket. His name is Kanani.

Q. Is he about the premises now?—A. No; he has been examined.

Q. Have you any other statement to make?—A. Not that I know of. As far as the home is concerned, things are going along as well as we could expect, but they will go along better if we had the moral support of the representatives of the government.

Q. It is within a possibility there will be a change in the superintendent. Have you any thought in the matter that you would like to give expression to?—A. I think one of the best of our own men would be William Notley. He has been assistant superintendent under Hutchinson and he did fairly well. But one thing: I would put him under warning not to favor nominations of the Christian Association unduly.

Q. In other words, you would want him to remain neutral?—A. Yes; as regards any religious denomination. I have my religion and I want everybody to respect it, and I respect everybody else's religion. This morning as I was going along I led an old man to the Protestant Church, because he wanted to go there. I wish everyone to be free in religious matters and I will always insist on it as long as I am in the home.

There is another thing: Shortly before election four men were arrested

for gambling, and when brought before the superintendent—chief of police—and promised to vote the Republican ticket were not prosecuted and allowed to go. One of them is Makakoa. I heard this from James Prosser, a white man here.

PETER AKONA (an 8-year-old boy) was hereupon brought forward and interrogated as follows:

By Mr. EMMELUTH:

Q. Peter, how long have you been here?—A. I don't know.

Q. Do you remember the doctor who sent you here, Peter?—A. Hoffman.

Q. How many times did he look at you?—A. Only one time he look

Q. Only one doctor?—A. Plenty doctor; I don't know.

Q. And they sent you over here?—A. Yes, sir.

Q. And you have been here seven months?—A. Yes, sir.

Q. You have got a papa and a mamma?—A. My papa at Lahaina My mamma in the Bishop Home.

Q. And your face is all that is the matter with you?—A. Yes.

Q. Was your papa sick?—A. No.

Q. Are you getting along all right, Peter?—A. Yes, sir.

Q. Do you like the home here?—A. No, sir.

Q. Would you sooner be with your mamma?—A. Yes, sir.

Transcript of testimony taken March 2 and 3, 1901, at Beretania Hall, Kalaupapa, Molokai, by a special committee of the first legislature of the Territory of Hawaii.

On behalf of the senate: Hon. D. Kalaauokalani (chairman), Hon. George R. Carter, Hon. J. B. Kaohi, Hon. H. P. Baldwin, Hon. S. E. Kaiue.

On behalf of the house of representatives: Hon. F. W. Beckley (chairman), Hon. A. G. M. Robertson, Hon. J. Emmeluth, Hon. J. K. Pendergast, Hon. S. Kawaihoa, Hon. A. F. Gilfillan, Hon. R. Puukia, Hon. S. W. Wilcox.

Chairmen of Kalaupapa Board of Inquiry: Hon. D. Kalaauokalani and Hon. F. W. Beckley.

Interpreters: W. J. Coelho and M. K. Nakuina.

Secretary and stenographer: J. D. Avery, stenographer of the house of representatives.

TESTIMONY TAKEN AT LEPER SETTLEMENT, KALAUPAPA, MOLOKAI.

Present: Senator Kalaauokalani, Senator Carter, Senator Kaohi, Representative Emmeluth, Representative Hoogs.

MARCH 2, 1901.

Senator Carter suggested that Senator Kalaauokalani act as chairman. At Mr. Emmeluth's suggestion, J. D. Avery was instructed to act as secretary as well as stenographer.

A prayer was offered by the Reverend Makiimoku.

The following preliminary questions were agreed upon to be asked each witness:

(a) Are you a leper or a kokua (helper)?

- (b) What is your age?
- (c) Sex?
- (d) How many years have you been a resident of the settlement?
- (e) Are you married or single?
- (f) If married, were you married before or after your arrival at the settlement?
- (g) How many children have been born to you in the settlement?
- (h) Have you any resources outside of the board of health appropriation?
- (i) What is your daily work?
- (j) What remuneration, if any, do you receive for it?

THOMAS K. NATHANIEL addressed the committee as follows:

I will take this opportunity to inform your committee who have come to investigate conditions here that we appointed a committee and through them our petition was presented to your honorable body, and we trust that you will listen to the supplications and prayers as presented by us and to the statements as made by a member of our committee, Mr. Makakoa.

Mr. MAKAKOA then addressed the committee as follows:

Honorable Senator Kalauokalani, who has been called by your beloved friends the Gladstone of Hawaii, and Hon. Mr. Beckley, our representative in the lower house, who also has been called Kalaipahu (a very rare wood), also the members of the house of representatives who have come here to call upon us, we extend to you the sentiments as expressed by our dear Lord in the saying, "It is love that I cherish, not offerings." You have come from the twelve islands composing this Territory; you have been selected by the people, and it is upon this basis and to you honorable members that we must look for help, and knowing that you are competent enough to carry the majority; then, if you carried the majority you were thereby authorized to act for it.

First, it is certain that many have desired but few have been selected to represent us from among you. Therefore, as we now make known our requests to you, we feel that you will do for us what is deemed best.

You have come as one body with one mind to hear our petition. Now we feel that you will take such action as is best and do such things as are good for us. We hope through you to have a thorough investigation made.

The first thing that we have mentioned in our petition is that the local management be taken away from the board of health and given over to us. We believe that in the management we can take care of the little difficulties that arise, because at the present time there are difficulties which are due to this form of government. There are two ways in which this can be described.

First. Those who are following the advice of those who are running the settlement receive first attention. Those who are not following them do not get any assistance at all. It is this disregard which is giving a great deal of dissatisfaction which has arisen in this settlement.

One such question is this:

In regard to the water supply, there are persons who are very weak.

They are not able to go for water, although the pipes are laid within twenty-five rods of their homes, but the management does not allow the pipes to reach these unfortunates.

Here is another very important matter; that is, the question of fuel. It has been required by the regulations to pay a dollar for fuel. This dollar is paid to the secretary of the settlement for half a cord of wood. This dollar is supposed to be passed up to their superiors. Instead of furnishing fuel within three months after the money was paid, there has been no fuel delivered. This fuel question would not be so hard were it not on account of the poor flour.

Mr. EMMELUTH. Who cuts the wood?

A. The lepers themselves at the rate of \$2 for a cord.

Senator CARTER. From where do they get it?

A. From Waialua.

Mr. EMMELUTH. Does a leper who asks for wood have to do the cutting?

A. Whoever desires fuel, he pays the secretary. This secretary of the settlement pays the man who cuts the wood. The wood belongs to the management of the settlement. The lepers do the work.

Mr. HOOGS. Name one or more persons who have been delayed more than three months.

Senator CARTER. Give specific instances; that is the best kind of evidence.

A. Judge J. P. Meau, Kamakaohi (k), J. W. Kalanui.

Senator KALAUOKALANI. Were they without wood for three to five months after they have paid for it?

A. Yes.

Mr. EMMELUTH. Who is the secretary at the present time?

A. There are others in the same boat; those mentioned are here now. The secretary is Pierce. He is a blind person. He is stone blind, and he can't read or write; he can't see.

Mr. EMMELUTH. Is he appointed by the board of health or by the settlement?

A. I don't know how he is appointed, whether by the board of health through the superintendent or by the superintendent himself.

Mr. EMMELUTH. Do you think that if local affairs were in your hands that you could help them better than this secretary does?

Mr. PENDERGAST. Does the board of health deliver the wood itself?

A. Yes; because they have a wagon and the necessary means to do it. by wagon?

Mr. EMMELUTH. Who runs the wagon for the board of health?

A. Charles Kahahili is luna for the bullock carts and laborers.

Q. What wages does he get?—A. Twenty-five dollars a month.

Mr. PENDERGAST. Is there always a supply of wood?

A. Sometimes there is plenty of wood; sometimes there is no wood. The trouble is, instead of getting the wood when required, they send wagons around with the wood, and we have to wait until the wagons are ready.

Mr. PENDERGAST. Is there a good road from here to the place where the wood is obtained?

A. Of course, the weather permitting, the road is good; in stormy weather the road is very bad.

Senator CARTER. How are they now?

A. All right

Mr. PENDERGAST How many loads can be obtained in a day?

A. Two loads can be brought down easy in a day.

Q. Has the board of health set any particular place—one where the wood could be piled?—**A.** This is at Kalawao.

Senator RUSSELL. How far is it from here to where the wood is piled?

A. Two miles.

Q. How many bullock carts in the service of the settlement?—**A.** Four bullock carts; there are other carts belonging to the homes.

Mr. EMMELUTH. (To the interpreter). Thank him for the information; tell that we want to proceed with the inquiry as we contemplate making it.

Senator CARTER. More formal.

Mr. EMMELUTH. We want you to state under oath, as promptly as possible, the answers to the following questions:

Witness sworn.

Senator CARTER. Ask him to make his complaint personal.

Examination by **Mr. EMMELUTH**:

Q. Are you a leper or a kokua?—**A.** Leper.

Q. Age?—**A.** Forty.

Q. Sex?—**A.** Male.

Q. How many years have you been a resident of the settlement?—**A.** This is the tenth year in this settlement.

Q. Are you married or single?—**A.** Married.

Q. Before or after arrival at the settlement?—**A.** My wife is living here with me.

Q. How many children born in the settlement?—**A.** Have three children, all out of the settlement; none born here.

Q. Any resources outside of the board of health?—**A.** No; I had means, but it was turned over to the children.

Q. Daily work?—**A.** Nothing steady. From time to time the captain of the police gives me cases to prosecute; that is, whenever he feels like it.

Q. What remuneration, if any, do you receive?—**A.** He turns over his monthly wages—\$25. The captain turns this over to me only when he feels like giving me a job. Sometimes I do, and sometimes I do not.

Mr. EMMELUTH. What, if any, personal complaint have you against the agent of the board of health?

A. Nothing personal; nothing outside of what we have already petitioned for. They have delayed matters for a long time.

Senator CARTER. Have you, yourself, suffered from any delay?

Senator KALAUOKALANI. Have you anything else that you require us to hear?

A. I have only one trouble. If we always got our wood in a month's time, it would be all right; we have to wait. I think we have good reason to complain, for we are not getting good flour; it is hard. We get poor salmon, as spotted-tails; not fit to eat.

Mr. EMMELUTH. Have you got any now?

A. Yes.

Senator CARTER. How about the beef?

Mr. EMMELUTH. Is it fresh or tinned?

Senator KAOHI. What is the matter with the flour?

A. It would not be so bad if it was good Golden Gate flour. It

could be cooked in two or three hours. It takes from eight to twelve hours to cook this "White Rose" flour. There would be no trouble if it were not for the wood. It takes so much wood.

Mr. HOOBS. If White Rose were put in Golden Gate bags, it would be good, wouldn't it?

A. I think one can detect the difference by the length of time required to cook it.

Senator KAOHI. That flour that is not good, do you get it always?

A. Yes; we always get it every month.

Senator CARTER. What is the trouble with the beef? Is it fresh beef, canned beef, or salt beef?

A. Fresh.

Q. Is the trouble with other than the beef is poorly handled?—A. is poor quality.

Q. Is it found bruised, or is it badly handled afterwards?—A. It is the handling. Bruised cattle that are landed here are destroyed; they are not used for food.

Mr. EMMELUTH. Tell him that the Government has a hard time to get good fresh beef. How is the tinned corned beef that has been set up, as between the fresh beef and the corned beef?

A. We would prefer to use the fresh meat, as the corned meat is poor. It spoils as soon as we open it, and as we are not provided with salt and pepper, and onions, etc., and oil, it is very hard to change the smell. There is an odor to the can sometimes which is disgusting.

Senator KALAUOKALANI. How about the canned salmon?

A. They are far better than the canned beef.

Q. How about the kalo (taro) and pai'ai (cooked taro)?—A. It is obtained over in Waikolu. We would prefer to use the pai'ai. Now about taro; we have to go over there ourselves and pull the taro. We are allowed 30 pounds each of taro. After pulling off the leaves, leaves about 21 pounds. Also, there is trouble in pulling the taro. Many are without hands, and they try to get taro.

Senator CARTER. Is it free for all?

A. It is not free for all; it is subject to the order of the superintendent. When the taro is ripe the superintendent issues an order to go up and pull it.

Q. Is there enough taro to supply each one that amount, growing up there?—A. Not enough.

Q. Who raises that taro?—A. Some is raised by the lepers; some the board of health raise also.

Mr. EMMELUTH. What are the regulations about planting taro by the board of health? Where does the board of health plant taro? Are the planters separate?

A. Formerly the planting of taro was given to the lepers by the provision of rule 15 of the regulations promulgated by the board of health upon the sanction of the cabinet in 1893.

Q. What land does the board of health plant—who plants it for them?—A. The patches of the board of health are planted entirely by the lepers.

Senator CARTER. Under that provision?

A. The board of health lands belong to the board of health.

Mr. EMMELUTH. Does the land cultivated by the lepers belong to the board of health?

A. We do not own the land. We, of course, plant taro for the board of health.

Q. Why is it they make a division with the board of health, and the board of health claim any share in the taro? What share does the board of health claim?—A. Regardless of this provision, the agent of the board of health is allowed to claim our taro. It is on account of this that we claim that it is not right.

Senator CARTER. How much does he claim?

Mr. EMMELUTH. What proportion do you get?

A. The board of health gets one-fourth, the planter gets three-fourths.

Q. Does the board of health pay those kokuas and those lepers that are planting? Don't they assist them in any way for that work?—A. There is no pay; the only remuneration that comes is the produce—three-fourths.

Mr. PENDERGAST. Whenever a man is planting taro on lands up there are they paid?

A. They are paid.

Q. This is in reference to the patches owned by the board of health?—A. Yes.

Mr. EMMELUTH. How much?

A. Fifty cents a working day.

Q. Is that not the reason why the Government have kept a part of the price? Is not the quarter retained as payment of that 50 cents a day? It is within the member's knowledge that people in Honolulu would plant taro and get it ready to pull and divide half and half with the owner of the land. The Government divides one-fourth and three-fourths, paying 50 cents a day for the labor. Don't you think that it is a liberal arrangement?—A. The board of health pay nothing for the additional one-fourth.

Q. The first arrangement in 1893 was that the planters should plant taro without cost to the Government?—A. Yes.

Q. Is it not the truth that kokuas and laborers would not go to Wai-kolu and plant taro until after this arrangement was agreed to; that is, until the Government would pay them 50 cents a day?—A. It was only during the last two years these new arrangements have been made. Prior to that the lepers had been in the habit of going there and planting taro. Since then a new arrangement has gone into effect.

Mr. PENDERGAST. Is the land cultivated by them land which they claim or land which the board of health furnishes them?

A. There were two or three kokuas to the lepers, the rest to the board of health.

Q. Is it not on the board of health's land that this 50 cents a day is paid?—A. Yes.

Senator CARTER. Is not here two or three owning land? When they are paid 50 cents a day, they cultivate for the board of health? When they cultivate for themselves there is no pay?—A. Yes.

Q. The first are paid 50 cents a day?—A. Yes.

Mr. EMMELUTH. What becomes of the fourth interest that the board of health takes? Do they sell it to the lepers or give it to them?

A. It is taken in this way: When they pull the taro out they are given an allowance of 57½ cents.

Mr. PENDERGAST. Weight for pai'ai?

A. Yes; it is worth 57½ cents.

Senator CARTER. How much is the allowance?

A. Bring down in raw taro 35 pounds; this is 57½ cents; the board of health takes one-fourth, and they get the remainder.

Q. The board of health takes all the taro and pays for it?—A. Yes, we are paid in money.

Mr. EMMELUTH. What does the board of health do with all the taro?

A. They give it to us.

Q. Under the new conditions we are contemplating giving over to the people of the leper settlement all the land. What arrangements would they make if they had it?—A. What we want is this: We want men to plant taro; to make the taro into pai'ai. Let them come themselves, pull and pound and cook into pai'ai. We would get it in that way. We remember the speech of the Hon. Senator Kalauokalani, "Little is the sea of the Arctic," that was in regard to the pai'ai. It is too small.

Q. Is it sufficient that they get 21 pounds of poi (the principal food of the Hawaiians)?—A. No; it is not enough.

Q. If we give the settlement to these people, could they manage so that these people that plant over there would give them 25 pounds of pai'ai?—A. Yes; we could do that.

Mr. PENDERGAST. If the management were to be placed in their hands, would you make such rules as would protect things in the way you now desire?

Senator CARTER. What are the terms in the settlement between the producers of pai'ai and the nonproducers of pai'ai?

Mr. EMMELUTH. If the settlement were self-governing, would you seek to establish an equality?

Senator CARTER. Would you protect those who are unable to plant?

A. It is still in vogue. We would take care of those who can not take care of themselves.

Mr. EMMELUTH. For each 150 residents at the settlement you would have one representative on a board of control as far as the local management of the settlement went, and they would have charge of the matters; they would make such regulations as would make it in the power of the well to take care of the people unable to work.

A. It can be done. Of course such a thing could not be carried out by such minds as are hollow, but it takes a mind which is broad like mine.

Mr. HAAHEO. When you say that a part of your product is claimed to be a share of the board of health, is that old rule still in vogue?

A. It is still in vogue.

Mr. EMMELUTH. Can a rule be in vogue when in practice on both sides it has been broken?

A. We believe the rule is still in vogue. We are brought up under these rules for violating them. Senator Kalauokalani will remember instances where people have been tried here when he was a judge. They were tried under the rules.

Mr. PENDERGAST. When rules are printed, new regulations issued—are the settlers here supplied with the regulations?

A. Yes.

Q. If that is the case, there has been no new regulations since the issuance of the present regulations.—A. No new regulations have ever been issued.

Q. Now, in regard to the persons who are unable to go to Waikoloa

for taro, who goes for them?—A. If he happens to be a man of any means, if he has got any money, he goes and buys flour and rice; but he can't stand that, as his eyes will be bulging out.

Q. Would it not be best to send wagons up to bring the taro down?—A. That would be the best thing.

Senator CARTER. Can you get wagons up there?

A. Only as far as Kalawao. This is the reason why we wanted the committee of the legislature to come here. We want the kokuas to help pull our taro.

Mr. PENDERGAST. We want to help you all we can.

Senator CARTER. If you can't get taro you can then buy rice, etc., if you have any money?

A. We don't purchase it; it is an allowance. If we don't take taro we can get flour and rice and cook it ourselves.

Q. Both the taro and the flour are given to you?—A. Yes.

Senator KALAUKALANI. What is the allowance of flour or rice?

A. Twelve pounds of flour.

Q. Is that sufficient for a whole week?—A. I believe that it is sufficient; we have no reason to complain; all we want is to get good flour and not poor stuff.

Q. Is this 12 pounds of flour equal to 21 pounds of pai'ai?—A. We prefer the pai'ai to the flour.

Q. How much rice?—A. Nine pounds a week. This is not sufficient. If we received 12 pounds it would be all right.

Q. What is the meat allowance a week?—A. Seven pounds. This includes flesh and bones. There is some very large bones found in the knee. It takes away 4 pounds for bones and leaves 3 pounds for meat.

Q. What is the desire of the lepers in regard to the allowance of meat?—A. It is not sufficient for them. If it were 10 pounds it would be enough.

Q. About the flour, how much flour would you prefer to have?—A. Twelve pounds is all right as long as it is good quality. Rather have 12 pounds of rice.

Q. Have the children any less?—A. Yes; all the children born of leprous parents only have half a ration.

Mr. EMMELUTH. Other children have full rations?

A. Yes. There are quite a number of children who have been running ten years on a half ration. They get 7 pounds of meat. Children get 3½ pounds. The result is as quick as their own ration is run (finished) they come and double up with their mother. Before the next provision day comes around there is nothing left.

Senator KALAUKALANI. Are all you people here unanimous in regard to the increase of the poi ration to 25 pounds?

(Beretania Hall, where this inquiry was being held, accommodates something over 200 people comfortably, and it was filled to the doors.)

A. Yes (by the entire assemblage).

Q. Are you unanimous in regard to 12 pounds of good flour?—A. Yes (by the entire assemblage).

Q. Are you unanimous in the demand for 10 pounds of beef?—A. Yes (by the entire assemblage).

Q. Are you unanimous for having 10 pounds of rice?—A. Yes (by the entire assemblage).

Q. How about crackers?—A. We get 8½ pounds of hard sailor bread. It should be 12.

Q. How about sugar?—A. We get 1 pound a week. At the present time we get 1 pound of sugar, or we can get poi and sugar. We want poi and sugar, too.

(To the general audience):

Q. What the committee believe is that it would be safe to give you 1 package of tea and 2 pounds of sugar every week.

(Several answering): That is all right.

Mr. EMMELUTH. Would you think it should be 10 pounds a week if they gave you good beef?

Mr. PENDERGAST. As we have come here to listen to your complaint we wish you to confer among yourselves. Get ready your answer and have a mass meeting.

Senator KAOHI. I believe that if you have selected a committee that this committee can express your views in your hearing. If all the things are true, it is only for you to verify them. That would simplify matters. As was stated, we have come here to listen to you. You can listen to the views of your committeemen, and if they express your views and express your wishes here it will save time.

ROBERT KAAOAO, called and sworn.

In addressing this committee (of the legislature) I am representing a committee of residents and voters, of which Makakoa is one, and of which nearly all are present.

Senator KALAUOKALANI. In regard to the cloth ration mentioned in your petition—item No. 5?

A. We would rather have cash than the cloth. If not, then half cash and half cloth; but we don't like that. There is some stuff in the store that is old and moldy. If we had the cash we could do better and get good material. Another thing is the price of goods. It seems this store is kept for a purpose which you know; I don't want to mention it. Very high prices are charged here. We would rather send a little money to friends for good goods.

Mr. EMMELUTH. You are under oath. We want to know all about that store over there, and anything else in connection with it.

A. It is this: A suit of clothes is priced at \$8. Our cloth allowance for six months is \$5. We can't buy a whole suit for \$5. When we want to take only a portion, the pants and then the coat, that is not permitted. We are forced to do without this cloth.

Q. As to the prices of other things, what are they selling for at the store?—A. Canned salmon is 15 cents. In Honolulu we can buy it two for a quarter.

(Mr. Wilmington, the storekeeper, interrupts, and is told that he will be given an opportunity to be heard later.)

Mr. PENDERGAST. Why do you ask that the board of health should bury the dead—item 10 of your petition?

A. In regard to this question, would answer this: We are charged in two ways—first, when a leper dies, if it is known that he is possessed of any valuables—such as a horse or other things, which I may have given to some one else—the superintendent of the board of health requires this friend who has received these goods or valuables to pay the expenses of his burial; second, if it is known that I belong to one of the benevolent societies, of which there are two formed for the purpose of saving and for taking care of graves, the society is compelled to pay the expenses of the burial. We believe

that being here under the care of the board of health, they should pay for digging these graves.

Senator CARTER. Does the board of health pay for these things now?

A. At present if a man has means or any friends, or helpers, the helper who knows of his death comes to the superintendent, and it costs \$2 for every grave.

Q. Who pays the \$2 if they have no money?—A. The board of health.

Mr. PENDERGAST. Does the board of health supply coffins?

A. The board of health always have coffins.

Q. How many cemeteries here?—A. Two—one at Kalaupapa and one at Kalawao.

Q. Are these cemeteries under the management of the board of health as well as these societies?—A. At all these graveyards you will notice that those graves without a fence are those taken care of by the board of health. Those inclosed with a fence are under the care of the societies. We join them for that special purpose. We do that to keep the cattle from walking over them.

Senator KALAUOKALANI. Can you show us some persons who have been brought here as lepers who are not?

A. Yes.

Q. Give us their names.—A. One, J. Kanani (k), male; 2, J. H. Imihia (k); 3, J. K. Waiamau (k); 4, Charles Travis (k); 5, Kapahu (k); 6, Silas Carter (k); 7, Ane Makanoë (w), female; 8, Ane Gaiser (w); 9, William Kaka (k); 10, Mooni (w).

Q. Let us have the names of all those who have children, born of leprous parents, who are not lepers.

Senator CARTER. Let your committee of fifteen give us the names and send them in to us.

A. Kapiiho.

Q. In regard to item 2 of your petition. Do the people here have to pay any freight?—A. The freight is not paid by the lepers here, but it is paid by their relatives. They have to pay double fare; no captain will take any freight from here.

Q. Do you have to pay any freight on the stuff you bring when you first come over here?—A. The board of health pays that. The reason we make this request is that people residing in Honolulu who have anything to send go and get a permit from the board of health and the board pays for the expense, but if they live over to the other islands they have no one to go and do that for them. They have to pay freight to Honolulu and then freight from Honolulu back here. The board has nothing to do with it.

Q. You want to make everybody "like a like" (on the same footing)?—A. Yes.

Mr. PENDERGAST. In paying this freight from Honolulu to Molikai, can not anyone go to the board of health and get a permit issued to them?

A. Yes.

Senator CARTER. In regard to item 3 of your petition—"that the board of health paint and whitewash all of the buildings occupied by the lepers"—I should think that it would pay to paint them for the preservation of the buildings.

A. The board of health pays for the painting of the buildings occupied by the board of health, such as the store, but all those buildings

occupied by the lepers have to be painted and whitewashed by the lepers.

Q. Do they give you the whitewash or paint?—A. It is true the board of health supplies us with material, but there are persons who are unable to use their hands; there are some who have no hands. They are obliged to pay 50 cents per day to the persons who do the work. As the board of health owns these buildings, and the board of health that brought us here, it seems to me that the board of health should do all that.

Q. In regard to item 4 of your petition—"that the children born of leprous women be given full food and fish allowance, as well as wearing supplies, not to exceed the value of \$10 a year." The children born here of leprous women get only half a ration?—A. Yes.

Q. In regard to item 7, "That the letters of the lepers be mailed free of postage." Do you not know that this is a matter for the United States Government and that we can not do anything with that?—A. It is just for this reason that we ask that the cloth allowance be made in money. We require postage stamps and we have no money to buy them with.

Q. Request is not that you be given Government envelopes that do not require stamps upon them?—A. We want to send our mail without stamps, as before. However, we know this is a Federal matter, and we leave it to you to find the best way out of it.

Q. In reference to item 9 of your petition, "That the importation of awa into the settlement be permitted, but not to exceed two stumps at one sending." Would that be given only to those who had become addicted to the habit, or to those who have not the habit?—A. The reason why we ask is this: Here in the settlement are lepers selling awa. Persons addicted to the awa habit do not disturb the peace of the community, but they sell it at a high price. The man who formerly had the awa license for the island of Molokai used to send us four stumps for a dollar, which would last for four full days. That will give us four nights of joy. Now we can only get one cupful.

Q. Who is raising it?—A. A leper.

MR. PENDERGAST. Is awa to the awa drinker what tobacco is to the tobacco user?

A. Yes.

Senator CARTER. Oh, yes; I can appreciate that.

MR. EMMELUTH. How much is used here?

A. There are quite a number of people here who have the drinking habit before they come here, and the habit still remains after they get here.

Q. Would the habit not be much increased if you got it from Honolulu?—A. It is not intended to bring this awa out in large quantities for lepers to make money on. If a little is sent that is enough.

Q. How much ground is given over to cultivation of awa now?—A. Three or 4 acres, perhaps. This awa has a good effect on a person who takes a cup of it, as awa does not make a tendency to fight, does not arouse one's fighting qualities, whereas the "swipes" which is drunk here usually raises trouble, often between husband and wife. When a man is drunk with awa he simply wants to go to sleep.

Senator KALAUOKALANI. Then you are in favor of the importation of more awa?

A. Yes.

Mr. EMMELUTH. If we give you government of your own, could you control the manufacture of swipes, or stop it?

A. It can be done. If they elect me for judge or sheriff I will attend to it.

Senator CARTER. In regard to item 11 of your petition, "That an appropriation be made for the erection of a home for the sons of lepers." Do you want this home built here or elsewhere?

A. Elsewhere, so that the children can get a proper education.

Mr. EMMELUTH. Ask the people who have children here if that is their manao (wish).

A. Yes (by the entire assemblage).

Senator KALAUOKALANI. It is your desire to have a home for clean children. Are you unanimous?

A. Ae (yes) (by the entire assemblage).

Senator CARTER. In regard to item 14 of your petition, "That a law be enacted providing for the examination of clean lepers biennially." Have the clean lepers here ever been examined?

A. That is what I have seen for years. As soon as the board of health arrives they get onto horses and they ride around and visit the homes. I think there have been no examinations made.

Mr. PENDERGAST. Was the board of health or only a few members that were simply sent up here by the board of health to visit? How about the committee from the legislature which was sent here?

A. If the board of health came with the members of the committee and called here the examination was made, but it was not full, only slight.

Senator CARTER. Are there any lepers here who might have become well?

A. They have been here ten years now and are well. They have been examined, but the result I do not know.

Q. There have been examinations, then, from time to time?—A. Very seldom that has been done.

Senator KALAUOKALANI. Are those patients who have been treated by Dr. Goto alive?

A. They are still alive and well.

Senator CARTER. In regard to item 25 of your petition, "That lepers who have no horses be allowed to import one horse each from anywhere outside." If every leper got a horse here, would there be enough pasture for them?

A. I believe there would be sufficient fodder.

Mr. EMMELUTH. In report I see that there are over a thousand animals here now, and only 900 patients and kokuas. In this case, who do the animals belong to?

A. There are a thousand animals, but that includes horses, cattle, and jacks.

Q. We hope to give you self-government possibly by the 1st of July; after that you can arrange all those matters between yourselves. A man who had animals would probably have to pay something for the animals' pasture.

Mr. PENDERGAST. In regard to the oil question, item 23 of your petition, "That each leper be supplied with 1 quart of oil once a month."

A. Why we ask for oil is because at the present time in a cottage of two rooms there may be four patients in one room and one in the

other. The four get only 1 quart, and the person in the one room gets the same amount. We believe the allotment should be 1 quart a month to each patient, regardless of the number of people in a room, the same as every patient gets one bar of soap.

Mr. PENDERGAST. Is not one lamp sufficient for one room? In a room, no matter how many persons there may be, one lamp should give sufficient light for the room. Would it not be fair to increase the light supply for each room instead of for each patient?

A. That is better; that is all right.

Senator KALAUOKALANI. Then you think you are going to get all these privileges that you are asking for now when you get the right of local government after July 1?

A. Yes.

T. K. NATHANIEL called and sworn:

Mr. EMMELUTH. From your own personal knowledge, what is there in the actions or work of the agent of the board of health that you consider is not sanctioned by law?

A. I desire an interpreter so that all can hear. I can speak English, but I want all the people here to understand. From my own personal knowledge, and my connection here, I have not known of any violation of law concerning this settlement by the agent, but have known of him striving to straighten out things when he was here during the week, and on his return of having striven to remedy the difficulties.

Senator KALAUOKALANI. Is this generally true?

A. Yes (by the crowd).

Mr. Emmeluth examined witness according to the preliminary questions, as follows:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Forty-three.

Q. Sex?—A. Male.

Q. How many years a resident of the settlement?—A. Seven years. I have been in segregation.

Q. Are you married or single?—A. Married and settled down.

Q. Were you married before or after your arrival at the settlement?—A. Married my present wife in the settlement; she is also leper.

Q. How many children born here?—A. We have no children.

Q. Have you any resources outside of the board of health?—A. No funds to draw from.

Q. What is your daily work?—A. School-teacher here.

Q. What remuneration do you receive?—A. Twenty dollars a month.

Mr. EMMELUTH. Where do you get your pay, from the board of education or the board of health?

A. From the board of education.

Q. Have you ever had to pass the examination by the board of education?—A. No.

Q. How many children are you teaching?—A. Fifty-one.

Q. Are these children lepers or both clean and otherwise that come here to school?—A. Yes.

Q. Are there also a number of children brought here from the outside as lepers?—A. Yes.

Q. Is there more than one school in the settlement here?—A. No.

Q. How many hours do you teach a day?—A. From nine to twelve.

Q. How many children in the settlement who are of school age and do not attend school?—A. Very few.

Q. At what age do the children drop out from school? Do they stop at 15?—A. Yes; but if they prefer to stay along they are quite welcome.

Q. What effort is being made to teach these children some work by which they can earn a living?—A. The only things they learn here is reading and writing and a little calculating.

Q. Is the school conducted in English or in Hawaiian?—A. In English.

Q. Do you think you could introduce mechanical training, beginning first in a small way?—A. Yes.

Q. If you had one or two sets of carpenters' tools, of a character suitable for training boys, could you teach them simple lessons evenings?—A. Yes; I think so.

Q. So far as you know, what would it add to the expense for such a system in the settlement? Would you need more school room?—A. I believe additional room should be made to the school building, in carrying out suggestions which you deem advisable.

Q. How long have you been teaching?—A. About three years.

Senator KALAUOKALANI. Is there an assistant superintendent and an agent?

A. Yes; there is.

Q. Have you anything to say in regard to his method of conducting his affairs here?—A. I think there is nothing for me to say as to his method of conducting business here, only we would deem it well to cancel this arrangement. We think we would do better to manage our own affairs. As it is when there is any trouble, there is only an assistant here, and when he returns the assistant reports to him and he refers it to the board of health, and we never get any satisfaction. There is another matter in regard to the matter of pipes. These pipes are purchased by the lepers themselves. If any one is dead, the assistant would lay claim to the pipes. But we made complaint about this. Now, it is left alone. We claim that as the pipes are put in by the lepers they are not the property of the board of health.

Mr. EMMELUTH. Where is the school located?

A. In Kalaupapa.

Q. How do they get over from Kalawao?—A. Walk down.

Q. Of the 50 children, how many come from Kalawao?—A. About 20, or more.

Senator KALAUOKALANI. Have you anything more to say?

A. You can ask questions.

Senator KAOHI. In regard to pilikia (trouble) about flour and rice?—A. All that has been stated is true.

Mr. PENDERGAST. Has any legislative candidate come here to lecture?—A. David Kakaulelio was the only one.

Q. You know which side he represented?—A. The Republican.

Q. It was here he held a meeting and nobody came?—A. There was also a meeting down at the wharf of candidates of the legislature who came in a body.

Senator KALAUOKALANI. When was it, the date?

A. It was before or during October.

Q. Was he here during election day?—A. It was the day of election no, it was the day before. It was when Prince David was here.

Senator CARTER. Do I understand the Republican candidates were allowed to come and the Democratic candidates were allowed to come but the Independents were not?

A. We do not know about the granting of such a permit. Only one person was permitted here. David Kahaulelio was the only person here. The others spoke from the wharf.

Q. Was there any petition gotten up here to have candidates come which was ignored by the board of health?—A. I do not know of my own knowledge; I heard the Home Rulers had made application and were refused.

Mr. EMMELUTH. When this hall was gotten for political purposes was any rent paid for it?

A. I don't think there was any rent charged by the trustees of this hall, as it is for public affairs and for anything the people want; they make application to the board of trustees and they grant it.

Q. Who are the trustees?—A. L. Way, J. Waiamau, H. Dragnet D. Pierce.

Q. How are these trustees elected?—A. I don't know. Perhaps to the board of health. I don't know.

Senator CARTER. Aside from the things mentioned in this petition have you any complaints to make yourself? Have you had any discussion of these complaints and the advisability of the same?

A. We have not discussed that matter, because in everything of this nature there was much expression made that we should leave it to the Territorial legislature, as we are wards of the government.

Q. If you are given local government, would you be willing to evolve the details?—A. We have had no discussion of the question but I think we would be willing to.

The committee to take testimony here adjourned until 12.30 of the same day, to meet in the same place.

AFTERNOON SESSION.

Present: Senator Kalauokalani, chairman, and Senators Carter and Kaohi.

R. M. KAAOAO, chairman of the committee of fifteen, was called and sworn.

Preliminary examination by Senator CARTER:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Thirty-six.

Q. Sex?—A. Male.

Q. How many years have you been a resident of the settlement?
A. I have remained five years in the settlement.

A. Are you married or single?—A. Single.

Q. How many children born here?—A. I had children, but they are dead; they were not born here.

Q. Have you any resources outside of the board of health appropriation?—A. None.

Q. What is your daily work?—A. I do a little farming when the occasion arises or anything I can.

Q. (Not asked.)

Senator CARTER. Are you able to earn any money at all?

A. No.

Q. Have you heard the questions put to the other witnesses this morning?—A. Yes.

Q. Were the answers correct?—A. Yes.

Q. In regard to one you wanted to make some correction. Do you remember what it was?—A. Yes; I remember. With reference to a petition, it has been stated that one was written here and sent out for a permit to allow a representative candidate to come here.

Q. Was it sent to the board of health and by them ignored?—A. Yes.

Q. Do you know whether there was any request for Republican speakers by the people here?—A. No; I do not know of it.

Q. What proportion of the people here are able to do manual labor? Out of a hundred are there ten or fifty?—A. I believe there are about ten to twenty in every hundred.

Q. If the plans are able to be carried out giving local option entirely here, do you believe that those who are sick can be taken care of by those who are well?—A. It is my belief that this is possible.

Q. What do you think of the question of more horses here, of every leper having his horse? Is there sufficient pasturage for them in summer?—A. It is my firm belief that there is sufficient pasturage here.

Q. In regard to the list given this morning. One of the statements was that they had been examined, but he did not know the results. Do you know? During the four years you have been here, how many opportunities has there been to be examined?—A. It is my recollection only once that examinations have been made.

Q. At that time, will you describe what was done? Was there only one doctor or several doctors?—A. There were four or five doctors. A number of people were examined at that time by these four or five physicians. I think there were about ten, but there were only four who were pronounced clean.

Q. Were they released?—A. They are still here.

Q. After they were pronounced clean by the physicians?—A. That is my information.

Mr. PENDERGAST. At the same time these people have been pronounced by physicians diseased. That was the reason they were sent here.

Mr. HAAHEO. I understand that after the examination by the physicians they were not released at all?

A. They are still here.

Senator CARTER. Can you give the names of these four?

A. J. K. Waiamau (k.), J. H. Imihia (k.), Kapahu (k.), McMillan (w.), Kanani (k.).

Senator RUSSELL. Are they here in the settlement?

A. Waiamau is; also Ane Gaiser (w.) belongs to this list.

Q. Are there any others who claim to be nonlepers?—A. Yes.

Senator RUSSELL. If they will come here to-morrow at 8 o'clock, I will look at them all who claim to be nonlepers.

Mr. PENDERGAST. In regard to these men who are, not lepers and have been so pronounced by the examining physician, are they remaining here of their own volition or are they detained here by the board of health?

A. They are remaining by detention of the board of health.

Senator CARTER. Is there anything further you want to offer yourself?

A. Yes.

Q. Go on.—A. Another very important thing which has been overlooked and is necessary to be attended to is the matter of the Pali road (mountain trail), which the storm has nearly washed out.

Senator CARTER. What is the use of that road?—A. The mail is carried over that way from here to the other side and from the other side to here.

Q. Since the mail has been under the Federal department has it been better service or poorer than before?—A. Well, it seems to me that the majority here are more pleased under the present system. In former days we had our money-order office at Kaunakakai. At the present time we have it right here. We don't have to wait now to get our money.

Q. How often does the mail arrive here now that does not come over the Pali?—A. Very seldom. Letters are being carried over the Pali once a week, and the same way going back.

Q. Now the Pali road is out, what is the inconvenience you are put to? How often does a steamer come?—A. This (the steamer that brought the legislative committee) is the first time mail has been brought here for three weeks by vessel. In former days, only when the superintendent came or went did a steamer stop. Then everything had to come over the Pali.

Q. How often do supplies come here?—A. A regular boat comes here.

Q. Is there anything else besides the Pali road that you would like? Would you like to have the legislature go over to the Pali and investigate?—A. Yes.

Q. Anything else you can suggest?—A. At the present time it is very disagreeable to carry mail by the Pali on account of the bad way. It requires two or three persons in some places to pass this mail. It has to be passed from one to another, as it is impossible for the man carrying the sack to get along the trail and carry the sack too.

Q. Are you a Catholic?—A. No.

Q. What do you think of the work done here by the Sisters; do you approve of it or not?—A. I don't think I quite approve of it.

Q. I would like you to state plainly what you base your reasons on.—A. The objection I have is this: Very often some friend of those who are in the home want to see them and ask to be permitted to call upon them, and refusals have been often made, and when anyone dies the friends who are out here wish to see them, but the Sisters object to the friends of persons who are deceased viewing the remains.

Q. How about the work over in the settlement, where the Fathers are; is it different?—A. It is different than what is done here in the home for women, because over there friends are permitted together, but in the women's home friends are not permitted to see the bodies.

Q. Do you think any person in the Bishop Home are kept there against their will?—A. No. If the women want to stay out of there they can come away.

Senator KALAUOKALANI. Is there a superintendent here?

A. Yes.

Q. Does this superintendent employ laborers here?—A. Yes.

Q. How many?—A. I do not know.

Q. Do you know whether any account is being kept of receipts and expenditures here in the settlement?—A. I believe there is an account kept.

Q. Is there an office?—A. Yes; there are books kept. We have a system or method of keeping these accounts. There is a general account of those employed in grubbing lantana. There are three men to a luna (overseer), and sometimes one luna to two men.

Q. What wages do these lunas receive?—A. The usual wages for a luna are 75 cents to \$1 a day.

Senator CARTER. And 50 cents for the ordinary man?

A. Yes.

Q. Do the lunas who work for 75 cents work at all or stand around and boss?—A. No. They do not work themselves.

Senator KALAUOKALANI. How many lunas under the superintendent here?

A. I do not know how many lunas are employed here, but there are lunas; maybe below ten or above ten.

Mr. PENDERGAST. Do you think one luna sufficient for two men?

A. According to my own observation it is right to have lunas, but they do not need one luna for two men; if it were five or six men it would be reasonable.

Q. Do the gangs of two or three men work together or are they separate?—A. Separate; they all work separate.

Mr. PENDERGAST. Is it possible for one luna to see the work of men who are working here and those who are quite far away?

A. That can be done, but the way the things are run by the assistant superintendent we have several lunas. That is where the extra expense comes in.

Senator KALAUOKALANI. How many stores are there?

A. One main store here and a branch store in Kalawao. Three coffee shops—two here and one in Kalawao. The coffee shops belong to the lepers themselves. The store is owned by the board of health. These coffee shops are not licensed.

Q. Why is it that other people have not been allowed to open coffee shops here?—A. It is due to the board of health that there should be only these coffee shops. The board of health thought that that was sufficient for the wants of the settlement.

Q. Are these coffee shops limited by regulation of the board of health?—A. There is no regular rule, but the rule seems to be that it was resolved by the board of health to carry this out. And that is what I call a rule.

Senator BALDWIN. Who owns the coffee shops?—A. Willie Bruns and Ahlo & Co.; the one at Kalawao is owned by Robert Holt.

Senator CARTER. Are the charges in the coffee shops reasonable?—A. Ten cents a cup.

Q. Do you get bread with the coffee for 10 cents?—A. Yes.

Q. How about the stores of the board of health in reference to the prices?—A. I think the prices are rather stiff.

Q. Have you in mind any one article?—A. About two months ago I went to purchase Irish potatoes. I was informed they were selling for 5 cents a pound, so I did not take any.

Q. How about cloth?—A. If you ask about cloth, I will say that it is high priced.

Mr. HAAHEO. How about tea? What is the price?—A. The usual price is 5 cents a package; sometimes it goes up to 10 cents.

Senator CARTER. What is the weight for 10 cents?—A. I don't know.

Mr. HAAHEO. Is a package sold for 5 cents reasonable?—A. That is the cheapest price—at the price it is selling at—5 cents a package.

Senator KAIUE. These statements you have made, have you sworn to them?—A. Yes.

Q. Did you state before this committee about all that you know concerning the petition which the committee you were chairman of presented to the legislature?—A. I answered as I was requested by the committee in the examination.

Senator RUSSELL. What do you know about the people that plant taro? Under what conditions have they planted this taro, and under what conditions are they now planting it?—A. These people who are working planting taro have petitioned to have it for themselves when they get it. This is the way they prefer to plant taro.

Q. What becomes of this taro? What do they do with the taro when grown?—A. I don't know exactly what allowance of taro. I think it is 35 pounds. That is the allowance of taro. The board of health takes this taro and gives the lepers their allowance from the taro.

Q. Under what conditions do you get the board of health land upon which you plant the taro, and under what conditions do the board of health pay for the taro?—A. In regard to this taro, as I understood when I came here, and the way it is now in the settlement at the present time, persons who desire to plant taro go and get a piece of land up in the valley and they can then plant their taro. Three years after I came here I was informed that the board of health had made a rule whereby they took away a fourth of every dollar made by the leper.

Q. Was it then upon a different condition upon which the land was given?—A. I don't know, except this, that what is written in the rule given to us by the board of health is in rule 15.

Senator KALAUOKALANI. Is your statement, therefore, the same upon the points stated by the other witnesses?—A. Yes; in the principal points.

Q. You have nothing of importance more to state outside of what is already given?—A. No.

Senator KAIUE. You were chairman of the meeting held for the consideration of this petition?

A. I was not chairman of that meeting, but was made chairman of the committee. The chairman of that meeting was Mr. Makakoa.

Q. Were there any minutes kept of the meeting that was held?—A. I believe that the minutes of that meeting are in the hands of the chairman of that meeting or the secretary, George Kanikau.

Mr. PENDERGAST. Did you see, on election day, any runners for the election of representative on the Democratic ticket, representative of the Kuokoa (Independent—Home Rule), working for their respective parties?

A. Yes.

Q. Could you furnish the names of the lunas for the respective parties?—A. Yes, sir. For the Republicans, J. L. Wilmington and James Prosser; for the Democrats, W. K. Kalua and Andrew Auau and John Unea, and for the Republicans, Willie Bruns.

Q. How about the Independents?—A. The runner for the Independents was Robert Kaaoao.

Q. Were you alone?—A. I was the only one.

Mr. PENDERGAST. Q. After the election, what was the result—which was the strongest?—A. The three were pretty strong.

Q. But who was the strongest?—A. I guess the Republican party was the strongest, because the senator for Maui was elected, Mr. Baldwin. He was the head of the ticket that was successful here.

Senator KAIUE. Have you anything more to say?

A. No.

Senator CARTER. Which of the three parties would carry the place now?

A. The Home Rule.

Mr. HAAHEO. How about section 15 in your petition, "That an expert on leprosy be procured for the cure of this dread disease." Being one of those who took part in that meeting, would you now state how large the attendance was at that meeting?

A. It had been a cold day like this, and there were not many who attended the meeting. I should judge there were about 30 people only who attended the meeting.

Gentlemen of the committee, it is now ten years that I have been in the settlement, and in the many expressions on all public matters of health here it was always considered necessary to have at least 20 people. The meetings usually ranged from 10 to 30. This is the number that was at our meeting. There were 20 people at the original meeting. That is why we held another meeting and invited all to attend and help draw up this petition. If you have any doubt about this petition representing the sentiment of this community, I would suggest that you have only to ask the house here and they will answer, and they will satisfy you that we represent the unanimous sentiment.

Senator CARTER. Were there as many out at that meeting as there are here now?

A. It was not as large as the meeting held this morning or this afternoon.

Q. How many people were out this morning, would you think?—A. Fully over 200 people present here.

Senator KAIUE. Didn't the committee keep any minutes of that meeting? Didn't you have any secretary?

A. George Kanikau was secretary.

Senator KALAUOKALANI. Will the committee who started this petition show by standing that you approve of everything as stated in the petition which you have presented to the legislature?

(The 12 members of the committee of 15 who were present in the hall here arose and signified their full approval of the petition as presented by them to the legislature.)

Senator KAIUE. Has there been any minutes kept whereby you give up these prayers?

Mr. Makakoa, who was chairman of the meeting which drew up the petition, arose and stated that on inquiry he found that no minutes had been kept. He stated further: It was I who presided at that meeting. Mr. Kanikau was secretary. There were a hundred different subjects brought up for discussion, and we sifted the whole matter down to the

prayers which are in our petition. Any unnecessary prayers have been thrown aside. You have our petition as we presented it.)

Senator KAIUE. Gentlemen of this committee, it would be best for you to make a rule, when you want to make requests of the legislature, that you keep your minutes so that when investigations are made you can have something to refer to.

AMBROSE K. HUTCHISON called and sworn.

Preliminary examination by Senator CARTER:

Q. Are you a leper or kukoa?—A. Leper.

Q. Age?—A. Forty-two.

Q. Sex?—A. Male.

Q. How many years a resident of the settlement?—A. I have been here about twenty-two years.

Q. Are you married or single?—A. Married.

Q. Were you married before or after arrival at the settlement?—A. I was married since coming here.

Q. How many children have been born to you here?—A. No children.

Q. Have you any resources outside of the board of health appropriation?—A. I have some money of my own.

Q. What is your daily work?—A. Any occupation that I can do to occupy my time—anything in the shape of work. I do anything in the shape of work.

Q. What remuneration do you receive for the labor?—A. I am not paid in money; I simply work for myself.

Q. You had other resources or property which you owned before you came here?—A. Yes; real estate.

Q. Have you read this petition?—A. No.

Q. (Reads:)

At a public meeting held in the Beretania Hall held at Kalaupapa, Molokai, February 20, A. D. 1901, it was resolved that the accompanying petition be placed in the hands of the fifteen members and praying:

1. That the local management of the settlement be given, by a law to be enacted therefor, to the persons segregated here.

Q. You have heard the first one; are you in sympathy with that?—A. Yes; I can say that I am in favor of that idea.

Q. (Reads:)

2. That a liberal appropriation be made to increase the water supply of the settlement.

A. I do not approve of that because I believe that there is sufficient water supply here.

Senator KALAUOKALANI. What would you think of water being brought over here from Waikolu?

A. I believe it is unnecessary, but if it is the intention of the legislature to go to work and carry out that idea, well and good. As far as my personal opinion goes I think there is sufficient water here for the use of the settlement.

Senator CARTER (reads:)

3. That a steam vessel be purchased for the board of health to be used for the transportation of freight from the other islands to the settlement.

A. I don't believe the government should take up that subject.

Q. (Reads:)

To the legislature of the Territory of Hawaii—Greeting: We, leprous persons residing at Kalaupapa and Kalawao, island of Molokai, Third representative election district, precinct one, through our committee respectfully pray as follows:

1. That the board of health be prohibited from claiming any share in the taro produced by the farmers at Waikolu.

A. In respect to that I would refer the committee to rule 15 of the regulations promulgated in 1893 by the board of health, with the approval of the cabinet. I believe that would be the best thing.

Q. (Reads:)

2. That the board of health be made to pay for the carriage of freight for the lepers sent from all the islands of the group.

A. In regard to this, let me explain. There are two branches in reference to this. It comes in one way and it comes in another. It would be a good thing in this way if the goods sent by friends for the personal use of lepers here, then the board of health should pay the expense of the freight of that package. Such was the rule laid down by Hon. H. A. P. Carter when he was attorney-general of the Republic of Hawaii and ex officio president of the board of health. There are other goods coming from the other islands for the use of lepers in trading. Now, I don't believe it would be right to make the government pay the expense of bringing these articles here for trading purposes.

Q. (Reads:)

3. That the board of health paint and whitewash all the buildings occupied by the lepers.

A. I believe this is not good at all, for this reason: Because there are persons who are strong and able-bodied who can clean their houses and keep their premises in good sanitary condition.

Senator KALAUOKALANI. How about persons who are unable to do manual labor?

A. There is a rule that the superintendent can employ laborers to do the work for persons who are unable to do that work themselves.

Mr. HAAHEO. Is that service performed by the superintendent paid for?—A. Those who do the work are paid for it.

Q. Who pays them?—A. The board of health pays for it.

Senator CARTER (reads):

4. That the children born of leprous women be given full food and fish allowance as well as wearing supplies, not to exceed the value of \$10 a year.

A. I am in doubt as to the advisability of approving that. This is the reason: I don't believe it is right to give such children full rations; or if they allow them this and grant them full rations, there will be time coming when these children as they grow up will demand more. This is a very serious question. If the legislature gives them this, they will have to face a day when it will have to be limited.

Q. Why, because there are so many children?—A. Yes; I say on account of the number of these children. I know a number of lepers who have six or seven nonleprous children who are receiving half rations. This can be proven by asking the proper officials in charge of those matters.

Senator KALAUOKALANI. What is your opinion; had we better have or not?

A. I leave that to the legislature to do what they deem best. The only thing that I look at is the expense. There are about twenty girls who should be taken care of by the Girls' Kapiolani Home. If taken there they would be trained. When they grow up they would have more character, but the parents love their children and don't wish to part with them. In the long years I have been here—and I have been here twenty-two—I have seen children, boys, who were neglected there being no home for them. They are left here without any attention, and as they grow up they become hoodlums. On account of such hoodlums I was compelled, when I had the power, to drive them out from the settlement, because I could not stand the noise.

Senator CARTER. Why were you removed?

A. I left the work in 1897 because of certain reasons which I do not care to be brought up.

Q. (Reads:)

5. That the cloth allowance to the value of \$10 be made in coin.

A. I don't think that this is proper. They will expend the money wastefully. Under that allowance the government has provided each leper with cloth to the extent of \$10 in value, and that is supposed to be sufficient to do during the whole year. Up to about 1890 it used to be the custom that a leper when he drew his cloth allowance would transform that into any other article of value that he wanted at the store. If that allowance should be turned into cash by the government and they have the cash, it is certain that it would not be used properly but it would be expended for other things—things that could be of no use to them.

Q. (Reads:)

6. That the minister of the interior, with the approval of the board of health, permit the erection of stores other than that of the board of health.

A. The intention by that is to do away with the board of health store. I think this is a very important matter, but I think we cannot interfere with it. I believe that it is best for the legislature to decide.

Q. If we take away the board of health store, the legislature should see that the other stores are good ones.—A. Yes; such as would supply the demand.

Q. Are there any lepers here who can operate such stores?—A. I believe that can be done. I think they can get the people here together and form a cooperative company.

Q. (Reads:)

7. That the letters of the lepers be mailed free of postage.

A. As regards this in former days we had our allowance. There was provision made for the letter from here to be sent free. Since then was made a Territory and part of the United States and the Federal postage rates extended here, we had to submit to the situation when it came. We have to expect that. We can't do otherwise.

Q. (Reads:)

8. That each leper be given once a month one-quarter of a cord of wood or fuel.

A. This is a very important question. We must consider this. At this time you can hardly see a tree up the valley, which was formerly covered with wood. There were forests of trees at Waielie. There used to be a forest of ohia and kukui (native woods). Ever since then

board of health has been making a road through there you see the kukui trees have been cut for wood farther and farther from the road up the mountain. How do you expect to give the settlement wood unless there is timber?

Q. We would have to bring firewood here.—A. Then, even if the wood was brought here from elsewhere, who would portion the wood in such manner that there would be no kicking?

Senator KAIUE (to the audience). Listen to these questions, and if your opinions are not represented, ask to come forward.

Senator CARTER (reads):

9. That the importation of awa into the settlement be permitted, but not to exceed two stumps at a sending.

A. There was a regulation at one time that awa was allowed. D. Kahanu had a license for the island of Molokai, but on account of the quantity of awa which was brought here the president of the board of health requested me, as superintendent, to stop it. I can not say very much about that matter, because I never used it, but I don't object to awa coming in. Here there are people who are raising awa. There are others that will buy it; and awa is sold here at 50 cents to a dollar a stump.

Q. (Reads):

10. That the board of health be made to pay the expenses of digging the graves of deceased lepers.

A. In regard to that, let me explain. At the time I was superintendent I used to do this. If a person was one who had means he would pay \$2 for digging the grave. If a person has means, or his people can afford to bury that person decently, I make them pay for it. I think the same rule has been in force since. If the legislature sees to do away with this burden, well and good.

Q. (Reads):

11. That an appropriation be made for the erection of a home for the sons of lepers.

A. I believe that would be one of the best things ever done.

Q. (Reads):

12. That the taro planters of Waikolu be made to cook and to make into pai'ai and deliver it at the food dispensary at Kalaupapa.

A. In regard to this taro planting at Waikolu, I am one of the taro planters myself. In 1899, in the month of April, it was proposed by Mr. Reynolds that the taro be made into pai'ai, just as is asked now. It was intended that the planters then should erect an outfit for the cooking of the taro, but toward the latter part of the year Reynolds's assistant started in to raise taro too. The board of health disapproved of this action and what he was doing, and the board of health ordered the assistant superintendent to quit. Then the board of health went into planting taro themselves. It was at that time that this occurred. Prior to Mr. Reynolds's reign here the allowance was 45 pounds of raw taro here. This was supposed by the board of health to be turned into 21 pounds of solid pai'ai. On account of the complaints that were made and the dissatisfaction among the lepers on account of the poor taro, the allowance was increased to 35 pounds.

Q. Was it ever the case that pai'ai was made and delivered?—A. The taro was cooked into pai'ai and delivered to those who called,

Q. Did that work satisfactorily?—A. This was carried on for some time, but when the government or the board of health gave out only raw taro, the planters stopped making pai'ai.

Q. You think it would be well to go back to this plan?—A. I am one of those who have planted taro up there, and I have taro turned out ripe and well. In October, November, and December I furnished the board of health with taro, the understanding being that when the taro became ripe enough to pull it was to be turned over to the superintendent. They should manage this taro at the price then prevailing. The price then for it was 57 cents for pai'ai, and it was the same price when the taro was pulled, then I was to have that figure. Whatever, should get only three-fourths of the value.

Q. Why did they charge you one-fourth?—A. I do not know; the board of health made that rule. I want to say that some time about the 1st of February a police officer came to the house and asked if my taro was ready and ripe. I stated that I would have taro ready for pulling about May or June. They seemed not satisfied with this, and the police officer and Kanukone said that they had inspected the patches and that I had taro ready for pulling now. Then I answered them: "You who are not the taro planters evidently seem to know more about it than I, who plant it, and evidently I know nothing about it." The Kanukone said: "I see that you do not want to sell us your taro." I answered: "Yes; only it is not ripe." About the 20th of last month Nailewa told me that he received instructions from the assistant superintendent to have my taro pulled, and that in the next few days the lepers would call up and get it. I asked him if he had a written order and he said "No." Then I said to him: "I will look upon you as the superintendent, because you have come as being under the orders of the superintendent. Will you give me \$2.50—the price paid to the superintendent in Honolulu?" He said he could not answer that. Then I said: "If you folks want the taro, there is a crop and land; you have any right to pull, then you are quite welcome to it." About the 20th of the same month, February, the lepers were ordered to go and pull the taro, and they proceeded to do so. They have taken the taro that they thought was fit, and that which was unfit they left in the field.

Q. Do you know how much they took?—A. I can not say, because they pulled regardless of quantity.

Q. Did they get an order for it?—A. I was informed the assistant superintendent gave the order.

Q. You have not been offered any pay for your loss?—A. Not yet, because no arrangement has been made about that. I expect that may be requested to make my statement in writing in regard to this, but when I am paid for the taro I shall have to take into consideration that I have received a serious loss, on account of the damage they did to my crop.

Senator KAIUE. You have never been informed of the value of the taro?

A. No; I have not been informed. When I asked what price would be given me, no answer has been given. I feel that I should get the present price of pai'ai, which is 57½ cents.

Senator KALAUOKALANI. How many bags of taro have been taken?

A. I have not been informed at all.

Mr. BECKLEY. Did you protest at the time?

A. I did protest, but I did not wish to go up to the office to see the Hawaiian luna, W. J. Feary.

Q. Is he here now?—A. I don't know.

(A man wearing a policeman's badge came to the front of the room.)

Senator KAIUE. Is this the man that went to tell you about the taro?

A. Yes.

Mr. EMMELUTH. Why is it so many reports come in as to the taro being soft or watery?

A. This is on account of the taro being so poor. This is not something new. It is on account of the soil not being properly tilled.

Senator CARTER. Taro has been grown in this soil a long time?

A. When I came here in 1879 I found that the taro was cultivated by the Kokuas and the Kamaainas (old residents) and their konohikis (serfs). When the taro was ripe up there I was one of those who went to get taro, and I found the taro in that condition, loliloli (watery.)

Mr. EMMELUTH. Is there any land within the boundaries of the settlement suitable for taro outside of Waikolu?

A. No other place within the limits of the settlement. There are other places outside of the settlement, up at Wailau.

Q. Is there any land that would be suitable for taro within sight of this window if water were available?—A. Maybe so, by planting dry.

Q. I asked if water were available. Would the lands at the foot-hills be available for planting taro?—A. It could be done, but only by a great deal of trouble, because the place is so rocky.

Senator KALAUOKALANI. How many bags of ide of Kalawao?

A. That is a cemetery; there are thousands of people buried there.

Mr. EMMELUTH. How many Kamaainas still living in the settlement?

A. No more. Only two (Kokuas) are permitted to reside here—old Mehihi and an old lady—and they are the servants of Father Van Lil.

Senator CARTER (reads):

13. That a judge and sheriff be stationed permanently at Kalaupapa.

A. We have police here, but no judge.

Q. Would it be a good thing for the people to have a judge and sheriff here?—A. I don't want to express my opinion on that; it is a serious question. I leave that to the legislature.

Mr. PENDERGAST. There are a great many cases arising in the settlement requiring the services of a judge?

A. Yes, that is true; but when there are a number of cases arising in this place, the judge calls here whenever it is necessary to try these cases.

Mr. EMMELUTH. What is done with the prisoners in the interval?

A. No offenders are arrested. They don't bother about it until the judge arrives. A warrant is then issued and the person is brought before him.

Q. What is the greatest offense most frequently committed?—A. Drunkenness from swipes, disturbing the quiet of the night, the free intermingling of men and women. This is the most serious offense in this settlement. Sometimes there is a larceny case, because there are people here who are not above that standing. They can break through a house and take things that don't belong to them. Then there are civil matters which have arisen—financial matters between persons.

Q. What amount do they arise to—\$25, \$50, or \$100?—A. Sometimes it is \$100, but it never amounts to more than \$300.

Mr. PENDERGAST. Is the judge paid for his services in coming here?

A. I do not know whether he is paid for the services performed here, but I believe he receives the regular pay.

Mr. HAAHEO. How long between times?

A. He comes only on the request of the officers in charge of this place.

Senator CARTER. Can anyone call him here?

A. Yes; the police officers.

Senator KAIHUE. When a judge comes here, do attorneys follow?

A. Aole loa (never).

Q. No one else besides the judge comes?—A. He is accompanied by some one who seems to be his servant; what his relation is I do not know.

Senator CARTER (reads):

14. That a law be enacted for the examination of clean lepers biennially.

A. I believe that that could not be done under the present government.

Q. (Reads.)

That an expert on leprosy be procured for the cure of this dread disease.

A. I do not believe it is advisable for such an expert on leprosy to be stationed here. If stationed here, he would not have the facilities which he would need for the proper performance of his duties. Another thing, we are supposed to be free. He would have to use force in order to get people to experiment upon. If it is desired to have that test, the place is in Honolulu.

Mr. EMMELUTH. Do you mean that the lepers in general refuse to be treated?

Senator CARTER. Experimented upon?

A. The trouble is many people refuse. People are too anxious to get cured. If in a certain time it does not effect a cure, they won't take a longer treatment or take the medicines at all.

Mr. EMMELUTH. How about the treatment Dr. Goto instituted here?

A. Some appear to be clean, but the disease does not seem to disappear. The disease turns out worse than it was before.

Dr. RUSSELL. Do you know of a single case that was really cured by the Japanese treatment?

A. No one that I know of.

Mr. EMMELUTH. In your opinion, after twenty-two years' residence in this settlement, you think it is inadvisable for anyone to come to the settlement for experiment, even though the patients are willing to be experimented upon?

A. That is my opinion.

Senator CARTER. Even if the people are willing?

A. That is my opinion. Of course, if anybody is willing to submit all right.

Mr. EMMELUTH. The main point in your observation is that the patients have been impatient when the result has not been brought about within a certain stated period.

A. Yes; because I firmly believe in that. My mind is free to the

effect that it is useless to work to battle with this disease. I believe that when one gets here that he is lost.

Senator CARTER (reads):

That the weight of the pai'ai be increased from 21 to 25 pounds.

A. I have nothing to say in regard to that. It is a matter with the board of health.

Senator KALAUOKALANI. We have come here to find out your opinion. We want to know whether it is advisable to increase the amount from 21 to 25 pounds.

A. According to my knowledge it is clear that it would be all right, if the supply could be obtained. There is not food enough now. I do not know how the Government could expect to give more than 21 pounds. How can we ask for more?

Senator KAOHI. You say there is a scarcity of food. Is there any complaint made to the board of health on the part of the lepers?

A. Yes.

Q. We have come here, not to reduce, but to find out whether by taking these things or that it would be safe to give you the allowance.—
A. I will be only too pleased to get the 21 pounds allowance now.

Mr. PUUKI. You have stated that there are taro planters; how is it that you do not get your full rations?

A. Because the board of health have taken the taro. I want to get poi. I am a Hawaiian and can't live on rice and flour.

Mr. PENDERGAST. Is this 21 pounds sufficient for a week?

A. I believe that it is not sufficient for a person of strong constitution.

Mr. EMMELUTH. Is the amount of 12 pounds of good Golden Gate flour sufficient for a man who is able-bodied?

A. I think for Hawaiians it is not enough. Likewise for the haole (foreigner).

Q. The Hawaiian uses flour for poi, and the haole for bread?—A. Sometimes they make it into pancakes. The haole makes it into bread.

Mr. BECKLEY. Upon your personal knowledge, are the persons taking the poi allowance allowed to take flour or rice in place of poi?

A. The way the allowances are arranged is, poi, 21 pounds; flour, 12 pounds; crackers, 8½ pounds; rice, 9 pounds; 1 pound of sugar; a 4-ounce can of baking powder given along with the flour. For all persons this is given out for one week. If he wants poi, he can not have the flour, rice, crackers, or sugar. If he takes the rice, he gets nothing else. If he takes the flour, he can not take the poi and other things.

Senator CARTER. He always gets meat with any one of them?

A. If he wants meat, he takes 7½ pounds, or 5 pounds of salmon. If he takes the salmon, he can not have the beef.

Mr. EMMELUTH. He gets one of three allowances—pai'ai, rice, or flour?

A. If he takes bread, 8½ pounds, he gets 1 pound of sugar, or instead of the pai'ai or rice. If he takes the flour, he does not receive the bread allowance, rice, pai'ai, but he gets the beef and 1 pound of sugar. When he takes the rice, he gets 9 pounds and 1 pound of sugar. Beef is a regular allowance. The first of every month every leper receives a bar of soap supposed to weigh 2 pounds, 4 packages

of matches, 5 pounds of salt, and for every family 1 quart of oil. Each family in a house receives 1 quart of oil.

Q. During your experience with Mr. Reynolds as agent of the board of health have you ever known the agent to disregard the orders of the board of health?—A. I do not know of any actions whereby he has been guilty of violating any regulation of the board of health from the day I became superintendent of the leper settlement up to the time I resigned.

Q. How about since you resigned?—A. After I resigned I don't know what happened after that.

Q. Have you from your observation known of Mr. Reynolds will fully burdening any leper in the settlement here unnecessarily?—A. I don't know.

Senator CARTER. If this legislature gives the settlement here a government to govern themselves, are there enough well, able-bodied men to do the work for the settlement?

A. I don't think so.

Q. Those who are able-bodied are liable to be sick part of the time and well part of the time?—A. Yes.

Q. Do you think it would be a good thing for the people?—A. I think they would be better contented. I believe it would be a good thing if it can be done.

Mr. EMMELUTH. How many people outside of the settlement would it take to run the settlement?—A. There are only two persons outside of the Sisters and Brothers at the home.

Q. Is there anyone who could take the agent's place in conducting the settlement, who would have the confidence of the people in the settlement?—A. I decline to answer that.

Senator CARTER. Is it your manao (opinion) that they would submit to the rule of the majority, or that there would always be trouble?

Mr. EMMELUTH. I think the question is irrelevant, because under the bill we propose to pass there would be no minority. Each 100 or 200 men would elect one man to represent them in a board of control or whatever it would be called.

Senator CARTER. Suppose there should be a difference of opinion there would be a minority and a majority. In every government there would be that, no matter how you make the law. The question is Does he think the people would be contented to submit to the majority rule—that is, will the minority submit? There is bound to be a difference in every community that exists. You can't give them a government where there is no minority. The question is, Will it simplify matters to let them settle it among themselves?

Mr. EMMELUTH. I withdraw the objection. Let him answer the question.

A. It is true such feelings are bound to come. It might not be noticed at the start, but it is bound to arise some time.

Senator CARTER. We want to know whether they will be more contented by governing themselves, and if the majority agree upon one question whether there will be dissatisfaction?

A. I think that anything the majority decided upon they will be bound to stand by it, because they selected the men themselves. The minority will be bound to respect their authority. They will disregard all differences of opinion.

Senator KAOHI. How long has the allowance been 21 pounds of *psiai*?

A. This allowance has been 21 pounds since 1866, I think.

Q. How long have they been asking for a raise to 25 pounds?—A. Every petition that has been sent to the legislature has asked for it, but it has never been granted up to this time.

Mr. BECKLEY. How long will 21 pounds last a man?

A. A man that is healthy, got a good body, it will last him six days; and if he had other things to go with it—a little extra in the way of the vegetables—it would probably last him another day.

Q. Then 21 pounds is not enough for a good healthy man?—A. It is insufficient.

Q. Would you like 25 pounds to be allowed hereafter?—A. Yes.

Senator KALAUOKALANI. If we say we will have another meeting here at 7.30 to-night, will you come?

A. Yes (by the entire assemblage).

Senator KALAUOKALANI. There will be a meeting, then, at 7.30 to-night.

SUNDAY, *March 3, 1901.*

Present: Representatives Beckley and Haaheo.

The meeting was called to order by Mr. Beckley at 9.45 in Beretania Hall, immediately following the examination of supposedly clean residents of the settlement.

JOHN WILMINGTON was called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Forty.

Q. Sex?—A. Male.

Q. How many years have you been a resident of the settlement?—

A. In April it will be thirteen years.

Q. Are you married or single?—A. Married.

Q. Were you married before or after coming to the settlement?—

A. Before I came to the settlement.

Q. How many children have you born here?—A. None.

Q. Have you any children at all?—A. None.

Q. Have you any resources outside of the board of health appropriation?—A. Yes.

Q. What is your daily work?—A. Storekeeper for the board of health.

Q. What is your remuneration?—A. Sixty dollars a month for such work. I am also postmaster.

Q. In your capacity as postmaster are you paid by the board of health or by the Federal Government?

Q. Since you are storekeeper, you may state who fixes the prices of the goods you sell—yourself or the board of health?—A. They tell me what per cent to charge and I charge it on the article.

Q. Do you get your orders in this respect from the board of health?—A. From the superintendent.

Q. As storekeeper, in your opinion, are the goods sold from the store in the settlement first class or some of the secondhanded?—

A. Some of them are secondhanded. When the merchants in Honolulu when we order things sent down, sometimes send something else. If we order a certain grade, they sometimes send a lower grade.

Q. What do you do in such a case?—A. Whenever that happens report to Mr. Reynolds, and the price is fixed accordingly.

Q. After goods have been sold by you to the people here, have there been any complaints about quality?—A. They never come to me directly with complaints, but I hear of it through other persons. Whenever wares are sold out of the store and the buyer who buys anything finds out it is not good, he can bring the article back, and the store will refund the money or make a deduction.

Q. At the time purchases are made have there ever been any protests as to the cost of goods?—A. No; there have been no complaints to me.

Q. From your own opinion as a salesman, do you think the price charged have been exorbitant?—A. Sometimes the goods come in damaged condition, and the cost must be added to what is left. That is the way we price the goods up.

Q. Then you think so far there has been no injustice done in the settlement as to the price of goods sold from the settlement store?—A. Yes.

Q. You think they have received full value for the money paid?—A. Yes.

Q. You stated a few minutes ago that secondhand goods had been delivered to the store. Have they been sold as secondhand stock?—A. I referred to dry goods, also to canned goods. Sometimes the condensed milk and sometimes the dry goods are spoiled.

Q. Sometimes, you say, condensed milk is received in poor condition such as you know is not fit for food. Do you sell it or condemn it?—A. Sometimes the condensed milk is old and I don't see the rust nor can I see the inside. If it is poor and they make complaint, it is condemned.

Q. Do your customers inspect the goods and make complaint at the time of purchase?—A. Sometimes in the store they request us to open it. If it is no good another one is given.

Q. In such instances when you find milk unfit to be used for food to what account do you charge the loss?—A. To the loss and profit of the store.

Q. In case you charge it to profit and loss, do you charge it to the remaining goods?—A. In stock taking I make a report of what has been condemned.

Q. At the present time is there any stock in the store that is secondhanded or little used or store worn?—A. I have some store-worn goods in the store.

Q. In case of this store goods, what price do you expect to get for them?—A. Whatever I can sell it for. I put it down and take and sell it at the market.

Q. Who fixes the price of store-worn goods? Do you fix the price, or do they offer you so much?—A. I put the price on it at first and the buyer says whether he will give, and I put it down and sell it at that price.

Q. Your object is to see that the store makes expenses?—A. Yes.

Q. Would you charge 25 cents for 5 cents' worth of goods?—A. If I knew the price of an article was 5 cents I will sell it for 5 cents.

Q. If they offer you less will you accept it?—A. I will accept it.

Q. If they should offer you 1 cent would you accept that?—A. Yes.

Q. Is the stock in the store sufficient for the needs of the settlement?—A. I think so.

Q. Do you keep an account of the receipts and expenditures here?—A. I do; I keep a book here to make my report to the board of health, who keep another book.

Q. Does the board of health give you information as to the cost of goods when they are sent here?—A. Yes; the bills of goods are sent to me by Mr. Reynolds, stating the cost of the article. I make my report to Mr. Reynolds, as he is my superior, and he reports to the board of health.

Q. What are the receipts for the month?—A. Our receipts now run from \$300 to \$350 a week. This is, since we have tickets.

Q. These tickets are to be exchanged for goods at the store in lieu of pai'ai?—A. Yes.

Q. Have you any idea what it costs to run the store a month, including the cost of goods?—A. One hundred and ten dollars is paid for clerks.

Q. Don't you know what the cost is, including the goods?—A. I don't look into that matter further. I check off the goods received and also keep an invoice of the goods. After I have passed over the goods received I approve it and send it to Mr. Reynolds.

Q. Is there any systematic bookkeeping at the settlement store?—A. I keep all the bills, but I have nothing to do with regulating expenses.

Q. Are goods sold for cash or on credit?—A. All cash.

Q. Have you any further ideas you wish to express with reference to your position as storekeeper that have not been touched in the subjects as presented?—A. I simply want to make some statement as to the charge made yesterday as to returning goods, clothing and canned goods, and depend upon you to do the investigating.

CHARLES M. BREWSTER was called and sworn.

Preliminary examination by Mr. BECKLEY.

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Twenty-four.

Q. Sex?—A. Male.

Q. How many years have you been a resident of the settlement?—A. A little over three years.

Q. Are you married or single?—A. Married.

Q. Was it before or after arrival at the settlement?—A. It was since I came to the settlement.

Q. How many children born here?—A. I have no children.

Q. Have you any resources outside of the board of health appropriation?—A. Yes.

Q. What is your daily work?—A. Beef, oil, and soap giver for the board of health.

Q. What remuneration do you receive for your services?—A. Twenty-five dollars per month.

Q. In your experience as a luna, has there been any charges preferred against you that you would like to refute?—A. No.

Q. What is your idea in coming before this committee?—A. There

was a man last night who made a statement that the way of cutting the beef was not satisfactory to himself.

Q. Who was that?—A. That was Mr. Way.

Q. Who cuts the beef?—A. There are four Hawaiians who are called butchers to do the work in that line.

Q. Under your orders and supervision?—A. Yes.

Q. What allowance is given to each leper?—A. Seven pounds of fresh beef per week, or 7 pounds of salmon for the same time.

Q. That includes bones?—A. Yes.

Q. During the time the beef is cut, do you see that the general average is the same as respects the proportion between beef and bone that is, that it is sometimes not one-quarter beef and three-quarter bone?—A. I try to do the best I can to give equal amounts of beef and bone to each.

Q. Have you a pretty fair knowledge of the different parts of a bullock?—A. When the job was first offered me I told the assistant superintendent that I was not a butcher, but that I would keep the books of the butchering department.

Q. As a luna of the board of health, don't you know as a matter of fact, don't you know that there is more food in some parts of the beef than in the quarters?—A. That is so.

Q. Still, in cutting the quarters, you take out 7 pounds of meat and in the back of the beef you take out the same amounts?—A. It is cut up in small pieces, a little piece of meat and bone. In giving it out some bones and some meat is put in. It is not cut up in big chunks so that meat is given only to some and bones to others.

Q. Were the pieces cut up so as to be of average size, both as to meat and bones?—A. Yes.

Q. So, as far as the beef allowance goes there should be no distinction, not more bone to some?—A. As far as I know it is fair.

Q. In getting out the beef allowance, do the lepers call for them?—A. Yes.

Q. How about the helpless ones?—A. They send friends or helpers.

Q. Suppose they have no kokua or friend to get the allowance?—A. There are always some friends to get it for them.

Q. There has been no instance since you have been in charge where a leper who was too weak to come for his allowance has gone without it?—A. No.

Q. How about the condition of the beef, has it been good quality right along?—A. I think the common run is as good as the meat they get outside, since the statements I have heard in regard to Honolulu beef. We used to think the kind of beef we were receiving was the worst kind of meat.

Q. The meat under inspection yesterday by the committee, was it the general average of meat in the settlement?—A. Yes, sir.

Q. Do you have worse meat in there or not?—A. Only the same kind of meat.

Q. Have you any further remarks you wish to express to the committee?—A. That is all.

Mr. HAAHEO. What are the relations between you and the superintendent of the leper settlement?

A. We are better treated under Superintendent Reynolds.

Q. If that is true, why are these complaints made?—A. It is a fact that for the last two weeks we never get our pai'ai.

Q. What do you know concerning taro planting by the board of health?—A. I don't know anything but that a little complaint is being made against the superintendent.

Q. Have you held this position very long?—A. About two years next May.

Mr. BECKLEY. You spoke about the canned beef; in what condition is it received?

A. Some good, but some has been in store so long it is unfit for use.

Q. How many years?—A. I don't know about that.

Q. That which was deteriorated, what was done with that?—A. I think I let my superior know about it and it was destroyed.

Q. The beef passed out by your instructions from which you took your rations. How did you find your corned beef, good and tender, or pretty tough?—A. Pretty good, I may say.

Q. Good enough for a poor, helpless leper who has lost his teeth and unable to chew?—A. I think it is not good enough for the weak ones.

Q. You give out fresh beef, corned beef, and salmon?—A. Yes, sir; salmon and a little canned meats, and an allowance of salt or fresh beef or corned beef.

Q. That was under the superintendent's instructions?—A. Yes.

Q. And you continued the same course, just giving rations of canned beef, with an allowance of salt salmon, fresh beef, or corned beef?—A. Yes.

Q. That is all you do?—A. Yes.

Q. How many are taking canned beef and corned beef?—A. I give them what they want.

Q. So you compel them to take a canned beef allowance?—A. No.

Q. How much salt salmon do you give at present?—A. Five pounds at present.

Q. What part of the salmon do you cut out?—A. I weigh it out and give it.

Q. Do you chop it up?—A. Some are too small. It takes two to make a ration. Others make three rations to the salmon.

Q. In cutting off the salmon what do you cut off, the head or the tail?—A. I take whatever they ask.

Q. You have stated in cutting the salmon that you are compelled to cut it into three pieces some times. What do you cut off, the tail, belly, or head?—A. I cut off the outer part.

Q. Have there been any complaints at any time from the lepers as to the quality of the salt salmon—that it is salt, putrid, in poor condition, or soft?—A. Some one came and told me it was not quite good; that it was salmon trout. They don't like that sort of salmon.

Q. Do you make a practice of seeing that only good salmon passes through your hands when it is given out?—A. I ask them what they think and they say the salmon is as it is and they can't help it; that they have to take it.

Q. Have there been any times when you knew that salmon was poor, and because they could not get any other allowance, you allowed them to take it as a ration?—A. I issued some yesterday and they said that it seems as good salmon as they could get outside themselves.

Q. At any time the salmon you spoke of, did you know the salmon was poor salmon?—A. After delivery.

Q. Has the same poor lot of salmon been served out again this week as a ration?—A. Yes.

Q. At the time of delivery of the rations were the lepers told that some had made complaints of the salmon?—A. I gave it to them and gave it out without telling them so.

Q. So it is probable that some lepers in the settlement who had taken out poor salmon as a ration had to use it or nothing else?—A. It is their privilege in taking the salmon to say that it is not good salmon. Then I would have to take it back again.

Q. But no one has been told that it has been stated that it was poor salmon?—A. No.

Mr. HAAHEO. Has Mr. Reynolds's assistant the running of the settlement?

A. Yes.

Q. Are your relations with the assistant as satisfactory as report with the superintendent himself?—A. Yes.

Q. How are the houses where the persons live? Are they big, airy and comfortable?—A. When I came here the management in regard to the living in houses was just the same as it is now. In some instances families are living in houses that are not large enough for them.

Mr. BECKLEY. You spoke of having been appointed sub-luna. Do the cottage you live in belong to the board of health or is it your own?

A. It belongs to the board of health.

Q. How long have you occupied that cottage?—A. Since 1900.

Q. Are you living in that cottage alone?—A. Myself and my wife.

Q. Previous to that time where did you live?—A. With Robert Holt, at Kalawao. He is my relative.

Q. What is the customary provision made here for lepers coming as to the accommodation?—A. I thought when the board of health brings patients here that they would furnish them with a house.

Q. What was your experience as to accommodations?—A. When I first came here Holt's people asked me to live with them. I was instructed by my mother to live in a home, but there are ten or fourteen there; it was too crowded. I preferred to live outside of the place. It was not the way I was accustomed to live. Since then I came to live with Mr. Holt, as already stated.

Q. Is the cottage you have the general average that other Hawaiians are occupying, or are there better conditions in your cottage than in those in the cottages occupied by other Hawaiians outside of the sub-lunas?—A. Only a very few people have the same kind of a house.

Q. Whites or Hawaiians, or a mixture of both?—A. Very few natives have a house like mine, unless they are employees of the board of health. As I am employed by the board of health, I have this cottage.

Q. You say very few outside of the board of health employees have that kind of a cottage; that is, in the same condition?—A. Yes.

Q. Are there several houses where they have a bath room and stove and are these occupied by Hawaiians or not?—A. I think there are several houses below here with these conditions and white men are living in them.

Q. In those cottages furnished for white men, are the same conveniences attached to the homes occupied by the natives?—A. Not the same.

Q. Has any native applied to the superintendent for such accommodation?—A. I know of one; there may be others.

Q. Has his request been granted as yet?—A. No.

Q. You say you are perfectly satisfied with the cottage you occupy?—
A. Yes.

Q. Previous to occupying that cottage, was the Kalawao cottage owned by the board of health?—A. By the board of health.

Q. Do you think it was in as good condition and kept in as good repair as the cottage you occupy at present?—A. I stayed with Mr. Holt.

Q. Was that cottage fitted with the conveniences that were necessary, and would you be just as satisfied if you were to move back into it to-day?—A. No.

Q. What difference is there between the cottage you now occupy and that?—A. That house is already occupied by one family.

Q. Your only objection was on account of the lack of rooms, not on account of the condition of the house?—A. No.

Q. In repairing the house, does the board of health supply the material?—A. The board of health supplies it.

Q. When?—A. There is a time fixed for that purpose.

Q. During a storm, when shingles are loose, what course do you take? When it is not time to get out these supplies, how do you get the necessary repairs?—A. We have to ask the assistant superintendent for what is needed to be done.

Q. And your request would be immediately attended to?—A. Yes.

J. D. KAHLE, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or a kokua?—A. A leper.

Q. Age?—A. Twenty-three.

Q. Sex?—A. Male.

Q. How many years have you been a resident of the settlement?—
A. Fifteen years.

Q. Are you married or single?—A. Yes; married.

Q. Were you married before or after your arrival at the settlement?—A. I was married here.

Q. Have you any children?—A. No.

Q. Have you any resources outside of the board of health appropriation?—A. No.

Q. What is your daily work?—A. Any work that may be offered by the board of health. But when I am able to labor, I get 50 cents a day.

Q. What is your remuneration?—A. Fifty cents a day.

Mr. BECKLEY. Have you any ideas which you wish to express before the committee?

A. I want to speak about the taro at Waikolu.

Q. All right.—A. I want the planting of taro at Waikolu and Wailua stopped; the planters are giving some trouble to the board of health; also giving trouble to us poorer ones. The planters at Wailua are demanding \$2.50 for one bag of taro as against \$1.15 for a bag of taro of 70 pounds. The bags are tied instead of being sewed. The board of health agreed to those prices. The board of health is made to pay exorbitant prices. If this continues the board of health will lose more money every day. Another thing—these planters go and help themselves to the taro and use it themselves without considering the

share of the board of health. A statement of this character was also made to the assistant superintendent in the hearing of others. When notice was given of this, the assistant superintendent and the police went to examine. They found there taro tops standing in the patches but the taro had been taken away.

Mr. HAAHEO. Where is the person who made that statement?

A. He is not here at the present time, but his name is Puilio.

Q. We will not take any evidence from you, but from the person who is personally acquainted with the facts and has personal knowledge.

JOHN T. UNEA, called and sworn.

Preliminary examination by Mr. BECKLEY.

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Fifty-one.

Q. Sex?—A. Male.

Q. Are you married or single?—A. Married.

Q. Were you married before or after you came to the settlement?

A. My wife is still outside.

Q. Has she ever been here?—A. Only once.

Q. How did she get here?—A. She came with the board of health.

Q. Have you any resources outside of the board of health appropriation?—A. None, save when I get a job.

Q. What is your daily work?—A. I get a job once and a while, but very seldom. I just do gardening around the house or a little fishing once and a while. I have been storekeeper, but I resigned about year and a half ago.

Q. Why did you resign?—A. I resigned on account of sickness nearly two years ago.

Q. During your time as storekeeper of the settlement was there any complaint made against you?—A. I don't know. You can ask the people here, and I don't think there is one who will say yes.

Q. Have you any statement you would like to make?—A. If you will allow me, I have a few expressions to offer.

First. The control of the settlement must be taken away from the board of health for good and sufficient reasons. The reason is, the employees of the board of health here are doing things in such a way that they are squeezing our necks. It is going on eight years that have been in the settlement. Next July it will be eight years. When I came here the planters were planting taro at Waikolu. When people didn't come on account of the bad weather, or some other reason, we depended upon the Waikolu planters. Fifty pounds of raw taro, or 45 pounds of peeled, was the regular ration. It was 50 at first, then it came down to 45 pounds. Then the board of health took charge of planting taro, as already stated by Mr. Notley, about three years ago. The board of health, when the taro was ripe, ordered the planters at Waikolu to put up their taro into pai'ai into 21-pound lots. That rule has not been in force up to date. When the first crop of the board of health was ripe the board of health gave us 30 pounds of raw taro, and that is the reason why I made the statement that they were squeezing us, and also that while pulling this taro some was loliloli. Everybody had to give in at headquarters of the settlement a statement of what he wanted. If anyone took taro he had to take it. If he didn't like it he couldn't change until the following week. Those who chose to

make the rations in taro were ordered to go to Waikolu and get the watery taro. The assistant superintendent one week, when the superintendent was not here, had to get rations from Waikolu. The luna who gave out the food was ordered not to give out rice rations, but to tell them to go to Waikolu and get their rations. When the superintendent came here it was reported to him. After this the taro men had to cut it up and brought it part way here, where everybody can go and get his ration. This happened about ten months ago. Last week the second crop of the board of health was pulled, but not cooked. They never try to put in the proper appliances for steaming the taro when cooking it. We never asked for any houses, but when we made a complaint about the taro it was never attended to.

As to the salaries of the board of health employees here, they are being increased. Four months ago a man was employed to look after the carts and bullocks. That one man was paid \$25 a month. Now there is one man to look after the bullock carts who gets \$25, a water luna who gets \$15 a month, and the head carpenter, who gets \$20 to \$30 a month.

Q. Was this changed since election?—A. It was after election.

Q. Have you any knowledge as to the reasons why Kanani was dismissed? You say the election was after Kanani was dismissed.—A. Yes, sir.

Q. Why were these salaries increased?—A. I think it was through the election. It was managed by one man. There was another case. Two employees of the government here are holding two or three offices.

Q. Who are they?—A. A witness here stated that the postmaster was storekeeper. The assistant superintendent also has another office. He gets \$100 as superintendent and \$25 as captain of police. Before there were two lunas for the oil and beef. The luna for the beef got \$20 and the luna for the oil \$5. One man is now doing all the work. Many of these places have been changed or the places used for election purposes; I can prove it.

In October before the election Charles Waimui was overseer for exterminating the lantana. Some days when he took his gang out to work he asked them what was the political affiliations. Some were Home Rulers, and said, "I will vote for the Home Rule ticket." Others were Democrats. When these answers were given by these employees this luna ordered them to put down the tools of the Republic and go to Robert Kaaoao, the luna of the Home Rulers, saying, "He will give you a job."

Another employee, John Kiaina, was treated the same way. He was told to take up his tools and go to the Home Rulers for a job.

Q. Do you know this of your own personal knowledge?—A. I was not employed at that work. I know those who were working, and that because of their declaration as to party affiliations they were dismissed.

One employee of the board of health of the settlement is now receiving \$30 a month, and if he does not go to work for two or three days he gets his full pay. Some days they get finished with the work for the government benefit and yet are paid by government money their full pay. Not only that, but if sometimes the pipe needs looking after, this same man is employed to go and fix up the job and is given \$1.50

a day outside of his \$30 a month. I can bring witnesses to prove the statement.

Mr. HAAHEO. What man is that?

A. George Kanikau, who makes up the pay roll for the settlement. There is no chance for a Hawaiian here even for houses. There is a man here who is known here as Kettle, who seems better than a native. There have been two or three houses built. Kanikau applied for a house but was refused, but this German applied and he got it, the same house.

Mr. BECKLEY. How long was Kettle in the settlement before he got a house?

A. Not very long, only three or four months. As soon as the house was built he moved right into it. I made this statement about salaries to show how the money is wasted.

Q. What do you think about giving the settlement local government?—A. If it came to local government, if the change was ever made, there would be trouble. It would not work, having one representative for 150 persons. It is better to appoint a judge through the officers. If it is given to the settlement, there are Hawaiians who will give the job to them.

I think it is better to put the management of the settlement in the hands of the superintendent and three commissioners—one of the commissioners to be appointed by the house, one by the senate, and one by the governor; each one to be here a month long, but the third month all three commissioners to be here to hear the different cases that may come before them. We recommend that the appointment of the superintendent be made upon the recommendation of the people of the settlement, which appointment is to be made by the commission and to settle all cases which may come up by a hearing before the superintendent and the commissioner present at that month. I favor in every other way the statements made yesterday as to the local government. The only people who would need to come here would be the commissioners. I would have this local government give premiums for building shrubbery and for forestry in general.

Q. In relation to item 12 of your petition, "That the taro planters at Waikolu be made to cook and to make into pai'ai and deliver at the food dispensary at Kalaupapa," how will that work in connection with your petition, "That the local management of the settlement be given by law to be enacted therefor to the persons segregated here; and also, "That the board of health be prohibited from claiming any share of the taro produced by the farmers at Waikolu?"—A. I favor the cancellation of the board of health's one-fourth share in the Waikolu taro. It is said that a lazy man is the devil's workshop. If we stop men from planting taro at Waikolu, we can plant sugar cane and other vegetables. We will be in no trouble. The rules and regulations of this settlement, especially rule 15, in regard to the planting of taro, should be carried out; that one-fourth proviso should be repealed.

Those working for the board of health now planting taro go and borrow money here from the money lenders, who are charging 10 per cent per month.

Q. Who are the money lenders?—A. The money lender is the wife of the assistant superintendent of the settlement. There is a rule that no leper is allowed to loan money to another. This is a regulation

which was made because the lepers refused to pay, but the paying out of the money is done by the assistant superintendent, and of course the people have to pay their debts. Another thing, they don't know how many days they really work; how much there is due them. The power of making a showing of the day's work is in the hands of the superintendent, and they can put in as many days as is necessary to cover the debt.

By some mismanagement the assistant superintendent has been put to some trouble in regard to getting out poi. The bid for the order was originally given to Kaliikani, of Halawa, on the other side of the pali. The people at Wailau and Pilehanu asked the assistant superintendent to be allowed to supply poi and bring pai'ai here. The assistant superintendent agreed to that, and on that account Kaliikani threw up the contract, and that is why we are pinkia (trouble) for poi. Payment made on this pai'ai was out of the assistant superintendent's own money, as that was the only way he could get the money, as the contract was with Kaliikani, and he was the only one employed to draw money from the board of health contract for poi furnished.

Q. In regard to item 5 of your petition, "That a cloth allowance to be value of \$10 be carried out; that one-fourth ration you are desirous of having changed to cash?"—A. These ration bills for cloth, calling for \$5, sell for \$2 and \$3 in cash. That is why we think it is better to get the ration in cash. When they get a cloth ration and want men shirts, and they haven't any at the store, they tell us to wait for some time. The time limit is May 1 and December 1, and after waiting until nearly that time, if they don't get what they want, they sell the ration. After those dates the allowance is null and void. We want to dispose of two persons in this settlement who are robbers and thieves.

Q. Who are they?—A. I will tell you who they are. They are Lakua and Umiumi. They are thieves and burglars. Even when they are in jail they break out.

JOSEPH KAHELEKII, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Age?—A. Thirty-five.

Q. Sex?—A. Male.

Q. How many years have you been a resident of the settlement?—A. Fourteen years.

Q. Are you married or single?—A. Married.

Q. Was it before or after your arrival at the settlement?—A. I was married here.

Q. How many children have you who were born here?—A. No children.

Q. Have you any resources outside of the board of health appropriation?—A. I have no resources outside of the board of health.

Q. What is your daily work?—A. I have no work. Only sometimes I secure jobs.

Q. It has been stated that you are one of those employed to clean up the lantana?—A. Yes.

Q. Are you working for the board of health now?—A. No.

Q. When were you dismissed?—A. I was dismissed on account of the action on the 1st day of November. While working we were notified

by the luna that the assistant superintendent had made a statement that the job belonged to the Republicans and other politics did not go. He asked me if I would join the Republican party, but I told him that I was a home ruler. That was the way that I was dismissed.

Q. He stated that "you can belong to the home rulers if you want to, but that you must go over there and get your money?"—A. That is the answer I received from the luna.

Q. How many were discharged?—A. There were six discharged that account.

WILLIAM KALEIHEANA, called and sworn.

Q. Were you one of the six men who were discharged on account of their political affiliations?—A. Yes, I was one of them.

KAHALEKII was recalled.

Mr. BECKLEY. At the time of this dismissal did they ask you to support the Republican party?

A. No. They asked what my politics were and then dismissed me.

Q. Are you a voter?—A. Yes.

Q. After the order of the board of health that no more politicians were to come here to make speeches, didn't anyone else come?—A. Yes.

Q. Who?—A. David H. Kahaulelio.

Q. Didn't anyone come after the order of the board of health?—A. No.

Q. If that rule was made in August, how about it?—A. If that rule was given out in August, my first statement was correct. Before the election a political meeting was held in Beretania Hall by David H. Kahaulelio.

Q. Wasn't the superintendent here at the time, and didn't he make any objections?—A. I don't think Mr. Reynolds was here. Mr. Fear, the assistant superintendent, was here at that time.

Q. Had the superintendent known what was going on, he might have stopped them from making political speeches?—A. No. That meeting was only that one time.

Q. Was any public notice given of the meeting?—A. Yes.

Q. Was the public notice in such manner that the assistant superintendent should have known of the matter or heard that a meeting was to be held?—A. Yes; I think he knew there was to be a meeting.

Q. How many times was a political meeting held here by David H. Kahaulelio, one or two months before the election?—A. Only one meeting that I know of; that was the meeting held by Kahaulelio. No other meeting was held but that.

GEORGE KANIKAU, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Twenty-eight.

Q. Sex?—A. Male.

Q. How many years have you been a resident of this settlement?—A. Six months now.

Q. Are you married or single?—A. Married.

Q. Were you married before or after your arrival at the settlement?—A. My wife is not here.

Q. How many children born here?—A. None.

Q. Have you any resources outside of the board of health?—A. One.

Q. What is your daily work?—A. None; I now and then get a job.

Q. What is your remuneration?—A. (Not stated.)

Q. State if at any time you have been offered a job. And if so, what was the nature of the work?—A. Copying the pay rolls.

Q. Did you hear the statement made by John Unea?—A. Yes.

Q. What have you to say about his statement?—A. I seen in the pay rolls that Kanani was head carpenter and blacksmith and received \$10 per month. In another place I saw the same name for repairing water pipe. He was paid for the same month extra pay. Worked 15 days and was paid \$1.50 a day.

Q. This same Kanani?—A. This same man.

Q. Do you know where this pipe repairing was?—A. A water main at Waikolu.

Q. As to the statement made by Unea as to the pay roll, do you confirm or deny the truth of the facts given by him?—A. I confirm with him.

PINEHAKA, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Twenty-five.

Q. Sex?—A. Male.

Q. How long have you been a resident of the settlement?—A. Five years.

Q. Are you married or single?—A. Married.

Q. Were you married before or after your arrival at the settlement?—A. I was married here.

Q. How many children have you had who were born here?—A. Three children were born here; all girls.

Q. Have you any resources outside of the board of health appropriation?—A. No.

Q. What is your daily work?—A. Carpenter under the board of health at times.

Q. What is your remuneration?—A. (Not stated.)

Q. You heard the statement of Unea? Is it true or not?—A. As far as regards the borrowing of money from the wife of the assistant superintendent, it is correct.

Q. Are you living at Kalaupapa?—A. Only when I come to visit; I live in Waipolu. My work is planting taro for the board of health for eight months.

Q. Was it during those eight months you borrowed the money?—A. Yes.

Q. From whom?—A. The wife of the assistant superintendent. When working for the board of health we don't get any money until the end of the month. They pay the first week of the month. We asked for money from the assistant superintendent, and he said that he has not money; that his wife has. When we go to her to tell her that we want to borrow money, she tells us that she will charge 10 per cent per month.

Q. When you went to the assistant superintendent to get your money, from whom did you get the money, from the assistant superintendent or his wife?—A. From his wife personally. I first asked the assistant superintendent and then his wife. His wife gave me the money.

Q. The assistant superintendent, is he a leper?—A. Yes.

Q. Is his wife?—A. Both of them.

Q. When working at Waikolu for the board of health, how many times did you come and borrow money and that interest was charged you?—A. Whenever I came out from Waikolu to the settlement, I desire to buy a little tobacco and coffee, as we have no money, so we have to borrow money. We come down once a month.

Q. When you came down to borrow money, did you come alone?—A. I came with others.

Q. Perhaps you were the only one charged 10 per cent.—A. Everyone.

GEORGE NAKOOKOO, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Kokua.

Q. Age?—A. Forty.

Q. Sex?—A. Male.

Q. How long have you been a resident of the settlement?—A. I came in 1888. Thirteen years I have been here.

Q. Are you married or single?—A. Married.

Q. Was it before or after your arrival at the settlement?—A. Before.

Q. How many children born here?—A. I have two children living here who are lepers, one who is not a leper; my wife is now dead.

Q. Were you present yesterday during the examination?—A. Yes.

Q. You heard the petition read?—A. Yes.

Q. Do you approve the petition?—A. I approve of the petition.

Q. You support this petition?—A. Yes; I support this petition.

Mrs. FEARY, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you the wife of the superintendent?—A. Yes.

Q. Are you leper or kokua?—A. Leper.

Q. Age?—A. Thirty.

Q. Sex?—A. Female.

Q. How many years have you been a resident of the settlement?—A. Twelve years.

Q. Are you married or single?—A. I was married before I came here.

Q. Was it before or after your arrival at the settlement? (Answered above.)

Q. How many children born here?—A. I have had four children born here; only one living—a boy.

Q. Have you any resources outside of the board of health appropriation?—A. (Not stated.)

Q. What is your daily work?—A. (Not stated.)

Q. What remuneration do you receive?—A. (Not stated.)

Q. Does that boy of yours receive his rations as a leper?—A. He receives a half ration, the same as other nonleperous children.

Q. As his mother, you consider him a nonleper?—A. He has not been examined, but I so consider him.

Q. Mrs. Feary, have you heard the statement as to borrowing money of you and your charging usurious rates of interest?—A. Yes.

Q. The commission would like your views.—A. There are certain boys who are working planting taro, and in between weeks they come down to the settlement. They come and ask my husband for money, and he won't loan them any money. I don't want to loan them any money, for after a while the boys go and drink beer, and then they make up a rumpus. Then they come and ask me for money. My husband has advised me not to give them any. But they come around to the door and homulimuli (overpersuade) me and say they want me to help them out. When they ask me for money I tell them that I will charge them 10 per cent. I am not anxious to give them any money, but if they are anxious to pay that price I will give it to them. I give it to them on account of what they say, and I give them any amount they want. If they want \$1 or \$2, I give them \$1 or \$2.

Q. In reference to that money, is it your own money or money in the hands of your husband as assistant superintendent?—A. My own money. These boys would give 25 cents on a dollar, and have done it with other people. I say that lot is good for nothing. They have paid 25 cents on a dollar. They run behind and then they go and borrow from some one else. The reason is they want that money. They don't care what interest is. They don't look at that. They want to drink swipes, and they are awful boys for drinking beer. That is true and they will show the truth. There are some of them here.

Q. Have you any further statement to make?—A. I have nothing to ask concerning the money. I admit taking interest.

Q. It is your privilege to deny anything that has been misstated here.—A. I merely say of the boys that I never forced them to take any money. They insisted that I should give it to them. They actually fought for the money. They have came and grabbed for the money.

KAPIULA, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Thirty-one.

Q. Sex?—A. Female.

Q. How many years have you been a resident of the settlement?—A. Twelve years.

Q. Are you married or single?—A. I am not married.

Q. If married, was it before or after arrival at the settlement?—A. (Covered above.)

Q. How many children born here?—A. (Covered above.)

Q. Any resources outside of the board of health appropriation?—A. (Not stated.)

Q. What is your daily work?—A. (Not stated.)

Q. What remuneration do you receive?—A. (Not stated.)

Q. Where do you live?—A. I lived at Kalawao first. Kaiser was superintendent at that time. I asked him to give me a house. He finally gave me one at Kawaluna. I staid there and improved the place. I was drunk, and there were others drunk, also, but I was the only one expelled from the place.

Q. Then you were kicked away from the place that you improved?—A. Yes, for being drunk; but there were others who were drunk.

Q. Do you drink?—A. Yes.

Q. Where do you get the liquor, as it is prohibited by the board of health?—A. From friends.

Q. Is intoxicating liquor sold in the settlement?—A. Yes; so times I pay for it, and sometimes I get it for nothing.

Q. Will the women who support the petition stand?

(Nearly all the women present stood—possibly all of them.)

ZELIE BELLE PA, called and sworn.

Preliminary examination by Mr. BECKLEY:

Q. Are you a leper or kokua?—A. Leper.

Q. Age?—A. Forty.

Q. Sex?—A. Female.

Q. How long have you been a resident of the settlement?—November 17, this year, it will be seven years.

Q. Are you married or single?—A. I am a widow.

Q. Were you married before or after coming to the settlement?—A. (Not stated.)

Q. How many children born here?—A. Ten children, only one born in the settlement. That one is not here now; it has been taken out of the settlement.

Q. Have you any resources outside of the board of health?—A. No.

Q. What is your daily work?—A. (Not stated.)

Q. What remuneration do you receive?—A. (Not stated.)

Q. As an inmate of the settlement, have you any opinion you would like to express to the committee?—A. I have a few remarks to make. In regard to Assistant Feary, a year ago I applied to him to have a store built to the house, but it was not until two weeks ago it was done. His answer always was that he forgot. It was only on account of my persistence that it was done at all. This was little hard for me, as I have no house and I can not help myself.

A statement has been made here that we can get things here cheaper at the settlement store. However, it is cheaper outside than in here when I want to buy things in the store. Only the other day for a dress, and I wanted to get some thread and some other things, but here you have to pay too high for things. As a general rule it is 10 cents for a spool of thread or three for a quarter. While I went to the store they would not give me three for 25 cents, but charged me 10 cents for it. Of course I make this complaint because I am poor but everybody is here. We all try to save money as much as we can and be economical.

A premium is given for building and making gardening, and I received the premium of \$7.50. And though I have made demand for a water privilege and have tried to get it, I have not received it and for that premium I took \$4 and paid for the water. Then the assistant superintendent told me that if I had asked him he would have done it for me, so I asked him to refund the money. Instead of that he gave me some more lengths of pipe. After that my house was repaired by the board of health, and they put a veranda and steps.

Q. After a reasonable time had elapsed after you had made your

complaint, did you at any time apply to Mr. Reynolds, of the board of health?—A. This was done only the last few days. I told Mr. Feary. He told me to go to Alapai, and Alapai told me to go to Feary.

Mr. BECKLEY. That is all.

NOTE—Makakoa wants the registration board to be residents of the precinct.

FTERNOON SPECIAL SESSION AT THE HOUSE OF ASSISTANT SUPERINTENDENT FEARY.

Present: Mr. Beckley.

(Session was held here at the house on account of Mr. Feary's illness.)

Q. Are you willing to give your opinion?—A. Yes.

Mr. FEARY was then sworn.

Mr. BECKLEY. Several charges have been made against you. First, you are charged with having discharged workmen at Waikolu on account of their political affiliations.

A. As regards the charge of dismissing men at Waikolu for political purposes, it is not so.

Q. You are charged with having taro pulled before it is ripe, spoiling an entire field without recompense as yet to the owner; with having mismanaged the poi contracts, which has caused the shortage of poi, and generally your management has been poor. Have you anything to say in regard to it?—A. I think my management has been to the best of my ability. I have done the best I could.

Q. Then you think your management has been to the best of your ability under the instructions of the board of health and the superintendent of the settlement?—A. I do. In regard to the charges relating to Waikolu, I have dismissed no men, except in accordance with orders. I have done everything to the best of my ability.

I do hereby certify that the foregoing is a full, true, and correct copy of the testimony and proceedings taken by me at Kalaupapa, Molokai, for the committees on behalf of the senate and house of representatives, acting together, being paged 1 to 88, both inclusive.

J. D. AVERY,

Stenographer of the House of Representatives.

EXHIBIT No. —.

HONOLULU, T. H., September 29, 1902.

Senator MITCHELL,

Chairman Subcommittee of

Senate Committee on Pacific Islands:

DEAR SIR: Inclosed herewith I hand you statement from myself on matters of public interest—some newspaper clippings, which are self-explanatory, and a statement of a private transaction, but which from its character has all the elements of public interest—all of which I hope you will find opportunity to peruse, and which I hope may assist

the Commission in its arduous work of reaching right conclusions the mass of matters that go to make up our local "pilikias." I know that you have an onerous task before you; but have no fear as to being discharged in a manner calculated to redound to the best interests of those making their homes in these islands, and to the glory of our country and flag.

Wishing you bon voyage on your homeward journey, I remain, with kind remembrance,

Yours, truly,

JOHN EMMELUTH,
P. O. Box 573, Honolulu, T. H.

STATEMENT OF JOHN EMMELUTH.

My name is John Emmeluth. I was born in Cincinnati, Ohio. My age is 48. Have resided in Honolulu for the past twenty-four years. My occupation is manager of Emmeluth & Co., Limited, a corporation of Hawaii, dealing in household furnishing goods, sheet metal, and plumbing.

I was a member of the "committee of safety" of thirteen in 1893 and of the advisory council of the provisional government which succeeded Queen Liliuokalani in power, and as such was a member of the constitutional convention of 1894, which framed the constitution of the republic of Hawaii. I held no office under the republic of Hawaii except as a member of the labor commission appointed by the president, S. B. Dole, in 1894. On the organization of this Territory by Congress, I joined the home-rule party, then, as now, under the leadership of R. W. Wilcox; became a member of the executive committee of said party, which body corresponds very closely with the state central committee of the parties on the mainland; was elected to the house of representatives of the first Territorial legislature from the Fifth representative district, comprising the west half of the city of Honolulu and the island of Oahu; was honored by the speaker of the house with the chairmanship of the committees on judiciary, finance, and public expenditures during both the regular and extra sessions of the legislature of 1901; took an active interest in all measures contemplated to decentralize the existing forms of government and substitute them for those forms familiar to all persons brought up under American government and institutions.

Fifteen years of observation of the trend of political conditions in Hawaii had before 1893 already satisfied me of the necessity for intervention by some strong power if the Hawaiian race was to be saved from total political and physical annihilation. During this interval an aristocracy of wealth had grown up in the little kingdom of Hawaii through the privileges and immunities obtained by the reciprocity treaty with the United States, which in its avariciousness for the almighty dollar threw to the winds consideration of the ordinary safeguards, and through its selfish methods and through the exploitation of the sources for securing cheap labor gathered together a cosmopolitan element from the four corners of the globe, bringing with them all their customs and traditions, their moralities and immoralities, into close everyday contact with the natives of the soil. The low wages at which these importations were employed and the disparity of women as compared with men in the importations naturally led to a condition of things socially, morally, and industrially most deplorable in its influence on the Hawaiian race.

Dr. C. T. Rodgers, superintendent of the Hawaiian census of 1890 (now secretary of the board of education), on page 23 says:

It is to be noted that the disparity of the sexes, which has always been an unpleasantly prominent feature of our census, still continues and seems likely to continue for a great while to come.

Also page 24:

The Japanese first appeared in a separate column in 1884, and then there were only 116 of them.

It will be seen that the disparity of the sexes already alluded to not only does not diminish, but steadily increases, the proportion of females to the whole population having fallen off in twenty-four years from 45.35 to 34.75 per cent.

It will be further noticed that the steady progress in this direction has been due entirely to the influx of large numbers of foreign males unaccompanied by any considerable number of females, and these have been, until recently, almost entirely Chinamen. The Japanese, as already noted, have nearly all come within the last six years, and of the 12,369 of that nationality returned in the census 18.45 per cent are females, while of the 15,301 Chinese only 5.09 per cent are females. In the eighteen years from 1872 to 1890 the Portuguese have increased from 395, of whom only 28, or 7.09 per cent, were females, to 8,602, of whom 3,832, or 44.55 per cent, are females. It will be seen, therefore, that to the Chinese immigration is mostly due the steadily increasing preponderance of males in our population previous to the present census.

I am fully aware that this is an old story. It has been written about in the newspapers and periodicals, talked about wherever men met, agitated in public meetings, and by anti-Chinese societies and discussed in the legislature, while little or nothing new remains to be said concerning it. It is nevertheless too important and conspicuous a subject to be passed over entirely without notice in a report of this kind.

The following figures are taken from the table above alluded to in the census of 1890, the census of 1896 under the republic of Hawaii, of which A. T. Atkinson (now superintendent of public instruction of the Territory) was superintendent, and from the United States census of 1900, of which Mr. Atkinson was also locally in charge:

Percentage of females to the whole population of the nationalities herein mentioned.

Year of census.	Chinese.	Japanese.	Portuguese.	Whole population.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
1866	9.17			45.25
1872	5.52		7.09	44.37
1878	3.90		13.30	41.19
1884	4.85	15.52	45.20	36.04
1890	5.09	18.45	44.55	34.75
1896	7.32	18.68	44.17	33.48
1900	13.47	22.26	No report.	30.98

From page 67 of the census of 1890 I give the following figures showing the prices paid for labor in Hawaii in 1890:

Following is a table showing the average monthly wages of plantation employees, January, 1890. I have been unable to obtain the same information of more recent date:

	Skilled labor.	Contract labor.	Day labor.		
			Men.	Women.	Minors.
Hawaiians	\$4.67	\$18.58	\$20.64	\$12.47	
Portuguese	47.42	19.54	22.25	13.29	\$10.61
Japanese	41.17	15.58	18.84	10.45	
Chinese	33.37	17.61	17.47		
South Sea Islanders	94.42	15.82	18.56	12.37	
Americans	94.42	20.00	17.45		
British	90.80		18.00		
Other nationalities	75.70	17.02	35.02		

On page 70 of the census report of 1890, above referred to, criticizing the policy of assisting immigrants, the doctor further states:

The object of this arrangement is the supplying the plantations with the necessary amount of cheap unskilled labor, "main strength and stupidity," which admitted to be an essential condition of success in sugar production.

Up to the passage of the American reciprocity treaty the plantation laborers were mostly natives and so far as they can be got they seem to have been always preferred but under the great increase of the planting business, due to the treaty, the supply of native labor became entirely inadequate to the demand. For some years the dependence was upon the Chinese, but the numbers of that nationality having reached a point which was believed to threaten a serious danger to our industry and social fabric, there was a general demand for a change of policy and Japanese have been introduced instead.

On pages 114-125, inclusive, of the Hawaiian annual for 1896, an authority on Hawaiian matters for nearly a generation and distributed by the Hawaiian government as an official handbook, is reprinted an article read before the Honolulu Social Science Club by Prof. W. L. Alexander, late surveyor-general of the republic and now in the United States Coast and Geodetic Survey Department, and whose history of Hawaii has been for years in use in the public schools of the island relating to immigration to Hawaii. In his preliminary reflections he says:

During the legislative session of 1878 the project of introducing East Indian coolies into these islands was warmly discussed. The member from Hamakua advocated the mixing of Asiatic races with the Hawaiians to improve the stock. "Look at my native island, Great Britain," said he, "the original Britons mingled with the Saxons and the Danes and the Normans, and the result was the world-conquering English race." At this point, Pilipo, a native member from North Kona, asked and was granted leave to put a question. He said: "Will the member from Hamakua please to inform us whether the Britons appropriated money to import the Saxons and the Danes and Normans?" A general laugh ensued, and the reply is not recorded. Pilipo were now living, he would see his patriotic forebodings fully justified.

During the last forty years the chief object of every Hawaiian administration has been to supply the demand for cheap agricultural labor. At the same time there have not been wanting friends of the native Hawaiians who have advocated the introduction of people of "cognate races," who should become amalgamated with them and infuse new life into their decaying stock. Various experiments have been tried with this end in view. Nor have patriotic statesmen been wanting who have opposed the importation of male laborers exclusively, and have advocated government assistance for the introduction of families of suitable character to become permanent citizens of the State, but with only partial success.

Again, page 115:

Kamehameha III, desiring to encourage the immigration of a class of people likely to make good citizens, endeavored to obtain the consent of the British Government to the removal to these islands of all the inhabitants of Pitcairn Island, to be settled as tenants on the crown lands. The project, however, failed, because General Miller stated that his government would never allow them to transfer their allegiance and become Hawaiian subjects. It is to be regretted that this promising experiment was not tried.

On page 123 he gives statistics of the result of forty years assisted immigration. Judging from the sentiments expressed, it would be valuable to the commission to have his opinion on conditions as they now exist with a relatively much larger percentage of Asiatics. He says:

The population of the Republic in round numbers now stands about as follows:

Hawaiians and part Hawaiian	40,000
Chinese	15,000
Japanese	24,000
Portuguese, including those born here	13,000
Other Europeans and Americans	7,000
Polynesians	1,000
Total	100,000

For comparison I submit the following figures from the United States Census of 1900:

Native Hawaiian and part Hawaiians.....	37,918
Chinese.....	25,767
Japanese.....	61,111
Other nationalities, including Americans, Europeans (except negroes) ..	28,972
Negros.....	233
Total.....	154,001

On page 123 of the above-mentioned article Professor Alexander says:

In looking over these figures it must be admitted that, as the labor commission of 1895 puts it, "The sugar interest has not improved the body politic" to any great extent by bringing settlers of the Caucasian races fitted to become citizens of the Republic. The Portuguese immigration, however, has been valuable by introducing an industrious and thrifty non-Asiatic agricultural class, such as form the backbone of any country. Many of them will become landowners on a small scale, and we may expect their children to be educated in the English language and in American principles of "liberty regulated by law." It is, therefore, to be hoped that before the door is closed against assisted immigration more of these people may become settled in the islands.

On American immigration he says:

It is strange that hitherto so little has been done to encourage immigration from the United States. As has been already stated, in order to insure the success of this Republic it will be necessary to build up and foster an intelligent middle class who understand the principles and methods of Anglo-Saxon self-government. To accomplish this desirable effect will require more systematic efforts to find settlers of this stamp and the offer of greater inducements to attract them and keep them here.

Among his conclusions, page 125, he says:

The new land law just submitted to the legislature and the admirable report of the labor commission on the coffee industry together contain the best solution yet offered of the problem how to promote American immigration of the agricultural class. Upon the solution of this problem depends the future fate of the Republic, and it will call for a high degree of wisdom and practical skill on the part of the government, as well as the active and patriotic cooperation of private landowners and capitalists during the next few years, to bring it to a successful conclusion.

Holding the views before set forth, and with a knowledge of the conditions existing, I make no excuse for my affiliation with an element primarily and honestly seeking to apply to this Territory the principles of "home rule," which is a fundamental part of the American system of government.

In support of the contention that the Government created on January 17, 1893, was not sincere in its assertion of a desire for complete annexation, I need only to point to the premeditated and persistent policy of immigration continued throughout its existence and culminating in the greatest activity during what has become known as "the transition period;" that is, between August 12, 1898, and June 14, 1900—a policy that is totally at variance with that obtaining in the country with which we sought political union in increasing the Asiatic population, as shown by the following comparative figures from the Hawaiian census of 1890 and 1896 and the United States census of 1900:

	Census of—		
	1890.	1896.	1900.
Chinese population of Hawaii.....	17,002	21,616	25,699
Japanese population of Hawaii.....	12,360	24,407	35,598
Total oriental population of Hawaii.....	29,362	46,023	61,297
Total population.....	89,990	109,020	154,000

The duplicity of the Government and its connivance with the planing interests during this period can be better understood by your committee upon first perusing the laws and regulations restricting Chinese immigration and then figuring out the number of Chinese represented by the deposits now in the Treasury against the return of Chinese under the law. While the fund, amounting to approximately \$250,000, would be sufficient to return 7,000 Chinese plantation laborers, the report of the governor of the Territory of Hawaii to the Secretary of the Interior for the year ending September, 1900, page 16, tabulation of laborers on plantations, shows that in 1899 there were a total of but 5,969 Chinese employed, and I venture the assertion that 25 per cent of these were laborers who did not come within the requirements of the law demanding deposits. Under the provisions of the law the planters were obligated to bring in 10 per cent of European and American laborers to the other 90 per cent from other sources. They were even placed under bonds for specific performance of this condition. On page 15 of the governor's report is a table of passenger movements, 1898 to June 14, 1900, which shows an increase of 4,000 Chinese, 35,598 Japanese, and 2,066 of all other nationalities. Of "all other nationalities," not one was an assisted American immigrant, and not to exceed 15 per cent came within the agreements between the planters and the board of immigration. In other words, not more than 1 per cent of the total assisted immigrants were of American or European birth.

In summing up the labor requirements of this Territory I desire to place the commission to keep constantly before them the totals of Asiatics now on plantations compared with the whole number of Asiatics in the Territory. The following are the figures taken from the United States Census of 1900 and the governor of Hawaii's report of the same year:

Number of Asiatics in the Territory of Hawaii and how employed.

	Chinese.	Japanese
Total on plantations.....	5,969	25,699
Total not on plantations and in competition with citizen labor.....	19,798	35,598
Total in Territory.....	25,767	61,297

Add to this number 3,000 Chinese registered in excess of the census by the internal-revenue department under the provisions of the organic act and you have a grand total of 89,878 Asiatics, of which the census shows 69,804 to have been males. Deducting the number of Asiatics employed on plantations (all males) leaves a total of 38,181 Asiatic males in direct competition with 32,605 non-Asiatics, about 12,000 of whom are registered voters of the Territory under the educational

qualifications of the organic act, the remaining non-Asiatics, 3,958, being, according to the governor's report, employed as unskilled laborers on the plantations.

I wish to point out to the commission in connection with these statistics the utter lack of reliable information to be obtained from sources of yearly tabulation. I notice a disposition on the part of the local government to belittle the value of statistical information, urging that the department at Washington having the oversight of such details need not seek yearly information on the various matters of public interest in this Territory. I would strongly advise urging the authorities at Washington to keep up yearly tabulations, such as were secured through the work of Mr. Omsted for a period of not less than five years. The statistics resulting therefrom would be of immense value in determining the lines on which to work out our local problems.

The foregoing comparative statistics indicate in measure that the obligations the United States assumed when annexing these islands were not confined to the mere cancellation of our financial indebtedness. They show a great moral wrong, an exploitation of opportunities created by environment along commercial lines to the utter ignoring of those higher, nobler principles which, lying close to virtue and honor, make for a pure home life, the only sure foundation for sound national life. Who is to blame?

In Thrum's Hawaiian Annual for 1890, page 106, is an analysis of the great register of voters for the years 1887-88, which shows, when considered in conjunction with the constitution of 1887, how effectively the foreign (or sugar planting) element intrenched itself in power thereby. The tables show that while the Hawaiians formed 63.95 per cent of the voters for representatives, they were only 35.54 per cent of the voters for nobles—a property qualification applying to voters for the upper house. The foreign element, which would have been in the minority under popular suffrage, was thus enabled to manipulate legislation as policy and their interests might dictate up to the time of the overthrow of the monarchy. During the existence of the provisional government and the republic of Hawaii our civilization had even more pronounced opportunities to assert itself, for as shown by the elections held during this interval the Hawaiians had been effectually disfranchised by the oath required to be taken and their loyalty to the ex-Queen. The white man in Hawaii has to shoulder in large measure the responsibility for the moral and social depravity, as well as the unfortunate industrial competition with which a vast majority of the electorate have to contend incessantly. The political history of these islands since annexation is practically a perpetuation of former conditions, with absolutely no regard for constitutional limitations except where enforced by Federal authority.

The governor, by reason of his record in the movement for annexation, had placed himself in an unenviable position in relation to the Hawaiian race. By his unwise acceptance of the position of first governor of the Territory, he was confronted with the necessity of dealing with an element which had been for seven years held in subjugation by a constant show of force by the government of which he had been the head. Through the operation of the United States Constitution and under the terms of the organic act, the Hawaiian had been placed on an equal footing with other citizens of the United States, and, by reason of numbers, for the time being at least, forms the majority element in this Territory.

Under these circumstances, the wise course for the government pursued, to my mind, would have been one of pacification—straightforward, and hearty yielding to the inevitable and an endeavor to win the confidence of his former opponents by so as would have promptly suggested themselves to any American might have held the office. Unfortunately, the situation was vitiated by the overzealous activity of persons who succeeded in bringing into our local affairs the party issues of the mainland. I had prepared ourselves for the same by alteration of our law form with the American system of government. To make it worse, the governor allied himself with one of these parties, identifying his administration therewith, but at the same time every principle which had given that party its prestige and support on the mainland, thereby alienating the support of a large number of that party's adherents among the voters of this Territory.

The conditions thus created are deplorable. The native element determined to hold aloof from affiliation to any great extent, either of the parties known on the mainland until they have secured freedom from the political thralldom of the past through the institution of local self-government. With the right man at the helm years ago, the home rule party would to-day be a thing of the past. Business confidence would have been unshaken, the financial system would not have been disturbed, and needed public works would have been provided for and completed long before the writing of these lines. And the Republican party on such a record as might have been made would be looking forward to an easy victory with ability and integrity as its nominees instead of being compelled to make questionable combinations with elements which but rarely were hostile to the party and its principles. In national politics I am a Democrat, but above party considerations I feel that I am an American and as such confess my sincere regrets at the political condition at present existing in this Territory.

The records of both houses of the legislature of 1901 and the correspondence between them and the executive yield conclusive proof of the ill-concealed hostility of the governor toward any measures leading to breaking down the barriers of special privilege in this Territory. Finding itself in the majority in both houses in the legislature the home rule party, immediately after the election of 1900, through its executive committee, invited the cooperation of the other parties in the framing of bills embodying the American principles of home rule. Its overtures were turned down by the element backing the governor and the first gun of dissension was fired. Next, its executive committee appointed a subcommittee on legislation, of which I was writer was chairman. Desiring information concerning various departments of the Territorial government, needed in framing legislation, and with knowledge that such reports were already prepared or in course of preparation, I wrote the governor a letter in which I certify the following to be a true copy:

HONOLULU, H. I., *December 11, 1901*

MR. S. B. DOLE,

Governor of the Territory of Hawaii.

SIR: Noticing in the published reports of the meeting of the executive committee reference to a request for information in re waterworks receipts and disbursements which I addressed to Mr. A. Brown (superintendent waterworks) and desiring to seek similar information from other bureaus and departments of the government

The original of the letter
was of the 1st of the month
and are found in the
correspondence of the
want to say I am
matter being, but

time in the form of printed reports or other available means for transmission.

The legislature met February 20, 1901, and, to our surprise, Secretary Cooper, by direction of the governor (so the secretary stated together with his stenographer, took a position at a desk close to that of the journal clerk on the floor of the house. Consultation on this matter resulted in introducing H. R. No. 2 by Mr. Beckley, reading follows:

Whereas it is a fundamental principle of the Constitution of the United States that the legislative, executive, and judicial departments of the Government shall be kept separate and independent; and

Whereas Henry E. Cooper, secretary for the Territory, is occupying a seat on the floor of this house: Therefore, be it

Resolved, That the said secretary, Henry E. Cooper, be, and is hereby, requested to remove his desk from the house. (House Journal, p. 6.)

The resolution went over until February 23, third day, and was then passed by a vote of 24 to 9. (House Journal, pp. 13, 14.)

The journal goes on to say that the secretary of the Territory inquired of the speaker whether he understood the resolution to mean that the secretary was denied the privilege of being on the floor of the house, to which the speaker replied in the affirmative. Wishing to avoid any possible misconstruction of what was intended, the writer then arose and explained that the secretary was denied the privilege of being on the floor of the house in his capacity as an executive officer but not in the hall as a citizen. The secretary then stated that he would leave under escort of the sergeant-at-arms, and the sergeant-at-arms performed that duty on direction of the speaker.

This action, together with the subject-matter of H. R. No. 3 (House Journal, p. 7), reciting the fact that the American flag, carrying with it the United States Constitution with its guarantees of liberty, was raised in Hawaii August 12, 1898, "since which time the people of these islands have assumed to the United States a position of filial obedience and respectful neutrality in regard to American political parties," declaring it "timely and useful to solemnly remind the present and the people throughout the Territory of the great principles lying at the foundation of the Constitution of the United States, the supreme law of the land, and which must ever be our guiding star in legislative labors, as a protest purely mercenary or class ideas against legislation, and" as the most appropriate manner on which to honor the greatest American on the eve of the anniversary of his birth (February 21), and ordering the Declaration of Independence read in English and Hawaiian and spread in full upon the journal, will indicate the spirit in which the first Territorial legislature took to its duties. H. R. No. 3 was written by its introducer, a Hawaiian, and the youngest member of the legislature.

Pages 15 to 28, inclusive, of the journal contain the governor's message to the legislature. His references to experimental stages of county government and the dual conditions proposed in its inauguration would put the blush of shame on any American reading the same. His reference to culpability of sufferers by bubonic plague (second paragraph, p. 19) is an indictment of criminal neglect on the part of the government in not pushing the sanitary measures that were before the legislature of 1898. His recommendation for the passage of a loan act in excess of the amount required or that could legally be raised under the terms of the organic act, together with the totality

absence of any reference to revenue measures that would yield the requirements for public expenditures in some other way, evidences how poor a financier the governor actually is. Section 55 of the organic act limits the amount of loans to be made by the legislature to "1 per cent upon the assessed valuation of the taxable property of the territory * * * as shown by the last general assessment for taxation." The governor in his message (p. 17) gives the assessment of 1900 at \$97,491,584, 1 per cent of which would be \$974,915.84, and then asks for the authorization of a loan of \$1,946,900. Notwithstanding the fact that property is assessed in Hawaii at its cash valuation, the governor (p. 17) says:

I recommend the passage of a loan act for a larger amount than at present required, under which the legislature at each session may appropriate funds as may be required, thus obviating the necessity of passing a new loan bill at each session. Such a course has been adopted by the legislature of 1896, and has been satisfactory.

H. R. No. 25, relating to acts of the executive during the transition period (House Journal, p. 116) and reply thereto (p. 161), together with H. R. No. 75 (pp. 212, 213), amending the above form, the steps in the procedure on which I examined the governor before the commission. His reply to the amended resolution (p. 243) is a model for future legislators to copy when addressing those who presume to bank on equal rights or privileges. In closing the communication he writes:

I think this proposition covers the ground sufficiently for the needs of the house.

The house ordered the communication returned to the governor. His extreme step would probably not have been taken had not the governor's private secretary returned to the house committee on public lands and internal improvements a resolution requesting information forwarded to the governor by said committee and certified to by the chairman as a true copy (p. 142). The letter, to my mind, marks a new departure in communications between coordinate branches of the government, and for this reason I copy same in full, as follows (House Journal, p. 143):

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, March 16, 1901.

HON. JESSE P. MAKAINAI,
Chairman Committee on Public Lands, etc.

SIR: I am directed by the governor to return the inclosed papers, as they are not in such shape as can be considered by him.

Very respectfully,

ALEX. G. HAWES,
Private Secretary to the Governor.

On page 189 the governor stated to the committee that—

The reason why this resolution was not in shape to be considered by me * * * was that the first resolution was not properly certified to by the clerk. It may seem a matter of little importance to you, but long experience has shown that it is best to be particular about the authenticity of papers.

Mr. Makainai then stated that he certified to the resolution, whereupon the governor said: "You should have demanded the clerk's certificate." The tone of the communication from the governor to H. R. No. 25 as amended, together with his failure to sign his official title to any communication he sent to the house, caused the house to think that it is best to be particular about the authenticity of papers," and in motion of Mr. Beckley the communication was "ordered returned to the governor with the statement that this house will not entertain

any communication that is not in proper shape" (p. 243). I quote your remarks made by myself upon the passage of the motion above referred to (as reported by the Star, one of the governor's organs), indicating the attitude of the house upon that occasion. The Star said

Emmeluth supported the motion to return the letter. He said he was sorry for the relations existing between the house and the executive, as shown by the obvious absence of usual etiquette and the refusal to meet reasonable requirements of the house. It is because the house is in ignorance of matters determined in executive council and by the governor that we are unable to ask for information in proper terms. I understand the council is to-day considering matters that ought to be referred to this house. I am sorry that these relations do exist, because I have prepared a resolution by which it was hoped to obtain from the governor his view to a continuance of this legislature in extra session. It is evident from the tenor of this communication that the relations between the governor and the house are such that we can not properly consider the subject-matter of the resolution I desire to introduce. I want to express to him regrets at the conditions existing and I hope that there may be some avenue for obtaining a better understanding.

The governor was not again heard from on this subject. Neither did he furnish at any time to the house the matter promised in his communication of March 18, in which he says:

I will furnish the house with copies of the official correspondence between the Government and its special agent, Mr. Alfred S. Hartwell, during the transitional period, as soon as they are prepared (p. 161).

As already stated, during the legislative session I was chairman of the house committees on finance, judiciary, and public expenditures, and member of joint committee on investigation of tax laws, in which several positions I had exceptional opportunities for gaining an insight into expenditures during the entire period of the provisional government and Republic and incidentally into the methods by which persons favored by the Government were protected from loss on contracts made therewith. As from the committee on public expenditures, I made a report to the legislature on April 29, from which I quote you the following figures:

Assuming the population to have averaged 145,000 during the three years covered by the appropriations, it cost a total of \$8,518,959.66, or a per capita per annum of \$19.58. In California the State cost, as shown by the last report, was \$4.66, while in the city of San Francisco, having perhaps one of the most costly of all municipal establishments, the amount of all taxes per capita was only \$8.43.

I hand you herewith part of a report submitted to the committee on public expenditures by the expert having the examination of the books in hand. The first four pages comprise appropriations for salaries that became inoperative through the going into effect of the organic act and amounting to \$441,260.35. The succeeding five pages show where the council of state, immediately upon learning this state of affairs, made appropriations increasing old salaries and inserting new ones to a total of \$535,786.82. This is an example of the character of economy practiced by what is locally known as "the best government on earth."

Quoting further from the report from which the excerpt is taken

We found the cost to the government of maintaining the leper settlement for a biennial period amounted to \$305,205. Maintaining insane asylum, \$91,977. The attorney-general's expenses had among them incidentals such as "cigars," "meal" and "hack hire" that footed up well on the programme. His department of stationery amounting to \$2,295; stamps, \$919, and his typewriting bill was \$15. Sundries totaled up \$317, and ice for the period cost \$337.

One feature of every legislative session, that I am aware of, is the necessity for making appropriations for unpaid bills. At the last session

ion these amounted to \$86,000. Judging from the amount of work performed by the government during the last eighteen months without legislative authorization, I should judge the unpaid-bills appropriation that will be requested of the coming legislature will total close to, if not exceeding, \$250,000. One of the matters investigated was that is known as the Pali road contract. W. E. Rowell, a relative of the governor, was up to the 1st of May, 1901, in continuous service of the government from the time of the overthrow of the monarchy. He is, like many others of the government, an honest man, in the sense that he would not knowingly put his hand in the treasury and help himself to coin. I advert to this, inasmuch as the constant cry of the elements in control of the government is "Honesty, honesty, honesty." This man Rowell was assistant superintendent of public works, and as such advertised for tenders to build a road up the valley from Honolulu to what is known as the Pali. When the bids were opened C. B. Dwight was found to be the lowest bidder, at \$29,975, for the work specified. He was required to furnish a bond of \$2,000 and commence operations building the road. After having completed it to exceed one-fifth of the same, and finding that at the rate of progress he was making he was going to lose money, Dwight communicated with the public works department, with the result that not only did they release him from his contract and allow his bondsmen to go scot-free, but turned around and hired him, his teams, and men at day work to complete the work. At the time of legislative inquiry a sum of \$75,000 in round numbers had been spent on this road, which it required three thousand and odd dollars to complete, making total cost of \$78,000 to the taxpayers for a road which had been originally contracted at less than \$30,000. In summing up our conclusions the committee recommended in part:

Our committee believes that the interests of the department of public works and the community at large would be subserved by the separation of W. E. Rowell from the administrative service of that department, and we recommend accordingly. We recommend further that a penal clause covering malfeasance in office be added to the general laws; that the amount of a bond required with a contract for public work should be not less than 40 per cent of the contract price of the work, and that no more sureties owning unencumbered real estate in the Territory be on such bond.

The circumstances surrounding this case are worth commenting on, illustrative of the methods and tendencies under the centralized condition of things existing in this Territory to-day. J. A. McCandless is a member of the legislature of 1898, and as such unmercifully roasted this same man Rowell for sundry malfeasances of a similar character to that noted in the matter of the Pali contract, though not aggregating so large a sum. Upon the organization of the Territorial government McCandless was offered the portfolio of superintendent of public works by Governor Dole, and I quote you language of the report, as follows:

Mr. McCandless permitted his anxiety to hold office to overcome both his prejudice and his judgment, and at the mandate of a superior, who was the friend of W. E. Rowell, took office under a promise, direct or implied, that the protégé of his superior should not be disturbed in the enjoyment of his sinecure.

This is by no means an isolated instance of excesses of this character. Legislative inquiry was made into conditions surrounding the awarding of contract for building a road around Diamond Head to one J. J. Meier, at \$9,700 for the total work, and signing agreements with him

at an advance of \$1,100 over and above this price, with the identical specifications attached on which the original tender was made. This was done by this same J. A. McCandless, and yet the governor set his name to the senate for confirmation as superintendent of public works for a period of four years longer.

On March 21 the governor transmitted to both houses of the legislature a message, as follows:

Upon the approval of "An act to provide a government for the Territory of Hawaii," I requested Judge Walter F. Frear, of the supreme court, to prepare a revision of the Hawaiian laws as affected by such act, etc.

The item of \$8,000 in the estimates for "compiling and publishing revised laws" was intended to cover \$2,000 for the work of compiling and revising, about \$500 for translating into Hawaiian, \$5,000 for publishing in both languages, and \$500 for incidental expenses, including proof reading and preparation of an index and table of contents.

I recommend that the legislature take measures to acquire Judge Frear's revision of the Hawaiian laws which is now substantially complete, and enact the same at the present session of the legislature. Hawaiian code and provide for publication thereof.

SANFORD B. DOLE

EXECUTIVE CHAMBER, March 21, 1901.

In criticising this action of the governor the majority of the judicial committee of the upper house said in part in their report thereon as follows:

This is the first instance in which an individual has been enterprising enough to undertake a revision of the laws without prior legislative authority so to do, and it is singular indeed that the governor should have failed to direct the attention of the legislature to so important a matter in his first and general message, and it is equally singular that the chief justice (Judge Frear) should have preserved entire silence upon the matter in his report to the legislature.

It is customary in all of the United States, as well as in the Territories, for the revision or compilation of laws to be effected by a special act of the legislature authorizing such revision or compilation to be made by a commission appointed for that purpose by either the legislature or the governor.

Further comment is unnecessary.

The following newspaper articles are filed with your committee for your information on existing conditions in the Territory without comment from me:

Open letter to Governor Dole on the bribery charges made by the governor against the legislature. (Bulletin, May 3, 1901.)

Judge Morris M. Estee on Chinese exclusion laws and their purpose. (Star, November 10, 1900.)

Importance of small farms. (Editorial, Republican, November 16, 1900.)

Local conditions. (Republican, May 9, 1901.)

Abuses of liquor laws by the Dole government. (Republican, April 4, 1901.)

Also copy of Hawaiian laws and regulations restricting Chinese immigration, published by the Chinese bureau, department of foreign affairs, 1896.

I also desire to submit my official certificate of election as a member of the legislature, signed by the high sheriff of the Territory of Hawaii in accordance with existing Hawaiian law, a copy of my appointment as a member of the tax commission authorized by the legislature, and a copy of the concurrent resolution under which the commission was appointed.

The reduction of revenue as mentioned by the governor of the Territory in his message, together with the methods of assessing and collecting taxes, the total absence of reliable information as regards property throughout the group outside of Honolulu, all pointed to the desirability of creating such a commission and yielding it sufficient funds to make its work effective. The joint committee on investi-

ion of tax laws, working through the legislative session, found great hardship in collecting reliable data concerning the industrial conditions of the Territory. What it did collect is represented in part in a tabulation which is submitted herewith for the information of the commission. Lack of time prevents my putting the matter into more condensed shape or neater form, but I feel that such value attaches to the general information contained that I can not permit these minor matters to stand in the way of my presenting the facts to your commission. The list of questions on which the answers are based is attached to the back of the tables. The variety of answers given—for instance, taking question 5, which is cost of cultivating cane per acre per crop—is answered by the different plantations all the way from \$65 to \$300 per acre. The statistics as to land under control of the different plantations are interesting as illustrating the fallacy of the leasehold system as now conducted by the Government. I would call your attention to 2,800 acres of land leased by E. Lindemann in the year 1891 on the island of Kauai at a rental of \$800 per annum; term of lease, thirty years. Two thousand six hundred acres of this land were sublet to Lihue plantation in 1899 for the sum of \$10,000 per annum, thus netting Lindemann \$2,200 per year and a homestead of 200 acres reserved. While admitting that this is among exceptionally favorable leases, still it indicates the necessity for change in the general law. I thoroughly believe in the perpetual lease system as the best means for working out the problems we have in these islands—to yield a man perpetual right to the use of the land on condition that he live on it, cultivate it, and pay his taxes, coupled with the privilege of at any time disposing of his improvements to anyone else that will continue the agreements under the original lease; that is, would live on the land, cultivate it, and pay his taxes. This, to my mind, is the only bar to encroachments by capitalists and speculators and the only preventive of absorption by large corporations. In conclusion, I would like to see the commission recommend changes in the organic act:

First. Permitting any citizen of the United States, regardless of previous residence in the Territory of Hawaii, to serve as governor of said Territory.

Second. Permitting President like discretion in the appointment of judges in the Territory.

Third. Permitting appeals from the local supreme court to United States courts.

Fourth. Such modification of the land laws of the Territory or direct control by the United States authorities as would yield to bona fide settlers opportunities for homesteading on a liberal scale.

Fifth. I am a thorough believer in the nationalization of the water rights of this Territory, and sincerely view with unfeigned alarm the tendency to yielding up these valuable concessions to private corporations for any consideration.

Sixth. The Government should, as rapidly as possible, bring under its direct control all wharves and landings in this Territory. For this reason I look on the transfer of water-front property from the Territorial government to the Oahu Railway and Land Company as an unwarranted, fraudulent transaction.

Seventh. In the matter of labor, you will readily glean from the character of statements made and the tabulations submitted that I am one of those who feel firmly convinced that there is already too much Asiatic labor in this Territory; that the sacrifices made in the past for

the sake of the upbuilding of a single industry should not be continued if our civilization and the American farmer are to have a ghost of a show in the future of this Territory. Take the tabulations as made by the committee on taxation, to which reference is made above, and analyze them as they should be analyzed, segregating the mill costs from the actual field-labor costs, giving that labor an equal opportunity with the capital that is invested in the mill, and the average American farmer could cultivate cane in the Tropics at a profit 10 to 1 of what is yielded him in his cultivation of the corn fields of Kansas or wheat fields of Minnesota. All that is needed is a guarantee of a reasonably uniform water supply and there is hardly an acre of land in this Territory but what would net a farmer \$150 to \$200 per acre. In connection with another matter I will submit you a statement signed by the treasurer of one of our large sugar agencies reporting on conditions in the company, which owns 145 acres of land and having a contract with an adjoining plantation to grind cane, the company turning off of 70 acres in 1900 cane that netted them in sugar a profit of \$39,500. Should the commission consider the information of value, I would be willing to assist them by a tabulation of the labor employed on plantations that will show what a relatively small figure this item of labor really cuts in the general expenditures of sugar corporations.

Eighth. The franchise and residence qualifications for voting and serving in office.

I do not believe in further limiting nor yet further extending the franchise under which the residents of this Territory now exercise their privilege. I believe in shortening the term of residence necessary to become a citizen of the Territory, as well as the term of residence now required for holding office, and in abolishing the age limit for eligibility to hold Territorial offices. In other words, I believe in Americanizing this community as fast as God and the conditions will permit. I must admit that we have unique local conditions and a most cosmopolitan population, which of necessity will mean in the near future a large accession of voters from the native-born of these various races. Under the conditions which would be created through the adoption of local self-government and a firm attitude on the question of immigration to this Territory, the future of these islands need not be despaired of. The Americans of this Territory wish you God-speed in the work you have undertaken coupled with your mission to these islands. If your recommendations will make for the betterment of the Territory and its permanent interests is the sincere hope of

Yours, truly,

JOHN EMMELUTH,

P. O. Box 573, Honolulu, T. H.

HONOLULU. *September 29, 1902.*

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, January 3, 1900.

MR. JOHN EMMELUTH,
Honolulu, H. T.

SIR: I have received your letter of December 11, requesting information upon a variety of subjects.

The mass of information desired is so considerable that its preparation would seriously interfere with the work of the different departments.

bureaus, which are at the present time pressed with extra work in the preparation of estimates and reports for the information of the next legislature.

Much of the information you ask for will doubtless be furnished in such reports, and legislative committees will be able to collect such additional information from the different departments as may be necessary to the work of the legislature.

Very respectfully,

SANFORD B. DOLE.

When the organic act went into effect on June 14, 1900, the following appropriations for salaries became inoperative, the offices which they represent being either absorbed into the federal system or entirely gone away with.

There are also a few items of permanent settlements which, owing to the death of the beneficiaries, are now useless.

These changes will prevent further expenditures from certain existing appropriations, the unexpended balances of which are as follows:

Salary of President.....		\$18,566.67
Permanent settlements.....		10,720.00
Queen Dowager Kapiolani.....	\$4,000.00	
Kaiulani.....	6,000.00	
F. W. Fehlbehr.....	720.00	
Judiciary department.....		52,808.42
Salary chief justice.....	11,000.00	
Salary first associate justice.....	7,736.30	
Salary second associate justice.....	7,736.30	
Salary first circuit judge.....	6,189.27	
Salary second circuit judge.....	6,189.27	
Salary circuit judge second circuit.....	4,641.67	
Salary circuit judge third and fourth circuits.....	4,673.94	
Salary circuit judge fifth circuit.....	4,641.67	
Department of foreign affairs.....		44,753.33
Salary minister of foreign affairs.....	9,283.33	
Salary secretary.....	3,713.33	
Salary clerk executive council.....	2,500.00	
Salary envoy at Washington (Aug. 12, 1898).....	12,000.00	
Salary secretary of legation (Aug. 12, 1898).....	8,400.00	
Salary consul-general, San Francisco.....	7,000.00	
Salary clerical aid, San Francisco.....	1,856.67	
Postal bureau.....		137,436.60
Salary postmaster-general.....	4,641.67	
Salary deputy postmaster-general secretary.....	3,094.64	
Salary superintendent postal savings bank.....	3,167.00	
Salary postal money-order department.....	3,094.64	
Salary clerks.....	41,486.34	
Pay of postmasters.....	44,708.57	
Pay of mail carriers.....	37,243.74	
Bureau of customs.....		170,941.55
Salary collector-general.....	4,641.67	
Salary deputy collector-general.....	4,177.50	
Salary three entry clerks.....	6,034.18	
Salary three statistical clerks.....	6,498.35	
Salary of port surveyor, Honolulu.....	3,094.64	
Salary of storekeeper.....	1,856.67	
Pay of appraiser.....	3,249.17	
Pay of assistant appraiser.....	2,320.84	
Salary customs gauger and tester.....	2,320.84	
Salary two examiners.....	3,864.96	
Salary appraiser's storekeeper.....	1,856.67

HONOLULU, T. H., June 22, 1901.

Hon. JOHN EMMELUTH,

Representative from the Fifth District.

SIR: By the terms of house concurrent resolution No. 5, providing for a special committee on taxation (copy of which resolution is herewith inclosed), I take pleasure in naming you as chairman of said committee.

I have named Representative A. G. M. Robertson, of the fourth district, and Representative Jesse P. Makainai, of the fifth district, as your associates from the house of representatives.

Yours, truly,

JOSEPH A. AKINA, *Speaker.*

CONCURRENT RESOLUTION.

Be it resolved by the house of representatives, the senate concurring That a commission of five members of this legislature be, and the same is hereby, created for the purpose of investigating the system of taxation and reporting upon plans looking toward an organization of the same.

That this commission shall consist of two senators to be appointed by the president of the senate, and three representatives to be appointed by the speaker of the house.

That it shall be the duty of such commission to report to a subsequent session of this legislature or to the first session of the next legislature a report upon its findings and a bill embodying such recommendations as the commission may determine.

That said commission shall have power to send for persons and papers, to examine them, to administer oaths, and to hold session whenever or wherever a quorum, consisting of a majority of its members, shall be present.

That this commission shall be authorized to employ a clerk and to make such examinations other than in Honolulu that it may elect either by the commission or a subcommittee of it.

That any printing or stationery that may be needed by this commission shall be furnished by the secretary of the Territory, and that the superintendent of public works shall furnish office accommodation and supplies to said commission.

We hereby certify that the above resolution has passed the house of representatives, Territory of Hawaii, this 30th day of April, 1901.

JOSEPH A. AKINA, *Speaker.*

Clerk House of Representatives.

We do hereby certify that the foregoing resolution was duly passed by the senate of the Territory of Hawaii this first day of May, A. D. 1901.

S. E. KAINE, *President.*

EDGAR CAYPLESS,

Clerk of the Senate.

CERTIFICATE OF ELECTION.

I, Arthur M. Brown, high sheriff of the Territory of Hawaii, do hereby certify that John Emmeluth, esq., was, on the 6th day of November, 1900, duly elected a representative for the Fifth election district for a term expiring on the fourth day of November, A. D. 1902.

Witness my hand this 7th day of November, 1900.

[SEAL.]

ARTHUR M. BROWN,

High Sheriff of the Territory of Hawaii.

EXHIBIT No. —.

STATEMENT OF J. EMMELUTH IN RE WATER RIGHTS IN WAHIAWA,
WAIALUA DISTRICT, OAHU.

The undersigned, a native of Cincinnati, Ohio, and resident in these islands for twenty-four years, requests permission to submit the following statement of facts to the subcommittee on Pacific Islands and Porto Rico of the United States Senate:

During the year 1899 I secured certain leases on lands in the district of Waialua, island of Oahu, Territory of Hawaii, for the term of fifty years, which leases in part comprise the lands abutting on the north Kaukonahua, on the bank opposite what is known as Waibiawa colony. In securing these several leases I was in active competition with the Waialua Agricultural Company and its agents, Messrs. Castle & Cooke, Limited, J. B. Atherton being president, W. A. Bowen, treasurer, and E. D. Tenney, secretary of the agency, as well as of Waialua Agricultural Company.

A. E. Nichols, of this city, was associated with me in the enterprise, and we sought a lease of forest land belonging to the Bishop estate, a local corporation having offices in this city. In securing this lease we again competed with the Waialua Agricultural Company to the extent that the Bishop estate concluded to put up a conditional lease for a term of twenty-one years of the forest land under their control at auction, which was done the latter part of 1899. The only competitors at said sale were the Waialua Agricultural Company and the interests represented by myself. The upset price was an offer which had been made of \$1,750, the lease being finally knocked down to the interests represented by myself at a rental of \$5,500 per annum; this after active and persistent competition by the manager of the Waialua Agricultural Company, Limited.

Having secured this lease, and deeming it absolutely essential to the success of the enterprise we were developing to secure rights in the adjoining forest lands, which belonged to the government, the undersigned, on August 24, 1900, addressed a letter to Mr. Wray Taylor, commissioner of agriculture, embodying a request for stream rights under conditions therein named, the lands and stream referred to being a branch of the Kaukonahua stream hereinbefore mentioned. This letter is marked "Exhibit F." No response being received to said letter, and accidentally learning, on the morning of September 5 following, of efforts being made by the Waialua Agricultural Company to forestall us in the matter of securing any rights in this stream bed from the government, and that the matter was then being discussed by the governor and his executive council in secret session, I immediately wrote the letter addressed to the governor of the Territory and submitted herewith as "Exhibit G," in which I called his attention to the letter previously written to the commissioner of agriculture. I was thereupon invited by the governor to meet him in his office at the capitol and there discuss with him the matters of water rights in the stream in question. At this meeting the governor handed me a copy of an agreement which he admitted was being considered in executive council, which copy as handed me is herewith submitted as "Exhibit H."

The governor at that time stated that the company to be formed under the terms of the agreement mentioned above was to be incor-

porated for \$750,000. Of this sum \$250,000 was to represent the already acquired water rights of the Waialua Agricultural Company \$250,000 the interests of the promoters of the Wahiawa colony as therein set forth, and \$250,000 the cost of construction of the proposed dams and reservoirs. On the very day of my interview in question Mr. J. B. Atherton, president of the Waialua Agricultural Company and of Castle & Cooke, its agents, secured from George Galbraith, the owner of one of the properties under lease to our company, an assignment of his right in the said lease during the term thereof in consideration of a guaranty of the annual rental.

Owing to our inability to cultivate these lands on account of disputed water rights, we were subject to heavy drafts for rental without income, and the sole object of securing the assignment of this lease was to assist the Waialua Agricultural Company in promoting its case before the governor and his council. In consequence of action taken by Mr. Atherton, a suit was instituted involving a decision of the 1,000-acre land clause in the organic act, which was decided against our company.

In the course of conversation with the governor he assured me of the appreciation of the purposes of our company as outlined to him by myself and of his intention to permit the entire matter to remain in abeyance until a written proposition could be submitted by our company embodying the details discussed by us. Notice of the governor's expression and request as above was acknowledged by our company (the Wahiawa Sugar Company, Limited) in a letter dated September 10, 1900, addressed to the governor and submitted as "Exhibit J." On September 12, 1900, the proposal itself was submitted to the governor in a letter, a copy of which is submitted as "Exhibit K." We respectfully request careful perusal of this letter and consideration of the colonization propositions, the future labor conditions, and the terms on which we requested rights in the stream as therein outlined and a comparison of them with the agreements finally reached in disposing of this water.

A few days after submitting this letter the Wahiawa Sugar Company, Limited, was informed through outside sources that employees of the Waialua Agricultural Company were cutting timber and clearing land in the government forest belt—a line of action in conflict with the statements made to the undersigned by the governor during our interview above noted. Under date September 17, 1900, we wrote the governor bearing on this subject a letter marked "Exhibit L." Bearing same date the governor made reply to this letter ("Exhibit M") which directly controverts statements made to the undersigned during our interview. On the 19th our company again asked similar concessions as those granted the Waialua Company in a letter a copy of which is shown as "Exhibit N," the governor replying thereto in a letter the original of which is submitted as "Exhibit O," wherein studiously ignoring common terms, he makes a further play for time. Our company made reply in letter dated September 24, 1900 (see "Exhibit P"), explaining what a "grade line" was and repeating our request for right to enter the forest land. On the same date the governor's private secretary gave notice to the undersigned of a hearing to be given the Wahiawa water question four days later, original of this being "Exhibit Q." On the 26th, two days after, the under-

signed wrote the governor's secretary for information ("Exhibit R"), to which letter no reply was received.

The matter seems thereupon to have remained in abeyance until the spring of 1901, when the undersigned, having been elected to the Territorial legislature in the interval, during a legislative session and while in his seat in the house of representatives was handed a letter from the governor dated March 27, 1901, original of which is herewith submitted as "Exhibit S." Owing to my membership in the legislature I felt it desirable to refrain from any personal negotiation in the company's interest on the subject mooted by the governor. I therefore passed the letter to E. A. Nichols, president of the Wahiawa Sugar Company, Limited, who thereupon communicated with the governor in a letter dated April 1, 1901, a copy of which is herewith submitted as "Exhibit T." Reply to this was made by the governor on the day following in a communication submitted as "Exhibit U." The pencil memorandum to which reference is made in the letter of the governor is herewith submitted as "Exhibit V." Reply to the letter last above referred to was made by E. A. Nichols in a communication bearing date April 4, 1901, containing the final proposal of the Wahiawa Sugar Company, Limited, and concluding with a request that, if there was to be competition for the privileges requested, the government put the same up at public auction in accordance with the law governing the leasing of government land. This letter is marked "Exhibit W," the final proposition and any further consideration of the matter being turned down by the governor in a letter dated April 8, 1901, original of which is marked "Exhibit Y."

In consequence of the attitude of the governor and the ability of the Waialua Agricultural Company, through the chain of circumstances thereby created, to prevent any operation in the lands under lease by reason of the advantages of information in advance, as evidenced in securing assignments of the rights under the lease by J. B. Atherton and his ousting us from the Galbraith leaseholds for failure to pay rent (the resources of those promoting our company having been exhausted in the interval), the conditions thus created were of a character to cause unfavorable criticism of the entire proposition, with a result that it was impossible to secure financial assistance on any terms whatsoever in furtherance of the work originally mapped out by our company, and in consequence we were obliged to make settlement of our agreements as best we could. We were obliged to pay the Bishop estate \$5,000 cash consideration for release from further obligation under the lease from them and a cancellation of said lease and made voluntary surrender of all rights under other leases, a total of 14,000 acres, the property of the Holt estate.

These several acts involved great financial sacrifices on the part of those interested in the enterprise, forced E. A. Nichols into bankruptcy, and very seriously involved the undersigned.

Summing up the facts, I submit that the conclusion which must be reached by fair consideration of the same is that the governor used his office to promote the interests of the Waialua Agricultural Company, under the guise of assisting the Wahiawa colonists. I submit that a vein of direct prevarication runs through the entire correspondence of the governor; that he knew from the first that the concessions of which we complained in regard to cutting of timber and grade line in the government forest were matters of agreement between the

Waialua Agricultural Company and the executive council in secret session; that he knew at the time of his interview with the undersigned, prior to September 10, that these concessions had been granted and yet refrained from a single reference to same during the entire discussion of the matter, which is shown above. He concluded with the request for submission by our company of our plans for obtaining water for irrigation purposes, and dismissed the undersigned with the statement that the government contemplated doing nothing in negotiations until our company had been given opportunity to submit proposals. As a matter of fact, the Waialua Agricultural Company had a large force of workmen cutting the grades along the proposed ditch line at the time of the interview mentioned.

The governor, in his letter of September 17, betrays an amount of willful bias and disregard of the common equities and amenities between man and man, and totally insincere in all these negotiations had with our company, and which from first to last were conducted in a spirit to invite indignation and criticism from those interested with myself.

The results to be secured being a vital necessity to the practical success of our enterprise, we, in all our proposals to the governor endeavored to be considerate of the public interests and of community conditions, as documents submitted will indicate. I regret that A. E. Nichols is not now a resident of this community, and for this reason is not able to personally appear in support of the contentions herein made.

I submit herewith final agreements reached between the government, Wahiawa colony, and Waialua Agricultural Company, marked "Exhibit Z." Any further information desired and that is in my possession will be placed at the command of those investigating this matter.

Without further interest at this time than a desire to see every opportunity created to give the small farmer a footing in this Territory, I ask the intercession of the commission to the end that if the agreements of the governor in this matter can not be set aside the same be at least modified to the end that any bona fide holder of land which he desires to cultivate may have equal privileges under like conditions as the Wahiawa colonists, outside of the persons promoting this enterprise.

Thanking the commission in advance for any consideration given this matter, I remain,

Yours, respectfully,

JOHN EMMELUTH,
P. O. Box, 573, Honolulu, T. H.

EXHIBIT F.

AUGUST 24.

MR. WRAY TAYLOR,
Commissioner of Agriculture, Honolulu.

DEAR SIR: The undersigned desires to secure in what was formerly the school lands, and now under the government control, a right to make storage reservoirs and to erect necessary fluming, ditches, or tunneling, as circumstances may require, for bringing water from the reservoirs so located onto the lands below and occupied by our com-

pany. In consideration of a concession of this character we would undertake—

First. To fence the lands as near cattle and hog proof as conditions will permit.

Second. To make a systematic and thorough cleaning out of wild hogs and cattle now roaming on the lands and destroying trees of small growth.

Third. To place in charge a competent forester and three assistants entirely at our own expense whose duty shall be to clear the lands of lantana and other noxious underbrush and to replant such portions as have been denuded by fire or other cause and to prevent such wanton destruction of the forest in future.

All work covered by agreements herein to be performed to the satisfaction of the commissioner of agriculture or his authorized agent, and replanting of lands to be accomplished in such manner and with such plants as the commissioner may direct or furnish.

We do not feel that we can pass money consideration for the privileges herein sought, as the expenditures for a considerable period of time will be of an extraordinary character.

Believing that the agreements covering the action herein requested of you will be mutually beneficial, and submitting blue prints of the lands in question, showing their relation to adjoining premises, we remain,

Yours, truly,

WAHIAWA SUGAR COMPANY, LTD.,
Per JOHN EMMELUTH.

EXHIBIT G.

SEPTEMBER 5—10 a. m.

Mr. S. B. DOLE,

Governor of the Territory of Hawaii.

DEAR SIR: I have just learned of an application, by parties in Waialua district, for water rights in the stream of Kaukohanua.

Having, in common with others under the associated name of Wahiawa Sugar Company, extended interests on lands adjoining this stream bed and adjacent to the government land above, I would respectfully suggest that if the government is to consider the matter of water rights therein any action proposed should be taken at a meeting called for that purpose and at which opportunity may be given for all parties interested to be heard.

With a view to conserving such rights as we may be entitled to, and with due consideration and knowledge of the desirability of conserving the forests under government control, our company made a written proposition to the commissioner of agriculture, Mr. Wray Taylor, on the matter, and which we would be very pleased to have you read, as it would in measure indicate our attitude in the matter.

Yours, truly,

JOHN EMMELUTH,
For Wahiawa Sugar Company.

EXHIBIT I

HONOLULU

JOHN EMMELUTH, Esq.,
Honolulu.

DEAR SIR: I hereby notify you, acting in the interests of Mr. George Galbraith, that his holdings situated in the Waialua district, B. Atherton, and has also assigned all his rights and agreements made with you to Mr. Galbraith, after make all settlements with him for the property to do with the property in question, which has been reserved by him.

It is my opinion that you will find Mr. Galbraith as was Mr. Galbraith.

Yours, very truly,

Mr. McCLANAHAN:

Above communication is self-explanatory for the reason why I could not see Mr. G. on Sunday.

Yours, truly,

The Wahiawa Sugar Company, Limited, to J. B. Atherton, 1900.

October 28. To six months' rent, from October 28, 1900, of land at Waialua, island of Oahu, under lease to John Emmeluth, dated June 2, 1899, recorded in the Hawaiian registry of deeds, in volume 211, page 41; the interest of said John Emmeluth assigned to said J. B. Atherton, and the interest of said J. B. Atherton assigned to the Wahiawa Sugar Company, Limited.

Received payment,

HONOLULU

THE WAHIAWA SUGAR COMPANY, LIMITED,
Honolulu.

You are hereby notified that a forfeiture of the lease of land from George Galbraith to John Emmeluth, recorded in the Hawaiian registry of deeds, in consequence of the failure to pay the rent due on October 28, 1900, for six months in advance, by John Emmeluth in said lease having been assigned to me, said George Galbraith to me. And you are to quit and remove from the lands named in said lease with my possession of the premises.

HONOLULU, H. I., *September 8, 1900.*JOHN EMMELUTH, Esq.,
Honolulu.

DEAR SIR: I hereby notify you, acting as the attorney and in the interests of Mr. George Galbraith, that he has leased the whole of his holdings situated in the Waialua district, on this island, to Mr. J. B. Atherton, and has also assigned all his interests under the lease and agreements made with you to Mr. Atherton, and you will hereafter make all settlements with him for rent, he having nothing more to do with the property in question, except the 50 acres which have been reserved by him.

It is my opinion that you will find Mr. Atherton as good a landlord as was Mr. Galbraith.

Yours, very truly,

CECIL BROWN.

Mr. McCLANAHAN:

Above communication is self-explanatory and affords a clue to the reason why I could not see Mr. G. on Saturday after leaving you.

Yours, truly,

EMMELUTH.

HONOLULU, *October 29, 1900.**The Wahiawa Sugar Company, Limited, to J. B. Atherton, Dr.*

1900.

October 28. To six months' rent, from October 28, 1900, to April 28, 1901, of land at Waialua, island of Oahu, under lease from George Galbraith to John Emmeluth, dated June 2, 1899, recorded in the Hawaiian registry of deeds, in volume 211, page 41; the interest of said lessor having been assigned to said J. B. Atherton, and the interest of said lessee having been assigned to the Wahiawa Sugar Company, Limited..... \$500.

Received payment,

HONOLULU, *November 1, 1900.*

The WAHIAWA SUGAR COMPANY, LIMITED,

Honolulu.

You are hereby notified that a forfeiture has occurred of the lease from George Galbraith to John Emmeluth, dated April 28, 1899, as recorded in the Hawaiian registry of deeds, in liber 197, folio 27, in consequence of the failure to pay the rent under said lease, due on October 28, 1900, for six months in advance; the interest of said John Emmeluth in said lease having been assigned to you and the interest of said George Galbraith to me. And you are notified to forthwith quit and remove from the lands named in said lease and not to interfere with my possession of said premises.

J. B. ATHERTON.

HONOLULU, *January 21, 1901.*

The WAHIAWA SUGAR COMPANY, LIMITED.

DEAR SIRS: You are hereby notified that I have entered into actual occupation, and now hold possession, of all of those tracts of land situated in the district of Waialua, island of Oahu, described in that certain indenture of lease from George Galbraith to John Emmeluth, dated April 28, 1899, of record in the Hawaiian registry of deeds in liber 197, folios 27-29, and in a supplemental agreement of lease between said parties dated June 2, 1900, of record in said registry in liber 311, folios 41, 42, reference to which records is hereby made for more definite description.

Said entry and possession have been made and taken in pursuance of a power of reentry reserved in said lease first above named to the said George Galbraith in case of a breach of covenant by said lessee; such breach of covenant and of the condition on which said lease was granted having occurred in consequence of the failure of you, said Wahiawa Sugar Company, Limited, the assign of said John Emmeluth, to pay to me, the assign of said George Galbraith, the rent of said premises, which was due and payable on the 28th day of October, A. D. 1900, under both said lease and said agreement, for six months in advance; and you are further notified that in pursuance of the right reserved to the lessor in said lease and agreement and now vested in me, in the contingency of such breach of condition, I did by said reentry determine and put an end to the estate created by said lease and agreement.

Respectfully yours,

J. B. ATHERTON.

A. E. NICHOLS,

*President Wahiawa Sugar Company, Limited.*HONOLULU, *March 23, 1901.*

The WAHIAWA SUGAR COMPANY, LIMITED,

Honolulu:

You are hereby requested to cancel and surrender to me that certain indenture of lease from George Galbraith to John Emmeluth dated April 28, 1899, of record in the Hawaiian registry of deeds in liber 197, folios 27-29, and also the memorandum of agreement supplemental to said lease, dated June 2, 1900, of record in said registry in liber 211, folios 41-42, the interest of John Emmeluth in said lease having passed to you by assignment and the interest of said George Galbraith, together with the right of exercising all of the powers reserved to him in said lease, being now vested for a term of fifty years in me under an instrument dated September 7, 1900, of record in said registry in liber 211, folios 227-230.

The above-mentioned lease became forfeited in consequence of failure to pay the rent therein reserved, which became due on October 28, 1900, and acting under the powers therein reserved to the lessor, I thereupon entered and took possession of the demised premises and terminated said lease. The fact, however, that this lease remains in your hands unmarked by any cancellation, and so stands on the record, constitutes a cloud upon my title to the demised premises.

You are therefore requested to cancel and surrender said lease.

Trusting that this request will receive your early attention,

I am, respectfully, yours,

J. B. ATHERTON.

Petitioner shows—

1. That by first lease G. leased to E. land, reserving the right to 44 acres, situate 3 cuds.

2. That by second lease this cut to 200, not charged.

3. That by do. E. assigned to pl.

4. That before and at the time of making the above-mentioned lease it was expressly stated by the defendant G. to E. his intention in his reserving right to select the land as aforesaid was that it might be used as a homestead for his brother Hugh, and that he desired the land for no other purpose, and that if it were not used, that his intention was that nothing should be done in the selection thereof to injure the rights of any company that might be formed or was being formed to raise sugar on the land thus leased to said E.; and the said G. fully understood that said land was leased by the said E. for such purposes and that the said G. further promised that the said 200 acres should be chosen as not to interfere in any way with the right of the said E. or any sugar company to which he might assign his rights in raising sugar on the land thus leased by the said G. to the said E.; and he further promised that if he did not wish to exercise his right to reserve the 200 acres for a homestead as aforesaid, that in such case the said E. or his assigns should have the use of all the said land at the same rate as that already leased.

4. That the statement by G. of his intention in thus reserving the right to select 200 acres for a homestead and his further promise that if he did not wish it for a homestead he would not exercise his right thus to select the 200 acres, but would allow the said E. or his assigns to cultivate the same, was an essential element in inducing the said E. to enter into the said lease of all the said land and was so regarded by both parties, and the agreement in the leases actually made to pay the rent therein mentioned was in part in consideration of and was itself a consideration for the said promise of the said G., and was at the time so understood and regarded by both parties, and that the said promise of said G. was by both parties regarded and treated as a covenant in the said leases.

5. That by the said lease thus made, quiet enjoyment.

5½. That thereafter E. to W. S. Co., duly recorded, so entitled to his rights, both law and equity, all sorts.

6. That thereafter, to wit, on or about September 7 the said G. executed an instrument which your plaintiff claims is void, and for fraud whereby he attempted to convey to the said A. all his right, etc., and that the said A. had notice of each and every one of the above-named facts and looks on and holds the said proposition as such.

5½. That thereafter, to wit, on or about September 7, 1900, the said G. notified the said E. that he had chosen the 200 acres as by the said lease reserved.

7. That these two events, to wit, the choice of the land and the assignment to A., that from this fact and other facts hereinbelow set forth, and from other information, your petitioner believes, and upon such information and belief alleges that the said incompleting choice of the said 200 acres has not been in reality on good faith made by the said G., but either directly or indirectly at the instigation and scheming of the said A.

8. That the said land is not fit and proper land to be used as a homestead, nor can it be used for such purposes or for raising crops

of any nature, but that the said 200 acres thus attempted to be chosen are such as to include within their limits all the water upon which the place was to rely for the irrigation of its plantation, and that such fact was at the time of the choice well known to and understood by the defendants.

9. That the defendant A. is the president of the Wai Agricultural Company, which said company is bitterly hostile to your petitioner and has at all times sought, and still, to prevent your petitioner from proceeding with the cultivation of cane and the acquiring of a good and quiet title to its property, but has at all times harassed and still harasses your petitioner in all ways, and your petitioner believes, and upon such information and belief alleges, that the said A. holds said land in the interest or upon some understanding for the benefit of said Wai Agricultural Company and not for his own use.

10. That your petitioner is informed and believes, and upon such information and belief alleges and charges, that the said incompleting choice of the said 200 acres and the said attempted assignment of the said G. to the said A. of all his interest in and to the property in dispute were not made in good faith and in accord with the intent (and agreement) of the parties, but that it was done wrongly and fraudulently with no other purpose than inequitably and unconscionably to deprive your petitioner of the beneficial use of the land leased to its assignor E. by the defendant G., and to force it to give up said lease; and that such action constitutes a direct fraud upon the rights of your petitioner.

11. That inasmuch as the said 200 acres was not needed or chosen by the said E. or any other person as a homestead, the incompleting choice of the said 200 acres in manner and form as above alleged is a direct violation of the said agreement and implied covenant entered into between the said G. and his assigns and the said E. and his assigns.

12. That the incompleting selection of the 200 acres as above set forth is a direct violation of the (implied) covenant for quiet enjoyment entered into on the part of the lessor and his assigns for the benefit of the lessee and his assigns.

13. That the said choice of 200 acres has not yet been completed, owing to the failure to have the same recorded as by deed required.

14. That to allow the same to be recorded may work an irreparable wrong upon your petitioner and expose him to loss for which no pecuniary damages would be an adequate compensation, inasmuch as said recording would then give the defendant A. a clear record title which he may assign to a plaintiff against whom your petitioner would be remediless both at law and in equity.

15. That the fraudulent attempted said choice of 200 acres, &c., and fraudulent assignment by the defendant G. to the defendant A., constitute a cloud upon the title of petitioner, such as would seriously impair the value of its interests, and that the invalidity of said instruments is not apparent upon their face.

16. That your petitioner has always been and still is ready to allow the said G. to make a choice of 200 acres of homestead land and in all other respects to do whatever shall to the honorable court seem equitable in the premises.

Wherefore—

1. That the defendants may be summoned to appear and answer this complaint and be bound by the proceedings hereunder.

2. That a temporary injunction may issue forbidding the defendant or either of them, or their agents, or attorneys from recording causing to record the said choice of 200 acres.

3. That the defendant A. may be ordered to deliver up for cancellation to your petitioner as a cloud on your petitioner's title the said incorporated instrument designated 200 acres along the river as the chosen.

4. That the said defendant A. may be ordered to deliver up to your petitioner for cancellation as a cloud on your petitioner's title the said fraudulent lease and assignment to him executed by the defendant G.

5. That the defendant G., his heirs and assigns, may be forever enjoined from exercising the choice reserved to him for 200 acres said from land suitable for homestead or agricultural purposes.

And we will pray.

H. A. B., being first duly sworn, on oath deposes and says:

That he is engaged in practicing law in the offices of K. B. McC.

That he has had charge of the case of the petitioner for, etc.

That he is credibly informed and believes, and upon such information and belief alleges, that the money belonging to the said R. C. T. is under the control of her attorneys in fact.

That a portion of said money has been improperly loaned upon chattel mortgage and personal note of G. W. D., one of her said attorneys in fact.

That such a loan is an improper one to be made of trust funds, and that it would not have been made save for the unbalanced mental condition of said R. C. T.

That your affiant has searched the records of the Oahu register deeds and has found no record of any such chattel mortgage, and to the best of his knowledge and belief the said note, if such exists, has not been recorded.

In the matter of the guardianship of R. C. T.

Motion.

Now comes the petitioner in said cause, by her attorney, K. B. McC. and moves the honorable court to reopen said cause to allow the petitioner to prove that the money of the said R. C. T. is under the control of her attorneys in fact, and that a portion of said money has been loaned to Mr. Davis, her said attorney in fact, upon his chattel mortgage and personal security; and that said loan is an improper and improper one for trust funds, and that such loan would not have been made save for the unbalanced mental condition of said R. C. T. and that such mortgage has not, in fact, been recorded as required by law.

1. It is admitted that the libelee may file his appeal.

This has been the uniform practice not only in cases of appeal from the district court to the circuit court, but in this court also. (Mars, C. J., in *Yeaton v. U. S.*, 5 Cranch., 283; also *U. S. v. Preston*, 3 Pet., 57; et al., on 37 Mars & Co. Lt., cover the point explicitly; Cal.

v. Haim, II code, § 1387, *Posleng v. Haim*, Stats. 1883, § 3, p. 611, Minn. p. 566, § 5, express rules out our case; Mich. 3 Comp. Law, § 9065, expressly ruled out I Stat., § 2274, expressly ruled out.

SEPTEMBER 10, 1900.

Hon. S. B. DOLE,

Governor of Territory of Hawaii, Honolulu, T. H.

SIR: Relative to the subject-matter of an interview by our vice-president, Mr. J. Emmeluth, with yourself during the past week, we desire to communicate further and say that at this writing we have not completed our proposition in re water of Kaukahonua stream.

We intend to have this proposition for submission at latest next Friday, until which time we hope you will permit the entire matter of disposition of surplus water in this stream to remain in abeyance.

Respectfully,

WAHIAWA SUGAR CO., LTD.

EXHIBIT K.

HONOLULU, H. I., *September 12, 1900.*

Hon. SANFORD B. DOLE,

Governor Territory of Hawaii.

DEAR SIR: In considering the matter of a further submission to yourself and executive council of a plan for supplying to our company water as may be required for irrigation of our lands we feel that we can hardly pass over the proposition already submitted through Mr. Wray Taylor, commissioner of agriculture, of date August 24, 1900, copy of which we append herewith.

In further consideration of this letter we desire to point out to you several features therein which may have been overlooked in previous considerations of the same.

We desire to call your attention—

First. To the fact that our request was not for exclusive privileges, the thought with ourselves being that we be charged with the care and preservation of such areas as our supplies would be drawn from.

In considering the subject of sources to be drawn from we desire to point out to you the vast difference between flows of the north branch of the Kaukonahua stream, bounding our land on the south side, and of the Poamoho stream, bounding same on the north side, by submitting attached herewith an estimate from actual weir measurements in these two stream beds at different times during the past fifteen months, and more particularly during the past month, by a competent engineer now on the premises.

Second. That the privileges so granted would be for a term coexistent with our keeping and performing agreements first, second, and third, as named in our said application of August 24, 1900, according to the intent thereof and no longer, this, as you may readily discern, being a far more favorable proposition to the Government than to yield the entire water rights of this stream in perpetuity at any price.

At the time of submitting the proposition above discussed we were absolutely ignorant of the fact of the Waialua Agricultural Company and members of Wahiawa colony having submitted to the Government propositions in regard to the waters of this branch of the Kaukonahua

stream. We were all the more surprised to learn, through our Mr. Emmeluth, of this action on their part, for the reason that at various times during the past fifteen months we have expressed our willingness to yield to a company which would conserve our interests such as dam sites or impounding areas as we are possessed of on equitable terms.

We believe ourselves entitled to water from the north branch of the Kaukonahua stream to the extent required by the cultivable area of our lands draining to said stream, amounting to 3,000 acres.

Concessions of water from this stream to the extent contemplated being yielded to the colonists at Wahiawa are unreasonable when considering the area of their lands draining to this stream bed. Without positive information, we would estimate that three-fourths of said colony land yields drainage to the south branch of Kaukonahua, and under logical conditions should draw its supplies therefrom.

We do not wish to attempt to point out the results to the Government from yielding agreements to one or the other of applicants, feeling that the applications as submitted speak for themselves.

We desire, however, to call your attention to one feature of the plans of our company relative to the cultivation of the Wahiawa lands, which from a casual observation on your part to our Mr. Emmeluth during a recent conference on this subject leads us to believe that the proposition as we have it in contemplation will be of interest to the Government in conjunction with our application. We purpose attempting the colonization of this entire tract, an area of 4,500 acres, under conditions and on terms mutually just and equitable as between settlers and the company. We have in contemplation inviting farmers of ability to our lands in Wahiawa, yielding each family a tract of 20 acres, to be cultivated for joint benefit, and a half acre in the colony sites for home stead and truck farming. These colony sites it is our purpose to arrange along banks of the streams bordering our land, the 20-acre tracts being arranged in tiers with roadways sufficiently wide for traffic purposes between each double tier of these lots, the desire being to place the entire property in such shape as will permit of the most economical operation of the same as a whole. We shall attempt to make this exclusively a colony of citizens of the Territory or those eligible to citizenship, and our entire agreements as to division of product will be based on a ratio of the price of sugar prevailing during the period of marketing our product.

While these are advanced lines on which to attempt operation of the property so extensive as that under consideration, yet we feel that in inaugurating work on these lines we are only adopting a system of cultivation which older estates will be forced in the near future to give consideration by reason of the constantly increasing wage and exaction of what is generally known as "cheap" labor.

We do not at this time purpose detailing the terms and agreements which shall be binding as between ourselves and the people we purpose inviting to settle on our lands. Of their absolute fairness to both parties in interest we feel that we can convince yourself and the members of your council should they feel disposed at this time to grant us the privileges requested by your letter of August 28. We feel perfectly free, however, to state the fact that we desire no concessions in this direction but what shall be conditioned upon the terms of our agreement to further such colonization upon specific lines.

We trust you will give this communication and the letter herein mature consideration, and will give some member of our company opportunity to explain such detail as may not be clearly understood.

Hoping you will see your way clear to granting our request, thereby enabling us to open these lands for settlement at an early date, we remain,

Yours, most respectfully,

EXHIBIT L.

SEPTEMBER 17, 1900.

Hon. S. B. DOLE,

Governor of the Territory of Hawaii.

SIR: The undersigned were given notice, through our Mr. Emmeluth, that the Government contemplated doing nothing further in re water rights in the Kaukohanua stream district of Waialua, without duly considering the water rights and privileges therein, and giving us an opportunity for the presentation of any fact and argument which we might desire to deduce in our behalf. Under the impression that this act on the part of the Government carried with it a cessation of work on the part of Waialua Agricultural Company and its agents on the Government lands above Wahiawa, we acquiesced in the decision of the Government that it desired time to consider the matter in its entirety.

We hereby give you notice that heretofore and now the Waialua Agricultural Company and its agents are actively at work cutting timber and clearing a line, preparatory to putting in a ditch, on the government lands, in the interests of our company. We ask for immediate information as follows:

Is the Waialua Agricultural Company, under any arrangement that may exist between the Government and said company, empowered to do these acts on the public lands? If not, we request of you enforcement of status quo regarding their acts. As much as the same is implied, in relation to requests by our company, we demand, in justice to the parties in interest, that the Waialua Agricultural Company and its agents be immediately enjoined from further operations in the Government lands, as herein mentioned, until such time as their rights and interests shall have been defined.

Yours, respectfully,

WAHIAWA SUGAR COMPANY, LTD.

EXHIBIT M.

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, September 17, 1900.

WAHIAWA SUGAR COMPANY, LIMITED,
Judd Building, Honolulu.

GENTLEMEN: Your letter of this date, referring to the action of the Waialua Agricultural Company, Limited, and others in entering on Government land mauka of the settlement at Wahiawa, has been

received. Some time ago, after negotiations had been begun with the Government, the said parties applied for a license to build a dam and make a ditch in such land, and the Government gave its consent to such parties to enter in said lands and make surveys and cut a trail. I know of no agreement or understanding between all parties against such action. It is in the interests of the Government that such a trail should be made.

Very respectfully,

SANFORD B. DOLE.

EXHIBIT N.

OFFICE OF WAHIAWA SUGAR COMPANY, LIMITED,

Honolulu, H. I., September 19, 1900.

Hon. S. B. DOLE,

Governor of the Territory of Hawaii.

SIR: Your communication of the 17th instant, in reply to our request for information regarding the privileges, if any, granted the Waialu Agricultural Company and others to enter the public domain mauka of Wahiawa and to cut a grade line therein for purposes of exploiting a site for a proposed ditch line, etc., came to our hands this day.

We thank you for the courtesy of reply to our letter, and in view of your statement that you are cognizant of and agreeable to work being done we now beg to make application for like favors to be extended to our company as have been extended to others, under like terms and agreement as those existing between the Government and the Waialu Agricultural Company or others.

We desire opportunity to duplicate the work done by the above named on the south bank of Kaukonahua stream by performing similar work on like levels on the north side of same stream, thus giving opportunity to the Government to review without prejudice both sides of the water privileges now in question.

Very respectfully,

WAHIAWA SUGAR CO., LTD.,
G. McWHITNEY, *Secretary.*

(No answer.)

EXHIBIT O.

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,

Honolulu, September 20, 1900.

WAHIAWA SUGAR COMPANY, LIMITED,

Judd Building, City.

GENTLEMEN: Your letter of September 19, asking for permission to enter the public lands mauka of the Wahiawa settlement for purposes referred to in your letter, has been received. I find that in my letter of the 17th instant permission was granted to the other parties to enter the government land for the purpose of making surveys and cutting a trail. I know of no permission granted to cut a grade line, and I do not know exactly what is meant in your letter by cutting a grade line. Will you please state exactly what you wish permission to do? You have already received permission to enter the said land and measure the water supply.

Very respectfully,

SANFORD P. DOLE.

OFFICE OF WAHIAWA SUGAR COMPANY, LIMITED,
Honolulu, H. I., September 24, 1900.

Hon. SANFORD B. DOLE,
Governor Territory of Hawaii.

SIR: We beg to acknowledge your letter of September 20, and to respectfully refer you, in reply to the same, to our letter dated September 19, regarding the privileges requested for operation in the government land, in advance of action by your excellency and cabinet upon applications heretofore made, in connection (as to our application) with the north branch of the Kaukonahua stream.

We glean from letter herein acknowledged that permission has been granted to other parties to enter the government land for the purpose of making surveys and cutting a trail. This, then, if the only privileges granted to others, is all we requested in our letter of the 19th.

The trail is what we referred to as a grade line, inasmuch as it is evidently contemplated to answer the purpose of cutting a ditch therein, and for this reason has been cut on a gradual ascent from colony lands mauka.

Very respectfully,

WAHIAWA SUGAR CO., LTD.,
G. McWHITNEY, *Secretary.*

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, September 24, 1900.

Mr. J. EMMELUTH,
Honolulu, H. I.

SIR: The governor requests me to inform you that there will be a hearing of the Wahiawa water question Friday morning at 10 o'clock, September 28, in the governor's office, at which you are requested to be present.

Very respectfully,

ALEX. G. HAWES, JR.,
Private Secretary to the Governor.

EXHIBIT 1.

OFFICE OF WAHIAWA SUGAR COMPANY, LIMITED,
Honolulu, H. I., September 26, 1900.

Mr. A. G. HAWES, JR.,
Secretary to the Governor, Territory of Hawaii, Honolulu.

SIR: I am in receipt of your communication of the 24th inst., notifying me of a hearing of the Wahiawa water question at a meeting to be held in the office of the governor on Friday morning.

Can I bring an attorney with me; and is the meeting to be open to the public?

These are inquiries I desire to make inasmuch as I understand the meetings in re this matter up to the present time have been of a secret character.

Yours respectfully,

JOHN EMMELUTH.

(No answer.)

I beg to say that I entirely misunderstood the latter part of your sentence, my impression being that you referred to a proposition offered by others, the same being one held in your hand and the memorandum for me. Please allow this to explain the error. I received 3 of my letter of April 1, intended as answering your proposition in letter to Mr. John Emmeluth, dated March 27.

We desire to submit in outline the following proposition which will direct our attorneys to draw up in proper form, if and as such as the government will entertain, viz:

Wahiawa Sugar Company, Limited, to be granted exclusive privilege for the term of twenty-one years (being the longest period by law for a lease of government lands) to enter mauka to mauka government land, develop water, construct dams, flumes, and do all necessary work in connection therewith.

Wahiawa Sugar Company, Limited, to fence, develop, and clear the forest.

Wahiawa Sugar Company, Limited, to recognize all acquired rights in and to the waters of said stream so soon as such rights be legally established and determined.

Wahiawa Sugar Company, Limited, to begin work within six months of signing the contract and to deliver water upon lands of the colonists within one year from same date.

Wahiawa Sugar Company, Limited, to furnish by gravity the quantity of said water up to one-third of all obtained, to the colonists as they shall be willing to buy, at the rate of one-cent per miner's inch per hour for water used for irrigation, and one-cent per miner's inch per hour for water used for domestic purposes. The rate of one-cent per miner's inch per hour for water used for irrigation shall be deemed to be 9 gallons of water per minute.

Wahiawa Sugar Company, Limited, to pay to the government for further consideration the sum of \$500 annually and one-third of the income from sale of water to the Wahiawa colonists. Such income to be used upon the lands of the colonists.

In conclusion I beg to state that if there is competition for the privilege, which is substantially a lease of the land with certain conditions, the Wahiawa Sugar Company, Limited, would prefer to have it be offered at public auction in accordance with the law governing the leases of government lands.

Trusting to be favored with a reply,

Yours, very respectfully,

President of Wahiawa Sugar Company, Limited,

EXECUTIVE CHAMBER, TERRITORY OF HAWAII.
Honolulu, April 8, 1898.

MR. ALBERT E. NICHOLS,
President of the Wahiawa Sugar Company, Limited,
Honolulu, H.

SIR: Your letter of April 4, embodying the proposition of the Wahiawa Sugar Company, Limited, for the privilege of taking water from the Wahiawa forest land, has been received.

This proposition is declined by the government, a proposition has

I beg to say that I entirely misunderstood the latter portion of the sentence, my impression being that you referred to a proposition offered by others, the same being one held in your hand while writing the memorandum for me. Please allow this to explain paragraph 3 of my letter of April 1, intended as answering your direct question in letter to Mr. John Emmeluth, dated March 27.

We desire to submit in outline the following proposition, which we will direct our attorneys to draw up in proper form, if conditions are such as the government will entertain, viz:

Wahiawa Sugar Company, Limited, to be granted exclusive privilege for the term of twenty-one years (being the longest period allowed by law for a lease of government lands) to enter mauka Wahiawa government land, develop water, construct dams, flumes, ditches, and do all necessary work in connection therewith.

Wahiawa Sugar Company, Limited, to fence, develop, and protect the forest.

Wahiawa Sugar Company, Limited, to recognize all previously acquired rights in and to the waters of said stream so soon as such rights be legally established and determined.

Wahiawa Sugar Company, Limited, to begin work within sixty days of signing the contract and to deliver water upon lands of the colonists within one year from same date.

Wahiawa Sugar Company, Limited, to furnish by gravity such portion of said water up to one-third of all obtained, to the Wahiawa colonists as they shall be willing to buy, at the rate of one-third of 1 cent per miner's inch per hour for water used for irrigation and 4 cents for each 1,000 gallons for water for domestic purposes. A miner's inch to be deemed to be 9 gallons of water per minute.

Wahiawa Sugar Company, Limited, to pay to the government as a further consideration the sum of \$500 annually and one-third of gross income from sale of water to the Wahiawa colonists. Such water to be used upon the lands of the colonists.

In conclusion I beg to state that if there is competition for this privilege, which is substantially a lease of the land with restrictive conditions, the Wahiawa Sugar Company, Limited, would prefer that it be offered at public auction in accordance with the law governing leases of government lands.

Trusting to be favored with a reply,

Yours, very respectfully,

President of Wahiawa Sugar Company, Limited

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, April 8, 1901.

Mr. ALBERT E. NICHOLS,
President of the Wahiawa Sugar Company, Limited,
Honolulu, H. T.

SIR: Your letter of April 4, embodying the proposition of the Wahiawa Sugar Company, Limited, for the privilege of taking water from the Wahiawa forest land, has been received.

This proposition is declined by the government, a proposition having

been received from other parties which is more favorable to the public interests, which has been accepted.

The privilege under consideration is not in the nature of a lease, but is rather a land license, which is not required to be put up at auction.

The provision of your proposition, i. e., "Wahiawa Sugar Company, Limited, to recognize all previously required rights in and to the waters of said stream, so soon as such rights be legally established and determined," appeared to me to be most objectionable, as giving a prima facie right to all the waters of the stream to your company and compelling all owners of rights in such stream to enter into litigation to hold rights that are not at present disputed.

Very respectfully,

SANFORD B. DOLE.

EXHIBIT Z.

LAND LICENSES.

Whereas the Waialua Agricultural Company, Limited, an Hawaiian corporation engaged in and carrying on an agricultural business in the district of Waialua, island of Oahu, Territory of Hawaii, owns and is entitled to a large portion of the water of the Kaukonahua stream and its branches in said district, which said stream and its branches take their rise in the mountains on the land known as Wahiawa; and

Whereas certain persons having heretofore associated themselves together under the provisions of the land act of October, 1895, and known as the "Settlement Association of Wahiawa," have acquired interests in certain of the land known as Wahiawa, and in the water of said stream of Kaukonahua and its branches; and

Whereas certain members of said settlement association have formed a corporation under the name of the Hawaiian Fruit and Plant Company, Limited, and in pursuance of an agreement of even date herewith entered into and between the said Hawaiian Fruit and Plant Company, Limited, Mary E. Clark, Byron O. Clark, and L. C. Kellogg, of said Wahiawa, and the members and occupiers under the settlement association, it has been agreed that the said parties shall form a corporation and that they will convey to said corporation all the rights of them and each of them, respectively, in and to the water running in both the north and south branches of said Kaukonahua stream, and that five-eighths of the paid-up shares of the capital stock of the said corporation so to be formed shall be issued to the said Mary E. Clark, Byron O. Clark, L. C. Kellogg, and the stockholders of the said Hawaiian Fruit and Plant Company, Limited; and

Whereas the said Waialua Agricultural Company, Limited, and the said Hawaiian Fruit and Plant Company, Limited, have made application for license to enter upon public lands mauka of the lands of the said Wahiawa Settlement Association, for the purpose of making surveys and to construct and maintain dams, reservoirs, ditches, tunnels, and flumes for the purpose of collecting, conserving, and conducting out water for the purpose of irrigation and for domestic purposes and for creating power; and

Whereas it appears to be in the interest of the development of agriculture that such license be granted, under the conditions hereinafter set forth, and no good reason appearing to the contrary:

Now, therefore, I, J. F. Brown, commissioner of public lands of the Territory of Hawaii, in consideration of the premises and of one dollar to me paid by the said Waialua Agricultural Company, Limited, and the Hawaiian Fruit and Plant Company, Limited, the receipt whereof is hereby acknowledged, by and with the consent of the governor of said Territory do hereby, subject to the conditions hereinafter set forth authorize and license said Waialua Agricultural Company, Limited and said Hawaiian Fruit and Plant Company, Limited, and such corporation as may be formed as aforesaid and their respective successors and assigns, to enter upon all of that tract of land known as the land of Wahiawa, in the district of Waialua, island of Oahu, and to make surveys thereon for dam sites, reservoirs, ditches, flumes, tunnels, and pipe lines, and to construct and maintain for the term below named dams, reservoirs, ditches, flumes, tunnels, and pipe lines at such place on said land as they may select, and to impound and carry away by means of such work all water which they may obtain and control during the term of this license, subject, however, to all existing rights in and to any of such water now legally vested in others.

This license is granted upon the following conditions, viz:

First. This license shall extend and hold good for the term of the charter of the said Waialua Agricultural Company, Limited, to wit until the 11th day of October, 1948.

Second. That the said Waialua Agricultural Company, Limited, and the said Hawaiian Fruit and Plant Company, Limited, will, and their successors and assigns shall, during the whole of the said term, at their own costs take all reasonable steps and make all reasonable efforts to preserve the forests and trees growing upon the said lands of Wahiawa and to prevent wild animals, such as cattle, goats, and swine, from being or running upon the same.

Third. That one-third of all the water obtained in the mauka ditch from the north branch of said Kaukonahua stream shall be made appurtenant to the lands of the said Wahiawa Settlement Association or the Wahiawa homestead lots pro rata to the area of the respective holdings of the members or occupiers thereof and their successors and assigns, and for the proper irrigation of such lands and for use on such lands only.

Fourth. That annually, for 20 years from the date hereof, 10 per cent of the dividends of such corporation so to be formed shall be paid to the said commissioners of public lands, or to any successor in said office to whom the duties of said office shall by law be delegated, for the use and benefit of the Territory of Hawaii, provided, however, that if during any one year after the expiration of 2 years from the date hereof such 10 per cent of the dividends shall amount to less than the sum of \$3,000, then and in every such case the said Waialua Agricultural Company, Limited, and the Hawaiian Fruit and Plant Company, Limited, shall pay in addition to such 10 per cent of dividends a sum sufficient to make a payment in all of \$3,000.

Fifth. That at the end of 20 years from the date hereof the amount of compensation to be paid by said Waialua Agricultural Company, Limited, and Hawaiian Fruit and Plant Company, Limited, to the Territory of Hawaii shall be subject to readjustment, and should the said parties be unable to agree upon the amount so to be paid the matter shall be referred to 3 arbitrators, one to be chosen by said commissioner

of public lands or his successor as aforesaid, and one by said Waialua Agricultural Co., Ltd., and Hawaiian Fruit and Plant Co., Ltd., and the two choose a third, and the decision of such arbitrators shall be final.

And likewise at the end of the second term of 20 years the amount so to be paid shall be again subject to readjustment for the remainder of the term in like manner and upon the same conditions as herein set forth.

In witness whereof I, the said J. F. Brown, commissioner of public lands of the Territory of Hawaii, have hereunto set my hand and seal this 6th day of April, A. D. 1901.

J. F. BROWN,

Com'r of Public Lands of the Territory of Hawaii.

Approved:

SANFORD B. DOLE, *Governor.*

TERRITORY OF HAWAII, U. S. A., *Island of Oahu.*

On this 6th day of April, A. D. 1901, personally appeared before me, J. F. Brown, commissioner of public lands, Territory of Hawaii, known to me to be the person described in and who executed the foregoing instrument, and he acknowledged to me that he executed the same freely and voluntarily and for the uses and purposes therein set forth.

JOHN M. KEA,

Notary Public, First Judicial Circuit, Hawaiian Islands.

EXHIBIT No. —.

REPORT OF THE COMMISSIONER OF PUBLIC LANDS OF THE TERRITORY OF HAWAII FOR THE YEAR ENDING JUNE 30, 1902.

COMMISSION OF PUBLIC LANDS, TERRITORY OF HAWAII,
Honolulu, July 26, 1902.

HON. SANFORD B. DOLE,
Governor Territory of Hawaii.

SIR: I have the honor to submit the following report on the transactions of this office for the year ending June 30, 1902:

This commission is represented in various land districts by the following subagents: E. D. Baldwin and W. R. Kamanao, first land district; Charles Williams, second land district; J. Kaelemakule, third land district; W. O. Aiken and D. T. Fleming, fourth land district; Stephen Mahaulu, fifth land district, the latter being also secretary and chief clerk of the general office.

Lands that have been surveyed and opened during the year (including those surveyed in former periods) under the various systems of the act of 1895, are shown in the following table:

Table showing lands taken up under general provisions of land act (other than cash sale and Olaa purchases under special conditions of Part IX).

Land district.	Right-of-purchase lease.			Homestead.	
	Number.	Acres.	Value.	Number.	Acres.
First—Hilo and Puna	72	4, 538. 40	\$26, 238. 18		
Second—Hamakua and Kohala	13	599. 73	9, 342. 57		
Third—Kona and Kau	11	1, 319. 31	2, 375. 39		
Fourth—Maui, Molokai	1	92. 46	924. 60		
Fifth—Oahu				33	130.
Total	97	6, 599. 90	38, 880. 74	33	130.

SUMMARY OF ABOVE.

	Number.	Acres.	Value
Right-of-purchase lease	97	6, 599. 90	\$38, 880.
Homestead lease	33	136. 29	
Total	130	6, 736. 19	38, 880.

Under homestead-lease system no appraisements are made. Rights are inalienable.

The above table shows an increase in land transactions from that of the previous year's report, which also go to show that small holding are in demand. From personal observation and from authoritative reports I am satisfied, with but few exceptions, that they are bona fide homesteaders. And it is a source of gratification for me to mention that the enthusiasm shown by applicants, Hawaiians as well as whites, have been sincere.

Most of the lands taken up as represented in above table were in Olaa. The demand for homesteads in Olaa is surprising, and we are supplying the demand as fast as the nature of the land and roads will permit; and it is hoped that the remaining lots in this section will be opened up at an early day. In fact, it has been practically decided.

The advent of the Hilo Railway in this region largely accounts for the demand. Where heretofore transportation was a considerable item and sometimes an impossibility, which was largely responsible for the failure of former homesteaders, it has now been practically eliminated and attendant to the present progress shown by homesteaders in Olaa.

I have great faith that farming will be a success in this and adjacent tracts.

The demand for homesteads in the other districts has been good and, in fact, a marked increase of intending settlers desiring land is quite evident.

Several tracts of land in Puna for which surveys have been completed during this period will be thrown open for settlement. There is quite a demand for land in Puna; lack of desirable land has been a setback, as it is well known that Puna is practically covered with pahoehoe, and lots had to be laid out in pockets and to suit the conditions. To lay lots on pahoehoe is simply waste of time and money.

In Hamakua and Kohala, 38 lots of the Kaapahu, and remaining lots in Pohakea and Paauilo tract have been opened up for settlement during a month or so ago, and quite a few lots have been taken up.

Settlement in these districts must necessarily be slow, solely on account of lack of proper transportation facilities, and also the impression left upon intending settlers by the drought that very nearly

destroyed all developments in these districts during the last two years, as it depends entirely on rain for its moisture. Disastrous fires occurred in the Hamakua forest from the middle of last year to and including the early part of January this year, and unfortunately it originated in the very midst of the drought; consequently the undergrowth was dry and very inflammable. Nothing could hinder its progress, though many attempts to check it were made, but such attempts were not successful until a good portion of the forest was burned.

The burnt district extended from the vicinity of Kukaiau on the Ooakala side to Paauhau and from the 2,500-foot to the 4,000-foot elevation. The damage done to the forest is irreparable, and no one can appreciate it unless he has personally observed it for himself—the destruction it has done to a once almost inaccessible forest. The matter was discussed at length in a report by the superintendent of public works who had the supervision of “putting out” the fire in the Hamakua forest, to you.

Remaining lots in Kaauhuhu homestead tract were also recently opened up for application under the homestead lease system of nine hundred and ninety-nine years. No applications have as yet been made for the same.

In Kona land transactions have been on the decrease. This is occasioned by no new surveys being carried out, and tracts that have already been subdivided have been taken up, and such lots as remain are of undesirable quality. However, new surveys have been completed and will be thrown open to applicants in the near future.

Maui.—The above table shows only one transaction during the year. We are confronted with the same problem as exists in the Kona and Kau districts. Contemplated surveys on lands in Maui are being laid out, and actual subdivision will be pushed to final completion at an early date.

Kahakuloa.—Settlement on this tract has been an absolute failure. Its location and topographical feature, and also the more potent factor being the lack of proper roads to and from said tract, are greatly responsible for this failure. With proper means of transportation I think that that portion of said tract known as Makiliua, adjoining Waihee, with its boundary along the Makamakaole stream, can be given out to settlers with possible profit. On the balance homesteading would be nothing but a farce. I would suggest that if the government could get a desirable bidder for the balance, with a provision for the preservation of the forest, it would be indispensable for the government to recognize it and put it up under those conditions.

Oahu.—The Hauula tract was opened up for homesteads under the nine hundred and ninety-nine year lease system and all of the 33 lots have been taken up. The inhabitants of Hauula, who were the principal applicants, are quite contented with their holdings and are doing well.

I had occasion to inspect the Wahiawa land, occupied by a colony of American farmers—in all, 13 in number—under the right of purchase lease, on final prove up. Taking into consideration all they had to contend with, the showing made by them demonstrates what industrious, progressive, and energetic farmers can do. Where once rank Hilo grass and scrub forest were growing can now be seen cultivable land where experiments have been carried on, some of which have been successful and are producing some profitable results. The

immense amount of time, labor, and money expended can not be overestimated by anyone who is even familiar with the work done by them.

Kauai.—Public lands on the island of Kauai are mostly held under lease (mostly Crown-land leases), consequently no transactions appear in the above table.

The land of Waioli in Hanalei was some years ago subdivided into lots averaging 50 to 100 acres. No applicants were received for same on account of its mountainous character, which made it impossible for anyone to conform with the various systems of the land act.

This is to be congratulated more than regretted. While the intention is to settle land wherever desirable, yet in this particular instance settlement would have had a disastrous effect on the whole land. Its mountainous character, in the first place, makes it insusceptible of any cultivation for agricultural purposes. In the second place, the accessible forest and undergrowth that exists on the land make it undesirable for grazing purposes unless cleared. Under these conditions I consider it fortunate that the land was not taken up, and that this office could deal with the land as it should be dealt with, and that is to keep the present forest and heavy undergrowth intact as much as possible.

Land of Aliomanu and Papa.—This land was leased to E. J. Morgan in the early part of 1899, with the condition that the government may at any time take such portions as are desirable for bona fide settlement purposes without any reduction of rent. On my visit to Kauai in November last I made a very thorough investigation of the land, and found a very limited amount of land, which may be found along the bottom of Aliomanu and Papa gulches, which carries the Anahola stream, and without exaggeration would make ideal homestead lots. The condition that exists there is anything but undesirable. With an abundant supply of water from the Anahola stream, rich, fertile land, I can not see why it would not be a successful venture. The rest being extremely difficult of access, as it consists mostly of mountain land, from its character it would be folly to open this portion for settlement.

From the above table you will also note that the right of purchase leases have been the most popular, and can only be accounted to it on generous conditions; too much can not be said in its favor.

Homestead lease system of nine hundred and ninety-nine years is also becoming very popular; the more intending homesteaders become familiar with its working the demand is accordingly greater.

Cash, freehold, and special agreement transactions do not appear in above table, because we have not had occasion to apply them to lands that have been opened during the period. These agreements are only applied to such lands that are limited in area and to discourage as far as possible the mere speculator.

Cash sales during the year ending June 30, 1902.

Lot 27, Part C, Olaa, Puna, Hawaii, 4.20 acres.....	\$314
Waiohinu, Kau, Hawaii, 3.35 acres.....	524

The above shows transactions under cash sales for the year.

Lot 27, part C, Olaa, was an undesirable remnant bounded on all sides by private lands and of no good to hold. It was decided to sell it to the highest bidder, and it brought in \$75 an acre.

The land in Waiohinu was sold for church purposes to the Anglican Church of Hawaii.

Land licenses.

Licensee.	Location.	Term.	Annual rental.
Henry Waterhouse & Co., trustee for J. H. and Phoebe K. Raymond.	Polipoli Spring, Walluku, Maui.	20 years.	\$200

This license was granted to the above parties for the purpose of conducting the surplus water from Polipoli Spring, which is 6,000 feet above sea level, by means of pipes, to more advantageous points for supplying their cattle with water, avoiding the necessity for their traveling long distances and to such a great height to the same; they to construct and maintain watering troughs on public lands along its line. This license was also granted in the interest of the development of grazing and agriculture and the enhancing of the values of the public lands of Kamaole, Kahikinui, and Kanaio.

General leases.

a Cane land.

b Grazing land.

This land was leased for grazing purposes. The area designated may mislead such persons as are not familiar with the land of Manuka, and to criticise the action of this department in leasing such a large area for such an "inadequate," or, more properly saying, insignificant figure. To justify its action it is well to explain the situation fully, viz: The land of Manuka is situated in the district of S. Kona, and its boundary on the south is the dividing line between the districts of S. Kona and Kau, and wholly covered with a-a rock, with the exception of about 500 acres of fairly good grazing land. In the disintegrated lava there has in recent years sprung up a very dense forest of ohia (an indigenous forest tree), which covers about 2,000 acres and may in time cover a greater area.

This 2,000 acres of forest land is impracticable for any purpose, even grazing, as the rugged character of the a-a rock prevalent in the Kona district is dangerous to life and limbs of any animal kind except goats. The rest is simply barren lava waste, devoid of any vegetation,

arid and waterless. Consequently it simmers down to the fact that the lessee has only practically 500 acres of land from which he can realize anything. The lease also requires the lessee to preserve the forest and to reforest same in places where same appears in "small state of diminution, and to keep land, where practicable, clear of lantana.

Koolau, Maui.—This land was leased in two tracts, namely: (1) All that forest land extending from eastern boundary of the Ahupuaa Honomanu to the western brink of the gulch of Wailua-iki and from the ocean to boundary of Haiku above. (2) All that forest land extending from the western brink of Wailua-iki gulch to the western brink of the gulch between the lands of Kapaula and Puakea (or Paakea) and extending from the ocean to boundary of Haiku above. Both are situated on the northeastern side of the island of Maui.

The leases as above quoted were sold at public auction under the following condition as to forest, etc.: Lessee is prohibited from cutting or allowing to be cut any forest trees except for fencing a domestic purposes, to be used on premises or for development, storage, and transportation of water, to replant forest where it appears in state of diminution. It also prohibits the running of cattle on the premises to exterminate wild cattle; lessee to build and maintain a substantial fence along their entire length on upper side of old government road to prevent stock from trespassing on the land and not interfere with vested interest in water along its entire length; to furnish homesteaders with water for domestic and irrigation purposes at convenient points. These are the principal conditions of the leases.

Main purpose, of course, is for water, an article very much sought after by the vast sugar enterprises to the west of this island.

This land, though of an extremely rugged and almost inexcessible character, and impossible of cultivation on this account, holds a quantity of water, which goes to sea and benefiting nothing at all to anybody, and the land has never, to my knowledge, brought any revenue to the government.

Under these conditions, I think the government is very fortunate to derive a revenue, which is very desirable to carry on public improvements, but this is not all; by it the government is insured against the destruction of the forest by the inroad of cattle or fires being started on it. The preservation of the same will conserve water; diverted water from arid land, promotes enterprises through which the government collects increased taxes. Taking these facts in consideration, it is without question these lands were leased under very favorable conditions, and the lessee is to be commended for his public spiritedness.

Leased under forest conditions.—That fencing (and maintaining the same) the whole area to prevent the inroad of cattle, to preserve and increase forest. These lands have no natural water supply, depending mostly on rain for moisture. What water they can conserve and impound is of course appurtenant thereto.

TABLES OF RECEIPTS.

1. Receipts of public land office from January 1, 1901, to June 30, 1901.

LAND REVENUE.

Rents:		
General leases	\$42,977.54	
Right of purchase leases	2,750.31	
Olaa leases	240.31	
Kaimu leases	3.75	
Miscellaneous	498.80	
Interest:		
Homestead	291.50	
Special agreements	2,870.94	
Cash freeholds	15.85	
Olaa agreements	18.65	
Fees	392.00	
		<u>\$50,057.65</u>

LAND SALES.

Purchase right of purchase leases	20,512.12	
Special agreements	6,626.41	
Homestead	2,369.20	
Olaa lots	1,104.45	
Kaimu	25.00	
Cash sales	525.00	
		<u>31,162.18</u>
		81,219.83

The above shows receipts of this commission for the six months ending June 30, 1901, which has not as yet been reported. A good showing is made, especially in land sales. You will notice by comparing this statement hereunder that the amount is greater than for the year ending June 30, 1902. This is occasioned by the purchase price being paid in on agreement falling due during this period.

2. Receipts of public land office during the year ending June 30, 1902.

LAND REVENUE.

Rents:		
General leases	\$95,577.93	
Right of purchase leases	5,266.20	
Olaa leases	193.23	
Puukapu leases	21.00	
Miscellaneous	1,233.60	
Interest:		
Homestead	355.34	
Special agreements	1,087.63	
Olaa agreements	61.00	
Fees	65.50	
		<u>\$103,886.69</u>

LAND SALES.

Purchase right of purchase leases	\$9,518.07	
Special agreements	1,902.14	
Homesteads	1,288.88	
Olaa lots	12.40	
Cash sales	315.00	
		<u>\$13,036.49</u>
		116,923.18

The above shows an increase in the receipts of this commission for the past year and has fulfilled all predictions made in our annual report of 1900, and it is hoped that it will be increased to a great amount in the coming year. Leases on land that bring in insufficient rents, some of which will expire, will be again leased for more than double the amount that we are deriving from them now.

Activity in land transactions will also be a source of increased revenue, not only for this office but also for the tax bureau.

SURVEY WORK.

This work is still under the supervision of the government survey office.

The following will show the location of homestead tracts subdivided during the year and aggregating a total area of about 8,000 acres and averaging 10 to 50 acres a lot:

Peter Lee, 29 miles, Olaa; Kaihenui settlement, 13 miles, Olaa; Kiula lots; Papa lots; Kaimu-Makena section; Kikala-Keokea section; Keauohana, Kehena, Keekee, Kamaili section; Malama section; Kaniahiku section; Kaimu-Kalapan section mauka; Keonepohaka section; Oneloa-Ahalanui (not yet opened); J. Lewis settlement, 13 miles, Olaa; Nailima settlement, 13 miles, Olaa.

Considering that the survey office is working under a professional basis and the work done is of the most improved and accurate method of survey, I think the above is a very satisfactory showing.

Actual survey work is being carried on in the following named lands.

Laupahoehoe lands, N. Hilo; Kiolakaa, Kau Olaa, 27 and 29 miles, contemplated.

Mahaiula to Ooma, N. Kona; Alika-Papa, S. Kona; Waimea, Hawaii; Wailua-nui, Keanae Maui; Waiakoa, Maui; Kanaio, Maui; Waiahole, Oahu; Aliomanu-Papa, Kauai.

It is too much to even assume that the survey work contemplated will be completed during the coming year, but with the present force in hand a good portion anyway will be completed.

Statement of expenditures for the year ending June 30, 1902.

Item.	Appropriation.	Drawn.	Total drawn.	Balance.
Salary of commissioner.....	\$7,200.00	\$3,600.00	\$3,600.00	\$3,600.00
Salary of secretary and subagent fifth land district.....	4,200.00	2,100.00	2,100.00	2,100.00
Salary of clerk and patent clerk.....	2,400.00	1,200.00	1,200.00	1,200.00
Salary of messenger for registry of conveyance and land office.....	1,800.00	900.00	900.00	900.00
Pay of subagent first land district.....	2,400.00	1,000.00	1,000.00	1,400.00
Pay of clerk and ranger first land district.....	1,200.00	600.00	600.00	600.00
Pay of subagent second land district.....	1,200.00	600.00	600.00	600.00
Pay of subagent third land district.....	960.00	480.00	480.00	480.00
Pay of subagent fourth land district.....	1,200.00	600.00	600.00	600.00
Pay of subagent sixth land district.....	720.00	360.00	360.00	360.00
Pay of ranger second land district.....	720.00	360.00	360.00	360.00
Pay of ranger third land district.....	720.00	360.00	360.00	360.00
Pay of ranger fourth land district.....	720.00	360.00	360.00	360.00
Pay of ranger fifth land district.....	720.00	360.00	360.00	360.00
Incidentals (including land-patent books, etc.).....	5,250.00
Traveling expenses.....	\$76.70
Printing.....	145.00
Advertising.....	1,224.52
Office expenses.....	1,113.88	3,360.10	1,889.90
Preliminary roads and trails.....	7,000.00	7,000.00
Expenses filing boundary certificates.....	800.00	70.60	70.60	229.40
Total.....	88,710.00	15,950.70	15,950.70	22,759.30

The above table shows a very small balance in our appropriation for incidentals, and amounts to more than the pro rata for the year.

Expenses for printing and advertising have been quite heavy, as new blanks had to be printed to conform to section 73 of the organic act. Activity in land transaction also occasioned a heavy expenditure for advertisements, and can not be avoided unless we curtail land transaction. To do so would show a lack of progressiveness.

Nothing has been spent on preliminary roads and trails. The difficulty with which this office has to meet in dealing with this question has yet to be solved.

It is a criticism sometimes made on work of this office that lands have been laid out in advance of the construction of roads, whereby smaller value attached to the land itself and the settler was hampered in the operations for lack of suitable roads, both of which statements are undeniably correct.

On the other hand, if such opening of lands were held back until suitable roads were completed it would cause an indefinite delay in land transactions, and the results so far achieved would not now be in evidence.

Statement of land grants issued during the year ending June 30, 1902.

a Fathoms.

b Square feet.

The above table shows an increase in number of land patents issued during the year greater than that of any previous year, and has kept the office staff hard at work to accomplish this, which requires the

exercising of considerable care, as the least error might create confusion or even litigation.

Land patents issued on land commission award during the year ending June 30, 1902.

Number of patent.	Patentee.	Location.
8117	V. Kamalu.....	Onomea, Hilo, Hawaii.
8118	Puhau.....	Kalihi, Honuaula, Maui.
8120	Kannuohua for W. L. Moehonua	Kalihi, Kona, Oahu.
8121do.....	Do.
8122do.....	Do.
8123	A. Keohokalole.....	Paauhau, Hamakua, Hawaii.

8132	M. Kekauonohi.....	Naliwa, Kona, Molokai.
8133	Nawali.....	Ninole, Kau, Hawaii.
8134	Mahi.....	Pelekunu, Molokai.
8136	Kaleimoku.....	Waiohama, Lahaina, Maui.

From present outlook and from applications on file the number land patents to be issued on confirmation of land commission award during the coming year will far exceed in number what appears in the above table.

The above will give a graphic review of the transaction of this commission during the year. Comparing it with the reports of previous years the showing made exceeds my most sanguine expectation.

Taking into consideration that the last legislature, probably through an economical disposition, struck out of the salary appropriation bill two items which were very necessary to the efficiency of this commission, though matters were fully explained to committees who visited and investigated the requirements of this office, but without avail (consequently we made the best of it, economizing at every possible point the results above accomplished does not only reflect credit on the staff at my disposal, but to the office in general.

FOREST PROTECTION.

The greatest interest in the protection and propagation of the forests of this Territory, not only by the Territorial and Federal governments but also by cooperative bodies and private individuals, and recognize by all, is a very important matter to be considered.

The question was dwelt on at length in report by Expert Forester E. M. Griffith to you on the condition of the Hawaiian forest.

Mr. Griffith states the situation admirably and to the point, and his suggestions should receive earnest consideration.

This commission has in recent leases of public lands where forest land is included made reservations for its protection, and will carry out this rule in all future leases.

Contemplated staking out of lines for forest reservation is being laid out and will be prosecuted on the ground as soon as practicable and when the surveys are completed the plans will then be submitted for your consideration. Allow me to say that any steps that may be

taken for the preservation and propagation of our now very much denuded forest will receive the cooperation of this commission.

Respectfully submitted.

E. S. BOYD,
Commissioner of Public Lands.

EXHIBIT No. —.

ELEVENTH REPORT OF THE EWA PLANTATION COMPANY FOR THE TWELVE MONTHS ENDING DECEMBER 31, 1901.

Officers of the Ewa Plantation Company, 1901: President, J. B. Atherton; vice-president, C. M. Cooke; secretary, E. D. Tenney; treasurer, W. A. Bowen; auditor, T. Richd. Robinson; manager, George F. Renton.]

ERRATA.

Page 7: Under "Crop of 1902" read "3,385.6 acres of Ewa Plantation Company" for 3,335.6.

Page 8: Under "Memorandum No. 2" read "Clarified juice, 16.99 per cent" for 16.19 per cent.

Page 13: Under "Total cost of crop" read "\$566,975.01" for \$556,975.01.

Page 14: Under "Earnings," right-hand column, read "Less railroad freight and insurance, \$9,311.70" for \$9,311.79.

Page 14: Under "Profit and loss," left-hand column, read "1901" for 1091.

Page 15: Under "Exhibit D, Resources," read "Hawaiian Fiber Company stock, \$1,500" for \$15,000.

Page 16: Under "Exhibit E, Disbursements," read "for interest on bonds paid during 1901" for in bonds.

MANAGER'S REPORT.

HONOLULU, OAHU, HAWAII, *February 7, 1902.*

To the President and Directors of the Ewa Plantation Company:

GENTLEMEN: Herewith I have the honor of submitting to you the annual report for 1901, together with statistics of field yields and mill manufacture, detailed statement of cost per ton of sugar, and comparison between plant and ratoon canes of expense of cultivation.

CROP OF 1901.

The product of the past year has been taken from the largest area and has reached the greatest yield per acre in the history of the plantation. Had it been possible to have manufactured the whole into sugar before the end of last August the average would certainly have reached over 11 tons of sugar. Grinding was begun on January 3 and completed on November 20, and in spite of the attendant drawbacks at mill, which will be referred to later, the factory output exceeded that of any previous year, averaging 3,127 tons per calendar month, inclusive of holidays, breakdowns, or delays from scarcity of labor. This showing is in excess by 306 tons monthly of any former season.

CROP OF 1902.

The amount of land from which cane is to be harvested during this coming year is greater by 451 acres than that for 1901. Owing, however, to the delays in grinding consequent upon the scarcity of labor

during 1900, a portion of the ratoons had a late start. On account of the same stringency some of the plant cane was not set out until the winter season of that year had commenced. Nevertheless, in all but two of these backward fields there has been no flowering to speak of and the canes are still growing, which will offset very materially the late start. Taking this into consideration, together with the probability that the crop of 1902 will be harvested earlier than that for the past season, with a correspondingly lower depreciation of canes, I have no hesitation in placing the output of this year at 30,000 tons.

CROP OF 1903.

Reference to field statistics will show this to be 3,383.2 acres. Of this but 608 acres is plant cane. With two exceptions of fields ground during the rainy season of 1901 and necessarily very much cut up by teams, every acre of the plant cane of 1901 was ratooned. It is hardly necessary to revert to labor conditions already sufficiently reiterated. There was but one thing to do, viz, to ratoon. By comparing cost of cultivation of plant cane with that of ratoons, a table of which is given herewith, it will be seen that the latter in 1901 cost \$46 per acre less than the former. So that, while a few fields of ratoons for 1903 are here by virtue of necessity, the much greater number are here by virtue of themselves.

The second ratoons, which, for the first time on this estate, cover a fairly large area, were carried on for precisely the same reasons as the first ratoons. Judging from present appearances they will yield fully 10 tons per acre. In fact, on account of the starting of the second before the first ratoons, which counts for as much proportionately on Ewa plantation as it does elsewhere, they are the best looking ratoons on the estate.

It is obviously premature to calculate the probable yield of this young cane, but it is certainly in good condition, is growing well, and I shall probably make the usual estimate on it.

MILL REPORT.

The heavy rains of the preceding winter retarded the ripening of cane so that during the earlier months of grinding the quantity required to make one ton of sugar was much greater than usual. This, of course, has a direct bearing on losses in manufacture. When, however, it is remembered that the immense crop of 32,840 tons covered ten months in manufacture; that the rollers of the crushing apparatus were worn smooth before grinding commenced; that there was no interval between the seasons of 1900 and 1901 for overhauling machinery; that upon the completion of the crop of 1901 the mill had been grinding incessantly for two years; and that, to top it all, the new mill was being erected with all the drawbacks it entailed; the fact that such a large quantity of material was daily delivered at the mill, and that the manufacturing losses were not greater, reflects great credit on an efficient staff, both in field and factory.

OPERATING EXPENSES.

The actual expenditure to produce the crop of 1901 was \$34.04 per ton. Not only did a higher rate of labor cause the greater cost, but

also a correspondingly high rate for general material, taxes, etc. An itemized statement of cost of production is herewith, to which you are referred for details. The following is merely a very condensed recapitulation.

Cost of crop of 1901 per ton of sugar.

Preparing and planting	\$2.80
Cultivating	15.19
Delivery to mill	6.29
Mill repairs, manufacture, and containers	4.38
Medical, hospital, and sanitary expense18
Rent	2.39
Taxes	2.04
Immigration expense and H. S. P. A. dues60
General	1.07
Total	34.94
Add depreciation charge	1.68
Grand total	36.62

In connection with the above it might be interesting to know that the cost of furnishing water for irrigating the crop until tasseling was \$35.72 per acre, or \$3.30 per ton of sugar, and that \$5.12 per acre, or 45 cents per ton of sugar, was expended in order to prevent the deterioration consequent upon a prolonged grinding season. The writer expects that before another season, on account of the enlarged capacity of the new mill, the larger portion of this latter expense will be eliminated.

PERMANENT IMPROVEMENTS.

These are set forth in the report of your treasurer, Exhibit B. They have aggregated more than was originally estimated. This, however, is the history of all mill construction and plantation enlargement in this Territory during the past two years. The mill also has taken longer to erect. But this was owing to stress of circumstances. The output for the past two seasons largely overran estimates, the labor supply has been scant, these large crops had to be taken off, and the new mill was of necessity delayed. That is the entire proposition in a nutshell. We are now, however, at the beginning of the end. At present writing there remains one new B. & W. boiler in process of erection, with 1 vacuum pan, 12 tanks, and 20 centrifugals to be removed from their present location and placed in their new setting. It is all straight-ahead work, and if labor is then obtainable the entire plant will be running by the middle of next April.

The original nine-roller mill is being thoroughly repaired; the old rolls are being replaced by new ones. All of the present milling is being carried on in the new section of the factory, and there will be comparatively little else to pay for this coming year in permanent improvements save cost of erection of the above-mentioned machineries and of the remainder of the mill.

An entirely new village or camp, situated a half mile east of mill, has been completed during the year, and houses have been added in other localities sufficient to accommodate all laborers required on the plantation.

The machine-shop equipment has been increased by a large, heavy planer, another lathe, an extra drill press, and a large-sized pipe cutting and threading machine. This with the former machines installed

makes a complete plantation outfit. In the carpenter shop there have been placed a band saw, also a planer and matcher. I consider that these new tools have already paid for their cost during the present mill construction.

For the benefit of employees a condensing apparatus has been installed at mill of sufficient capacity to supply the entire village and the factory with distilled water. This condenser is now in operation.

LABOR.

In connection with this vital question I invite your attention to the following comparison of the cost of sugar production between the years 1899 and 1901:

Cost to produce 1 ton of sugar, and net proceeds at mill.

Year.	Material and general expense.	Labor.	Total Cost.	Net proceeds.
1899	\$13. 67	\$12. 59	\$26. 26	\$72. 61.
1901	16. 49	18. 45	34. 94	

It will be noticed that the expense for labor has jumped 50 per cent, that material and general expenses have advanced 20 per cent, and that the net proceeds of sugar have fallen 14½ per cent.

At present it is gratifying to note that the labor situation is easier than it was during last year and that the price for labor has dropped about 18 per cent. Sugar in its turn is again rising.

WATER SUPPLY OF THE WAIANAE MOUNTAIN.

Your company holds the right under lease to take water from the easterly slopes of this range. It would be well, probably, some convenient date to have surveys made to determine the practicability and economy of storing in reservoirs the storm waters from this watershed for the purposes of irrigation.

GENERAL.

It is a regrettable fact that a successful cane-loading machine is not yet in operation. Various devices have been tried and abandoned, and so far, the severe labor of loading is all done by hand. Nevertheless, the time is coming, must come, when manual labor will be reduced in this department. It may not be and probably will not be in one immediately successful machine, but will rather lie in a series of successful ideas or advances culminating in an economical device or system.

In order to cheapen the cost of irrigation the use of fuel oil to replace coal at the pumping stations will in all likelihood take place in the near future. Approximately 11,000 tons of coal were used in 1901 at the pumps. With the opening of Pearl Harbor the cost of transportation of material and manufactured product must of necessity be reduced.

Of course the prime factors in the success of the sugar business are cost of labor and price of sugar. A low labor rate and a high sugar rate may cover a multitude of errors. But this combination has gone; we are facing very depressed conditions, and the present and probable future conditions of the sugar market demand rigid economy and the best thought.

In the interest of economy the new mill will exercise a most important influence. Briefly stated, its machinery consists of 2 nine-roller mills with crushers and engines complete, 11 boilers of 2,400 horsepower, 2 superheaters, 24 settling tanks, 4 large vacuum pans, 2 quadruple effects, 45 centrifugals with engines and pumps, 465 coolers on wheels, and 17 tanks of 750,000 gallons capacity for 4th sugars, together with all accessories, pumps, engines, tanks, etc.

In the essentials in the actual machinery necessary for the economical production of a large quantity of sugar there is no mill in the territory which will surpass the new Ewa mill, and there is ample room in the structure for any possible additions or changes which science may demand in the future.

With these improvements the plantation was never in a better condition to face the present depression. The mill will be able to wring out the best possible extraction from the cane and work its juice into a product with the least possible loss. And surely it is high time, with the vast amount of material handled annually at this place, that we reach out both for these definite sources of waste and these stray percentages of sugar which are classed as "undetermined" losses; for out of these losses in field and mill, through insufficient machinery, will come a substantial portion of future dividends.

Respectfully submitted.

GEO. F. RENTON,
Manager.

MEMORANDUM No. 1—*Field report.*

TREASURER'S REPORT.

To the stockholders of the Ewa Plantation Company:

SIRS: I am pleased to submit the following exhibits of the financial affairs of the company for the fiscal year ending December 31, 1901:

Exhibit A.—Expenditures for permanent improvements.

Exhibit B.—Operating expenses.

Exhibit C.—Revenue account.

Exhibit D.—Balance sheet (condensed).

Exhibit E.—Summary of receipts and disbursements.

Respectfully,

W. A. BOWEN,
Treasurer Ewa Plantation Company.

EXHIBIT A.—*Expenditures for permanent improvements for year ending December 31, 1901.*

Properties.	Balance December 31, 1901.	Additions during 1901.	Totals.	Depreciation on balance of December 31, 1900.	Present balance December 31, 1901.
Buildings.....	\$134,869.16	\$34,596.74	\$169,465.90	\$6,743.46	\$162,722.44

EXHIBIT No. —

THIRD ANNUAL REPORT OF THE OLAA SUGAR COMPANY, LIMITED,
FOR THE YEAR ENDING DECEMBER 31, 1901.

[Officers for 1902: L. A. Thurston, president; B. F. Dillingham, vice-president; A. W. Van Valkenburg, secretary; E. E. Paxton, treasurer; E. A. Mott-Smith, auditor.]

TREASURER'S REPORT.

HONOLULU, *December 31, 1901.*

To the stockholders of the Olaa Sugar Company, Limited.

GENTLEMEN: I herewith submit the following exhibits showing the financial condition of your company on the 31st day of December, 1901, as prepared by the plantation bookkeeper, Mr. J. F. Clay.

Exhibit A.—Operating expenses for thirty months ending December 31, 1901.

Exhibit B.—Stock expenditures.

Exhibit C.—Stores.

Exhibit D.—Balance sheet.

I further submit condensed statement of receipts and expenditures for the current year, and also details of capital stock and bond accounts.

Treasurer's statement of receipts and disbursements for the year ending December 31, 1901.

RECEIPTS.

Assessments on stock, including \$73,801.50 charged to stock in treasury	\$520,481.57

	1,250,000.00

REQUIREMENTS FOR 1902.

It is estimated that the requirements for the coming year necessary for carrying forward the development of the plantation as outlined in the report of the manager will be in the neighborhood of \$1,200,000.

Assessments have been suspended until June 1 next. The date on which the same may be resumed will depend on the returns from the crop now being harvested and local financial conditions.

Respectfully submitted.

ELMER E. PAXTON,
Treasurer Olaa Sugar Company, Limited.

AUDITOR'S REPORT.

I have examined the books of the Olaa Sugar Company, have checked the receipts and expenditures with the vouchers on file, verified the yearly trial balance, counted the cash on hand, and examined the annual statements of accounts, all of which I find to be correct.

W. G. TAYLOR,
Acting Auditor.

DECEMBER 31, 1901.

MANAGER'S REPORT.

To the President, Board of Directors, and Stockholders of the Olaa Sugar Company, Limited.

GENTLEMEN: I beg to submit the following report of the operations of the Olaa Sugar Company, Limited, for the year ending December 31, 1901.

WATER SUPPLY.

The water supply of the company has been largely developed during the past year by the extension of previous tunnels and the digging of new ones. One thousand eight hundred and sixty-nine feet of tunnels have been constructed to date. These tunnels all concentrate at one point into a main flume. Extension of the tunnels is still going on. The present supply of water appears to be sufficient to supply all the needs of the mill and for fluming, but as tunneling continuously develops more water I thought it best to continue so as to have an assurance against deficiency in the driest weather.

FLUMES.

The main flume, from the water head to the cane fields and across the plantation to the Volcano road, has been completed. It meets the Volcano road just above the so-called "Peck road" at about 18 miles, being a little over a mile above Mountain View, approximately 10 miles above the mill.

From this main supply flume two flumes for carrying cane have been constructed longitudinally through the fields to the mill, and a third one will be completed within a month. A fourth will be constructed immediately. These four, with cross flumes from one to the other, cover the entire territory for 10 miles above the mill, and will enable the fluming of all cane lying between the mill and an elevation of 1,800 feet. About 40 miles of flume are now constructed.

Considerable doubt having been expressed by practical fluming men as to the feasibility of keeping the mill supplied by cane flumes from the distances required and with the amount of water available at Olaa, I am glad to say that nearly two months' experience has demonstrated the entire practicability of this method of transportation under the conditions presented at Olaa. In fact, with only one flume in operation, using between 4,000,000 and 5,000,000 gallons per twenty-four hours, a delivery of over 60 tons of cane per hour has been accomplished, keeping the mill in continuous operation to its full capacity. Fluming is now going on simultaneously and with perfect success from the fields along the Puna road, 1 mile from the mill, from Peter Lee's at Eleven Miles, 3 miles from the mill, and from the fields back of Mountain View, 10 miles from the mill.

The water from the flume has been ample for all mill purposes, although the month of December was unusually dry.

RESERVOIRS.

As there has not yet been need for water at the 20-mile point on the Volcano road, where our reservoirs are located, no further development or increase of the same has taken place. They will be completed during the coming summer and water stored there with which to remove the cane lying between that point and the main flume at Eighteen Miles.

A storage reservoir at the mill, with a capacity of 750,000 gallons, for mill use, is nearly completed, and it is intended to build for the same purposes another storage reservoir of larger capacity a short distance above the mill, from which the mill can be supplied by gravity instead of by pump as at present.

MILL.

There were unexpected delays in the completion of the mill, so that it was not ready to begin grinding until December 23, when the taking off of the crop began. With the exception of a few matters of detail easily remedied, the mill is an extremely satisfactory piece of work and gives every indication that it will fully comply with all expectations and estimates as to its power and capacity. The estimated capacity is 150 tons per twenty-four hours. Although no complete run of twenty-four hours has yet been made, it is a practical certainty that the mill has more than the estimated capacity. I believe that under favorable conditions the mill will be able to turn out 200 tons per day.

It is due to the contractors, the Honolulu Iron Works, and the efficient foreman in charge of the erection work, Mr. James Scott, that the contract has been carried out in the most conscientious and satisfactory manner and that your company possesses one of the most up-to-date, economical, and efficient sugar mills in the world.

RAILROAD.

With the exception of the car yard at the mill and the connection with the main tracks of the Hilo Railroad Company, no plantation railroad has been installed during the past year. A large part of the third crop will be planted below the mill, and a railroad track will be necessary to harvest this crop. The necessary rails are all here and will be installed in ample time for the harvesting of that crop.

The Hilo Railroad has during the past year extended its track from the mill longitudinally through the plantation as far up as Mountain View, or to approximately the Seventeen Mile point on the Volcano road. It has also graded its road approximately to the Twenty-two Mile point on the Volcano road.

The plantation has made arrangements with the railroad company for the transportation to the mill of all cane lying above the plantation flumes at a rate which makes it inexpedient for the plantation to construct tracks to such fields. The construction of the railroad will also bring into cultivation with sugar cane, for manufacture at the Old mill, a large area lying above the plantation, held by private owners.

LABOR.

In common with the entire planting interests of the country, Old could have used to advantage a larger number of laborers during the past year, but has suffered as little as almost any plantation. But for the fact that harvesting is now going on, we would have about enough people; as it is we could do better with several hundred more.

During the past year a number of Porto Ricans have been added to the labor force.

We have on the plantation 237 Porto Ricans, including women and children.

Although there is among them a good deal of poor material, the majority of them are fair workers, and we have had little trouble with them. I think that one prime reason for this is that we have continuously maintained in our employ a thoroughly competent interpreter so that there has been no misunderstanding between laborers and manager as to what was wanted on either side.

The total number of employees on the plantation is as follows:

Management and office	14
Linas	34
Mechanics	42
Chinese cane contractors	21
Japanese cane contractors	399
Japanese laborers	805
Japanese women	38
Chinese	206
Portuguese	100
Hawaiians	20
Porto Ricans	220
Porto Rican women	17
Other nationalities	19
Total	1,935

In addition to these there are about 550 persons engaged in sundry clearing contracts.

SHARE PLANTING.

Three forms of share-planting contracts are in use on the plantation: First. Where the planter owns his own land and the plantation makes no advances to him.

Second. Where the planter plows and plants plantation land and furnishes most of his own capital.

Third. Where the plantation plows and plants the land and then turns it over to the planters to care for the cane until maturity.

Under the first two forms the cane is purchased by the plantation at so much per ton, the price being on a sliding scale based on the current price of sugar.

Under the third form a flat rate of so much per ton of cane is paid to the planter.

Under the first form 50 planters are now cultivating under contract with the plantation.

Under the second form 60 planters are cultivating about 600 acres under contract with the plantation.

Under the third form 420 contractors are cultivating 3,175 acres.

A much larger number of outside landowners are anxious to plant cane for sale to the plantation, but are prevented from doing it by lack of capital. As soon as the company is in a position to do so I strongly advise that reasonable advances be made to reliable planters. If outside capital can be induced to make advances to the planters, it would be a sound proposition for the plantation to guarantee the account, taking security on the land and crops for so doing, and further protecting itself by having the advances made guaranteed by this company in the way of accepted orders, inspection being made from time to time as to the progress and value of the work. I earnestly recommend consideration of this plan, believing that if it is adopted several thousand acres of additional land will be brought under cultivation as soon as the necessary capital is available.

CROP OF 1901 AND 1902.

It was expected that the mill would be ready in August or September last. Owing to the delay in completion it was thought best not to hold the 247 acres of cane planted for seed cane which was not needed,

and which had tasseled, and the same was sold to the Waiakea Mill Company, the proceeds of same amounting to \$46,422.29 net.

Plantation cane	Acres	3,54
Planted by outsiders.....		9
Amounting to.....		4,4
Less.....		2
Leaving		4,1
now being ground.		

It is too early in the season to make definite estimate of what the total yield will amount to, but I feel confident that the estimate of last year, of 5 tons to the acre, will be fully borne out.

CROP OF 1902 AND 1903.

Estimated area of second crop is as follows:

Plant cane	Acres	2,060
Long ratoons.....		329
Twelve months' ratoons.....		1,000
Estimated Puna Sugar Company		1,100
Estimated, other outside landowners.....		500
Total		4,990

The varieties of plantation cane for the second crop are:

Lahaina	Acres	2,7
Caledonia.....		2
Rose bamboo		3
Yellow bamboo		1
Total		3,3

The planting of the second crop was completed in October. Being planted in good season it has a much stronger and more advanced growth than the first crop had at this season and should produce heavier average yield.

CROP OF 1903 AND 1904.

The estimated area of the third crop is as follows:

Plant cane.....	Acres	2,5
Long ratoons from first crop.....		2,5
Short ratoons from second crop.....		1,0
Outside owners.....		7
Total estimated area.....		6,4

Planting on the upper lands began simultaneously with grinding and will be continued without interruption. The top seed from the upper land is being used exclusively for planting. I expect to plant all the lands intended for third crop lying above 1,000 feet elevation by the middle of the year and begin planting lands below that elevation about the middle of June.

CHARACTER OF THE CANE.

The apparent evenness of the growth of the young cane at the different elevations ranging from 300 feet near the mill to 2,000 feet

noted in last year's report, has continued to maturity. The cane is now being cropped at elevations ranging from 300 feet to 1,800 feet, and the quality of cane at the various elevations is nearly the same.

It was feared by some that owing to this being a rainy district the saccharine quality of the cane would be low. This fear has been entirely disproved, however, as the following figures will show.

The average of all Olaa cane ground, including that from all elevations, plant and ratoons, and being part Lahaina, part rose bamboo, and part yellow bamboo, up to the 31st day of December, is as follows: Density (Brix.), 19.97; sucrose, 17.82; purity, 88.94.

Individual analyses have been made as high as: Density (Brix.), 20.7; sucrose, 18.28; purity, 90.75.

WEATHER.

The weather has been good throughout the year, no inconvenience having been suffered, the rainfall being ample and evenly distributed, as appears by the appended report.

Rainfall and temperature for the year ending December 31, 1901.

OLAA SUGAR COMPANY, LIMITED—ANNUAL REPORTS, PRESENTED AT THE ADJOURNED ANNUAL MEETING OF THE STOCKHOLDERS, HELD AT THE ROOMS OF THE CHAMBER OF COMMERCE, HONOLULU, APRIL 30, 1900.

[Officers for 1899: L. A. Thurston, president; H. P. Baldwin, vice-president; A. W. Carter, secretary; J. B. Castle, treasurer; E. E. Paxton, auditor.]

TREASURER'S REPORT.

To the Stockholders of the Olaa Sugar Company, Limited.

GENTLEMEN: The expenditures for the development of your estate of the receipts from assessments on the capital stock of your company will be found distributed in the following financial exhibits prepared by Mr. J. F. Clay, the plantation bookkeeper.

A.—Statement of operating expenses—crop 1901-2.

B.—Statement of stock expenditures.

C.—Statement of resources and liabilities.

It will be of especial interest to stockholders to know that in spite of the protracted financial depression caused by the plague, but a very small percentage of the stock has become, or gives signs of becoming delinquent. After as careful an estimate of the needs of the plantation for the first year's work as under the circumstances it was possible to make, the directors determined, with the desire to distribute the burden of assessments into as small payments at regular intervals as practicable, to levy the same, monthly, at 2½ per cent each from October 1, 1899, to July 1, 1900. The assumption by our company, however, of the factory contract of the Kihei Plantation Company with the Honolulu Iron Works brought within this period heavy payments which were not expected to accrue until subsequently to July 1, while the publication of assessments to that date precluded any additional increase of the same in the interim. While the purchase of the Kihei contract has proved from every point of view advantageous to the Olaa Sugar Company, the payments on account of the contract and the enlargement thereof will be responsible for the greater part of the anticipated debit balance with your agents on July 1 next. The amount, together with the remaining payments on the factory contract as well as its transportation and erection, and the planting of an appropriate second crop, will all necessitate a heavier average assessment for the period of sixteen or eighteen months to elapse between July 1 next and the first returns of sugar than for the first year of your work. We now estimate that the total assessments levied between August 1 and January 1 will amount to 30 per cent, or \$6 per share. It will be the aim of the directors to divide the remaining 35 per cent assessable during 1901 in as moderate installments and at as regular intervals as practicable.

Your manager's report will already have satisfied you that your money is being expended to good purpose.

J. B. CASTLE,
Treasurer Olaa Sugar Company.

HONOLULU, March 22, 1900.

OLAA, HAWAII, *December 31, 1899.*

REPORT OF THE MANAGER FOR SIX MONTHS ENDING DECEMBER 31, 1899.

OLAA, PUNA, HAWAII, *January 1, 1900.*

*To the President, Board of Directors,
and Stockholders of the Olaa Sugar Company, Limited.*

GENTLEMEN: I beg to submit the following report of the status operations of this company for the six months ending December 31, 1899, accompanied by a statement of resources and liabilities, as of that date:

I took charge of the Olaa plantation, as its manager, at the end of June, 1899, at which time there were about 50 free laborers at work. Some 40 acres of seed cane had been planted, and 3 horses were engaged in plowing. All plowing was being done by the Volcano Stables Company of Hilo. All of the rest of the material has been obtained, and all work hereinafter enumerated accomplished since, approximately, the first day of July last.

REAL ESTATE HELD BY THE COMPANY.

The prospectus of the company stated that the promoters expect to obtain "approximately 19,500 acres."

The promoters have closed all options on lands as the same fell due and have now transferred to the company 13,000.85 acres in fee simple and 4,032 acres on a forty-year lease, and hold options on 1,569.15 acres in fee simple, yet to be closed up. These options are being closed as fast as they fall due.

In addition to the lands obtained by the plantation from the promoters, the company has purchased, on its own account, several small

pieces of land, mostly house sites previously reserved, and pieces connecting lands owned by the company. The area so purchased amounts to about 70 acres.

The company has also leased, on its own account, 200 acres of cane land.

The total area of the plantation, including the land under contract of purchase, is therefore 18,872.25 acres.

The lease under which the leasehold land is held gives the company the right to take from the land of Keaau from time to time any further land which the lessee may desire at the same rates of rent. There are considerable areas of cane land in Keaau which will be taken up later on as they are needed. It is estimated that this area will eventually reach fully 4,500 acres.

PURCHASE OF ADDITIONAL LAND.

Large amounts of land adjoining the lands of the plantation have been offered for sale; but it has been decided, except in special cases, where there is some peculiar value to the plantation attaching to the land offered, not to make any further purchases for the present, as it is deemed best to utilize cash resources for the purpose of developing the lands already owned by the company, rather than to increase the present area; the area of cane land already held being larger, with one exception, than any other plantation in the country.

PAID-UP STOCK ISSUED.

The contract between the company and the promoters was that paid-up stock should be issued to the promoters from time to time, as options were respectively closed and the lands made over to the company.

In pursuance with this contract the promoters have turned over to the company the land above enumerated, the contract value of which is \$2,179,617.50, for which there has been issued to the promoters 107,329 shares of paid-up stock of a par value of \$2,146,580.

There remains in the treasury yet unissued 17,671 shares of paid-up stock of a par value of \$353,420.

TRANSPORTATION.

The plantation lies along both sides of the Volcano road, beginning at 8 miles and extending to 22 miles from Hilo, the nearest and only base of supplies.

As all lumber, merchandise, and material of every kind whatsoever had to be transported by teams to the plantation, this subject received my earliest consideration. As soon as possible importations were made from California, and the company is now possessed of as fine a teaming outfit as there is to be found in the country, consisting of 402 mules and dump carts and wagons sufficient to do all the hauling and plowing necessary.

In addition to hauling all the lumber and supplies used on the place, all of the seed cane used has been brought from as far away as Honomu on the one hand, and Pahala plantation on the other; distances, respectively, of approximately 30 and 35 miles.

HILO RAILROAD.

The contract made with the Hilo Railroad to connect the plantation with Hilo stipulates that railroad connection shall be completed by November, 1900. It has, however, pushed operations much more rapidly than required by its contract. The grading of the road from Hilo to Olaa mill site is now nearly completed, and it is confidently expected that through rail connection will be in operation by the middle or end of March.

This will be of great assistance to the plantation, as it will reduce the cost of transportation from Hilo to about one-third of what it now costs and relieve the greater portion of the animals now used in teaming, so that they can be utilized in plowing and other plantation work.

BUILDINGS.

There were taken over with the various lands purchased by the company a few small scattered buildings, which furnished but slight accommodations.

This branch of the work has been pushed as fast as possible, and we now have well-built stables for over 400 mules and accommodations for 1,800 laborers, together with all necessary homes for skilled labor and superintendents.

With a few minor exceptions, no new buildings will be necessary during the development of the first crop except those appurtenant to the mill and its accessories. When other lands of the company begin to come into cultivation some additional buildings will have to be provided in order to get the labor near to the fields where they will work.

All of the buildings have been built with the full requirement of air space required by law, and an effort has been made to provide cottages for families and to prevent, as far as possible, the lodging of large numbers of people in one building, heretofore so frequently objected to in connection with plantation life.

SEED CANE.

As stated above, when I took charge there were already planted approximately 40 acres of seed cane on the plantation. Various Olaa residents had also planted small areas of cane, much of which has since been purchased from them by the plantation.

The planting of a sufficient amount of seed cane was one of the problems first taken hold of upon my arrival. The greatest item of difficulty and expense in connection therewith was the fact that nearly all plantations had ceased grinding, so that no top seed was available and the seed that could be obtained was at a great distance from the plantation.

A large portion of the seed purchased was "body cane," which, as is well known, does not make as good seed as do cane tops. A considerable percentage failed to germinate, requiring replanting. This has all been done, however, and all the fields are now coming on in good shape.

The policy decided upon was, so far as the seed could be obtained, to plant bamboo and caledonia on the upper lands and lahaina on the lower lands. There have to date been cleared, plowed, planted, and purchased and there is now in good growing condition seed cane of the kinds and amounts herein stated, viz:

	Acres
Lahaina	487
Yellow bamboo	61
Rose bamboo	132
Yellow caledonia	36
Total seed cane.....	716

LAND CLEARED AND PLOWED.

In addition to the above 716 acres already planted, clearing and plowing has progressed as follows:

	Acres.
Plowed and harrowed twice, now ready to plant.....	1, 145
Plowed once	1, 450
Total plowed.....	2, 595
Cleared and ready to plow	297
Cleared of vegetation (loose stone yet to be cleared before plowing)	1, 520
Forest and stump land partly cleared, under contract to be cleared	1, 500
Total lands cleared, partly cleared, and under contract for clearing	3, 317

SUMMARY.

Lands planted	716
Lands plowed and partly plowed.....	2, 595
Lands cleared and under clearing contract	3, 317
Total	6, 628

All of this land not planted this year will come into the second crop.

FIREWOOD.

In clearing forest land all suitable ohia wood is cut and piled in cord lengths. As soon as transportation facilities are ready this wood will be removed and sold, and should yield a good profit to the plantation. By the end of the present year transportation facilities should be such that this wood can be sent to market, besides furnishing the plantation with all the fence posts, railroad ties, and firewood it needs for many years to come.

It is not intended to clear the forest any more rapidly than is necessary for the planting of the crops.

ESTIMATED AREA, YIELD, AND RETURN FROM FIRST CROP.

There are so many preliminary requirements in the early stages of a plantation that an exact estimate of what the first crop will be cannot yet be made. The present intention, however, is to plant, say, 3,000 acres on the lower or Keaau lands and 1,000 acres on the upper or Olaa lands, 4,000 acres in all.

The Puna Sugar Company has requested that its first crop be ground at the Olaa mill, and a number of outside landowners are already planting cane to sell to the mill and others intend to do so. It is too early to state what this area will amount to, but I believe that there will be not less than 1,000 acres, or a total first crop of, say, 5,000 acres. (Since the above was written a contract has been closed with the Puna Company for their crop, which is guaranteed to be between 350 and 500 acres.)

ESTIMATED YIELD.

What the yield of the cane will be is, of course, not a matter of exact calculation. The basis for estimate is, first, the opinion of experts, and, second, the appearance of cane now on the ground. The experts who have given an opinion upon this subject are John T. Moir, manager of Onomea Sugar Company; C. M. Walton, manager Pahala plantation; Dr. Walter Maxwell, director of the Planters' Experiment Station, and Dr. E. Hartman, chemist for the Onomea and other plantations.

Mr. Moir, after an exhaustive inspection of the land, reported in writing as follows:

In my estimation these lands will produce from 5 to 6 tons of sugar per acre right along without the least strain. I consider this a very conservative estimate, as I have never seen richer soil anywhere on these islands. * * * In all my experience (which extends over eleven years in the district of Hilo) I have never seen finer soil for raising sugar.

Mr. Walton, in his expert report, states as follows:

For fertility I do not think the equal of this land can be found in Hawaii. * * *

In my opinion these lands should produce a yield of from 5 to 7 tons per acre, which should be kept up for a long time, owing to the great depth and fertility of the soil.

Dr. Maxwell, after making a detailed examination of the land and an analysis of samples from all sections thereof, has made an exceedingly favorable report thereon, dealing with each portion of the plantation in detail. This report has never been printed, and I attach it herewith as a part of my report.

The concluding paragraph of his report is as follows:

Considered as a whole, the proposition of the Olaa Sugar Company, by reason of its magnitude, is very impressive, and the extent of the lands, with the nature of the soils and the apparent fitness of the climate, promises for the enterprise a great future.

Dr. Russell, upon being shown this analysis by Dr. Maxwell, stated to me that he had compared the same with the report (in his possession) of a body of German scientists appointed by the German Government to report on ideal sugar soils, and that their report as to component parts of ideal sugar soils and Dr. Maxwell's analysis of Olaa soils were practically identical.

Dr. E. Hartman, the chemist for the Hilo district plantations, analyzed a sample of 18-months-old Lahaina cane, grown without care or cultivation in Olaa, at an elevation of 1,500 feet. He reported that the analysis showed the cane to be higher in sucrose (cane sugar) and purity than any cane grown on any plantation in Hilo or Hamakua which had come to his attention. The analysis made on a laboratory extraction of juice showed: Sucrose, 17.56 per cent; purity, 94.4 per cent.

His report also states:

The juice extracted from this cane at a nine-roller mill would have approximated the following composition: Sucrose, 19.95 per cent; purity, 95 per cent.

Mr. Hartman has recently visited the plantation and examined a field of 25 acres of 6-months-old Lahaina cane, growing at an elevation of approximately 1,800 feet, and states that the field is as fine a stand of cane as any field of similar age in the Hilo district.

PRESENT CONDITION OF CANE.

Ocular demonstration of what cane will do in Olaa, which has come under my personal observation, is as follows:

Rose bamboo cane, 18 months old, which had neither care nor fertilizer, was recently cut in Olaa at an elevation of 2,000 feet, and stripped 11 to 13 feet.

At Mountain View, 16½ miles from Hilo, at an elevation of 1,520 feet, there is a field of yellow bamboo, planted in April last, which strips an average of 7 feet. The land on which it was planted was not cleared of stumps or plowed, and no fertilizer has been applied. The cane was planted by hand with pickaxes, and has only been hoed twice. It covered the land completely within six months, so that no further weeding was necessary.

There is cane now growing in not less than fifty different localities in Keaau and Olaa, and throughout the cane presents a strong and healthy growth.

Anyone can draw his own conclusions from the foregoing opinions and statements of fact. My opinion is that the company is amply justified in calculating upon a yield of not less than 5 tons of sugar per acre for its first crop. Without making any calculation for outsiders' cane, this would give the company, on a 4,000-acre crop, a full 20,000 tons of sugar.

If the prices of sugar are the same that they were in 1899 this would give to the plantation approximately \$72.50 per ton, or a total gross return of \$1,450,000.

If the price is only \$70 per ton, it will give a gross return of \$1,400,000.

If the yield should be 6 tons to the acre instead of 5 the total yield

would be 24,000 tons, which, at \$72.50 per ton, would give the company \$1,720,000, or at \$70 per ton would return the company \$1,680,000.

LABOR.

The number of people directly employed by the plantation is as follows:

Management and office	1
Overseers	4
Mechanics	8
Teamsters	3
Contract laborers	1,08
Contract Japanese women	6
Free Japanese	10
Chinese	13
Portuguese	2
Hawaiian	2
Other nationalities	2
Total number plantation employees	1,69

The number of mechanics will be materially reduced this month, as building is practically completed.

In addition to this number of employees of the plantation, there are now working on clearing and other contracts for the plantation additional laborers to the number of 815. A large number of these will probably take up independent planting contracts.

COOPERATIVE LABOR.

Up to the present time all of the work has been preliminary, and no arrangements have, therefore, yet been made for a cooperative basis of producing cane.

As soon as the planting of the main crop begins, which will be about the month of March, arrangements will be made by which a large portion of the crop will be cared for by laborers on shares. This system is already in operation on several plantations and works most satisfactorily. I consider it the best solution of the labor problem, and hope and expect at an early date to have a large proportion of the contract laborers working on this share-planting basis instead of on a purely wage basis. This method is particularly satisfactory to the Japanese and will obviate many of the difficulties arising out of the contract labor system by giving the laborer an individual interest in the crop.

GRINDING AND PLANTING SEASON.

The lands of the plantation extend from an elevation of less than 200 feet to over 2,000 feet and cover 15 miles in length. Most of the cane below 1,000 feet elevation flowers, and must be harvested within a few months thereafter or it deteriorates. The cane above 1,000 feet elevation flowers but seldom, takes longer to mature, and can stand longer without deteriorating than cane which has flowered.

This condition is most favorable to economical operation, as grinding can begin on the lower levels, and by working up to the higher levels practically continuous grinding throughout the year can be carried on, while planting goes on under like conditions.

This will materially simplify the labor problem by making all operations continuous instead of requiring all of the cane to be taken off at one time and all of the planting to be done at another. This not only renders labor more economical by systematizing it, but effects a great saving in seed, as the best seed, viz, cane tops, is available for planting, thereby securing better original growth and saving the expense of replanting. Moreover, the entire cost of seed, except cutting, is saved, as the cane tops are valueless for sugar purposes.

LOCAL PLANTATION TRANSPORTATION.

The main item of transportation on the plantation is that of cane to the mill. There will also be a large amount of transportation on this plantation for several years to come in getting the firewood off the fields. Transportation of fertilizer to the fields and supplies to the camps also requires consideration, but is less important.

The intention is to make flumes and water the main method of transporting cane to the mill and wood to the railroad.

The mill location is about a half mile below the government road to Puna, opposite the 9-mile post from Hilo, at a point low enough down so that the cane can be flumed thereto from all parts of the plantation except from about 1,000 acres lying at the extreme lowest point. To reach this land lying below the mill, and also to provide a safeguard against any possible shortage of water, about $2\frac{1}{4}$ miles of railroad track will be laid in four different directions, with the mill as a focusing point. This will enable the mill to keep running even in case of temporary shortage of water for fluming.

Later on it will probably prove advisable to extend branches of the railroad farther up through the plantation fields for the purpose of carrying fertilizer and supplies. This will not be needed this year, however, and can be left as a matter for future consideration.

The rails, portable track, and locomotive for the above railroad plant have been ordered. The ties will be cut on the plantation. The standard broad gauge, 4 feet $8\frac{1}{2}$ inches, has been adopted, that being the gauge of the Hilo railroad.

WATER SUPPLY.

The question of water supply for fluming, mill, and domestic purposes has been one which has received much attention. Three sources of water supply have been considered:

First. Tunneling at various points, four prospecting tunnels having been run, varying in length from 75 to 120 feet. No water has been obtained from this source.

Second. Concentrating and storing a number of small streams of water at the upper end of the plantation.

There is a limited area at the upper end of the plantation which has a substratum of clay which makes perfect reservoirs. During all weathers much additional water can be obtained on this land by cutting drains. During ordinary rainy weather there are many streams running through it and disappearing when more porous land is reached, while the flow is enormous during the frequent heavy rains. The clay bottom spoken of is from 4 to $7\frac{1}{2}$ feet deep and rests upon a bed of

smooth Pahoehoe rock. This formation lends it to cheap construction of reservoirs. Trenches have a central point and the sides lined with clay to prevent leakage. Cuts in the walls on the upper and lower sides are made with which the entire interior of the reservoir is lined at small expense.

There have been completed to date four reservoirs of 9,500,000 gallons. It is planned to extend the system at an early date to a capacity of 50,000,000 gallons.

Third. A piece of land containing about 3,000 acres from the Lyman estate for a term of forty years at \$100 per annum. The land lies a short distance beyond the Mauna Kea, and is distant about 11 miles from the city of Honolulu. The value of the land consists in the fact that a very large extent rises and disappears underground during a lava flow of 1855. Part of the water from this source is controlled by the Hilo Sugar Company. A dispute has been arrived at between the two companies as to whether the company develops all of the water on both sides of the divide. The company takes out at a given point its division of water from this source has not yet been fully determined, and underground courses having recently been discovered.

Although the present is the driest season with respect to Hilo and Olaa for many years, there is now a surplus of water, at an elevation between 1,800 and 2,000 feet, 5,000,000 gallons per twenty-four hours. The total flow is upward of 12,000,000 gallons. This surplus of water on Olaa proper lands, will be more than amply sufficient for the transportation and other water necessities.

A flume about 9 miles long will deliver the water to the city, at which point it will be divided into branches and diverted to the lower reservoirs.

I feel certain that so far as the water problem is concerned, regards transportation, domestic, and mill use, the system described will furnish an ample supply at most times.

PRESENT SHORTAGE OF WATER

Until water is laid onto the various camps and sources above enumerated rainfall is the only source of water. It is caught in tanks from the various roofs. The fall during the last three months, together with the increase of both men and animals, has prevented a supply ahead, the tanks never yet having been refilled. The consequence has been that considerable hauling of water has been necessary. This condition, however, is but temporary and will occur again.

There has been no deficiency of water so far as the city is concerned. The dry weather has, moreover, been of great clearing, enabling a rapidity and thoroughness in the work have been accomplished in ordinary weather.

Kilbuck Plant

smooth Pahoe-hoe rock. This formation lends itself peculiarly to the cheap construction of reservoirs. Trenches have been cut around a central point and the sides lined with clay to a depth of 7 or 8 feet. Cuts in the walls on the upper and lower sides admit and release water with which the entire interior of the reservoir site is sluiced out at small expense.

There have been completed to date four reservoirs, with a capacity of 9,500,000 gallons. It is planned to extend this series of reservoirs at an early date to a capacity of 50,000,000 gallons.

Third. A piece of land containing about 3,000 acres has been leased from the Lyman estate for a term of forty years, at a rental of \$1,000 per annum. The land lies a short distance beyond and north of Wai-akea, and is distant about 11 miles from the center of the Olaa plantation. The value of the land consists in the water upon it, which to a very large extent rises and disappears underground in tunnels of the lava flow of 1855. Part of the water from this source flows upon land controlled by the Hilo Sugar Company. A satisfactory arrangement has been arrived at between the two companies by which the Olaa company develops all of the water on both of the lands and the Hilo company takes out at a given point its division of the water. The water from this source has not yet been fully developed, new springs and underground courses having recently been found not heretofore known.

Although the present is the driest season which has been known in Hilo and Olaa for many years, there is now in sight on the Lyman land, at an elevation between 1,800 and 2,000 feet, a flow of about 5,000,000 gallons per twenty-four hours. In ordinary weather this flow is upward of 12,000,000 gallons. This supply, with that on the Olaa proper lands, will be more than amply sufficient to supply all the transportation and other water necessities of this plantation.

A flume about 9 miles long will deliver the water onto the plantation, at which point it will be divided into branch flumes and a portion diverted to the lower reservoirs.

I feel certain that so far as the water problem is concerned, both as regards transportation, domestic, and mill use, the sources above described will furnish an ample supply at most economical cost.

PRESENT SHORTAGE OF WATER.

Until water is laid onto the various camps and stables from the sources above enumerated rainfall is the only source of supply. This is caught in tanks from the various roofs. The lightness of the rainfall during the last three months, together with the large and sudden increase of both men and animals, has prevented the accumulation of a supply ahead, the tanks never yet having been filled. The consequence has been that considerable hauling of water has been necessary. This condition, however, is but temporary and is not likely to ever occur again.

There has been no deficiency of water so far as the growth of cane is concerned. The dry weather has, moreover, been invaluable to us in clearing, enabling a rapidity and thoroughness far beyond what could have been accomplished in ordinary weather.

MILL.

The Kihei Plantation Company, having made a contract with the Hawaiian Commercial and Sugar Company to grind its crop, the Olaa Sugar Company took over the mill contract which had been entered into between the Kihei Company and the Honolulu Iron Works.

The Kihei mill has been designed for a capacity of 125 tons per day. We have estimated that it will require a capacity of 170 tons of sugar per day in order to take off our first crop, and that it will eventually be necessary to have a capacity of 350 tons per day.

The additional present capacity has been provided for, so that the mill now being constructed will take off 170 tons of sugar per day. This is about the maximum capacity of one 9-roller mill.

In order to increase the capacity hereafter a second 9-roller mill will have to be added.

The building is being constructed so that it will accommodate the machinery necessary for a capacity of 350 tons of sugar per day, but machinery for the smaller capacity only will be now installed.

A large portion of the machinery for the mill will be ready for delivery in the United States in April next, and the entire building will be delivered in New York upon the 1st of July. All this material will be delivered here during the next summer and fall, so that the erection of the mill and machinery should be under way by January next.

The obtaining of the Kihei contract is doubly valuable to this plantation, as not only is the price lower than it would otherwise have been by reason of the recent rise in prices, but the securing of the mill at so early a period should prevent the so frequent loss on new plantations of waiting for the mill. In this case the mill should be ready some time before the crop requires to be cut.

ROADS.

It is necessary to have road communication through the fields even when full railroad transportation is provided. For the purpose of hauling in seed and ease of communication through the fields, I have had constructed about 11 miles of macadamized road. About 2 miles have been constructed by the plantation laborers and the balance by contract. These roads are mostly in the lower fields, where loose surface rock is available, and which if it had not been put into the roads would have been picked up anyhow and placed in piles throughout the fields.

The cost of the roads has heretofore been very little more than the simple clearing of the land from loose rock would have cost. I am thoroughly satisfied that the extra expense of putting the stone into roads instead of into piles will far more than pay for itself on the first planting, and, further, that the rapid planting required for getting in the required area could not have been accomplished without them.

HEALTH.

A usual accompaniment of opening up new ground on new plantations has been an outbreak of typhoid and malarial fevers among the employees. This plantation has been unusually fortunate in this respect, as but comparatively little sickness has been experienced.

Owing to the isolation of this district, we have erected a hospital of our own and have had the services of a first-class physician, Dr. N. Russel.

F. B. MCSTOCKER,
Manager Olaa Sugar Company, Limited.

REPORT OF DR. WALTER MAXWELL ON SOILS OF OLAA PLANTATION COMPANY.

The lands embraced by the Olaa Plantation Company are found in two separate and large sections, viz, "Keaau" and "Olaa."

(a) *Keaau*.—The lands of this section, due to the differences in the soils, have to be considered in two or three classes:

(1) *Reddish soils free from stone*.—These soils are located at an elevation of 200 feet and upward. These lands embrace about 400 acres, much of which is covered with rich, heavy growths of guava, ferns, etc., but few trees. As indicated, the soils are reddish in color of good depth, and resting upon a deep subsoil free from stone.

The chemical composition shown is as follows:

	Per cent
Soluble matter	80.7
Organic matter	28.7
Lime1
Potash2
Phosphoric acid3
Nitrogen6

These data will be considered in later remarks.

(2) *"AA" soils*.—The lands of this tract, like those of the former tract, are fine breadths of undulating ground, free from gulches, but in parts somewhat stony. A rich growth of vegetation covers almost the whole of it. The soils are a vegetable mold to a depth of from 12 to 20 inches, and this rests upon an open "aa" subsoil of good depth and porousness. These lands and soil closely resemble those of the Waiakea plantation. In small patches upon this tract of "aa" soils, which comprises over 2,000 acres, pahoe-hoe soils are found. These patches, however, comprise only a few acres of the tract.

The analysis of the respective soils are as follows:

	Soluble matter.	Organic matter.	Lime.	Potash.	Phosphoric acid.	Nitrogen
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
"AA" soils	70.87	25.29	0.655	0.507	0.570	0.6
"Pahoe-hoe"	74.98	32.40	.538	.538	.281	

(b) *Olaa section*.—This section covers such an extensive area that, at first view, it appears impracticable to consider it as a whole. The superficial survey of the lands, with a very careful examination of the character and depths of the soil in the several widely distributed localities, showed, however, that practically only one character of soil was to be dealt with, and this fact caused the examinations and soil analysis to be based chiefly upon the fact of altitude.

(1) *Lower altitudes*.—This division was represented in the examinations by the lands surrounding the "Halfway House," the samples of soil being taken from the tracts owned by Peter Lee and others at about 1,000 to 1,100 feet.

These lands are composed of fine, level breadths, covered with rich vegetation, chiefly of undergrowth. The soils are deep and porous, and overlie very porous subsoils. The analysis gives as follows:

	Per cent.
soluble matter	81.59
organic matter	29.41
lime271
potash272
phosphoric acid248
nitrogen724

(2) *Middle altitudes*.—The lands included within this division comprise the areas reaching from 1,300 to 1,800 feet, with "Mountain View" (1,500 feet) as the center. Most of these lands are spread out in every level breadths hundreds of acres in size. Excepting very small patches, such as are found about 1 mile up the so-called "New Road" (1,400 feet elevation), are areas free from rock but covered with a densely rich growth of timber and underbrush. The soils are very deep and unusually porous to a depth of several feet. The analysis of the soils in this division gave an average as follows:

	Per cent.
soluble matter	73.68
organic matter	26.38
lime700
potash340
phosphoric acid217
nitrogen646

(3) *Higher altitudes*.—The areas at these highest elevations, ranging from 1,800 to 2,200 feet above sea level comprise lands in every nature similar to those of the middle altitudes. With the exception of some limited portions, the same deep, porous soils are found, overlying very open subsoils. The uncleared areas are covered with dense vegetation, the joint product of a rich soil and heavy rainfall.

The soil analysis gave as follows:

	Per cent.
soluble matter	65.06
organic matter	19.85
lime	1.410
potash454
phosphoric acid204
nitrogen532

REMARKS.

In the Keaau section three types of soil have been examined:

(a) The "reddish" soils, although of good depth, are not high in the elements of plant food excepting nitrogen. The phosphoric acid is good, but the potash, and more especially the lime, is low.

(b) The "aa" and "pahoe-hoe" soils, which compose the chief areas of this section, are high in lime, potash, and nitrogen, and moderately good in phosphoric acid. These soils are of high fertility, and this will be durable on account of the amounts of the elements contained in the small stones in the "aa" soils, which will gradually be released and made available for the growing crops.

The Olaa section, as already remarked, comprises large areas of level, fine-lying lands, and whose soils are of great depth and porousness. This porousness is a guaranty of perfect drainage; but it is also a factor which will cause to be required a most judicious and scientific system of fertilization in order to avoid loss of applied fertilizers and to maintain fertility. So far, the leaching action of heavy rains has been retarded by the heavy undergrowths and the large content of humus and organic matter in the surface soil.

In the soils of the "lower altitudes" the lime, potash, and phosphoric acid contents are moderately good, while the nitrogen is high.

The soils of the middle altitudes are high in lime, good in potash, moderate in phosphoric acid, and high in nitrogen.

The higher altitude soils are very high in lime, high in potash, moderate in phosphoric acid, and high in nitrogen.

Considering the high contents of organic matter in these soils, due to large rainfall, it was expected that they would be very sour. The samples have an acid reaction, and the application of a small dose of burnt lime will be of immediate use. The soils, however, are not sour soils (excepting small wet holes, where excess of organic matter has rotted), and this freedom from sourness is due to the high content of lime and to the excellent drainage.

In considering climatic conditions, the chief factor in the present case is temperature, since the rainfall is, and apparently always will be, abundant. The Mauna coffee plantation (Mr. Peck) furnished the maximum and minimum readings for the years 1896, 1897, 1898, and part of 1899, at the elevation of 1,900 to 2,000 feet. The results are found as follows:

Average night temperature for three years	6
Average day temperature for three years	8
Mean temperature for the three years	7
Annual mean temperature in Honolulu	7

The lowest night temperature recorded in the said Olaa locality during the three years was 6° above the lowest temperature recorded in Honolulu. The present special characteristic of the temperature in the Olaa district is its uniformity. The removal of forest on a large scale may result in decreasing the day temperatures and slightly lowering the night readings.

The relation of the soil to the variations in the air temperature is an important factor. During the night of May 15, when these examinations were being made, a thermometer was buried in the soil to a depth of 6 inches. The previous day temperature was 78°. The night was very cool, the air falling to 58°, but the thermometer in the soil at 7 inches did not fall below 69°. Soils of a different nature would have given up their heat to a greater degree to the cool night air. It is thus indicated that the uniformity of the air temperatures, with the moist heat of the days and the power of the soil to retain heat, will be ample guaranty of the fitness of the conditions for cane culture, which fitness is supported by the cane in different localities now growing. Yet it will probably be found that the cane at the highest altitudes will require more time to mature than at lower levels.

Considered as a whole, the proposition of the Olaa Sugar Company by reason of its magnitude, is very impressive, and the extent of the lands, with the nature of the soils and the apparent fitness of the climate, promise for the enterprise a great future.

WALTER MAXWELL

FIRE CLAIMS EXAMINED.

[Copies of eleven different claims filed with the fire claims commission, together with the testimony taken before said fire claims commission in support thereof, and also showing the award in each claim.]

EXHIBIT No. —.**CLAIM OF S. SHIMAMOTO, NO. 1.**

Fire claims commission, Territory of Hawaii. Claim of S. Shimamoto, No. 1.

This claim was called for hearing on this the 31st day of May, A. D. 1901, before the fire claims commission, and the following proceedings were had:

The following counsel appearing:

Messrs. Andrews, Peters, and Andrada for the Territory of Hawaii; F. M. Brooks, esq., and Messrs. Kinney, Ballou, and McClanahan for the claimant.

Commissioners all present.

C. F. Reynolds, official reporter.

Mr. MACFARLANE. This commission is now convened for the purpose of hearing the various claims, and we are now ready to hear the evidence that is to be offered on the first claim, claim No. 1.

Mr. ANDREWS. I wish to state on behalf of the government and at the request of the attorney-general our firm will for the present represent the government, and I ask the names of Andrews, Peters & Andrada be entered of record as appearing for the government.

I should like very much for the commissioners to fix the rules governing the claims, and to have the rules discussed, so as to see if we have any objections to them.

Mr. MACFARLANE. The commissioners will make such rules as it finds necessary. We have adopted rules, we think, that are fair. Have you got a copy of them? If any additional rules are to be made or discussed, or an amendment to be made, that is with the chairman. Whenever it is found necessary to amend these rules it will be done, but the commission will go on with the rules as printed.

Mr. KANE. I would like to know if these rules have been published according to law?

Mr. MACFARLANE. These rules governing this commission have nothing to do with the law; the commission make their own rules and they have been printed, and you have a copy of the printed rules. If later on we want to correct, we will do so. Now we wish to proceed as fast as possible with the consideration of these claims. I would ask the attorneys for claimants, and claimants themselves, to expedite matters as much as possible; the commission will listen to all the evidence. It will not be necessary to look up points of law or anything of that sort, and I ask those that are to come before the commission to assist the commission as much as possible to expedite matters, so that we can get through. So you will proceed with claim No. 1.

Mr. BALLOU. We will ask that Mr. C. Shiazawa, who has had the personal charge of these claims and has assisted me on behalf of all

the Japanese claimants, that he act as interpreter for the first claim, the claim of Mr. Shimamoto, that has been in the hands of Mr. Brooks from the start, that has not gone through our committee, and, therefore, Mr. Schizawa has had nothing, almost nothing, to do with it.

Mr. BROOKS. I wish to make a very brief statement in regard to this matter.

Mr. MACFARLANE. I would say on behalf of the Japanese interpreter the regular interpreter appointed by the court is not here this morning, and Mr. Shiazawa will act for him and is acting for the commission.

Mr. BROOKS. The destruction of this building, the building where this merchandise was stored, 326 Nuuanu street, although a part of the fire took place on the 31st of December—that is, the board of health was engaged in burning the streets—that is, the fire was in the adjoining building, and for some reason or other the roof of this warehouse was burned and in such a way as to destroy this building and destroy the contents.

S. ANNO, called for the claimant, sworn.

Mr. BROOKS. What is your occupation?

A. Shipping clerk.

Q. For whom are you employed?—A. Macfarlane & Co.

Q. How long have you been employed there?—A. Eight years.

Q. Were you so employed there on or about the 31st of December 1899?—A. 1899; yes, sir.

Q. You may state whether or not you know the firm of S. Shimamoto.—A. Yes, sir.

Q. State whether or not you were in anywise connected with the firm in any way during 1899.—A. No, sir.

Q. You have no interest in this claim one way or the other, have you?—A. No, sir.

Q. You may state whether or not you know where Mr. Shimamoto's warehouse was on Nuuanu street at the time.—A. Between Bertainia and hotel. At the request of the board of health I went up to take an inventory of the goods represented by the firm of Shimamoto. I went there and they showed me the inventory—their inventory—as they said it would be convenient to compare it with ours. There was very little dispute as to the amount of goods being there. There was also an appraiser from the custom-house, Mr. Weeden, who appraised the goods, and his appraisal compared with ours—very little dispute as to the amount of goods being there. I want to state that from the beginning, that at the time of this fire, Mr. Cooper would be responsible for the work about this matter, would be responsible for it, and he asked us to make out the bill and send it in. Shortly after that the big fire occurred, and then there was nothing done toward adjusting this loss, so that this bill was made up and, I believe, settled on these different articles. It was not exactly the cost price; there was a little profit added to it, and that is the same bill that has been filed here, since that time and later on reported to this commission.

Mr. BROOKS. We want simply a just and fair price; in other words we want the cost price according to the way it is expressed in the law. I desire to say the difference between the bill as filed, the difference

we shall claim a reduction of about 10 per cent, so don't claim within 10 per cent of what we asked for in this particular case.

Q. (To the witness.) Near Chaplin lane?—A. Yes, sir.

Q. How many rooms?—A. One room.

Q. How many stores?—A. Two stores.

Q. Any cellar?—A. One cellar.

Q. (Here the witness is shown a paper.) You may state what that paper is, if you know.—A. Yes, sir; that is a copy of the inventory that I took.

Q. Now, you speak of taking an inventory, describe how you come to take the inventory.—A. Well, when the board of health sent an officer down to take the inventory, nobody would for Mr. Shimamoto, and Mr. Shimamoto asked me to go and take his salesman and to take an inventory. I went, took the man, and took the inventory.

Q. You stated that there was a board of health agent told you?—A. Yes, sir.

Q. Who was that, do you know?—A. Max Berger.

Q. He was deputy sheriff here?—A. He is deputy sheriff in Hanalai now.

Q. He was representing the board of health at that time?—A. Yes, sir.

Q. Did he take the inventory with you?—A. Yes, sir.

Q. How did your inventory commence—the inventory that you took?—A. He took the inventory, the man called out the number of packages and we put it all down (the number) and we counted them all.

Q. Now, you may state whether or not the inventory that you took is the same inventory as is filed herein. Have you seen the inventory in this case—the one on file? You may state whether or not this inventory is the same as this one here.—A. Yes, sir; I know that is; yes, sir.

Q. It is the same?—A. Yes, sir.

Q. Now, what was done, if you know, with this merchandise?—A. Well, this merchandise not burned up by the fire—it is all damaged.

Q. How was it damaged?—A. By water.

Q. What was done with this merchandise?—A. All of it was spoiled.

Q. Do you know what they did with it?

COMMISSIONER. This merchandise that was damaged by water, was that the merchandise that the inventory was taken of?

A. Yes, sir.

Mr. BROOKS. When was the inventory taken; before or after the fire?

A. After.

Q. How many days after?—A. About two days.

Q. You spoke about it being destroyed. What do you mean? What was this fire? How was it destroyed by water?—A. It was the fire department work—the fire engine on the roof of the warehouse.

Q. What was the fire department doing?—A. Trying to save the warehouse.

Q. What were they doing at the time; what was the fire department engaged in doing? (To counsel.) I suppose it will be admitted they were engaged in saving the warehouse, and that this house was right next to the warehouse?

Mr. ANDREWS. I suppose we will have the privilege of cross-examining the witness?

The COMMISSIONER. Yes, sir.

Mr. ANDREWS. We will admit that the fire department was trying to suppress a fire on the block. I think you ought to prove the fire in the surrounding neighborhood.

Mr. BROOKS (to the witness). Where was this fire relative to this warehouse?

A. Next to the warehouse.

Q. You may state whether this merchandise was a total loss.—A. Yes, sir; we had to leave it out there, and then the board of health sent down an old wagon and took it away.

Q. What did they do with it?—A. I don't know; I guess they threw it away.

Q. You say that you took this inventory after the fire and after the goods were damaged?—A. Yes, sir.

Q. You must have known where the goods were.—A. I took the inventory after the fire.

Q. Where was the place?—A. At the warehouse of S. Shimamoto located right behind Mr. Damon—

Q. Well, you were asked where the goods went to.

A COMMISSIONER. And as he took the inventory, and took it after the fire, he must surely have taken it where the goods went?

Mr. BROOKS. He said they went to this certain warehouse. The warehouse was full of merchandise, and the board of health wanted to make some compensation, so they were ordering you, together with this man, to take an inventory there of the merchandise that was not burnt, and it was arranged that the board of health had to take it there, as it was damaged by water, and before doing so they directed an inventory to be taken of the stuff?

A. Yes, sir; and then they took the stuff out and threw it away.

A COMMISSIONER. When was that appraisement, or the value of the items, fixed to that inventory?

Mr. BROOKS. I am not trying to prove the value; the merchandise was there.

A COMMISSIONER. Was the value put there when you took the inventory of the goods; was the value put there?

A. No, sir; I only took the inventory.

Q. No price?—A. No price.

Mr. BROOKS. Afterwards did you have anything to do with the fixing of the price that was put opposite here?

A. No, sir.

Q. Who put that on there, if you know?—A. I believe the bookkeeper of Mr. Shimamoto.

Cross-examination:

Mr. ANDRADA. Was any part of that building on fire; was the warehouse on fire?

A. Only the roof.

Q. Was there any part of that merchandise in that warehouse destroyed by fire?—A. No, sir.

Q. The inventory was taken after the damage was done by water?—A. Yes, sir.

Q. And who represented the government when you took the inventory?—A. Mr. Max Berger.

Q. And he took an inventory identical with yours; and did the board of health decide that the goods had been damaged to such an extent that they could not get anything for them; is that the idea

A. Not anything there; I only just put—just counted the number of packages and put down the number of packages, and after they counted it again—

Q. What is that?—A. We counted the number of packages of Japanese and Chinese goods.

Q. And then where was this merchandise taken to?—A. I don't know where the board of health took it to; I was careful to hand over the goods to the board of health.

Q. Now, there were a certain number of those goods that were not ruined by water, wasn't there?—A. Everything.

Q. Wasn't there any merchandise that might have been in barrels or cans, and so preserved that the water could not affect it?—A. The bricks on the roof just came falling down, and certain things were damaged, and everything was of no value at all.

Q. Wasn't there some of that merchandise that was not damaged by that water?—A. All damaged; we could not take out anything in consequence.

Q. Wasn't there any of that merchandise in barrels or cans?—A. Yes, sir; but it was all damaged.

Q. If it was in barrels or cans, how could it have been damaged very well, unless there was a great deal of heat?—A. Well, we took the numbers of the packages, and we put them in the hands of the board of health.

Q. I want to get at this. Did you take an inventory of all the merchandise that was damaged, or did you take an inventory of all the merchandise that was in there?—A. I took an inventory of all the goods that were in that warehouse.

Q. And all the goods you handled were damaged?—A. I took an inventory of all the goods that were in the warehouse.

Q. (To Mr. Brooks.) You gentlemen mean to have the proof of the loss of this merchandise?

Mr. BROOKS. I shall.

Q. (To the witness.) You may state whether or not all the merchandise that you took an inventory of was a total loss.—A. Well, I took an inventory of all the goods in that warehouse.

Q. What was done with the goods after you took the inventory?—A. I handed the goods over to the board of health.

Q. What did the board of health do with them?—A. Took them all away in their own wagon.

Q. Don't you know they took them away and dumped them into the water?—A. I don't know where they took them.

A COMMISSIONER. You say that you took an inventory of everything in that warehouse after the engines got through—after the fire?

A. Yes, sir.

Q. After the fire you took the inventory?—A. Yes, sir.

Q. Was there any can goods or barrel goods; were the tins mutilated; were there any tins that came out whole?—A. Green corn and tomatoes and sardines.

Q. Were they mutilated or did they come out intact; was there anything of that character in the stock; were there any can goods in the stock?—A. Yes, sir.

Q. Were the labels on them; were the tins intact, or didn't the tins have the labels on them or off?—A. Some cases smashed and some in good condition.

Q. Were the barrels broken or still intact?—A. There were not so many barrels.

A COMMISSIONER. Now, the first item here is 924 tubs of shoyu.

A. Yes, sir.

Q. Was that in tubs?—A. Yes, sir.

Q. Is this what you mean—that the water went all over the tubs? Did that ruin the contents, could you say from your own knowledge?

A. From my own knowledge. The most of the goods were damaged in these packages. I saw strong packages. Of course some of the goods were in good condition, but the most of the goods were open, broken and bent.

Q. I will ask you another question. Were all of these tubs—were any of those tubs broken?—A. Some of them.

Q. Others were not?—A. Yes, sir.

Mr. BROOKS. If the court is going into the question whether the board of health had a right to do this or not, I want to prove that they did do it.

R. SEJI called and sworn for the claimant and examined through an interpreter.

Mr. BALLOU. Do you know the firm of S. Shimamoto?

A. Yes, sir.

Q. Are you employed by that firm?—A. Yes, sir.

Q. In what capacity?—A. Manager.

Mr. BROOKS. How long have you been manager?

A. Five years.

Q. Were you manager for him on the 31st of December, 1899?

A. Yes, sir.

Mr. BROOKS. If there is no objection, I would like to put Mr. Weed on the stand in the place of this witness, so that he can go.

The COMMISSIONER. Very well, if there is no objection.

RICHARD WEEDEN, called for the claimant, sworn.

Mr. BROOKS. What is your occupation? What was your occupation about the 31st of December, 1899?

A. Appraiser at the custom-house.

Q. Where were you employed—at the custom-house?—A. Yes.

Q. Have you any interest in the claim of S. Shimamoto?—A. None in the least.

Q. Did you have anything to do with the appraisement of the store of the merchandise of his on Nuuanu street?—A. I did.

Q. Kindly state what you did.—A. I was there two days.

Q. Who asked you to go there?—A. I was ordered by the collector. I believe, to go there and see, and they showed me the claim, and was ordered to go and make an estimate of the claim. I was there for about two days making my estimate, and after that I was told that it was handed over to some one else; that my time was more important at the custom-house, and that I couldn't be spared from there so long.

Q. How was the warehouse; was there much merchandise there?

A. Well, it was full. Of course, I went there to see what was injured. I should judge that there was eight or ten thousand dollars injured there—what I took. I can't tell the amount that I did take in all, but it was in very bad condition.

Q. When was this—after the fire or before the fire?—A. After the fire: I had no reason to go there before the fire.

Q. Now, what was this that was destroyed?—A. The most of the property that was destroyed, a considerable of it that was destroyed, was fish, and it was putrefied, and they dumped it in the river. Mr. Towse was there at the time, and Mr. King; he had the order to destroy them.

Q. At that time the board of health thought there was plague?—A. The whole of it was in very bad condition; it was unfit for anything; we opened some of the tins; the most of them were broken off of the edge. A young man that was there for Hackfield & Co. opened some of the goods to be sure to see if there was any of it that was any good, and it was all fermented.

Mr. ANDRADA. I would like to ask the commissioners if the rules of the common law in regard to the admissibility of evidence—I would like to know if you are going to admit hearsay evidence. It is a matter of information for myself.

Mr. BALLOU. Before the commission answer that I would like to state our idea on that subject. There are matters even at common law, there are many exceptions to the hearsay rule arising out of the interest in the case. I would certainly suggest that a good working rule for this committee to adopt would be, in all matters of this kind, to make this public. I would also suggest at this point, if we were going before a jury in a law case we should have every possible thing cleared up—

A COMMISSIONER. There are a great many things coming before this commission with a lack of direct proof on both sides, but I think it can be fairly left to the commission to weed out such evidence as this, and leaving to their senses the returning of an honest decision for both parties concerned. We are here to protect the interest of all concerned, the government as well as the claimant, and it will be the duty of the commissioners to take into consideration the evidence, whether it is direct or whatever it is, and weigh it well, and try to be fair to all concerned. I think it is the duty of the claimant to present all the proof that he can when he is presenting his claim.

Q. (To the witness.) As an appraiser you went up to that house; what did you do when you got there?—A. To look at the things there.

Q. Did you take an inventory?—A. Yes, sir.

Q. What became of that?—A. I think I gave it to the Hackfield man.

Q. Did you have it with you at the time you were taking the inventory?—A. I gave it to the man that succeeded me. I didn't finish it.

Q. What was his name?—A. It was a Hackfield man—Mr. Humburg, I think. It was intended that I should finish it right through, but we were so busy at the custom-house the collector directed me back to my work, and I left it. I had a gentleman with me.

Q. Did you appraise the goods?—A. Yes, sir; I put my valuation; the same kind of goods as this. I can't swear that is the exact type-writing. There is vinegar and matches and fish. I went down in the cellar—

Q. How much of that stock did you go over; half of it?—A. Well, over half of it. I looked casually at the rice that was there and it seemed to me very badly damaged. The water had come right through the ceiling right down in the cellar, and that opened the tins which we supposed would be in good condition, with the heat.

Q. Now, with regard to these tubs of liquid, the first item; you say that was in such a condition that the board of health thought it was necessary to throw right in the sea?—A. Yes, sir.

Q. Was the condition of that liquid brought about by the fire of water?—A. I can't say.

Q. You can't say whether it was the fire that caused that to be in that condition, or whether it was from the fact of being there so long fermented?—A. That I can't positively say, the cause; it was after had all been wet with water; when we opened some of the cases it was fermented and of no use, and it couldn't possibly be used.

Q. Would water put into this tub make it ferment?—A. Well, I don't know whether the water inside, cold water or hot water, would.

Q. Were all of these tubs that you overhauled hot or cold?—A. They were cold at the time.

Cross-examination:

Mr. ANDRADA. Wasn't there a good deal of this stuff in the tubs and barrels?

A. There was a considerable in tubs. I think we calculated what was in tubs and what was not.

Q. Wasn't a good deal of this merchandise in tins—tin containers—preserves? Was that damaged by fire or water?—A. It may be by the fire.

Q. What was the cause of the damage?—A. The kegs were swollen out and many of them burst open.

Q. What was the final determination of the board of health with respect to that merchandise?—A. To destroy it.

Q. Do you know whether it was destroyed?—A. No, sir; I do not.

Q. Do you know that it was taken away from the building?—A. Yes, sir; I know it was taken off; removed away.

Q. By whom?—A. By order of the board of health.

A COMMISSIONER. Did you state who sent you up there?

A. Yes, sir.

Q. Who sent you up there?—A. The collector of customs.

Mr. ANDRADA. Did you go there as an appraiser for the board of health?

A. No, sir; I went up by orders of the collector of customs. I do not know whether it was for the board of health or who it was for.

Q. But the custom-house didn't have anything to do with it?—A. I got my orders from the custom-house; I don't know on what charge but they gave me the orders, the board of health did not; the collector of customs told me to go up there and look over these goods, and I went up there.

Q. And all that you know about this whole thing is that you prepared and made that inventory?—A. Yes, sir.

R. SEGI recalled for claimant.

Mr. BROOKS. You were manager for Mr. Shimamoto on December 18 in December, 1899?—A. Yes, sir.

Q. Now, you know of course where his warehouse is. You may state what was the condition of that warehouse in regard to having merchandise; was it full or half full or what?—A. It was full of that merchandise.

Q. How does it happen that particular time of the year; or does it happen at that particular time of the year that you had a large amount of merchandise on hand; and if so, why?—A. Because there were several steamers arrived from Japan at that time, the regular steamers, so we got a lot of goods from Japan.

Q. What was the condition of the goods about that time? Did I understand that you were away at the time of the fire?—A. I wasn't here.

Q. Where were you?—A. I was on the island of Kauai.

Q. When did you go to Kauai?—A. Before the 31st of December. I left here on the 24th.

Q. That is one week before?—A. Yes, sir.

Q. Now, what was the condition of that merchandise, if you know? Was it in good condition or bad condition when you left here?—A. In good condition; all new goods.

Q. Now, you have been manager for five years. You may state whether you were familiar with that kind of merchandise that was in the warehouse.—A. Yes, sir; very familiar.

Q. You may state whether you were familiar with this inventory. Do you know the contents of it?

A COMMISSIONER. Can you read that thing over?

A. Yes, sir; I can read it.

Mr. BROOKS. Well, now, from your knowledge of that inventory, you may state what the prices are as compared to the prices shown there. What was the market value at that time of that merchandise as compared with the list there?

A. That compared with the other prices a little lower—this shows a little lower price.

Q. Now, you may state what the cost price of that merchandise was at that time as compared with this list.—A. There is 10 per cent difference between cost and that price.

Q. Then the price set forth in this inventory, the cost price, is 10 per cent less than the price set forth in this inventory, the actual cost price?—A. Yes, sir.

Cross-examination:

Mr. ANDRADA. Now, you have been manager, and you are familiar with the price of these different articles?

A. Yes, sir.

Q. What was Hawaiian coffee worth per bag at that time, the market price?—A. About \$13, the market price.

A COMMISSIONER. Nine hundred and twenty-four tubs of Shoyu. When was that Shoyu received? When did that come into your warehouse?

A. I can't tell you. There was a few left there before, but most all in the warehouse came there in October, November, or December of the same year.

Q. Were you there when Mr. Weeden and the other parties came? Did you have anything to do with the making of that inventory—fixing the price?—A. No, sir; I was absent; the bookkeeper done it.

Q. The bookkeeper did this particular inventory now in court?—A. Yes, sir; the bookkeeper have done it.

Q. Now, as the manager of Shimamoto, do you know that an inventory was taken by the appraiser sent up there by the custom-house?—

A. I was not there at the time that the appraiser came around; when I returned back from the islands, the 5th of the month, it was valued by my bookkeeper with the appraiser; he had been over the valuation made by the appraiser.

Q. Did Shimamoto—you as manager of Shimamoto—keep an appraisement?—A. No; I was told by the bookkeeper that the bookkeeper made the valuation, made the inventory, and by that inventor the appraiser went over the goods.

Q. Do I understand that you got—that the bookkeeper got—a copy of that inventory from the appraiser?—A. No, sir.

Q. When did that 472 cases of Somen, at \$4.40—when did that come in there?—A. Just about the time that it was taken in those three months, October, November, or December, and some was left before.

Q. Don't you know how much was left before?—A. I can't tell you about 20 or 30 cases.

Q. Does Shimamoto import himself—was that imported from an firm?—A. Yes, sir; imported directly.

MR. MACFARLANE. The question of certified copies to corroborate the statements of the claimants, copies of the invoice when the import direct, and the bills when they buy from the various houses in town; it is the idea of the commission to get all of this out, and get as complete as possible, and by and by we will ask for certain things in certain cases; we will ask for certain things to be produced before the commission and form a part of the claim. (To the witness.) I would ask you if you have the custom-house invoice for these importations in this liquor?

A. There is no liquor in that paper.

Q. Those items that I speak of—Shoyu? You had some invoices.

A. Some of them lost and gone.

Q. Where are the others?—A. At the time of the fire the merchandise was all taken out of the front—the main store. There was cases, tins, boxes, and bags of coffee; everything was carried out safe to several parties, and after the thing was over some of these boxes were broken into, and in that way some was lost entirely. He has got a few of them.

MR. BROOKS. Was there any insurance on this?

A. No insurance.

A COMMISSIONER. There is one item, 1,000 pieces of kanten, \$10.

A. That is provision—Japanese provision.

Q. Made from dried vegetables?—A. No, sir; in cake shape, arrow root.

MR. ANDRADA. Now, when this property was taken by the board of health, did they consult you at all or any of your employees?

A. Yes, sir; we were consulted by the board of health.

Q. Who did they consult?—A. The bookkeeper.

Q. Is he here in Honolulu?—A. Yes, sir.

Q. Now, did you buy any provisions here or did you import them?—A. Some of them were bought here.

Q. But the majority is imported?—A. Yes, sir.

Q. Where is Mr. Shimamoto?—A. He is at Hawaii—on the island of Hawaii.

Q. He did not sign this claim, this statement of a claim?—A. No, sir.

Q. Who signed it?—A. Myself.

Q. Did you have his power of attorney?—A. Yes, sir.

MR. BROOKS (to the witness). Bring in your power of attorney.

T. MARUMOTO, called for the claimant, sworn.

Mr. BROOKS. What was your occupation here on the 31st day of December, 1899?—A. I am bookkeeper of S. Shimamoto.

Q. You may state whether or not M. Anno gave you an inventory purporting to be an inventory of the merchandise in the Shimamoto warehouse that was destroyed at that time, and ask him why Mr. Anno gave him the inventory.—A. Yes, sir; I got it from Anno.

Q. Now you may state whether from that inventory you put the price or the value of that merchandise, and you fixed that at that time.—A. I did it, sir; I put it in.

Q. Now, how did you happen to fix the values as you have them on this inventory—what basis?—A. There is a rule in my store for sales of merchandise, valuation; that is, invoice price and freight on it and expense for carting and 10 per cent on it; that is the valuation on it.

Q. Then this list would be the actual cost price and 10 per cent on it of that merchandise, would it?—A. Yes, sir.

Cross-examination:

Mr. ANDRADA. How long have you been bookkeeper for Shimamoto?—A. About four years.

Q. In that capacity you must be familiar with the price of the different articles here?—A. Yes, sir.

Q. How long has this store of Shimamoto existed?—A. I can't tell you how long.

Q. Did it exist before you went to work for Shimamoto?—A. Yes, sir.

Q. When you went to work for Shimamoto, did he have this same warehouse?—A. No, sir.

Q. When did he first secure this warehouse?—A. The month of August; the same year it burned down.

Q. Did he have a warehouse before that time?—A. Yes, sir. We used to make the back part of the store a sort of warehouse where we used to store goods, having a lot of merchandise coming in all the time and no place for all the merchandise; and we had to go out and borrow somebody else's storeroom, and finding that very inconvenient we rented this warehouse.

Q. Then you moved the stock that was in the rear of your store into this warehouse?—A. Yes, sir.

Q. How long had this practice been in vogue, that storeroom in the rear of your store?—A. Before my time, a long time.

Q. Was there or not a lot of old goods in the back of the storeroom before you secured this warehouse and before moving into the warehouse?—A. No, sir; there was none.

Q. No old goods?—A. No old goods—at least two or three months old.

Q. You are positive of that?—A. Yes, sir; I am sure about that.

Q. Then the goods were sold immediately after you got in there and you kept on getting enough supplies; is that the idea?—A. Yes, sir.

Q. And all of these goods that was in the warehouse at the time of this fire, were they all fresh goods?—Yes, sir.

Q. All fresh goods?—A. Yes, sir.

Mr. MACFARLANE. About what was your monthly sales?—A. The store used to sell about \$3,000 a month up to that very month, the month of December, but after December, on account of so much goods arriving from Japan—

Q. On account of so much goods arriving from Japan?—A. More sales, about \$5,000 from the month of December.

Mr. ANDRADA. Now, prior to taking this building, whenever it was was the warehouse full of goods then?

A. Yes, sir.

Q. The warehouse was full?—A. No, we didn't; however, on account of information from Japan that they would send more goods ever steamer, Shimamoto rented the warehouse, and after renting the warehouse the goods arrived; the warehouse was chock full all of the time.

Q. You say that your monthly business prior to October was about \$3,000 a month?—A. Yes, sir.

Q. And after that it increased to \$5,000 a month?—A. Yes, sir.

Q. Now, did the board of health or any representative of the board of health consult you as to their taking away this merchandise?—A. No, sir; I was not directly consulted by the board of health, because the place was quarantined at the time where I was living, but Mr. Anno, he was told, also Anno's wife was consulted about it—about the goods being taken away. I wasn't directly consulted at all. Mr. Shimamoto was consulted.

Q. Is Mrs. Shimamoto—is she here?—A. She is in Japan.

Q. What became of all the goods that was in this warehouse?—A. Thrown away by the government.

Q. Do you know where they were destroyed, where they took them to?—A. I can't tell.

Q. Now, have you in your possession the books of Shimamoto?—A. Yes, sir.

Q. All of them?—A. Yes, sir.

Q. So that you can prove all of these statements?—A. Yes.

Q. Now, I ask that the books be brought here; it is quite an important thing to prove.

The COMMISSIONER. Have you all the invoices, the original invoices?

A. No, sir; not all. I have been engaged in searching for it; not knowing that such a thing would be wanted before the court, but I think I have some of them.

Q. What has become of the most of them?—A. I kept all of these documents in one box; the box was carried away by somebody else and when I got it back it was all broken and several things in it missing, and among them some of these invoices.

Q. Who had access to these boxes?—A. I can't tell you. It was done in the confusion of the fire.

Q. When did you finally find the invoices that you now have in your possession?—A. I found it among the merchandise which was stored away in Hackfield & Co.'s for Shimamoto.

Q. You have bills of any merchandise that might have been bought in Honolulu?—A. I have some; not all.

Q. (To the commission.) I suggest now that those boxes of invoices which might have been in the possession of this witness be brought into this court, so that we can make a very thorough investigation of this thing; we have simply to pass upon the evidence that is before us here, and those things would be good to go by.

Mr. BALLOU. We would be glad to do anything of this kind, but simply wish to point out to bring in the first instance the cost of

each and every item of this whole list the detail would be an undeterminable task; so far the commission might select out any item and have us find the invoice, it wouldn't be very long to select them.

The COMMISSION. Then it is understood by the claimants that as far as possible, the larger items substantially, they will produce, and from that will be selected.

Mr. BALLOU. We will ask him to bring in his books and the invoices, especially the books of October, November, and December.

The COMMISSION. You testified that Anno gave you an invoice, did you not?

A. Not an appraisement, but the number of merchandise, that is all—a list of the merchandise.

Q. What has become of that list?—A. The inventory that I got from Anno after I put the price on it I returned it to Anno again; I handed it over to Anno again.

Q. The warehouse was burned then, damaged, and the goods were taken away?—A. Yes, sir.

Q. Did you keep a copy of that inventory or pass it back?—A. Right back.

Q. It is in your book?—A. The copy is in my book.

Q. Where was your place of business at the time?—A. On Nuuanu street.

Q. Where is it now?—A. On Merchant street, in the Magoon Building.

S. OZAKI, called for the claimant, sworn.

Mr. BALLOU. Mr. Ozaki, are you a wholesale merchant in Honolulu?—A. Yes, sir.

Q. How long have you been in business in Honolulu?—A. About eleven years.

Q. Do you import goods from Japan?—A. Yes, sir.

Q. And sell them at wholesale as well as retail?—A. Yes, sir.

Q. (To the commission.) We offer Mr. Ozaki as an expert witness on values. That same remark applies to some question asked by the commission.

Cross-examination:

Mr. ANDRADA. In December, 1899, can you tell from your own knowledge what the price of meso might have been in kegs or tubs, the way it comes in tubs?

A. I happened to be away at that time—I was in Japan at the time, and I can not tell you what was the wholesale price in December of that year.

Q. What is the price of meso now?—A. You could find out better by my manager. I leave those things in the hands of the manager.

Mr. BALLOU. Are you not familiar with the wholesale price of the different articles so that you can testify about them?

A. I can not tell.

K. EMYAMATA, called for the claimant, sworn.

Mr. BALLOU. What is the name of your firm?

A. Mutsu & Co.

Q. How long have you been in business in Honolulu?—A. About three years and a half.

Q. Do you think that you could give the valuation at wholesale, the price at wholesale, the price of the various Japan articles imported from Japan?—A. Yes, sir; some of them I can tell.

Cross-examination:

Mr. ANDRADA. Were you in Honolulu about December last year the whole month of December, 1899?—A. Yes, sir.

Q. What was the price at that time of goma per bag?—A. About cents a pound.

Q. How many pounds would the bag contain?—A. Some 100 pounds.

Q. And it was about 7 cents per pound the last year, 1899?—A. Yes, sir; that is the market price here.

Mr. MACFARLANE. The market price or the cost?

Mr. ANDRADA. The market price. What is the cost price of the article.

A. About six and a half in Japan, Japanese money, and a half in American gold.

Q. Did you pay for your goods—is the habit of paying in American gold or Japanese money?—A. American gold.

Q. So that the cost in Japan—that would cost in Japan about 3 cents—in Japan?—A. Yes, sir; about that. I told you the price is seven; that is, American gold.

Q. And that is here?—A. Yes, sir.

Q. What is the price of shoyu—what was the price in December 1899?—A. That depends on the quality, some \$1.35, and \$1.40, and \$1.70, and \$1.80.

Q. It depends on the quality?—A. Yes, sir.

Q. Is that the cost landed here in Honolulu?—A. Bought and paid for; yes, sir.

Q. All the cost?—A. Yes, sir.

Q. Now, what is the cost of shoyu—what is the cost price of the article?—A. I think \$1.25.

Q. Here?—A. Yes, sir.

Q. Including freight?—A. Yes, sir; including freight per ton.

Q. What is No. 1 shoyu worth, the very best article; what was the market value in December, 1899?—A. I can't say exactly, about \$2 pretty near \$2. Now it is two and a half.

Q. What is the price per keg of kobu?—A. Three and a half, 10 pounds.

Q. Shiraga kobu, what is that worth?—A. I think that is 7 or a pound.

Q. How many pounds are in a case?—A. Some 50 pounds, and some more than that.

Q. Did you ever have a case with more than 100 pounds in it?—A. No, sir; not more than 100 pounds.

Q. Do you know of your own knowledge that a case of shiraga kobu ever contains more than 100 pounds?—A. Yes, sir; it contains more than 100 pounds.

Q. You have seen it?—A. No, sir; I have never seen it, but it is pretty heavy stuff.

The COMMISSION. How much does the case weigh?

Mr. ANDRADA. There seems to be no way of proving that article (To the witness.) What is the price of warina per bale (that is the second article from the bottom of the first page)?

A. From \$4 to \$5.50 per 100 pounds, sometimes more, though it depends on the quality.

Q. Have you ever seen it cost \$6.50 per bale?—A. Yes, sir; some times it is higher; when it is high in Japan it is very high here.

Q. Have you any idea what the market price of that article was here in this market in December, 1899?—A. I think \$4 or \$5, sometimes \$6, it depends on the quality, about \$6, I think.

The COMMISSION. Take the item of 472 cases of somen, the fifth item, what was that worth at that time?

A. Two twenty-five.

Q. Landed here?—A. Yes, sir.

Q. That is in American money?—A. Yes, sir.

Q. I understand you, \$2.25 landed here?—A. Yes, sir.

Q. Are there different grades of that?—A. Yes, sir; some 10 and 15 cents; some is higher and some is lower.

Q. But what is the average?—A. Two twenty-five.

Q. And all cases just the same?—A. Yes, sir; they weigh about 40 pounds, I think; 2 boxes in 1 case.

Q. So, 472 cases of somen, what do you estimate that to be—2 cases put inside just as you speak of?—A. Always import 2 boxes in 1 case.

Mr. BROOKS. That is, when there are 2 boxes in 1 case the boxes are 2.25 and the case 4.50?

A. Sometimes they put 4 boxes in a case.

The COMMISSION. I asked you to take the 472 cases of somen; how much is it a case?

A. Some put in 2 small boxes and some put in 4 small boxes.

Q. You have got 472 cases; how much is it worth a case, what is known as a case?—A. Two twenty-five 1 box, 1 small one.

Q. How many boxes in a case?—A. Sometimes two and sometimes four.

Q. Well, state then what would you interpret this to mean: "472 cases of somen;" what do you interpret that to mean?—A. I think that is the small boxes.

Q. How much is the price of the small boxes?—A. Two twenty-five.

Q. What would Daizu beans be worth per bag at that time—how much a bag?—A. Two dollars and sixty cents or seventy cents.

Q. Kawayanagi tea, what was that worth—how much a case?—A. About 10 cents 1 pound.

Q. How many pounds in a case; how much in a case?—A. I don't know; some put in 50 pounds and some 100 pounds; no regular case.

Q. Eighteen cases of tea, how much would that be—how many pounds?—A. No regularity as to the case; I can tell by the pound.

The COMMISSION. Mr. Ballou, we wish to start in on the idea, and the intention is to ask your assistance, to get the matter clear before the commission on these items 1, 2, 3, 4, and 5—"256 canned goods," and so on. Now, I would say for the benefit of attorneys and for claimants that those items each handled would receive very close scrutiny.

Mr. BALLOU (to the witness). When you are speaking about the cases of goma for 3½ cents American, did that mean landed here or in Japan?—A. In Japan.

Q. Do you include in that the custom-house and the freight?—A. No, sir.

Q. What would be the price of the goma landed here?—A. I think about \$7 a hundred landed here.

Q. When you say 472 cases of somen, that refers to small boxes and not to large ones. Have you any particular reason for saying that?—A. I never see but the small boxes.

Q. If an examination of the cases of somen, why do you say that you think it refers to small boxes? Doesn't all the cases contain two boxes?—A. Somebody say that one case means two boxes and some might mean one small case.

The COMMISSION. Have you claim for any loss of goods?

A. No, sir; nothing at all.

Q. No claim before the Commission for any loss?—A. No, sir.

S. SWEET, recalled for claimant.

Mr. BALLOU. This 472 cases of somen, does that refer to a small case or a case containing two boxes?—A. Two boxes.

Q. How do you know that?—A. A case means two small boxes inside.

Q. Do you know what this 256 cases of canned goods referred to?—A. There are several inside of the case; I can't tell you what it is.

Q. If the board of health counted so many cases of canned goods, why, we will let it go. [To the witness.] How do you fix the valuation on them?—A. I didn't put no value on it—on that particular inventory. I was told by the bookkeeper that the price was taken, the average from several shipments; took the shipments prior to that time. I can find out what the price was to make the average of all canned goods. I took the lowest price on it.

Cross-examination:

Mr. ANDRADA. How did you fix that price—\$5.75 per case?

A. I took an average on several cases. There was a case that cost \$9, and \$8, and \$5, and like that. We took the average of them, the particular shipment, and took the list and went all through it.

Q. Now, did you have a warehouse book—a book containing all the goods that you have in your warehouse—did you have a sort of a book like that, a warehouse book?—A. Yes, sir; I had, which was all damaged and burned.

Q. When did you take an inventory last before this fire? When did you count your goods?—A. I can't say exactly when the last inventory was made, but I believe it was in January of the same year.

Q. You are the manager of a business, the sales are three to five thousand dollars a month, and you can not state definitely before the commission when you took the inventory last?—A. I wouldn't like to testify here before I look at the book; it may have been December or January of the previous year; one of those two months.

Q. It was either December or January of the previous year?—A. Yes, sir.

Q. As a matter of fact, you did not have the warehouse in January 1899?—A. No, sir.

Q. You did not have it until August, 1899?—A. That is right; yes, sir.

Q. Now, before you got that warehouse—after you got the warehouse, in 1899, was there any inventory of goods taken?—A. No, sir.

Q. Then you did not take any inventory of the goods in that warehouse?—A. No, sir.

Q. And when you made the statement that it was made in December or January, that was taken by the board of health? Was there any inventory made of the goods in this warehouse besides the one made by the board of health?—A. No, sir.

Q. Then you have no way of knowing what goods were in the warehouse except this inventory?—A. I can not tell what goods were in the warehouse exactly to the number, but I made a full inventory out of my general book. I made an inventory and sent it to the board of health, but that inventory, the one I received, the inventory made by the board of health, may have been adopted by the board of health—contained, may have contained more than the firm got out of the books, so that it was changed according to the inventory of the board of health.

Q. This inventory was a copy of the inventory made by the board of health?—A. Yes, sir.

Q. How much was that difference, and in what way?—A. About three cases, more or less, of the inventory taken by the board of health; something like that.

Q. It was practically the same thing?—A. Yes, sir; practically the same thing.

Q. Have you got a memorandum of your last stock taking?—A. I think the last time we took stock was in December.

Q. Have you got the memorandum that you took of the stock taking that you made at the time?—A. No, sir; I have none.

Q. Well, you state that you took one in December—in about December of the year before—what became of that?—A. Well, that memorandum—I had a memorandum inside of the book, but it is lost; it was among those boxes of invoices that was lost when we took the merchandise out of the store prior to burning the store, and when I received it back those books were all gone.

The further hearing of this matter is continued until 1.30 p. m. this day.

MAY 31, A. D. 1901.

AFTERNOON SESSION.

Mr. BALLOU. We will produce the books, the original invoices, which the commission called for, and the commission wished to examine the bookkeeper; the papers don't seem to have any date.

Cross-examination of S. SEJI resumed.

Mr. ANDRADA. Was there a schedule of freight rates?

A. Six dollars a ton.

Q. Where are the bills of lading accompanying this invoice?—A. They are on file here.

Q. Here is a lot of goods shipped on the 29th of December from Yokohama?—A. Left some time in the month of January and afterwards we received those goods.

The COMMISSION. I think that the bill of lading had better be filed in each case.

Q. (To the witness.) You were away at the time of the fire?—A. Yes, sir; at Kauai.

Mr. ANDRADA (to the witness). Mr. Shimamoto lives in Kauai?

A. No, sir; on business; I was away on business.

Q. Why isn't he here—Mr. Shimamoto—to-day to represent his

claim?—A. He is always away from this place; he was the last five or six years in Japan, and he didn't know anything about this thing.

Q. Does this business belong to Mr. Shimamoto or is it a company?—A. Owned by Mr. Shimamoto.

T. MURAMOTO, recalled for claimant.

The COMMISSION. Have you any idea of what comprised the item "256 cases of canned goods?"

A. No, sir; I can not tell unless I look at the books.

Mr. BALLOU. What book?

A. That book that was burned.

Q. Did this house of Shimamoto have any iron safe?—A. We have such a safe in the store; in the warehouse we kept an account of the warehouse goods, but not in a safe.

Q. The warehouse book you kept with the goods?—A. Yes, sir.

Q. Then you don't know what these items are composed of, no idea of what it is composed of?—A. No, sir.

Q. How did you arrive at the valuation of 5.75 you put on the canned goods?—A. I took the average price from the list of all the canned goods and found out that 5.75 was the average price.

Q. Do your books show whether the taxes were paid on this property, this merchandise?—A. Not to my knowledge; there was nothing paid on that particular merchandise that was destroyed. In truth I am not sure whether the taxes were paid on those goods or not; all of those goods were handled by Mr. Seji, manager, the cash going out and coming in.

The COMMISSION. The idea of asking that question was to give some idea of the amount of stock that he is carrying.

Mr. BROOKS. Was the question leading up to the amount of stock that he is carrying in his possession, in his business, the year before?

A. Yes, sir.

Q. (To the witness.) I would like to ask this man, Can you tell whether these were Japanese groceries, or whether they were American groceries or English groceries, or whether they were a mixture of everything, these 256 cases of groceries?—A. All Japanese provisions.

Q. Japanese?—A. Yes, sir; canned goods.

Q. Were any of the goods in the warehouse at the time of the fire ever returned to you?—A. Nothing returned.

Q. Not returned?—A. Nothing returned.

Q. What was done with them?—A. Carried away by the board of health.

Q. You never heard of them again?—A. No, sir.

Q. What is that book?—A. The shipping books.

Q. Where are the firm books, the books covering the business?—A. At the store.

Q. We want all of those books before the commission.

The COMMISSION. Mr. Ballou, there is one thing the commission will lay particular stress on; that is, to show the amount of capital that is put in the business, a question that might be very properly asked to give out the facts of the case.

The COMMISSION (to the witness). Bring all the accounts you have got in the store. Who comprises the firm of Shimamoto—this claimant?

When you order those goods from Yokohama, do you send the money for them or do they carry the account for you?

A. I pay cash and on account.

Q. Do you deal with more than one firm in Yokohama; do you send the money to them, or do they carry the account for you?—A. I pay cash, but on account.

Q. Do you deal with more than one firm in Yokohama?—A. At Yokohama one firm, but there is some more in Hilo Shimya.

The COMMISSION. Now we ask the question, What did the board of health do with these goods?

Mr. ANDRADA. That is what I think the board of health ought to show.

GEORGE R. KING, called for the claimant, sworn.

Mr. BROOKS. Were you connected with the board of health on the 31st day of December last, 1899?

A. I was on the 1st day of January.

Q. Early in January?—A. Yes, sir.

Q. State whether or not you are familiar with the premises of Mr. Shimamoto, on Nuuanu street, the warehouse near Chaplin lane.—A. I remember something about the warehouse there that he claimed; I didn't know that it was Shimamoto's.

Q. What was the matter with it?—A. It had been damaged; the adjoining premises had been burned the day before, some four or five doors below. On the morning of the 1st I met Mr. Cooper, who was then president of the board of health, and Jack McVeigh. Mr. Cooper asked me to go over there and take charge of the gang that was clearing out that warehouse. I went along, and Dr. Pratt, in charge of the sanitary headquarters. I went over there and, I think, got some six or eight men and took them over to the warehouse that was in the rear of Ahlo's store, a coral building there. My instructions from Mr. Cooper were to clear everything out of the building, as they wished to see what could be saved. I had Mr. Weeden, of the custom-house, who was familiar with the values, and he was to go and take an inventory and appraise it.

Q. Do you know whether he did or not?—A. I don't know whether he did or not. He told me that he did not see all the goods there.

Q. You saw the goods there. How was the house, full or half full; was there much goods in it?—A. As I remember, there was one room that opened out on the land that runs off of Chaplin lane and abreast of the fence of Frank Damon, a place there on the moukai side of the building. There was a door there where the fire came in and burned the hoops off of the cans there; that was the only damage by fire; the balance of the damage was by water.

Q. Was there many goods?—A. The room was full—about 18, I should judge, as near as I can remember now—somewhere about 18 by 20, a low ceiling, not over 9 feet. There was something in the cellar.

Q. In the cellar?—A. Yes, sir.

Q. Were there goods in the cellar?—A. Yes, sir.

Q. Why was it necessary to clean it out; what was the condition of these goods?—A. Mr. Cooper's idea was that there was a great deal there that could be saved for the owners if it was taken out immediately, and not left in there inside of the other stuff, alongside of the other stuff that was wet.

Q. Do you know what was done with this stuff?—A. I took it out and piled it up in this little alleyway, and some was afterward put in Chaplin lane in the same style, as soon as we got it out, at the next day in the morning—on the 2d of January—I went over and started my men to work on it; I had to go back to the office, then Mr. Towse took charge of it, and when I went around in the afternoon I understood that Jack Hare and Mr. Weeden took an inventory. I found Mr. Cooper and told him it was pretty wet, and I understood afterwards it was taken out to sea and dumped. Who took it out I can't say.

Q. You don't know who took it away from the place where you piled it?—A. No, sir.

Mr. BROOKS. You took charge of the stuff for the board of health?

A. Yes, sir; I suppose you might say that.

Q. That is, the board of health took charge of this merchandise?

A. Mr. Cooper, as president of the board of health, took McVeigh who was quarantine officer, and he asked me to go over and hand these few men, which I did.

Cross-examination:

Mr. ANDRADA. Did you handle all the goods that were in the warehouse?

A. I think my men did clean the whole house out, not the first day there were some other things in there we did handle; we didn't clean any of the main building.

Q. But it belonged to Shimamoto?—A. No, sir; I don't think so at all; there was a lane mouka side of this coral house, a little shed the 6 by 8, and that was a lot of Chinese stuff marked for shipping to the other islands.

Q. What was the condition of that place when you went there?

A. Gone.

Q. Burned?—A. I think, as I remember it, it had caught on fire and the ceiling between this and the second story was broken down.

Q. Were these goods in a hopeless condition; that is to say, damaged so they could not be saved?—A. I think that about the only thing that could have been saved was the soyu in the tubs.

Q. From your own knowledge you don't know whether this merchandise was taken out to sea and dumped; you don't know that from your own knowledge?—A. No, sir; I don't know it of my own knowledge.

Q. Can you give us any information where you got your information as to their being taken out to sea and dumped?—A. It is so long ago and so many people connected with it I can't really state. If I remember rightly, Mr. Cooper said it had been very badly damaged by water. I won't be positive, but I am under the impression that Mr. Towse, who remained there, who was inside of the district for weeks saw it taken out; that it was worthless, wet by the water.

Q. Could you tell us whether or not the entire house was filled up with these Japanese provisions?—A. No, I could not. As I say, there was a room about 18 by 20 or 24 feet deep and a very low ceiling; it should say not over 9 feet—it might have been 10—and the goods were packed in the passageway so that you could only go sideways.

Q. Only one room?—A. The cellar had some things; I don't know what; it wasn't packed in, as the upper room.

Q. Was there as much in the cellar as there was in the upper room?—A. No, sir.

Q. You say that there was, you said, soyu in those tubs?—A. Yes, sir; tubs of that size.

Q. Would you say there were 1,100 tubs there?—A. No, sir; I have made a rough estimate—that was about the only thing that I could make an estimate of—I made a rough estimate, as I said, as they stood there in the tiers, and I think I allowed 15 or 20 of what was burned; the hoops were burned. I think that I made an estimate in my mind that there were possibly 275 or 300 tubs there; certainly nothing like 1,100 tubs. It isn't possible that there were 1,100.

Q. And, Mr. King, if this soyu, or whatever its name is, that by reason of the fire it came in contact with the fire, the heat, or the water, that it went bad, are you able to tell whether it did ferment or whether it got bad?—A. I don't think that the soyu that was not broken probably came out in good condition; the few that were broken fermented, and the other provisions in there.

Q. Then if the soyu wasn't in good condition, or was in good condition, why did the board of health throw it overboard—throw it away?—A. That I can't say.

Q. But you say there were 256 cases of all kinds of goods there that you came across yourself?—A. Quite a quantity of Japanese goods—salmon—something of that kind.

Q. Would you say there were a number of cases?—A. No, sir; I would think not.

Q. How many cases at the time you were handling there?—A. I wouldn't like to state positively, but if my memory serves me now I don't think there were over 100. They were on the mouka side of the building, as I remember it, and there were two dozen in a case; they were right on the mouka side, the mouka wall of the building; I saw that it was full of miscellaneous stuff, and makai was full of stuff of all sorts in these cases.

Q. Did you look into these cases?—A. A great many were broken.

Q. What was the condition of the contents? Were they intact or were they destroyed, or were the contents in good shape?—A. Except the boxes, the contents looked all right.

Q. The labels, were they there?—A. Yes, sir.

Q. They were there; now you speak of labels?—A. They were in separate boxes; there was a great deal of the stuff that had no labels on, and some that had labels on. There were boxes that had labels in.

Q. To put on?—A. Yes, sir.

Q. Four hundred and seventy-two cases of somen, and besides these 256 cases of canned goods. Do you recollect of seeing those cases?—A. I would like to ask what somen is—about what is the size of the case.

Q. A kind of a vermicelli.—A. There were two boxes in a case, and the case stood there and two small boxes in; I saw a great deal of that stuff; yes, sir.

Q. Would you say there were 472 cases of that?—A. I tried to pile the cases in piles as near as I could, and it certainly would have impressed me if there were any number of cases like that—any one style of goods in cases.

Q. There were 225 bags of beans. Do you recollect coming across those?—A. I took out some beans, but nothing like 225 bags.

Q. How many would you say were there?—A. I piled up by Ahlo's the rear corner of Ahlo's lot, I piled these beans up there by a low fence; in the warehouse there was three tiers; to the best of my knowledge there were two or three tiers, and I think 10 bags high: they might possibly have been between 75 and 90.

Q. Then besides the 225 bags of daizu there was another 406 shoy bean, making a lot of 225 and 406; 650 odd sacks?—A. To the best of my recollection there was nothing like any such quantity.

Q. He has here different kinds of beans, about 650 sacks; what is your estimate, Mr. King, of seeing, taking those beans together, suppose they were packed in one place?—A. I haven't thought of this matter any since that time, and it would be hard to remember; we packed all the beans; there were beans in boxes; I knew nothing of the difference of the beans; there might have been, to my recollection; I would say that I am correct, but to my recollection and knowledge if there were 90 bags of beans there I lost track of them, I would say there were not over 90.

Q. Of all kinds?—A. Yes, sir; I don't know of any difference in the beans. We piled the beans in one place.

Q. What size were the sacks, do you recollect; were they 50-pound sacks or 100-pound sacks?—A. I think not; the only sacks we have are supposed to contain 100 pounds; that I wouldn't be sure of.

Q. One size of sacks?—A. Yes, sir.

Q. I would like to go back to that tub business. I find some more tubs, about 1,200 tubs of different kinds. How many tubs would you say that you handled there; they represent 1,200; how much did you handle out of that 1,200?—A. I think between 275 and 300, what they would call shoyu, that is the little small tubs, and in the main building, perhaps 8 or 10 tubs, and a few that I was told contained shoyu.

Q. Do you recollect coming across Hawaiian coffee?—A. Yes, sir; there was some. There was a little it struck me—

Q. About 8 bags?—A. Yes, sir; about that number, I think.

Q. Do you recollect coming across any cases of Japanese porcelain?—A. Alongside of the canned goods on the mouka side of the building there was a few cases piled there, cheap goods. They were broken; the ties were off of them, one or two of them. There were a few cases, one Japanese porcelain cups and saucers.

Q. How many cases would you say there were?—A. I think two barrels. In coming up there I remember three cases right alongside of the door on the mouka side, probably a half a dozen.

Q. Mr. King, did those meet the same fate as the rest of the goods?—A. They were piled up on the outside.

Q. And probably dumped into the sea? In your mind there were not 50 cases of this porcelain ware?—A. No, sir.

Q. Was everything taken out of both warehouses? Was it cleaned out, both rooms?—A. The room in the cellar?

Q. Yes, sir.—A. Yes, sir; I was around there on the outside. I think this was Monday, and I was around the next day, the 2d. I think it was Tuesday I went up there; I went around in the afternoon in that district; then I had my men working. Towse had the men at work and he had the lumber piled up, and he said everything was out.

Q. Did you leave Towse in charge?—A. Yes, sir; I asked him if he would take charge. I had to go back.

Q. Did you see Mr. Weeden make an inventory?—A. I did not see

the first day. Jack Hare came up there in the afternoon and then he worked with Mr. Weeden, and said when everything was out they would come around the next day. I was told they hadn't been there. I didn't see them there myself.

Q. Then the inventory was not made in the building; the inventory was made after it was moved out of the building?—A. After it was taken outside.

Q. The goods were outside of the building. Was that only the goods of Shiamamoto, or was other people's goods there?—A. The stuff that came from this little lane, that was put in a place by itself. I thought it belonged to some one else. What was in the main house, I didn't know who that belonged to. If I heard at the time I have forgotten it. I knew the place belonged to Ahlo—that is, that Ahlo owned the lot.

Q. Was there anybody there while these goods were being removed from the warehouse to claim them?—A. No, sir; I think there was some one around there once or twice; but I didn't hear anything.

Q. Do you know whether there was a copy of the inventory made at the time?—A. I do not.

Q. Among the files of the board of the health?—A. I don't know. I have nothing to do with the board of health. I was acting under them that day; afterwards the citizens' sanitary committee. I was appointed and was working under the citizens' sanitary committee. I never had anything to do with the board of health.

Q. You don't know whether there was a copy made of that inventory at the time?—A. No, sir; I remember of hearing that something was made of an inventory, but what became of it I have not the slightest idea.

Q. You didn't see Mr. Weeden there or anybody else while the inventory was being made?—A. Mr. Weeden came there once while I was there; he didn't do anything at that time. I wasn't there when Mr. Weeden made the inventory.

Q. Then if the inventory made by Mr. Weeden showed the number of cases, the different goods that have been described here, would you think that would be likely to cover the goods taken out of the warehouse?—A. Yes; that is the difficulty here. I don't see how it is possible that included the goods that was in that warehouse.

Q. If this inventory was made up correct and showed a certain number (924) of tubs of shoyu and a certain number of meso and a certain number of bags of beans, whether or not there are more included in the inventory than there was in the building?—A. If Mr. Weeden's inventory shows any such figures as that, then my memory is all wrong.

Mr. BROOKS. Do you know as a matter of fact whether Mr. Weeden made this inventory before they were taken out?

A. I know as a matter of fact that he did not take them out.

Q. You don't know?—A. No, sir; that he did not make the inventory before they were taken out of the warehouse.

Q. You don't know that?—A. Yes, sir.

Q. Do you know whether anyone made an inventory before the goods were taken out?—A. Not on the morning after I got there.

Q. Before you got there?—A. No, sir.

Q. You don't know whether Mr. Weeden had been there before you got there?—A. I don't know that he had. I don't think he had, though.

Q. Can't you recollect that Mr. Weeden was there two days taking

this inventory and then turned it over to you and went away at the time that you came there?—A. No, sir; nothing of the sort. When I left Mr. Cooper I went down to the board of health. I was on a wheel. I got some timber posts, and took in what men I wanted. I then met Mr. Weeden at the board of health, and he said he would be around. He was to take an inventory and he would be around the later.

Q. Now, Mr. King, of course anything that you have testified from your recollection you don't claim that it might not be wrong?—A. I said to the best of my recollection.

Q. If two witnesses testified here, including Mr. Weeden, that the inventory is correct, and taken at that time, and this amount of goods was in there and the different inventories compared with each other, what would you say as to that; wouldn't you say that your memory was wrong?—A. I would say, most decidedly, that my memory was wrong.

Q. You never thought of this before to look it up and so refresh your memory?—A. I have never thought of it for a year or more until yesterday, and I met you.

Q. You did a great deal of this kind of work at this time in different warehouses?—A. That is the only one.

MR. ANDRADA. If there had been anything like 1,100 tubs of shoyu wouldn't that have attracted your mind as being a very great quantity of shoyu to be in one place?

A. As I remember it, the shoyu was next to the mouka wall and farther along in the room right alongside of the door, and as I said between 275 and 300 tubs, as I remember it.

Q. Are you positive there was no such quantity as 1,100 tubs of shoyu there?—A. I don't remember any such quantity.

Q. There was no such quantity as 650 bags of beans?—A. I certainly don't remember any such quantity.

Q. If there had been, would you have noticed such a quantity of beans?—A. I have testified to the best of my memory about piling the beans by the cover of the fence, and I put it possibly 90 or 100 sacks.

Q. Did the piles look as though there had been any taking done right previous to your getting there?—A. I don't think I noticed any there were a lot of handcarts standing in there—four or five handcarts.

Q. But you could not testify that there was any such quantity of goods in the warehouse as this statement purports to show?—A. To the best of my recollection I don't think so.

S. ANNO, recalled for claimant:

MR. BROOKS. Was the inventory made by you; made while the goods were in the house—the warehouse—or after they had been taken out of the warehouse?

A. In the warehouse.

Q. And who was with you at the time that you made the inventory of those goods?—A. Mr. Max Berger, Mr. Weeden, and Mr. Niiya; he is the Japanese clerk in Hackfield & Co.'s; he came to represent Mr. Berger and Hackfield & Co.

Q. Where is he now?—A. He went to Japan.

Q. Mr. Berger is in Huolia?—A. Yes, sir.

Q. Who counted the tubs of shoyu?—A. Everybody counted them.

Q. Do you remember how many tubs there were?—A. Over 1,000.

tubs, because there was 930 or 940 tubs in one pile and about 200 in the other pile, and then they divided them up, No. 1 and 2 shoyu; 200 in one pile and 950 in the other side.

Q. You helped to count that shoyu?—A. Yes, sir.

Q. While it was in the warehouse?—A. Yes, sir.

Q. And Mr. Richard Weeden helped to count that shoyu?—A. I believe so.

Q. Mr. Berger and Miiya?—A. Yes, sir.

Q. You say that you believe that Mr. Weeden counted the shoyu with you?—A. I believe so.

Q. Wasn't he there; don't you know, and didn't you count it together?—A. One was counting; one boy from Shimamoto counted them, and we all counted them up, took the whole number, and those numbers we put down in our book.

Q. What day of the month and year?—A. I don't remember; it was two days from the fire.

Q. Were these goods moved onto the sidewalk in Chaplin alley or wherever it was?—A. No, sir; where I counted those goods all of those goods was in the warehouse.

Q. But you don't know that they were brought—you didn't see them when they were moved out onto the street afterwards?—A. I saw from the outside some wagon taking them away, and I heard from Mrs. Shimamoto that the board of health sent a wagon and took the things away from the warehouse.

Mr. BALLOU. After you had made your inventory did you afterwards see the goods piled up outside in the lane moved out, and did you see them being taken out from the warehouse?

A. About five or six days after the taking of the inventory I saw a wagon move those goods from the warehouse.

Q. Five or six days?—A. Yes, sir.

Q. They were in the warehouse when they were carried away?—A. Yes, sir; taken away from the warehouse in a wagon. We didn't move the goods when we were taking the inventory.

Q. But four or five days after you took the inventory you saw them haul away the goods in a wagon from the warehouse?—A. Yes.

Q. Were they still remaining in the warehouse or piled up outside?—A. The goods that was in the wagon was the balance.

Q. And you heard Mrs. Shimamoto say that the board of health sent the wagon to remove the things away from the warehouse?—A. Yes, sir.

Q. And you said you saw them being hauled away four or five days after you had the inventory; that they were taking them away from the building. The theory is that shortly after the fire the goods were taken out by the board of health and piled up in an adjoining premises, in Chaplin lane. Now, were they afterwards put in the warehouse or were they immediately taken away in the wagons it would indicate that you saw them some few days after the inventory was taken, the wagons being at the warehouse, loading it on the wagons from the warehouse and carrying it away, or that the goods remained in the warehouse. What is the fact? Were they inside of the warehouse when the wagon was there?—A. I took the inventory of those goods in the warehouse. When I took the inventory of the goods in the warehouse, after five or six days of the taking of the inventory I saw a wagon move those goods from the warehouse.

Q. They were not on the outside four or five days—they still remained in the warehouse; is that your recollection?—A. I don't know of any goods outside or inside of the warehouse. I saw from Chaplin lane a wagon piled up with goods.

Q. You were not close to the wagon at the time?—A. No, sir; not so close, but I heard from Mrs. Shimamoto that the board of health ordered them taken away.

Q. Mr. Shimamoto was not in the country at this time, was he?—A. Mrs. Shimamoto.

Q. How many rooms of that warehouse was occupied with provisions?—A. The first story and the second story and down in the cellar and upstairs. I remember the upstairs and the downstairs.

Q. How many rooms, I asked you—how many rooms were there in that warehouse occupied with provisions?—A. The whole building they occupied the whole building.

Q. How many rooms would that be, do you know? More than one?—A. Those rooms?

Q. Yes.—A. All occupied with goods.

Q. How many rooms were there in there?—A. In the building?

Q. Yes, sir.—A. The first story, the second story, and downstairs.

Q. All of the first floor was one big room or divided off?—A. I don't remember.

Q. Now, if we produce three or four witnesses who say there was only one room occupied by provisions and with the cellar, would the not be telling the truth?—A. I can't tell only the things that I saw the first story was full, the most of that shoyu, and the second story was the bag of beans and such things as that, and downstairs a sea of wet with some kind of goods and some porcelain.

Q. And then you say that there was more than one room and the cellar occupied by those goods, do you not?—A. Yes, sir.

Q. Who employed you to make the inventory?—A. I am friendly with Mr. Siji, the manager for Shimamoto. He wanted a salesman and a bookkeeper. They were all in quarantine, and there was nobody to attend to those goods. I had information from Mrs. Shimamoto, and she asked me as a favor to look after the goods, and what I have done I have done for Mrs. Shimamoto.

ED TOWSE, called for the claimant, sworn.

Mr. BALLOU. During the plague times were you connected with the board of health—working for them?

A. Yes, sir.

Q. In what way?—A. I was assistant superintendent of Chinatown quarantine from about the 17th or 18th of December until the 21st or 22d of January.

Q. Do you remember the case of the warehouse of Shimamoto, near Chaplin lane?—A. A big stone warehouse.

Q. What did you do in connection with it?—A. Well, I sent stuff from that warehouse to the city feed warehouse on Beretainia street.

Q. What was the cause of the damage to the building in the first place?—A. Smoke and water.

Q. Did you see the building after it was damaged?—A. Yes, sir.

Q. Do you know whether or not the contents had been inventoried by the board of health before you took them away?—A. I think so.

Q. Do you know by whom?—**A.** The work was started by Mr. King. I don't know whether he completed it or not. My impression is that Mr. King started it, and it was completed by Mr. Weeden and somebody else at the custom-house. No; I want to change that right now. The inventory was completed. I think it was done by Mr. Max Berger, a German who speaks Japanese. I think Berger is still in the Territory.

Q. Now, at the time—you cleaned out the warehouse, finally?—**A.** Yes, sir.

Q. At the time you carried the things away, they were finally disposed of. Did you take them out of the warehouse or from the outside?—**A.** They had all been taken out. I think some small quantity had been already taken out, but not to amount to anything.

Q. Most of it still remained in the warehouse?—**A.** Yes, sir.

Q. Can you give any information as to whether or not you know what became of that inventory taken by this German?—**A.** No, sir; I don't know whether he finished it up or not. I spoke to him about finishing it up a number of times. I think that he completed the inventory.

Q. Was he working for the board of health?—**A.** Yes, sir.

Mr. BALLOU. Have you any independent recollection now of the number of tubs of shoyu that were there?—**A.** No; I suppose there were several dray loads of them sent up to the City Feed Company's warehouse.

Q. Do you know what became of them?—**A.** No, sir; I think they went back to China.

Cross-examination:

Mr. ANDRADA. Did you go over to clean out this warehouse prior to Mr. King being there or subsequent to his being there?

A. Part of the time that I was there Mr. King was there. Mr. King and I was or had charge of the cleaning it out until Mr. King had to leave, and I had charge of the taking it away.

Q. You attended to that part yourself?—**A.** Yes, sir.

Q. Can you say whether or not, Mr. Towse, from your present recollection, whether there were 110 tubs of shoyu there?—**A.** No, sir; I don't know.

Q. Did you notice some beans there?—**A.** Yes, sir.

Q. Could you say whether there was five or six hundred bags there or not, or more?—**A.** No, sir.

Q. You can't say how much or what quantity there was of any one thing, could you?—**A.** No, sir; it would be simply conjecture.

Q. And you do not know what disposition was made of the goods after they were taken to Beretainia street warehouse?—**A.** No, sir.

Q. Was that inventory made while the goods were in the house—the warehouse—or after the goods were taken out of the warehouse?—**A.** I think while the most of them were in, nearly all; some were taken out as rapidly as possible to get them out of the way.

Q. Were they taken—were they removed from there, and how long was it after the fire they were removed from there?—**A.** It was several days.

Q. And have you any recollection, Mr. Towse, as to the number of bags of beans that caught your eye?—**A.** No, sir; I can't say.

Q. Suppose 600 or 700?—**A.** I should not think there were that many.

Q. Is there any way when these goods went from this place—was there any way of the German giving a receipt for so many bags on his receipt?—A. No, sir; our orders were simply to send all of that stuff to scows to be taken to sea and thrown over.

Q. A part of these goods were taken to the city feed store warehouse?—A. The saki and groceries.

Q. You don't know what became of that?—A. No, sir.

Q. Do you recollect the condition of the stuff that was taken to the warehouse, what condition it was in at the time that it was taken from the warehouse to the city feed warehouse?—A. The stuff that was taken from the stone warehouse to the city feed warehouse was in pretty fair condition; that is, the outward appearance; I don't know how it was inside.

Q. You can not recollect the amount or number of cases and the kind, or both?—A. Several dray loads were taken from the stone warehouse to the city feed store warehouse.

Q. Would that mean several hundred tubs? Were they double drays?—A. Yes, sir; they were great big drays.

Q. Where was the city feed warehouse?—A. On Beretainia and Punchbowl.

Q. Do you recall any other information?—A. There was quite a quantity carried to Kakaako.

Q. What was its condition?—A. Good.

Q. Do you know anything of the final disposition of those goods that were taken from the warehouse to the city feed warehouse?—A. No, sir.

Q. Who was keeping the warehouse at that time; do you recollect?—A. No, sir.

Q. This was in January, 1900?—A. Yes, sir.

GEORGE R. KING recalled for the claimant.

MR. BALLOU. Mr. King, were you under the impression that you had taken everything from the warehouse and piled it up in Chaplin lane?

A. Not the first day.

Q. Finally when you had cleaned out the warehouse and piled it outside?—A. Yes, sir; I was there when we pulled the roof off.

Q. Now, Mr. Towse says, as compared with the whole amount in the warehouse, there was only a very inconsiderable amount outside, and when he cleaned out the warehouse and the great bulk of the goods he took out of the warehouse that they were not put back.—A. I don't know; not that I know of the second day. Right in front of this building right on Nuuanu street, there was a new building only partly burned standing in such shape we wanted to pull it down, and I was around there in the evening and I was there while we pulled a portion of the roof of this building off. Just how soon after that it was I don't know. At that time everything was out.

Q. Your testimony with regard to the quantity was based on what you took out of the warehouse and put on the lane?—A. Of what was left on the end of the first day.

Q. And on the second day the walls were taken out, were they?—A. The walls?

Q. The merchandise?—A. I think so, to the best of my recollection. If I had thought I was going to be called on, I would have made a note

of it; but my recollection is that on the afternoon of the second day I went around there and everything was cleared out; and the white men that we had there came to me the afternoon of the first day—Towse had found him for me—and he was left there in charge. He was there on the second day. I remember of going in there on the afternoon of the second day. I think that is the afternoon that we pulled down the other house for fear that it would fall down; and my impression is that everything was out at the time that building was pulled down.

Mr. ANDRADA. You have testified that you cleaned out one room and a part of the cellar?

A. No; my men were working cleaning out the one room and a part of the cellar, and we didn't it the second day; and the second day I had to go back to the office, and Mr. Towse agreed to take care of my men as well as his own.

Q. When you left was there a great quantity of goods still in the warehouse?—A. As I remember it, not a great quantity. I think we had two-thirds of it out the first day; and when I went around the second day the men that I had with me on the first day were helping to displace this burnt lumber.

Q. Could you say that the entire warehouse was occupied with these goods?—A. I can not. I don't remember the dimensions of the warehouse. I have not been around that way for quite a while.

Q. All that you cleaned out was the one room and the cellar?—A. Yes, sir.

Q. When the roof was taken off of there how many rooms—how many stories?—A. Two stories and a cellar.

Q. Was there anything underneath the roof?—A. No merchandise. On the second floor?

Q. Yes, sir.—A. The floor was broken through in places, the plaster broken down in places into the lower story, and, as I remember it, I have seen the men up there in that upper story. I couldn't see whether there was any or not, really.

RICHARD WEEDEN, recalled for claimant.

Mr. BALLOU. At the time you made that inventory of the goods in Shimamoto warehouse were the goods inside of the warehouse?

A. Some of them were inside and some out.

Q. About what proportion was inside and what proportion outside?—

A. I think, if I remember correctly, most of the saki was outside and the fish in the cases outside. I think that perhaps one-third was outside. I don't know that there was one-third, but there was a considerable outside.

Q. Have you any independent recollection now as to the number of tubs of shoyu in general there were in that place?—A. No, sir; I can not tell you, really. I have forgotten now.

Q. Do you know whether there was 100, or 200, or 500, or 1,000?—A. I should think there was a big number of tubs, about 1,000; quite 1,000 tubs.

Q. What did you do with the inventory?—A. I gave it to Mr. Towse.

Q. Was the inventory in your handwriting?—A. Yes, sir.

Q. Do you identify this as the inventory that you made?—A. That is not my handwriting.

Q. I understood that was the original.—A. That is the original that Mr. Anno made.

Q. Who else was there while you were making this inventory?—A. Japanese.

Q. Anybody else?—A. Mr. Towse was there and Mr. King, the gentleman just gone out.

Q. Were there any other persons there?—A. Maybe some other people around there; not that I know of doing anything.

Q. Do you remember a German that speaks Japanese?—A. There was a German—Hackfield's man.

Mr. BALLOU. One is Max Berger?

A. There were one or two Hackfield men around there.

Q. One could speak German and Japanese?—A. I wouldn't be positive about that.

Q. Did you take an inventory of the whole stock that was there?—A. Only a part. I was there two days and then went away. I wasn't finished, and I handed it over to Mr. Towse and some German, a Hackfield man. I gave it to them.

Q. You passed your half over to them?—A. Yes, sir.

Q. And informed him what goods you had taken?—A. Yes, sir.

Q. How about the valuation of that inventory—that inventory that was made?—A. Yes, sir.

Q. Where did you get those valuations?—A. Was from our valuations.

Q. You have means of arriving at the valuation of shoyu, and everything of that sort?—A. Yes, sir.

Q. Is this your valuation, the cost to land, the port valuation?—A. Port valuation.

Q. That is not the valuation of everything that comes before this commission, in arriving at the valuation is the cost, but I believe it is understood in this particular instance, it is the market value.

Q. (To the witness.) Did you put that in there, 10 per cent over the cost?—A. I took as the valuation in Japan the market value in Japan.

Q. How do you know it was 10 per cent over cost?—A. No, sir; it was not 10 per cent over cost of the market value in Japan.

Q. I thought to that you added the cost of importation?—A. No sir; I didn't add any cost at all; I took the cost of the goods in Japan at the time.

Q. Then the inventory that you made is based on the prices in Japan?—A. Yes, sir.

Q. Not the prices here?—A. No, sir.

Q. Have you any idea where that inventory is?—A. I can not tell you. I thought the thing was all over. I handed it to some one that was present at the time, and said I had nothing more to do with it.

Q. Will you run over that [here the witness is shown an inventory and see if you identify it as being something like the inventory that you made?—A. If I remember right, that first lot is what I did.

Q. And just two cases?—A. Yes, sir.

Q. As you made it?—A. Yes, sir; that is what I recollect.

Q. Do you identify that?—A. Yes, sir.

Q. The quantity?—A. Yes, sir.

Q. How are those prices?—A. Those prices are about right, sir according to the market value in Hongkong at the time.

Q. That is, the market value here with 10 per cent added?—A. The variation; they vary this size considerably, and did at that time.

Q. This was made up at the time, and this is supposed to be the price at the time. Now, you say that you put the valuation on your own inventory and the valuation was the Japan price, the price in Japan?—A. Yes, sir.

Q. Now, you make the statement that this price seems to be right, and yet there is the freight to add?—A. If you add 10 per cent to this, and the weight of the tubs vary, that makes a considerable difference to add 10 per cent.

Q. On the shoyu?—A. Yes, sir.

Q. You mean \$1.40 American money, gold, and that would be your appraisement of a tub of shoyu as the cost in Japan?—A. No, sir; that is not American gold; that is Japanese.

Q. I understood you to say that was American gold. Let us understand it. When you say that \$1.40 would be your appraisement on a tub of shoyu, you mean that it would cost \$1.40, yen, in Japan?—A. Yes, sir.

Q. Now, what would be the market value of that tub of shoyu here; what would you add for commissions, etc.?—A. The market value was at least 50 per cent more.

Q. And the cost—what would be the cost—allowing that it was \$1.40 silver yen in Japan, with the freight and charges, what would be the cost landed here?—A. Bring about 95 cents, American money.

Q. Ninety-five cents additional?—A. No, sir; 95 cents, American money.

Q. For a tub of shoyu?—A. Yes, sir; about 40 cents, with 50 cents added.

Q. And \$1.40 would be 70 cents, to which you would add the freight?—A. And 10 per cent duty.

Q. So that would make the cost 95 cents here?—A. Yes, sir.

Q. That is the inventory that you extended there?—A. I didn't extend those; I have my figures; I didn't extend any; I didn't have time to finish it.

Q. What would you say, Mr. Weeden, to that first item, 924 tubs of shoyu; at that time what estimate would you put?—A. One dollar and forty cents Japanese.

Q. That is the cost landed here?—A. No, sir; I took it at Japanese prices, not American prices, landed here, and then the expense and charges was to be added on afterwards.

Q. Then what would you call that; you call that landed here about 90 or 95 cents gold?—A. Yes, sir.

Q. And what has he got in there?—A. One dollar and forty here. The COMMISSIONER. Mr. Ballou, is this claim yen or American gold? Mr. BALLOU. It is American gold.

Q. (To the witness.) Does the price of shoyu vary?—A. Yes, sir.

Q. In the different grades does it vary in the market value, away up at one time and away down at another?—A. Yes, sir; varies very considerably.

Q. Is it a liquor?—A. No, sir; it is a sauce.

Q. What was the condition of those tubs when they left the building after you had appraised them?—A. Some of them—I was not supposed to look inside—I can't tell you. Some of them on the outside

were wet; they were dirty; there was water on some of them. Some of them were taken out and dried off.

Q. As a matter of fact, some—there are a great many tubs in that condition, and injured?—A. Yes, sir; but we couldn't tell on the inside.

Q. On the outside?—A. It was only water on them.

Q. And then on the inventory dated November 25, 1899, 300 tubs of shoyu at \$1.40 Japanese?—A. That is about right.

Q. Then on another 50 tubs \$2.16?—A. That is right.

Q. Two qualities?—A. Yes, sir; they vary. There is three or four different grades; that is, some at \$2.50 and some of it as low as 90 cents.

Q. How high does shoyu run?—A. Two and a half and two sixt according to the grade—a very fine grade of shoyu, and where it is the more money you get for it.

Q. What would be the value of the 2.60 laid down here?—A. You add about 25 per cent altogether; add to that—

Q. Just about the cost of importation 25 per cent?—A. Yes, sir.

Q. You have no independent recollection when the steamship *Lady Joyce* arrived here?—A. I remember the vessel.

Q. I find by the *China*, October 13, 110 tubs of shoyu, 2.35 yen; the would be right, 50 tubs, 1.30?—A. Yes, sir; there is a difference in the quality, the double price.

Q. I call your attention to this 50 cases of canned goods, assorted 432 yen. Ten hundred and thirty tubs of shoyu by the *Lady Joyce* she came in on the 20th of December, 1899; 780 tubs, 1.60; 1,000 tubs 2.25; 100 tubs, 1.40; 100 tubs, 2.65.

The COMMISSION. That shoyu wasn't on hand at the time; it is dated the 20th of December, 1899. That has nothing to do with that date; that wouldn't have been very strange to us to have 1,000 cases of shoyu on hand.

Q. (To the witness.) Do you recollect when you first took the inventory?—A. No, sir; but I think I can look it up.

The further hearing of this matter is continued until the 1st day of June at 9.30 a. m.

JUNE 1, 1901.

MORNING SESSION.

Mr. ANDRADA. I find among the papers of the board of health what seems to me to be the original inventory; it shows that it was taken at the Beretania street warehouse, and in the same envelope I find this paper which seems to be a copy of that, and possibly the original of the one that Mr. Brooks has presented here.

I found this inventory; I do not know in whose handwriting it is; it is not signed.

The COMMISSION. I would like to ask you, Mr. Ballou, to explain to the claimant that the commissioners have not interrogated him here in open session as to the manner of his keeping his books after giving the amount of money in the business, who he owed, and all these things that can be taken up in executive session in adjudicating this claim.

That he would not like to testify before the public, but just before the commission. It is not the idea of this commission to do an injustice that way. We do not expect anyone to give their business away to the public; we here who are in business—at least our merchants—

we haven't or do not intend to ask one as to the way he is conducting his business—anything that he wouldn't like others to know; not because it wasn't right—it is something that takes up a good deal of time—any question that we have a right to ask in connection with his business and his books, and that he need not put them in until we are in executive session.

Mr. ANDRADA. I saw a member of the board of health who was connected with the board of health during that whole thing; he said that Mr. Weeden and Mr. Berger and a third party he didn't know just then, and I asked him to come this morning; he said he had to go to a meeting which would not be over before 10 o'clock.

A COMMISSIONER. When was the institution of the fire?

Mr. ANDRADA. This is a card made to Mr. Gottenberg merchant committee as depositor of the goods taken at the Beretania warehouse.

A COMMISSIONER. I think we ought to follow this case as far as we can.

Mr. BALLOU. Assuming that this will be identified, I would like to call the attention of the commission to it. There is an estimate of 1.40 shoyu tub as it is here in two places.

A COMMISSIONER. Anything that would throw light on it would be more than acceptable. I don't think that the attorney for the claimant would object to anything that would throw light on it.

H. E. COOPER, called for the claimant.

Mr. BALLOU. Mr. Cooper, during the epidemic of the plague here, in 1899 and 1900, were you for a time president of the board of health?

A. Yes, sir.

Q. Up to what time?—A. My recollection is to the middle of January, when I left the board.

Q. And then you left the board entirely?—A. No; I was a member of the board, but not president.

Q. Who became president of it?—A. Dr. Wood.

Q. Do you remember the warehouse of S. Shimamoto in Nuuanu street near Chaplin lane?—A. Yes, sir; a coral building. Yes, sir; I remember it.

Q. Do you remember the fire adjacent to that which damaged that warehouse?—A. Yes, sir.

Q. By whom was that fire set and in what connection?—A. Set by order of the board of health.

Q. In connection with the suppression of the epidemic of the plague?—A. Yes, sir.

Q. Had there been any case of bubonic plague?—A. Yes, sir; three cases. Two cases were taken out on Sunday morning, the last day of the year, 327½, I think it was, where the case occurred, and the buildings ordered burned there of Ahlo and the land running into the alley. I think there was damage done on the mouka side of the warehouse that wasn't condemned, but it caught fire from the fire near it.

I really can't find the list of all the fires that were set by the board of health for the suppression of the plague, but there should have been a list kept by the secretary up to the time that I left. I don't know what was done after I resigned as president of the board of health. There was a list kept by the secretary and also a list kept by the appraisers, who were appointed by the board of health, Mr. Olcott and Mr. Welhemi. They kept a list of the buildings that were burned by

the board of health, and the character of the buildings also, and photographs of the buildings were taken also as they were burned, and also a photograph after the fire, to show how they were burned.

The COMMISSION. Do you recollect the date of the fire?

A. I think it was the last day of December. My recollection is that it was on Sunday morning that the fire was ordered—1899. I believe the plague broke out on the 12th or 13th of December, 1899, and the fire was on the 31st day of December, 1899.

Mr. BROOKS. I will ask you this for the purpose of some cases that I have following this: Can you state whether the fire that was originally started on that day—how that fire was started—by whose orders?

A. No; I had very little to do with that fire, Mr. Brooks. I was just a member of the board of health. I had no direction of the fire at that time; that was under the new president. The three fires that I did order, that was on the corner of Monaiika.

Q. As to the date of this fire, under the order, the same order?—A. The fire at the corner of ——— was the only building on Nuuanu street. I think it must have been the first week in January; perhaps the 3d or 4th of the month; I am not positive about that. The fire on Kaakalili street was the fire just before that.

Mr. ANDRADE (to the witness). Did the commission ask any one to go to this warehouse in the rear of Ahlos—this coral house—and take an inventory of the goods in that warehouse?

A. My recollection is that I did after the fire, not on the date of the fire; I think that I applied to the custom-house for some one to go up there and make an inventory, and some one was detailed by the collector of customs.

Q. Do you know where the goods were taken to that were there in that warehouse?—A. There were a large number of bags containing fish. They were first piled up against the fence on the Waikiki side of the building, and I think the most of them were taken out to sea, the becoming very offensive, and, being damaged by water, they were taken out to sea and destroyed.

Q. Were any of the provisions in that house taken to the warehouse on Beretania street?—A. My recollection is dim, I think; I think something of that kind did happen, but I won't say that it is so.

Q. Do you know whether the government or the board of health has ever realized from the goods that might have been saved from those fires—that is, in consequence of any damage, I mean, by the sale of the goods or anything?—A. Not to my recollection.

Q. The evidence shows that a good deal of these articles were taken from that warehouse to this house on Beretania street, but we could not trace the final disposition of the goods.—A. I have no recollection of them; I have no recollection of any sale whatever. The general method of procedure was that the board was satisfied that goods taken from the warehouse buildings were free from contamination; then they were delivered over to the person who claimed them—I can not say about this specific matter—but I should say undoubtedly there was a registration of the board of health that could tell about it as there was a committee appointed for that very purpose.

The COMMISSION. We have got evidence here that shows a part of the goods were dumped into the sea, and a part of them went to the City Feed Company's store, that is on the corner of Punchbowl and Beretania street. The witnesses for the government and for the other

side say that they went there; that is, tubs of shoyu, and there were also crates of crockery. Now, the question before this commission is, Did the government ever turn these goods back to the claimant, or was a receipt taken from the claimant for those goods; and if they were not, where did they ever go to? Now, if you can, suggest some way in which we can find out, get at the proof of where those goods are, or whether the claimant ever took them, or has received compensation for them—for those goods.

A. My recollection is—I can't say after the fires had become more numerous—in regard to the taking of this property, merchandise, the citizens' committee was formed, and they tendered their services throughout the trouble and were kept as general supervisors of goods being removed from the buildings to be burned, and they had general supervision over them. At this particular fire no such committee existed, I think, and I think the goods were taken away and destroyed by the order of the board of health. Those that were taken to the Beretania street warehouse, I can't say how they came to go there—it is a matter of recollection and it is a long while ago, and I have not tried to refresh my memory—I can say that my impression is that there were a number of packages taken from this yard. They were taken out and they were not destroyed; they were taken outside, and that that was damaged was taken out to sea and destroyed, and those supplies that were taken out there, and I can't say whether they were turned over to their proper owners or not.

Q. Could you suggest some way in which we could get at that—information that we could send for and find out?—A. I should suggest Mr. Reynolds, who was the executive officer of the board of health at that time. Mr. Weeden was the clerk detailed by the custom authorities to take charge of it, and Mr. King, who is now in the auditor's office.

Q. They all testified that the goods went there, but my recollection is that they did not know what disposition was made of the goods after they went into the building. It may be, as you suggest, that Mr. Reynolds is the person.—A. I don't know; but as a rule it was under his control at the time. I know that the collector for the board had control of all the warehouse, and I should say who had charge of the warehouses might be able to furnish some data. They must have kept books at the time, and they will show the receipt, or should show the receipt, by the teamster. There were three that should have a record of it: it may be that Mr. Wilhelmi might have it. There were photographs taken, but that was done before the torch was applied. In this matter of the warehouse wasn't anticipated, and no precaution was taken as to that warehouse. The firemen thought they could take care of the warehouse. The fire through the window, and that is how great damage was done by the water. It was flooded by water.

Q. One of the principal reasons for your appearing before the commission was for the purpose of informing the commission as to the origin of the fire, and on what authority the fire existed. You, being at that time the president of the board of health, was one of the executive officers of the board and one who authorized the applying of the torch?—A. Yes, sir.

Q. Now, will you kindly state what induced you as a member of that board to issue such an order?—A. The formal resolution, Mr. Pratt, that was passed would be better evidence. The resolution was

passed stating the terms and reasons why the board proceeded, and the resolution was passed by the board, and then it became my duty as chief executive officer to do it, which I did.

Q. Then, it was from information that you had from local source and others that there was an epidemic and as to its character?—A. Yes, sir; that seemed the most efficacious way of fighting; that was by fire at that time. We thought that ought to be undertaken, that as it is the right of the claimants to recover, that this should be in the first place instituted by the order of the board of health. And parties came in and informed particularly that his goods and wares were lost as a consequence of that order; we had no information as to what particular property was ordered burned, and, as gathered from your evidence, that the property ordered burned was on the corner of Chaplin lane and in the vicinity of Beretania street. Naiki of Ahlo's, this warehouse wasn't among the condemned buildings; it caught afire.

Q. But you know of your knowledge that this loss occurred in consequence of the order of the board of health, the order to burn?—A. It may be that the fire was caused by that.

Q. For the information of the commission, you were speaking of the resolution adopted by the board of health. Wasn't the basis of your taking action on those resolutions; are these records obtainable to ascertain what was done leading up to that?—A. I should say that the secretary has the full record; that the minutes were read from day to day.

Q. Who was the secretary of the board?—A. Mr. Wilcox.

Q. And the records are with Mr. Wilcox, so far as you know?—A. Yes, sir.

Mr. ANDRADE. Has this inventory of these goods ever come into your hands; have you ever seen it?

A. I can't say yes or no.

The COMMISSION. Now, we want to know about these goods; where they went and what became of them.

Mr. BALLOU. It is unfortunate with the merchandise accounts. I have got a lot of cases of simply people being burned out of personal property on the 20th of January; coming along to that this record will have very little bearing on it.

The COMMISSION. And when it comes to this case again we are blocked; so that in getting the government's evidence in such a shape then we will be prepared to go on when the case is called.

The CHAIRMAN. We will give the government a week, of course. Should the government get ready in three days we can go on with this case and Schedule B, and that will give counsel an opportunity to determine for the government what he will do.

RICHARD WEEDEN recalled.

Mr. ANDRADE. I found this also, which is a copy of a paper that found. (To the witness.) Do you recognize that?

A. It is not my handwriting there.

A. GOTTENBERG, called for the Government, sworn.

The COMMISSION. Do you know anything about the taking of these goods to the City Feed Company's feed warehouse, on the corner of Punchbowl and Beretania street; that is the place where these goods went to?

A. Went there; what is in that receipt book.

Q. Do you know who was in charge of the goods in that building?—

A. A man named Gottleman.

Q. Where is he?—A. In Steiman's cigar store, on the corner of Hotel street and Fort.

Q. He was there in charge of this warehouse by order of the board of health, was he?—A. Yes, sir; I think so.

Q. You were on the merchants' committee?—A. Yes, sir.

Q. Did any goods go from there that you know of into this warehouse—the City Feed Company's warehouse?—A. Yes, sir; according to the receipt on the book.

Q. Do you know what disposition was made of those goods after they went in there?—A. No, sir; simply received by Yaumoto. My position on the citizens' committee was treasurer. I paid all the bills and received the money and paid the laborers; that was my connection with the merchants' committee. I had charge of that. I paid all the bills, and paid them out and kept them in a book at the same time.

Q. You don't know, Mr. Gottenberg, what went in there?—A. No, sir.

Q. Do you know whether they were under the control of the merchants' committee or the government?—A. Yes, sir; the merchants and Mr. Gottleman took charge of the warehouse.

Q. Is this the receipts for the goods taken in there?—A. Delivered from there.

Q. Then these receipts show where it went to?—A. The person that received the goods. Whether they were delivered to the owner of the goods I don't know.

Q. Who was chairman of the merchants' committee?—A. Mr. Wako-field, Keiser, and Humberg; they were appointed by the merchants.

Mr. BROOKS. At the request of the board of health?

A. I think that the merchants worked with the board of health at their own suggestion.

Q. When were you first employed on this work; when did you first enter upon those duties; do you recollect the first work?—A. It was previous to the fire.

Q. Which fire?—A. The fire of January 20—the big fire of January 20.

Q. Were you so engaged on December 31, or the early part of January?—A. Well, in the early part of January, I don't remember exactly.

Q. Do you recollect taking the goods away from Shimamoto's place?—A. No, sir; that was not part of my work; I received the goods from the stores.

Q. What was the nature of your work?—A. I was treasurer of the committee.

Q. What duties had you to perform?—A. To save goods from these stores prior to the conflagration; from the stores that the board of health had condemned.

Q. Now, when was it when they entered upon their duties?—A. It was after the fire at Shimamoto place; previous to that they had nothing to do with the goods there; I haven't it in my mind, but I can find out.

Q. The fire that caused the loss to Shimamoto was on the 31st day of December, the building that the government through the board of health took charge of and some goods that was in the warehouse, and the fires of the 1st, 2d, and 3d of January. Was this merchants' com-

mittee organized at that time or subsequent?—A. I think they were organized after the fire on the east side of Muuanu street back of the Shimamoto warehouse.

Q. You gave the names of those who constituted the committee?—

A. Wakefield, Keiser, and Humbert.

Q. Is this the complete receipt of all the goods that went out of there?—A. Yes, sir; given to Shimamoto at that time.

Mr. BALLOU. Mr. Chairman, I ask permission now, in connection with this case, which is a Japanese case, to introduce my general line of evidence as to the way in which all Japanese cases have been handled and made up. I will state my reason for asking it at this time, and it is a most important one, in regard to saving the time of the commission. My idea is to show the care with which all of these claims have been handled by the agents of the Japanese Government; have the evidence of record, and have it presented to the government officially.

We may be able to arrange a compromise of a great many of the smaller claims—of the personal property, Schedule B. That compromise, I understand, Mr. Andrade, would have to be submitted to a higher authority; that is why I would now like to get it of record, in order that it might be transcribed and put in a position where I can say to the government: There is the evidence of the care with which these claims have been made up, and in view of all the reduction that have been made on them, and the number of claims thrown out and canceled, I would like to submit the following proposition by way of an adjustment of all the smaller claims that are here. I would like to put it out now and keep it as a part of my first case, it being evidence which will be applicable to all of the cases.

The CHAIRMAN. Is it in a written form?

Mr. BALLOU. A part of it is in written form. I have the proof of the consul-general of Japan as to the methods which they have pursued. It was my purpose to put on the stand the consul-general of Japan and the secretary of the consulate, who has been his executive officer during this time, and one or two Japanese merchants' committees, to show in detail the methods which they have employed in setting out each of the particular claims which have and will be introduced here.

Mr. ANDRADE. These parties are here, are they not?

Mr. BALLOU. Yes, sir; nearly all of the claimants are here. This applies to case or claim No. 1 at the present time. This is the oral testimony concerning as to how the claims were made out and revised and prepared by the consulate, the Japanese claims; and those claims were handled a little different from the others. I wish to simply offer the testimony orally now as to how these claims were handled. I don't want to go into any particular case, but as they come in their order will be considered, in any compromise that I might make with the government. This general evidence will apply to case No. 1, 7, 8, 11, 13, and 14, and so on down the list taken in connection with case No. 1. One of the first things that I shall prove is that every Japanese claim of personal property—

Mr. PRATT. Is held under an assignment?

Mr. BALLOU. No, sir; was made up by getting the man's statement while he knew what it contained and immediately after the fire, so that there was no chance for an outsider who was not a sufferer to get in there at all.

I wish to state to the commission that the general evidence that I shall offer—that the compromise that I am now endeavoring to arrange with the government is some of the small claims that do not concern the commission. I am not asking to be relieved of producing the best evidence.

Mr. PRATT. A limited statement—it might be well for you to acquaint the government with what your intention was, so they might know before we proceed to determine whether or not we will consider it.

The further hearing of this matter will be continued until the 3d day of June at 9.30 o'clock a. m.

The Government is given one week from this date to proceed.

JUNE 3, 1901.

MORNING SESSION.

The further hearing of this case is continued until the 6th day of June at 9.30 a. m.

JUNE 6, 1901.

MORNING SESSION.

Mr. BALLOU. The witness that I was going to call is not here, Mr. Emishi, who had charge of the matters up to the time they were turned over to the consulate, and had charge of them all. I will have to let that go for the present, and ask the consul to come forward and be sworn.

MIKI SAITO, called and sworn.

Mr. BALLOU. What is your official position?

A. Imperial Japanese minister stationed here.

Q. In Honolulu?—A. Yes, sir.

Q. And you have held that position how long?—A. Here in Honolulu?

Q. Yes, sir.—A. Well, it is about three years on the 9th of September. In 1898 I arrived here.

Q. In 1898?—A. Yes, sir.

Q. So you were here as the consul during all the time of the suppression of the bubonic plague?—A. Yes, sir; exactly.

Q. What did you do in your official capacity in regard to the Japanese claims?—A. Well, at that time I was one of the representatives in Honolulu, and also I represented my Government in taking care—I was instructed by my Government to take care of the Japanese sufferers. Under these instructions that I received from my Government—

Q. And what did you do as consul in pursuance of those instructions?—A. In following out those instructions?

Q. What connection has the consulate with these Japanese claims that have been filed?—A. Well, I will tell from my memorandum. When first when the fire was ordered I was very anxious if there was any dispute between the government and the sufferers, and I told them to make an inventory of all the property destroyed, the various kinds of property. I told them not to destroy the property hurriedly without making an inventory.

Q. Have you made the statement?—A. It is very short. I repeatedly

told the Hawaiian government not to destroy property hurriedly and without having an inventory taken, which would save, the taking of the inventory would save, serious dispute afterwards in the future. On a later date, the 8th of January, 1900, just a year, I received from the minister of Hawaiian affairs. He informed me that it would be a very good idea for the companies to select their appraisers and personally appraise their personal effects before destruction.

Q. That was on the 8th of January before the fire?—A. Yes, sir.

Q. Well, in consequence of that did you do anything?—A. After receiving this information I immediately gave it to the Japanese that were situated in Chinatown.

Q. You did that by posters, did you?—A. Yes, sir; also posted it.

Q. It was posted in Chinatown immediately after the 8th of January?—A. Yes, sir; that all Japanese subjects should make a personal inventory of their effects. And I wish to show a copy of the law which I had written of the Hawaiian government. I had that inserted, the same that I received from Mr. Mott-Smith, minister of affairs of the Hawaiian government:

HIS IMPERIAL JAPANESE MAJESTY'S CONSUL-GENERAL,
Honolulu, 5, 1900.

Mr. MOTT-SMITH, *Minister of Affairs*:

I want to acknowledge the receipt of your letter in answer to mine of the 3d instant asking for an expression of an opinion from me as to the government's liability to compensate those Japanese whose property has been burned or otherwise destroyed—that property which may have been burned by the government by the regulation of the board of health during the plague in Honolulu. The opinion that the government—the liability is between the government and the owners and occupants of the destroyed property—that will have to be left for the future to determine. The Japanese are entitled to a consideration. As to whether the Hawaiian government will hold itself responsible for the compensation.

(Here the consul filed letters with the clerk.)

Q. (After reading.) Now, after the great fire of January 20, what was done by the Japanese toward collecting their claims?—A. When I received such information from the Hawaiian government I gave a notice to the Japanese living in Chinatown, and they obeyed my voice and took my advice, and the inventory was made at this time and at the time at Camp Kalihi and Kakaako. It greatly benefited us for the subsequent work. But at this time the only way to make it out, the inventory, and a price for the property, if it was possible. After the great fire of January 20 there was a Japanese society under the name of the "Japanese United Society." I think this society sent out a committee to the camps at Kakaako and Kalihi, and the committee furnished Japanese sufferers with paper for the use of a description of their goods.

Q. (Here the witness is shown a blank.) Are these a sample of the blanks which the Japanese committee took into the various camps and obtained a statement from the sufferers while they were in the detention camps?—A. Yes, sir.

Q. That is the form of the blank that they filled out in the detention camp by the Japanese committee?—A. Yes.

Q. Is that for the merchandise?—A. That is for personal effects.

Q. Were the merchandise ones filled out in the camps?—A. Yes, sir; some of the merchandise.

Q. Were filled out in the camps?—A. Yes, sir; by the proprietors of these shops. They were destroyed by the fire; were mostly outside of Chinatown.

Q. And were any of those taken to the detention camps?—A. Yes, sir.

Q. Now, what was done with these slips which were filled out in the detention camps by the sufferers?—A. When they were filled up this way by the sufferers themselves, then the committee takes them, this inventory, to the office of the Japanese Society—the Japanese Society we will call it. And the Japanese Society having received these inventories they appointed a shipping committee for the investigation, and this shipping committee examined and investigated all through these original inventories for about one month or two.

Q. Was the Japanese consulate officially represented on that committee?—A. No, sir.

Q. It was not?—A. No, sir; that had no particular connection with the Japanese Society, because every member of the Japanese consulate was very busy.

Q. When were these turned over to the consulate?—A. After we took the Japanese Society—after they were gone over by the Japanese Society, they were then turned over to the Japanese consulate, and all of these inventories, they were subject to further investigation; it was on the 7th of March, 1900.

Q. That the committee turned it over to you, and induced you that a further investigation should be made in the matter?—A. Yes, sir. This was the 1st of April, for the Japanese consulate—before the Japanese consulate was connected with the work of investigating the Japanese claims.

Q. Now, what was the first thing that the Japanese consulate did with these claims from the 7th of March, at which time they were turned over by the Japanese Society?—A. When we received these inventories from the Japanese Society I ordered all Japanese sufferers to make out—the men living outside of Chinatown, everybody in the city—to appear personally before me. It was the end of March or the middle of April, and we subsequently inspected each of their inventories that was presented to me, and urged an inspection, investigation, and an examination.

Q. Was that done at the consulate?—A. Yes, sir; and any claim that appeared to be dishonest or supposititious was unceremoniously disregarded, and the proper claims ordered translated and type-written.

Q. That is, translated into English?—A. Yes, sir [referring to a lot of claims]. This represents a bunch of 100 that I selected at random last Saturday.

Q. Are they originals?—A. Yes, sir; these are in Japanese and these are in English.

Q. (To the commission.) I call attention to that stamp on the back. I will go into this with a little more detail with Mr. Tunka, who had the immediate handling of these. I will go into the detail of those more afterwards.

Q. Then, Mr. Miki Saito, after the first examination by the committee they were turned over to the consulate on the 7th of March?—A. Yes, sir.

Q. And a further investigation at the consulate personally, and a rejection of some of the claims?—A. Yes, sir; and the claims that were approved of were translated and put into English, stating the claims.

Mr. ANDRADE (to counsel). Are you proving anything now in regard to the Shimamoto claim?—A. Has a bearing upon every one of these.

Q. That is, throughout on all the claims?—A. This is evidence that will apply mostly to my claims of personal property.

Mr. ANDRADE Is Shimamoto claim among these?—A. No, sir.

Mr. BALLOU (to the witness). Now, after these claims were properly translated into English, and they passed a second examination, what was done with them?—A. A third examination was had; a system of examination as to these inventories; the claims were compared with the claimants personally; the claimant was subpoenaed, and he was asked if that was his claim, and the duration of his residence in the Hawaiian Islands, the number of his family and employees, the amount of taxes which he was paying, and in some particular inventories, and for an agreement if I didn't know very well his standing; then we wanted some written certificate, issued by a responsible party living in Honolulu, guaranteeing the fairness of the claim.

The CHAIRMAN. In selecting the responsible person to verify these claims, what nationality was that person?

A. Was Japanese.

Mr. BALLOU. It was about this time that the first fire claims commission was appointed by the Republic; that was the time that the first fire claims commission was appointed?

A. Yes, sir.

Q. And that commission did nothing?—A. Which commission do you mean?

Q. The fire claims commission did nothing?—A. Well, it was the end of last April or the beginning of May. It was at the time of the first examination and investigation threw out our claims, not the actual standing of the fire claims court in May or the ending of April or the beginning of May. That has given us a very good opportunity to make and consider the second examination.

Q. Who conducted the second examination which was made?—A. At that time I asked Mr. Tanaka, the Japanese vice-consul, to be present at that committee.

Q. And how many did that committee consist of?—A. Well, this was the official part, and partly assisted by the special committee that was selected by me. Well, there was three or four, and many of them engaged by wages.

Q. Paid them for their work?—A. Yes, sir.

Q. Do you remember who was on the committee?—A. Mr. Tanaka.

Q. Who paid this committee?—A. The Japanese consulate.

Q. Do you remember who was on the committee besides Mr. Tanaka?—A. Well, they were changing; you can ask Mr. Tanaka; he knows.

Q. Now, all of this time you were in communication with your government?—A. Yes, sir.

Q. And made this the subject of your official reports?—A. Yes, sir.

Q. Now, after the time that Mr. Tanaka and the special committee took up their third investigation—what month was that conducted

in?—A. Well, the time in connection with the investigation of these inventories was more than one year, but I will tell you, the time of our second investigation, the principal part of the second examination was to ascertain whether the articles stored of the sufferers at the Alaa warehouse at the time of the fire in Chinatown, a large quantity of the Japanese personal effects they had moved and stored at the Alaa warehouse, and there was no one around to attend to them.

Q. So they were reported lost, and these were the first blanks that were made out in the detention camps?—A. Yes, sir.

The CHAIRMAN. Were there any subsequent blanks? Were there any blanks made out after these?

A. Yes, sir; and these went right straight down; in connection with that, it was all done right there; there is no separate blank on which the description was made.

Q. These [showing blanks] are the original blanks that were made when the sufferers were at the detention camp?—A. When the sufferers were at the detention camp, this was the style, and they were changed, and when the change was made they were then kept in English; the other changes were noted in English—some in Japanese, and some in English, and some in both.

Mr. PRATT. Now, when you refer to this claim, this corresponds to the original number, or the one that is now on file here.

Mr. BALLOU. I might suggest this one filed here, that is the official number—I mean this particular one. I intend when I present another claim of personal property—I intend to produce the original Japanese claim or blank, showing how it was first made out at the detention camp, and the English translation, and then present the claim for comparison.

Q. These have been in the custody of the consul all of the time?—A. Yes, sir; in the consulate.

Q. And have been there since the 7th of March?—A. Yes, sir.

Q. Then that committee, that special committee of which Mr. Tanaka was the head, began working by the month?—A. Well, his work is still continuing until now; after it begun we received these inventories from the Japanese society.

The COMMISSION. In any of these inventories is there anything allowed for the goods that were returned to them in any case?

Mr. BALLOU (to the witness). Is anything allowed in these inventories for goods that were returned to the sufferers from the Alaa warehouse?—A. Yes, sir; to some extent.

Q. I refer to claim 1893; can you state whether or not— —A. Yes, sir; that was returned entirely from the Alaa warehouse.

Mr. BALLOU (to the commission). These blanks I will state myself. I asked the consul and his secretary to pick out 100 blanks where claims were canceled, just to pick them out of the 2,600 claims, and these were picked out.

Q. Canceled claims?—A. Yes, sir.

Q. (To the commission.) I call attention to the treatment of the cash claims, \$150.

Q. Was that claim returned?—A. No, sir; never presented.

Q. They said it required more investigation?—A. Yes, sir.

Q. That was their objection?—A. Yes, sir.

Q. Where the claim was returned the claim was canceled?

Mr. BALLOU. Yes, sir.

Mr. PRATT. And where they were not satisfactorily proven they were canceled?

Mr. BALLOU. Yes, sir. I will ask Mr. Tanaka as to the details of this work and the number of cancellations.

The WITNESS. By our careful examination more than 20 claims were entirely withdrawn and more than 5,600 articles in various claims were canceled.

Cross-examination:

Mr. ANDRADE. You did all of these things in pursuance of the communications that you received from your home government, did you not?

A. Yes, sir.

Q. And the commission was appointed under your directions, as I understand it?—A. Yes, sir.

Q. This commission paid by the Japanese Government of your own personally?—A. Well, partly out of my own business. We never received any benefit—none at all.

Q. You did that personally?—A. Yes, sir.

Q. I am speaking now of the members of this committee appointed by yourself. They were paid?—A. They were hired men mostly; practical workers—clerical work.

Q. They were paid by yourself and not by the Japanese Government?—A. Well, yes, myself; well, we may say the Japanese consulate; not from the Japanese Government, but from the Japanese consulate.

Q. You mean yourself individually; you hired these men individually?—A. Yes, sir.

Q. And you paid them?—A. Yes, sir.

Q. Personally?—A. Yes, sir.

Mr. BALLOU. Out of the treasury of the consulate or your own personal funds?

A. Out of my own personal funds; certain money was deposited with me in my hands.

Q. Deposited by whom; by the merchants or by your own Government?—A. From the home Government.

Q. Now, how did you arrive at the different prices which you have here for the different goods?—A. That is very hard to tell, but we know what our Japanese shoyu is; we know the standing of those things; I got it out of my own head.

Mr. BALLOU. Mr. Saito, these that we have here are the personal property claims?—A. Yes, sir.

Q. What connection did the consulate have with the claims for merchandise destroyed by the fire; the Japanese merchandise?—A. The Japanese merchandise; as to the examination of the Japanese merchandise claim, I think we had intrusted it to the respective claimants themselves. We gave them from time to time our advice to make honest claims. I am therefore confident that in the matter of the claims they are subject to the closest examination.

Q. But you did not examine the merchandise claims themselves; you didn't do so yourself?—A. No, sir; I sent and advised the merchants and the claimants that they must make a careful examination, and that there would be a careful examination, and to produce honest claims, and they are still doing so. I have examined the claims five or ten times.

Mr. ANDRADE (to the witness). Now, for instance, as to the merchandise. There was a committee appointed by yourself to go into the loss occasioned by the fire?—A. No.

Q. How did you do that?—A. No, I never touched the figures at all. I don't know how they got them at the time of the fire, but I would order them to make a good examination for themselves.

Q. The committee did investigate?—A. No, sir.

Q. The merchandise claims?—A. No, sir; they had their own committee among themselves.

Q. They had nothing to do with the consulate?—A. Well, nothing; I can't say nothing. We had nothing to do with the merchandise. They examined the documents, the inventories; but I never changed the figures.

Q. How did you examine the merchandise claims?—A. Well, I read it from top to bottom, and examined as to any change.

Q. In that way you might discover if there was any fraud?—A. No fraud at all; there is no fraud at all.

Q. There was no committee, nevertheless, appointed to look into the merchandise claims; there was not?—A. By the merchants themselves.

Q. Who were some of these gentlemen, do you know?—A. Well, yes, about that, you ask the question; the president was a member of the committee himself.

Q. Who is he?—A. Mr. S. Ozaki.

Q. Then you personally know very little about the merchants' claims; is that so?—A. Yes, sir; not very much.

Q. Well, you know more about the claims as to the personal effects?—A. Yes; because some of them have no knowledge of the policy to practice to produce these documents; but the merchants they know better themselves than the others do.

Q. How did the committee arrive at the price stated in the inventory of the personal effects?—A. At the first time I mentioned the figures some were arrived at, but I think I did that personally myself.

Q. You have examined all of these claims, have you?—A. Yes, sir.

Q. Now, how did you know that these claims were invalid? Were they raised higher than they ought to be?—A. Well, I don't know; the claimant saw that it was not the proper thing; some of them were too elevated and they were lowered.

Q. But had you any regular schedule by which you could go on?—A. Regular standard?

Q. Yes, sir.—A. Well, no; not that I know of. We know the things possessed by laborers; we can see that it must be the standard price. When they mention shoes at \$8 or \$10, why then we cut it down to the proper figure.

Q. Did you have any claims that bore any such figures as \$8 or \$10 for a pair of shoes?—A. No, sir.

Q. Now, how long did that take to go through all of those claims?—A. By my own self?

Q. Yes, sir.—A. Well, from the 7th of March last until now.

Q. Are you sure?—A. Yes, sir.

Q. Did you have anyone that was more familiar than yourself with the different prices of the articles mentioned in these inventories to help you in ascertaining the proper figure and for figuring up the amount proper for the article?—A. Well, in the main the inventories and the figures are all proper.

Q. But that is simply a conclusion reached by yourself?—A. Yes, sir.

Q. You have nothing definite upon which to base these figures, have you?—A. But they are all different articles and different kinds of prices, so we can not make any decided standard. Some of them were bought here in Honolulu and some away from here.

Q. If you took the price that articles was bought for, did you allow for wear and tear?—A. It is very hard to answer that; ask Mr. Tanaka.

Q. For instance, a man had a pair of shoes that he might have paid \$3 for, and they had been worn for some time; then they would be no longer worth \$3?—A. No, sir.

Q. How did you get at that?—A. Well, the shoes when they are bought, then to the person they are worth about \$2.50. You must remember that the fire which was at that time was about the end of the year and the beginning of a new year, at the time when the Japanese generally buy new things.

Q. That is the custom?—A. Yes, sir; that is my experience, and those shoes mentioned in these inventories are mostly new shoes—most of the things, the valuable things.

Q. Well, you had really nothing authentic to go by, had you? You had nothing certain to go by but the figures mentioned in these inventories?—A. No, sir.

Q. You really went by the word of the claimant, who was then either at Kakaako or Kalibi?—A. We had made an urgent investigation and certain deductions from those figures mentioned by the claimant.

Q. Did you make a reduction of all the claims?—A. Yes, sir. You will find out by and by that there was a reduction made in the inventories as compared with the first one.

Q. Now, how many claims have been filed with you so far?—A. The total amount of claims, merchandise, 653.

Q. Is the number of the claims?—A. Under \$100 there are 1,078 and over \$100 up to \$250 there are 973, and over \$250 and up to \$400 or \$500, 455; from \$200 up to \$250, 973, and from \$250 and over, 455.

Q. How many claims in all?—A. Two thousand five hundred and six.

Q. Will you tell me how many committees have handled these claims and adjusted the price on the inventories?—A. We have got to take the things mentioned mostly by price. The Japanese consulate—

Q. How many committees?—A. Well, I have 5 assistants there, and also, we have referred to the committee of searching—

Q. How many committees to search are there—one?—A. Committee of thirty.

Mr. BALLOU. When was this committee of thirty formed—about when?—A. That was the beginning of April.

Q. Of this year?—A. Yes, sir.

Q. And then the committee of which Mr. Ozaki is head—that is the committee?—A. Yes, sir.

Q. After that committee was formed, what did the consulate do?—A. They kept writing everything; every night from 7 o'clock till 1 and 2 in the morning.

Q. For the purpose of doing what?—A. Segregating these claims.

Q. Who appointed the committee of thirty?—A. Appointed by the claimants themselves, the committee meeting at the Japanese school;

forget the date of the first meeting; we can tell you by and by. They were appointed by the Japanese claimants themselves.

The CHAIRMAN. And who appointed Mr. Ozaki the president of the committee?

A. By the committee itself.

Mr. BALLOU. And just what did the consulate have to do with the committee or their investigation?

A. There were many documents whose owners we didn't very well know, and we left such claims until the next chance. The total amount of such claims made over 240, and these claims, the 240, were submitted to the Japanese committee.

Q. Because the Japanese consulate could not get at a satisfactory result?—A. Yes, sir.

Mr. ANDRADE. This committee of thirty has handled all of these claims?

A. No, sir; not all of the claims.

Q. Just which claims did they have charge of, the personal or merchandise?—A. Personal.

Q. No merchandise?—A. Yes, sir; they made indications to the merchants.

Q. You say there were 2,605 claims and more?—A. I think so.

Q. Did you have occasion to throw out any as being invalid or not legal claims?—A. The first time I don't know about it, but all the others.

Q. Did you throw out any claims at all—reject any claims?—A. No, sir; we did not throw out any.

Q. You did not reject any?—A. No, sir.

Mr. BALLOU. All the claims were originally filed?

Mr. ANDRADE. Whether there were any thrown out entirely—rejected?

Mr. BALLOU. All the claims that were originally filed were thrown out—rejected by the Japanese consulate?

The WITNESS. No, sir; but I think there was some claims which are not verified by those which we did not produce in this court. I don't remember the exact quantity and number of such claims.

Q. I understood you to say that there were 20 and over claims thrown out entirely.—A. Yes, sir; owners of claims, personal effects came from the Alaa warehouse.

Q. Are any of them represented by these claims here?—A. Yes, sir; there is one here that was canceled; they were entirely withdrawn and not produced before the commission here.

Q. You are positive that there were none of the claims which were first precluded and thrown out entirely as being invalid?—A. No, sir; we never throw any out; we called those persons before me to get them to testify that is the proper figure and quantity, and when I don't understand I can't know their statement; then I take some respectable person to guarantee that his claim is good.

Q. Did you go into the question of insurance at all in your investigation?—A. No, sir.

Q. Then you don't know whether or not some of these—that some of the property was insured?—A. I think some of them is insured.

Q. Does your inventory show whether or not any of the goods were insured?—A. None whatever.

Q. Why is that?—A. No, sir.

Q. I thought you said some might be?—A. No, sir.

Q. About how many—how many of these claims were canceled?

Mr. BALLOU (to Mr. Andrade). I will ask you to ask the vice-consul.

Mr. ANDRADE (to the witness). How many of these claims were canceled—withdrawn?

A. I can't tell the exact amount; I don't think it was more than 20.

Q. You are positive about none of these personal effects being insured?—A. No, sir; I don't remember.

Q. And as to the merchandise, you do not pretend to say anything about that. Do you know whether or not any of them were insured?—

A. As I say, some of them.

Q. Does your inventory show whether or not there was any insurance?—A. No, sir; they are not insured.

Q. How do you know that?—A. Now, we are speaking of personal effects, not of merchandise; you are speaking of personal effects.

Q. As to the merchandise, you don't know whether any of that was insured, do you?—A. I can't say; some of them is insured, but I can not tell you at present which was insured.

Q. When you found that the claimant was a merchant—

Mr. BALLOU. These inventories do not include the merchandise?

The WITNESS. No, sir; no merchandise at all; that is, personal property effects; that is, the personal effects.

The CHAIRMAN. Then, what you are bringing before the commission to-day is the claim entirely for the personal effects and not for merchandise?

Mr. BALLOU (to the witness). Mr. Saito—I intend to cover the whole amount—Mr. Saito has testified that the only thing that the consulate had to do with the merchandise was that the inventories were filed with the consulate, and after an examination by him, and there has been a good investigation of them; they had nothing to do with the fixing of the prices at the consulate.

The CHAIRMAN. And he is speaking of the personal effects?

Mr. BALLOU. Yes, sir.

The CHAIRMAN. Which he had the personal work and supervision of?

Mr. BALLOU. Yes, sir.

Mr. ANDRADE (to the witness). Now, you have testified there were about 2,506 claims filed with you. Is that originally, or is it as the number stands now?

A. It is almost the same. There were new claims which were not of the original claims, and after two or three months they produced another claim. These two claims are different and separate, but the same claim, but different numbers; the first claim and the second claim are this number, not exactly the number of the claim, but the number of claims.

Q. Why did they present the second claim; was the first not good enough?—A. No, sir. They explained, when they lost the property not included in this schedule, then they produced another claim.

Q. Then the first claim was not quite complete; is that the idea?—

A. Yes, sir; and when completed with the first and second they were complete; then the claim will be complete.

Q. They first filed one inventory and that was found to be incorrect, and then they filed a second one, which was more correct; is that the idea?—A. No, sir; that is quite different. When the first claim—that is, an unfortunate delay in the first claim—they omitted a portion of the property in this schedule; they make another claim, so that both are quite correct.

Redirect examination:

Mr. BAILLOU. Did you prepare a brief statement of the case?

A. Yes, sir.

Q. Does this statement cover practically all the ground gone over? (To the commission.) This is a statement prepared by Mr. Saito, and I ask leave to file it. I have already sent a copy to Mr. Andrade. (To the witness.) You say that you have directions from your home Government to proceed in this matter?—A. Yes, sir; from the Government.

Q. Have you any official correspondence that might be produced here?—A. No, sir.

Mr. PRATT. From whom did you receive the instructions?

A. From the Government.

Q. From what officer?—A. Minister of foreign affairs.

K. S. IMANISHI, called and sworn.

Mr. BALLOU. What is your business?

A. Well, I am manager of the Yokohama Bank of Savings.

Q. What is your position—what was your position in regard to any committee at the beginning of the plague here in Honolulu?—A. I don't remember the exact date, but it was from the fire; I don't remember the date exactly—that is, the date of the formation of the society; this society was formed before the fire of Shimamoto or after the fire of Shimamoto.

Q. Was that before or after the big fire?—A. Oh, yes.

Q. Which? Before or after?—A. It was before the big fire.

Q. Now, this committee was formed by whom?—A. Formed from the permanent Japanese in this city.

Q. And what was it—and you were president of that committee?—A. Yes, sir.

Q. What was the object of that committee?—A. First, the object in this city was to investigate the condition of things in Chinatown and for food, but I didn't supply it.

Q. A relief society?—A. Yes, sir; but after the big fire in Chinatown our business was to begin to work among the sufferers and get a statement of their loss.

Q. Before that what warning had been given to you, the sufferers, before the big fire?—A. It was about the first part of January, by a bill posted by the Japanese consul, and subsequently the society informed the sufferers in Chinatown to make their statements on the blanks, and also to the merchants to make it out.

Q. At that time were there any negotiations pending between the merchants and the government?—A. There was, as you all know, three merchants' committees appointed—Mr. Keiser, Mr. Humberg, and Mr. Wakefield. These gentlemen came around to me and asked me if I would ask the Japanese merchants to surrender their goods in their possession at 66½ of the cost price. I think it was January 15. On that day I called a meeting of the society; I sent word to the Japanese merchants in Chinatown to make an inventory and to decide whether they would surrender for 66½ cents or not. They had a meeting in Chinatown and we had a meeting outside.

Now, finally it was decided by the society on the outside to ask the board of health to pay and we would accept the 66½ cents of the full cost price of their goods, and it was decided on the 19th of January.

The next morning the committee called upon Mr. Paul Newmann to file a petition before the board of health to appoint five appraisers, one from the Japanese and Chinese and three from the board of health, and this committee of five to appraise all the merchandise in Chinatown, and shall have full authority to accept 66½ cents of the cost.

Now, it was about 9 o'clock on the morning of January 20, left his office and we returned to our office; the fire was on top of the steeple of the Kanaka church; the wind was blowing hard, and after two or three hours Chinatown was struck by the big fire; consequently the business of the society was done evidently; but then after the fire was passed it took up the matter of making the inventory of the property lost and we moved slowly on that.

Q. It was your committee that sent into the detention camps?—A. Yes, sir. Well, about eight committees appeared in the society and three were specially appointed, elected, to investigate the loss, and five society committees were sent to the camps to get a statement. Now, I want to make a statement as to how these statements were made. As I told you gentlemen, the Japanese consulate posted a bill to each one to make out an inventory or statement. Subsequently we met and also advised to make them very particularly all of their possessions; that would avoid confusion. On the other side, the merchants' committee asked us to sell at 66½ cents of all the Japanese merchandise, and we acted especially for the Japanese merchants, and we advised them to be particular in making out the bill, the inventory of their goods.

Most of the sufferers of January 20 by the fire—they took that inventory and memorandum to the camp, and from the memorandum the inventory was made of the items lost, and that list was brought to the society and these copies were made.

Q. And these [showing], are these samples of the list that was made?—A. Yes, sir; the original receipts.

Q. At the time they were made in the detention camps?—A. They were made in Japanese.

Q. Were they signed by the claimant?—A. Yes, sir.

Q. At the time they were made in the detention camps?—A. Yes, sir.

Q. Each one signed it?—A. Yes, sir.

Q. Signed like that?—A. That is a copy from the original receipt—the original receipt.

The CHAIRMAN. Do I understand that is not the original?

Mr. BALLOU. No, sir.

Q. (To the witness.) When your agents went into the detention camps did they take the blanks with them?—A. Sometimes, to some camps. Other camps they got the original papers in Japanese.

Q. You mean by that that the paper that was made out in the detention camp—made out by the sufferers before the fire and taken to the detention camp?—A. Yes, sir; before the fire.

Q. And taken to the detention camp?—A. Yes, sir.

Q. And from some camps you collected those slips?—A. Yes, sir.

Q. And were those copied by the committees?—A. The committees—mostly done by the committees. The committee were elected specially for that purpose.

Q. Who was on the committee that received any of those original slips in Japanese and put them on these blanks?—A. Well, Mr. Kob

rashi, Mr. K. Himan, Mr. Y. Takakuaa, and Mr. Tanaka; he was the head of the committee and two to assist, besides.

Q. Do you know whether as a matter of fact, what camp was it made by the committee and retained in the camp?—A. Well, the drill shed.

Q. That was the camp where these were made up and signed by the sufferer?—A. Yes, sir; and Kakaako and Kalihi.

Q. You simply took out the original slips to the claimants?—A. Yes, sir.

Q. And actually wrote those out and took them back?—A. Yes, sir.

Q. Do you know whether the reductions were made at that time on the original slips, and were they filed by the claimants?—A. Well, I was informed by this committee that they made the reduction.

Q. Before even these first Japanese claims were made out?—A. Yes, sir.

Q. Now, after these claims were made out in this shape, what was done with them by the committee?—A. Oh, yes, the terms were made on that basis clear through the case in the Japanese consulate; that is, on March 7.

Q. What further did your committee have to do with the merchandise claim?—A. Well, about the merchandise, we took from each merchant an inventory which they made, and when the committee—the merchants' committee—proposed to buy their goods, from that day we made original receipts, original copies of their loss; it wasn't transferred, the personal effects were transferred on March 7—that transfer of the merchandise.

Q. Personal and merchandise claims were not turned over to the consulate on March 7 along with the personal property?—A. No, sir; the last claims were sent in on March 7, and the personal property numbered about 2,300.

Q. What was done with the merchandise claims?—A. We took from the inventory of the claimants; that was after the big fire.

Q. Did you have anything to do with the appraising—appraising the value of the merchandise, the effects of several of those merchants?—A. The value was mostly the committee, the investigating committee.

Q. Which committee?—A. The balance of the committee.

Q. Of the Japanese society?—A. Yes, sir.

Q. They investigated the values of the merchants' claims?—A. Yes, sir.

Q. Who comprised that committee? Who were the men that had anything to do with it, with the examination of the price on the merchandise, the value put on the merchandise?—A. Mostly done by the gentlemen whose names I just gave you.

Mr. PRATT. Who valued the personal effects?

Mr. BALLOU. Who first put a valuation on the personal effects?

A. Well, that was done by the eight committees.

Q. At the time the claims were made out this way in the drill-shed camp and the original list came in from the other camps, had the claimants put the valuation on them?—A. Yes, sir.

Q. They had?—A. Yes, sir.

Q. They had put their valuation on them?—A. Yes, sir.

Q. So that anything that the committee did was in way of revision?—A. Yes, sir.

Q. And what committee was intrusted with the revision of the per-

sonal effects claims?—A. I was informed by the committee, when I went to ask these three gentlemen about the particulars of the valuation and the inventories. This Japanese society handled any one of these things and other things; there were a great many things attended to.

Q. So that you did not have any personal knowledge; you were simply general manager of the society?—A. Yes, sir.

Q. When was the present committee of thirty organized?—A. I was out of it—out of town at that time. I left here on January 29 of this year, and went to Hawaii, and I remained in Hawaii about one month.

Q. And then it was this year that the committee of thirty was organized?—A. Yes, sir.

Q. Now, why was it necessary to form that new committee of thirty?—A. Well, that first committee were elected mostly of those that lived outside of the quarantine. The direct sufferers couldn't come out and attend to the meeting.

Q. And your society was formed of people outside?—A. Yes, sir.

Q. The present committee of thirty was composed of the sufferers themselves?—A. Yes, sir; the sufferers themselves.

Cross-examination.

Mr. ANDRADE. Are you a Japanese official in this country in any way. Do you represent the Japanese Government in any particular way?

A. No, sir.

Q. What is the distinction between the Japanese society and the committee of thirty. Are they distinct bodies, or is one a part of the other?—A. Well, just as I told you, the difference is, the first society was formed solely of those outside of the quarantine, and the present committee is formed from the sufferers themselves.

Q. That is the late committee of thirty?—A. Yes, sir.

Q. Now, you have testified that some of these claims were drawn up right in the camp where the sufferers were—that is, the detention camps—and others were copied from slips of paper, which was drawn up by the claimants themselves in their respective camps?—A. Not in the camp; they made the memorandum and then we made the inventory. They made such memorandums when they were in Chinatown, and particularly each one; consequently they were made, the memorandums before they left Chinatown.

Q. And those memorandums are what you made the inventory from. Is that the idea?—A. Yes, sir.

Q. Some of these claimants, they lost all of their belongings, did they not?—A. Well, about that, particularly, I have to refer to the special committee of three.

Q. Have you any knowledge of the ascertainment of the price of the different articles that they claim to have lost in the fire?—A. I was informed by the committee that investigated that they had investigated as far as possible the individual interest and where they got it. Where the claimant put down \$5 the committee asked them whether they bought it at the time of the big fire, or whether they got it before or how long they had it, and in that way they made an estimate.

Q. These committees, were they entirely uninterested parties?—A. Yes, sir; outside parties.

Q. Then they made an allowance for reasonable wear and tear. Is that the idea?—A. Yes, sir.

Q. Did they take into consideration the deterioration of the goods that were in the store any length of time?—A. You mean personal property or merchandise?

Q. Merchandise.—A. Well, about the merchandise, they made inventories while they were in Chinatown because of the three committees' proposition to pay 66 $\frac{2}{3}$ cents.

Q. Do you know by what authority that such a proposition was made?—A. Well, that I can not tell—it was from the other side—simply that is what I was informed by the three merchants' committees. They arranged to make that pay 66 $\frac{2}{3}$ cents.

Q. Do you know whether or not all of the claimants appeared personally before any of these committees selected for the adjustment?—A. They were investigated by the committee, and if the committee thought that the claim was not right or original—the committee claimed to investigate for the regular society—it was partly discussed with the committee whether or not this amount—that the amount could be based on these articles which they claimed to have lost.

A. Yes, sir; they had nothing to do with the sufferers; no connection whatever.

Mr. BALLOU. Everyone brought before the consulate and signed this and got a receipt; they didn't appear before this committee.

The CHAIRMAN. The question is—never mind whether or not the consul was satisfied—all of these people were living here at the time and they appeared before the consul as individuals?

Mr. ANDRADE. Not to fix the value of the goods?

The CHAIRMAN. Whether they presented themselves in person before the consulate; otherwise they may have been in doubt.

Mr. ANDRADE. Do you know whether or not any of the goods contained in these inventories were afterwards returned to their respective owners?

A. I don't think the inventories were returned to them.

Q. In the case of the merchants or otherwise?—A. Well, some of them got something from the Aala warehouse and some from the Government warehouse on Beretania street; I don't know where.

Q. Do those inventories show that?—A. Yes, sir; oh, yes.

Q. During this investigation, do you know whether or not a great many of these inventories were interlines to such an extent that they were entirely thrown out?—A. I believe so; that some of them were entirely thrown out because they were not reasonable at all.

Q. Were they for merchandise or personal effects?—A. Both; personal effects and for merchandise. They made inventories at the time, and they made particular new inventories at the time, and all merchandise was certified over to the merchant committee, and then they will have to see the inventory, and they can put down anything they didn't have down; they can put down what they had.

Q. Now, had any of these committees any other evidence by which they could have drawn up these inventories other than the simple evidence given them by the claimants?—A. Yes, sir. Well, the committee had, for instance, the evidence; if any claimant said he was in a Japanese lodging house, then the owner of the lodging house was asked whether he had such things or not.

Q. And in so doing did you get very much information?—A. I suppose so; I can't answer that.

Q. And that was the only evidence that the committee had to assist them in ascertaining the number of articles which was contained in these inventories and the statement of the claimants?—A. Yes, sir.

The CHAIRMAN. When ascertaining the amount of merchandise belonging to these various claimants, were invoices or bills, or anything of that sort, produced to verify in any way the statement that they made?

A. Well, mostly all of those things were burned up in the big fire and the most of the inventories were taken with them out to the camp which were made just before the big fire.

Mr. BALLOU. And they made those inventories for the purpose and with the idea that they would sell the goods to the government at that time, and when the government would have an opportunity to investigate, and therefore they could not be fraudulent?

A. The fire destroyed all the evidence. At the time that the made these inventories it was expected that the government would come—

Mr. ANDRADE. They made them upon the information that they got from the merchants' committee?

A. Yes, sir; the inventories which were made at that time the merchants' committee had proposed to buy at 66½ cents; they compared then the invoice—it was just before the big fire—and they had all gone over their goods and made an inventory of their goods and accounts of their goods.

Q. And they made—these inventories were made by them?—Yes, sir.

Q. Where are those inventories?—A. They have them themselves.

Q. Have they ever been before any of these various Japanese committees?—A. I think they have passed the investigation; they are original inventories.

Q. Why are those not with the committee, whilst the copies are?—A. They kept them, and on the 1st of November they gave them—

Q. And then those original inventories, as made by them, would be valuable to compare with these; that is, if they are called for?—Yes, sir.

Q. In some of these statements here it says canceled the personal effects—it doesn't say for what reason. For what reason were they canceled; for instance, a silk kumora, why was that canceled?—Because the consul didn't think he had it; that I can't tell.

Q. It was done by the consulate?—A. I can't exactly say when I give you the dates when the inventory was made.

Q. As a rule, all of these claimants, or the majority of these claimants, have you made them any allowance at the bank?—A. No, sir.

Q. It is not a class of people; the claimants are not a class of people that the Yokohama bank would loan money to?—A. No, sir; we don't loan money on claims. The money is sent out to Yokohama. We use the money to buy exchange on China and London and New York.

Mr. ANDRADE. Now, in preparing the claims of merchants in regard to merchandise, did the committee take into consideration whether or not some of those items were cash?—A. Well, about that I have to refer to Mr. Kobayashi. I wasn't informed whether they investigated or not.

Q. You don't know?—A. No, sir.

T. KOBAYASHI, called and sworn.

Mr. BALLOU. Mr. Kobayashi, Mr. Imashi has informed us that you were on the special committee.—A. Yes, sir.

Q. And that is a committee for the collection of these claims?—A. Yes, sir.

Q. Who were the men that went into the detention camps afterwards?—A. It was appointed as a committee, and that committee appointed a subcommittee; sometimes I have been at the detention camps, but the most of the times the subcommittee went down there and took those memorandums.

Q. Who were on those subcommittees?—A. Dr. Kamaski and Mr. Ono, Mr. Sago and Mr. Segi.

Q. What district did you go into yourself?—A. To Kakaako.

Q. And did you take those blanks in with you?—A. No, sir.

Q. What did you do in Kakaako detention camp?—A. I had down there one slip of paper I have given to other persons; there was not any paper in there to make a memorandum on.

Q. And did you find in there any who were already prepared with the memorandum?—A. Yes; some already had the paper.

Q. Some of them had not?—A. And some had not.

Q. Those that did have the papers ready—what did you do?—A. Well, of course, when I had been there some time some wanted to make a list of his personal effects and some had no paper; those that had any paper I advised them to make a list of their goods.

Q. And what was done with those memorandums?—A. After I gave them the paper I left, I have been there the next day, or two days after, to collect the memorandums.

Q. To collect them?—A. Yes, sir.

Q. And at that time you collected some memorandums that the men had brought in from Chinatown with them?—A. Yes, sir; and some that had already been made out on paper.

Q. Which you furnished them two days before?—A. Yes, sir.

Q. And what did you do with those memorandums?—A. I brought them back to my office.

Q. Where was the committee's office at that time?—A. I had an office in the Orpheum building. We had removed our office to the parsonage of the Baptist Church on Fort street.

Q. And then how were these slips in Japanese made up?—A. Each one?

Q. One like that [showing]?—A. That is the size.

Q. From those slips that you collected?—A. Yes, sir; we took a copy from them.

Q. How was it with reference to the drill-shed camp?—A. They were different. We sent those forms of blanks by a person living inside, and they selected other parties to write the Japanese.

Q. And they wrote the Japanese words to make up their blank?—A. Yes, sir.

Q. Now, from those slips that you brought out from Kakaako on to these Japanese blanks, were there any claims rejected or reductions made?—A. Yes, sir; when we wrote out these slips of paper, the memorandum, and when we took the copy there we put it into the form of a statement; in some cases we find that is not so correct.

Q. Why did you know that it was not correct—how did you know it?—A. I know things. There was a few of those cases, probably only one case; I thought her husband's occupation—I knew her husband's occupation—

Q. Was what?—A. One woman, a widow, whose husband died—when her husband died I heard his condition wasn't so good, and still when his widow made the claim, I just took notice I seen backed as her memorandum, that I was handed to investigate, whether it was true, and I directly told her of my own knowledge, I believe you have not got so much money and goods as what you describe.

Q. Was that claim cut down?—A. Yes, sir.

Q. How many were there of those?—A. Only a few. When we got through and made up the statement, I wrote down very carefully; they were drawn up very carefully; I tried to avoid dishonest statements if possible.

Q. At that time these claims were not signed by these claimants at all?—A. No, sir.

Q. They were made up at the time?—A. Yes, sir.

Q. And the claimants were in the detention camp?—A. Yes, sir.

Q. Do you know when they were sent?—A. After that we transferred them to the Japanese consulate.

Q. Now, did the claimants fix the value of their personal effects?—A. Yes, sir; and the Japanese United Society—Mr. Imamiashi was the president of the society—every person in the quarantined district. I remember one house, after two or three hours' notice the fire department went there and burned it. I believe they had no time to take an inventory of their goods; but, as I say, I desired telling everyone to make an inventory, a memorandum, a bill of what they had, and when we sent out orders the committees went down to the detention camps and told them that they must put down everything. For instance, they made up one shoe \$3, but after one year or two years the valuation must be down.

Q. Now, did you look over the valuations so as to put them in the blanks?—A. Yes, sir.

Q. Make any reduction?—A. Well, in very few places.

Q. Then what was done with these blanks finally?—A. They were transferred to the Japanese consulate.

Q. On the 7th of March?—A. Yes, sir.

Q. Now, what did your committee have to do with the merchandise, the merchants' accounts?—A. Well, the merchants they made their own memorandum or list of goods, we looked over them and those blanks were turned over to the Japanese consul's hands. We didn't send the statement of personal effects, because the merchandise statement is very long and the merchants every week said we will make up a statement, a proper statement right in English, if it is necessary, do it in typewriting and they will hand it in to the Japanese consulate, showing the nature and amount of their accounts, showing that they just simply made up the statement of the total amount of their merchandise.

Q. At the time that you transferred the personal-property schedule to the consulate, did you know how many were transferred?—A. I know that twenty-three hundred.

Q. And were those all that you had in your hands?—A. Yes, sir.

Q. Did you afterwards make up any more?—A. Yes, sir; one or two from farther parts.

Q. Did you have anything to do with the final valuation of the merchandise?—A. No, sir; I did not make up the valuation myself.

Q. Who did make it up?—A. The merchants themselves.

Q. Did you look it over?—A. Yes, sir; I looked it over.

Q. Did you revise it at all?—A. No, sir; I didn't make any difference.

Q. No revisions?—A. No, sir.

Q. When you speak of the merchants, you mean the claimants themselves?—A. Yes, sir.

Mr. BALLOU. How many of the Japanese merchants' claims are there?

A. I don't know; I don't remember.

Q. How many of these are assigned over to Mr. Ozaki?—A. I don't know.

Q. When, with reference to their being transferred over to the Japanese consulate?—A. At that time Mr. Ozaki was not interested in the claims in the committee.

Cross-examination:

Mr. ANDRADE. You have testified that you took those blanks, pieces of paper, to the detention camps and there had made a list of the property lost by the claimants?

A. Yes, sir.

Q. That is the idea?—A. Yes, sir.

Q. Did you have anything else to go by but the bare word of those claimants?—A. Exactly.

Q. And you do not know whether or not they are interlined?—A. What is that?

Q. You don't know whether they claimed more than they really had or not?—A. No, sir; we did not know. Beforehand we advised them to make up a list of things claimed.

Q. Do you know whether or not they made up this memorandum?—A. Of course I do not.

Q. Did you not have a great many Japanese just simply tell you what they had, and that they had no memorandum? Isn't that so?—A. Yes, sir; some had no paper. That is why they didn't make up their memorandum. Sometimes the man's memory is a little defective.

Q. Now, you simply had their word for what they had lost?—A. Yes, sir.

Q. And while you were on the committee did you frequently—A. At this point, I might say, his memory is very fresh—fresh before the big fire of the 20th. I don't remember how long before, but anyway, as I said just a few moments ago, our society advised them, every person in the quarantine station, to make up an inventory of the goods, because any time that the government gives notice, then the parties can prove up their case.

Q. But, as a matter of fact, you got a great many inventories just from what the Japanese claimants would tell you. Is that not so?—A. Yes, sir.

Q. Now, did you serve personally on any of these committees that passed upon these inventories?—A. We looked them up.

Q. Now, if a man came in with a claim that looked to you reasonable, you passed upon it?—A. Yes, sir.

Q. Were any of them enlarged?—A. When we saw anything we looked it up carefully, and if it was reasonable we passed it.

Q. What did you look up?—A. His own papers, memorandum, which he wrote down on his slip of paper. After we got it we wrote down ours. In a very few cases they didn't have it. They had lost their memorandums. There was a very few persons that came and told us how many or what the goods were.

Q. They came to you?—A. Yes, sir; a very few.

Q. Well, on the other hand, you did have a great many at the detention camp?—A. Yes, sir; in the detention camp they haven't any paper; we supplied the paper.

Q. You had nothing else to go by but their say so?—A. Yes, sir.

Q. Now, as to these inventories for merchandise, could you testify that those were correct inventories?—A. I think so.

Q. How?—A. Because I have looked them over very thoroughly; some the price is different and some the amounts are different, and at that time we thought there are many merchants. There are some merchants import goods directly from Japan, and some merchants never import goods from Japan, but them wholesale from Ozaki, so that we could put down the real price; that must be different; and also many of the importers are small importers and some importers are large importers; then he would buy his goods in large quantities at one time and some one else a very few in comparison, a few goods in Japan, so the price must be different.

Q. Now, we take, for instance, the man that imports a large quantity of goods from Japan.—A. Yes, sir.

Q. And he presented you with an inventory?—A. Yes, sir.

Q. Now, how do you know whether that was a true statement of the goods contained in his store or warehouse at that time?—A. Well, of course, that I can't say.

Q. You don't know?—A. No, sir; I trust him.

Q. You simply have to trust to him?—A. Yes, sir.

Q. And you do not know whether his inventory is true or not; you have to take his word for it?—A. That is very difficult to say.

Q. Now, as a matter of fact, did you not simply take their statement as true?—A. Yes, sir.

Q. Did you make any examination of the books of any concern?—A. No, sir.

Q. Did you examine the invoices?—A. No, sir.

Q. Did you examine the stock books?—A. No, sir.

Q. As a matter of fact, you took the bare and simple statement as he presented it to you as a true inventory, and that is what you had to go by?—A. Yes, sir; but the bills I looked over.

Q. Now, did you fix the values?—A. As I said before, of course some one has. I don't know the values myself.

Q. Who did that?—A. It is drawn out themselves and he presents to us.

Q. Take, for instance, a large importer of goods. How do you get at his valuation—the market price here or the market price in Japan?—A. Well, I acknowledge that he made up the values.

Q. That is the case?—A. Yes, sir.

Q. In Japan or here?—A. Landed here.

Q. But their shoes, etc.?—A. That is an expense, and, of course, very expensive, too.

Q. Did your committee make any deduction for goods that had been in the warehouse and stores for any length of time?—A. No, sir.

Q. Why not?—A. Well, they presented these inventories, and we knew, and we agreed that these is just the goods that they lost by the fire. Of course, if I found in some cases they were not there they were deducted from the statement, and he didn't make any claim for them.

Q. As a matter of fact, you didn't know whether the things or goods were kept in the store or warehouse for three, or four, or five years, or any length of time?—A. No, sir.

Q. You got the impression that the goods were all fresh goods?—A. I didn't think that of some of the goods—the groceries. They are not all fresh; there might be some of them old.

Q. But the majority of these claims are for other merchandise than groceries, clothing, and dry goods?—A. There are other things; I think there is. Dry goods are not always new, because some merchants import a great number of silks from Japan, and they keep some of them a year and a year and a half.

Q. But some merchants import a great many different articles which are perishable, don't they?—A. Yes, sir; like provisions.

Q. So you did not go into it deep enough to ascertain how long any of the perishable stuff might have been in the warehouse or the store, did you?—A. No, sir.

Q. Now, I want to ask you a few questions. We will just take up this claim No. 180; it belongs to T. Kanashi. Your inventory shows that he is a contractor. Is it ordinary for the Japanese to have one piece of silk crape, 4 yards, valued at \$20?—A. Yes, sir; some.

Q. A Japanese in ordinary circumstances?—A. Yes, sir; that is not ordinary.

Q. He is above the ordinary Japanese that has silk crape, 4 yards, valued at \$20?—A. Yes, sir.

Q. Is it ordinary for Japanese in ordinary circumstances to have a kimona?—A. Japanese from Japan have kimonas of silk.

Q. Here is an inventory that claims—three, four, five, six, seven, eight—one at \$18. Is it ordinary for a Japanese to have a kimona for \$18? Is that so in ordinary circumstances?—A. It is above the ordinary.

Q. He must be above the ordinary circumstances?—A. Eighteen dollars for a kimona?

Q. Yes, sir.—A. Eighteen dollars is not such a big amount for a silk kimona.

Q. Would you tell the court what obayskuchi is?—A. That is a very valuable silk.

Q. What is it used for?—A. For wear.

Q. For men and women?—A. Yes, sir.

Q. That is also \$20?—A. That is cheap for that quality.

Q. Now, here is a man only a contractor?—A. Yes, sir.

Q. Do you know what committee had charge of this one claim?—A. I don't know; I don't remember who drew up this statement.

The CHAIRMAN. What is your occupation?—A. I was interested in the immigration company.

Q. And now?—A. In the same business.

Q. Are you interested in any of the Japanese business?—A. I was manager of Ozaki's dry goods business—his store—about six or seven years; I severed my connection with Mr. Ozaki last year, in December.

Mr. ANDRADE. In examining these inventories did you look up the question of insurance, to see whether these stores or warehouses were insured?—A. You mean by that personally?

Q. Merchandise and personal effects.—A. Yes, sir; some in regard to the merchants; some of them were asked whether or not they were insured, but not all.

Q. Then you do not know, as a matter of fact, whether or not any of the merchants was insured, do you?—A. No, sir.

Q. Then you simply took the statement of the inventories as they were presented to you, and that was about all, wasn't it?—A. Yes, sir.

Q. The question of insurance you didn't go into at all?—A. No, sir.

Q. And you do not know whether there was any insurance paid at all or not?—A. No, sir.

MR. PRATT. You were asking more particularly in regard to the personal goods and not in regard to the merchandise; you left that to the storekeepers?

A. Yes, sir.

The CHAIRMAN. You did not appraise the merchandise yourself?

A. No, sir.

Q. In these claims your committee didn't appraise any of them? You didn't appraise the value there at all? You simply accepted the statement of those goods that they had on hand, and those goods were worth so much?—A. Yes, sir; that is the statement as it was presented.

Q. Did you look over them?—A. Yes, sir; of course we looked over the valuation, and if we thought that the value wasn't so much we would call the person and ask him whether it was all right or a mistake.

Q. And you made this statement? Did you get that from the statement of the claimant himself? There was no other proof of his having the amount of goods as represented in the case?—A. No, sir.

Q. There was no way of checking it at all?—A. No, sir.

Q. But from the statement of the claimant himself?—A. Yes, sir.

The further hearing of this matter is continued until 1.30 p. m. this day, June 6, 1901.

JUNE 6, 1901.

AFTERNOON SESSION.

MR. BALLOU. If this commission were bound by the rules of evidence, the testimony that was taken this morning would be incompetent. It is simply the statement of third persons as to what claimants told them, and in a court of law it would not be evidence at all. I didn't feel called upon to object to it. I suppose there will be some million and a half dollars to be divided up among these claimants, and I understand that the government wants to see that it shall be divided as fairly as it is possible.

The CHAIRMAN. I will explain that, Mr. Ballou. The letting of this testimony in as evidence or anything that is not evidence that is let in in all classes of cases, but it is with a view of letting it before the commission such investigations as have been made contemplating a negotiation for such a compromise of these claims as may meet the approbation of the commissions and the government.

MR. BALLOU. In that point of view I don't object to it at all, but as evidence under the law it is hearsay, and I think we all agree in regard to that.

The CHAIRMAN. I think it is to go in for that purpose, and we want it understood that it goes in for that purpose.

Mr. BALLOU. That is what it is offered for at this time.

The CHAIRMAN. And is to be used for no other purpose, and if it is to be I certainly object to it.

Mr. BALLOU. As I have said to the commission and to the attorney-general, it is to show the investigations that have been made of these claimants, and also it is to be used in the settlement of the smaller claims that the government—it is offered only for the purpose of showing the general plans; that is all it is offered for at this time, and I trust that I shan't have to offer it again; that I will have better evidence in the other cases than this. I will have the claimants themselves; if I haven't them here that question can be determined when it arises.

The COMMISSION. Whether it is in evidence at all?

A. Whether it is in evidence at all, I shall certainly endeavor to get better evidence. There might be a claimant that is not a Japanese I might reach on one of the small claims would be sufficient; it is time to consider it when it arises.

It is doubtful for this purpose. There is a certain deduction, which the mind always makes, which is entirely outside of evidence, competent or incompetent, and one of the deductions in a case of this kind is that the best lot of claimants—that is, the standing among them, most of them have a low standard—are laborers, etc. We have claims here put in the first instance that there will be fraud and illegal claims. Now, in so far as this testimony tends to rebut that inference in the minds of the commission in the case of the Japanese; in so far as they have failed to some degree, there has been some attempt to wipe out that inference of illegal claims, in so far as the Japanese are concerned; that is the evidence in all of the cases, and when I shall present the other cases here I shall have the direct testimony of the claimant and his oath and on cross-examination by the commissioners. That is all that I wish to offer at this time.

The CHAIRMAN. It is not a matter so much of evidence as it is the manner in which your evidence was produced. When each individual claim comes up—as I understand also from the words of the attorney-general and also counsel for the claimant, that it is the intention of both of them to give such information as possible to the commission as would enable them to adjudicate the claims, where there is an absence of direct testimony, and where there is an absence of data that would come in in the ordinary claim in court—I think that is the intention of the commission, and we understand that thoroughly, that both the government and the claimant are to throw as much light on the subject as is possible, so that the commission can arrive at a fair decision to all concerned.

Mr. BALLOU. That is, the court is not bound by the strict rules. There has been great suffering in this community, and it is the desire of the government to have this money distributed. Of course it can not be distributed with absolute fairness. It is impossible. But get at all of the truth and to have distributed as fairly as it can be.

T. TANAKA called and sworn.

Mr. BALLOU. What official position in the Japanese consulate do you hold?

A. I am vice-consul.

Q. The position of vice-consul?—A. Yes, sir.

Q. When did the consulate first take up the investigation of these Japanese claims?—A. All the claims?

Q. Yes, sir.—A. It was on the 7th of March, last year, we received these documents from the Japanese society.

Q. What documents do you refer to as having been received on the 7th of March?—A. It was only the Japanese originals.

Q. Of which this bill [showing] is a sample bill?—A. Yes, sir.

Q. These are the Japanese originals?—A. Yes, sir.

Q. They were received on the 7th of March from the committee?—A. Yes, sir.

Q. From the society?—A. Yes, sir.

Q. At that time were most of the claimants still in quarantine?—A. I think some of them were discharged.

Q. At the time those claims were turned over to the consulate, were they signed by the claimants, or not?—A. I saw them at that time. I don't think—I don't say they were signed at that time by the claimants.

Q. What steps did the consulate take on receiving those original Japanese claims?—A. I was instructed by my consulate to look them over and receive the statements.

Q. And what was the result of looking them over?—A. I found out many things at the time. One thing quite important was that their statement, almost every statement, by looking at the signature of every claimant in certain cases they were missing—there were missing items in regard to the occupation and the destruction and such things.

In some statements there were statements that they couldn't explain: there were, of course, items that I couldn't explain, because the claimants came from some places in Japan, and they used only the local dialect, and those statements and such things you have to follow it up.

Q. At the time these documents were turned over to you was there any list made of them?—A. Yes, sir; the list that I have received at the time.

Q. Summarizing these original claims as turned over, what are those dates at the top, the first line household packages, in the first column. and the next column cash, and the next column household furniture and utensils—and the next column?—A. Clothing.

Q. And the next column?—A. Jewelry of all kinds.

Q. And the last column?—A. Miscellaneous.

Q. Those correspond, do they not, to the heads of the English blank?—A. Yes, sir.

Q. They are the same heading here?—A. Yes, sir; all kinds of fixtures, cash, clothing, etc.

Mr. ANDRADE. Are these copies of each other?

A. No, sir—yes.

Mr. BALLOU. Consecutive; this is No. 1 to 888, and this begins 889 to 1776, and 1777 to the end?

A. Yes, sir; which is 2300.

Q. They were turned over to you, then?—A. Yes, sir.

Q. What is this?—A. This is the total receipts.

Q. And that is the list?—A. Yes, sir.

Q. And as detailed by you to the committee?—A. By the committee. I didn't calculate it at all at the time.

Q. This covers 63 pages, and these pages are a detail of this list?—

A. Yes, sir.

Mr. PRATT. From the valuations indicated and the aggregate valuation extended?

A. I don't think that these two pages have been added up.

Q. What is the total of the first 36 pages?—A. Those are added in pencil that has been added, but not the total.

Mr. PRATT. What is the aggregate?

Mr. BALLOU. Of these 2,300 claims of personal property?

A. Four hundred and ninety-five thousand six hundred and ten dollars and ninety-seven cents.

Q. After those 2,300 claims came in were there a few claims that came in from the committee?—A. I understood at the time of that transfer that the Japanese society told us that there were some remaining claims in their hands, but I think that 2,300 is the round number to make it. After the 2,300 that left a few claims to be transferred, which we did from time to time.

Q. As they got them in shape they turned them over?—A. Yes, sir.

Q. What, then, was the first action that you took after looking over those blanks and finding that some of them lacked the signature and certain data, such as the occupation, and so forth?—A. It was the 7th of March that these documents were transferred; at that time I think the consulate informed several of the claimants to appear before him and make and verify it by their signature.

Q. Was that done?—A. It was commenced actually there, I think, on the 21st of March.

Q. On that day the claimants began to appear?—A. Yes, sir; and in the office; our office is small, but we had another office down town, and there I myself went and one of my colleagues went to supervise the work and make the investigation.

Q. Were the contents and the signatures of the various claimants as they now appear on those documents?—A. Yes, sir; the signature of the claimants, and here is the date that these signatures were made; that is written the 6th of April, and besides there is written the location, the present location, of the claimant, so as to make it easy in the future to address him.

Q. Now, as far as the personal property was concerned, have all the claims that have been prepared for filing been signed by the respective claimants?—A. Yes, sir.

Q. Are there any claims that you have received from the Japanese society which the claimants didn't come in afterwards and sign?—A. Yes, sir; we have a few still in the office; I don't know the exact number of those unsigned claims, but I believe it is more than 100.

Q. Are those to be filed here with the commissioners?—A. Unless they are signed in the immediate future; I think it is not proper to file them with the commission.

Q. And they never have been included in the tabulated statement that you had made up?—A. No, sir; we didn't translate them.

Q. You didn't translate them into English?—A. No, sir.

Q. At the time when the claimant came in and signed these claims, were the claimants given any paper?—A. I have a receipt for their claim.

Q. How many books of that size did it fill?—A. Well, there are 27 in all.

Q. And which you have brought into court, what numbers are these—what number of the book?—A. It is 1 to 27, that is the first one, the last one.

Q. And this [showing a portion of 27] represents the receipts that were given to the other claimants?—A. Yes, sir; filling up the blanks, of course.

Q. There is the form of the receipt book and here is the stub?—A. No. 1 and the entire 27 books.

Q. And the receipt for each one of those stubs was given to the claimant?—A. Yes, sir.

Mr. BALLOU (to the commission). We will have the receipts and the stubs and will introduce them in a few minutes. We have a few of the receipts and the stubs.

Q. (To the witness.) At the time the claimants came in to sign these claims was any investigation made of the genuineness of the claim?—A. Yes, sir; so far as it was not apparently unreasonable then I issued a receipt for them.

Q. What was done in such cases?—A. In such cases I ordered the claimant to file it over again, a genuine and faithful claim.

Q. To what extent were the reductions made up to this time?—A. I can't tell exactly the amount of it; as I told you just now, we didn't give the receipt for the claims which we didn't admit.

Q. So that the original claim was returned to the claimant?—A. Yes, sir.

Q. And they kept it?—A. We were in possession of the original claim and they just filed a new claim, and after looking over, if it was reasonable, then we issued a receipt; if it was not reasonable, we returned it and issued no receipt to them.

Q. Then the sum total of those receipts in those books represent the reduction of the claims as turned over to you by the society?—A. That is my recollection.

Q. Can you tell us the total of the receipts as shown by your books and the stubs?—A. So far as the personal claims are concerned it is over 600. I don't know the exact number of the total receipts.

Q. And they show a reduction made by the return, but not by the society?

Mr. BALLOU. Yes; a still further reduction is shown by the receipt.

Q. (To the witness.) At the time the receipts were issued—after the receipts were issued to the claimants, what was done with the claim then?—A. I won't state. It was translated into English on the other side. We have subjected each claim to our inspection and examination.

Q. And are these English blanks samples of the claims as they were translated into English?—A. Yes, sir.

Q. After the receipts were issued?—A. Yes, sir; after the receipts were issued.

Mr. PRATT. Are these the originals for which the receipts were issued?

A. Yes, sir; these are an exact copy of them.

Q. What was then done with those claims; what months were the most of the receipts issued in?—A. Of course they continued from the 21st of March until a very recent date, because, as I just told you, there are still unsigned claims, and I have those claims in the order they came; that the claimants came up to me, and when they are signed we issue a receipt just exactly as we did at first; but this work was done mostly from the 21st of March until, I believe, about the 20th of April—that is, one month.

Q. Then the great majority of these were issued the first month.—
A. Yes, sir; in April and March.

Q. What proportion of the claimants that came up to sign these were interrogated by you at that time and examined by you?—A. Almost every claimant was interrogated more or less.

Q. What was the next work that was done that was undertaken by the consulate in respect to these claims?—A. As I said, now we have examined every claim, whether there is any unfaithful or unreasonable claim or not.

Q. Examined every claim?—A. Yes, sir.

Q. When was that work begun?—A. I think it was about June, after the first court of claims was established.

Q. That is, at the time of the first court of claims the claims were all in as represented by these receipts that were issued?—A. No, sir; there was some receipts which were issued after the court of claims was established.

Q. It was after that court had fallen through that you began your investigation—the second investigation?—A. Yes, sir.

Q. How was that investigation conducted?—A. Mr. Saito, my consul, asked me to inspect every claim, and in case I found out any ambiguous or any item that was in doubt, and then I wrote it down in a memorandum; and I also assisted in his work, and those ambiguous or suspicious claims, we had some one appear for them and cross-examine in the investigation, and then we investigated in that way.

Q. What was done with the claims as a result of that?—A. Well, a great many claims were reduced, both in amount and in items.

Q. What was the reason for the reduction?—A. Well, after a minute examination of the claim we have found out in many cases there were statements which perhaps from the representations and misconstruction were not right and ought to be reduced, and other cases. After the first time and the second issue of the receipt there were claims that were quite extraordinary; anyway, I thought it was necessary to examine those claims, so the claims were ordered back.

Q. What was the treatment accorded by you to the cash claims?—A. When we examined them at first I asked to examine them as to how they were, and the result of the examination is written down on the original issue and somewhere, also, in the memorandum book. Until last year we didn't decide to open, rather to deal with the cash claims. Finally it was referred to this committee, of which Kobayashi was president, and we have decided to disregard the cash claims, notwithstanding their apparent faithfulness.

Q. What has been the final result of your dealings with the cash claims? How many big cash claims have you allowed?—A. Only one big cash claim, and there is no cash claim except that one which amounts to \$50 or more.

Q. What were the circumstances connected with allowing that one claim?—A. That is the only claim. The claimant is a hotel keeper on Nuuanu street. At the time of the fire she put the cash in a safe, and at the time of the fire she couldn't carry it away, and after the burning there were many witnesses, both Japanese and foreigners, who witnessed that safe. It only had cash and money. It was in such shape inside of the safe, and when it was opened the paper money was all in the same shape it was before it was burned. It was ashes, and when it was touched it was all gone.

Q. But it retained its shape?—A. Yes, sir; its original shape.

Q. What was the amount of the claim? Do you remember?—A. I think it was \$344; I don't know the amount exactly.

Q. And with the exception of that one claim there has been no cash claim allowed for over \$50?—A. No, sir.

Q. Does that involve many reductions?—A. Yes, sir.

Q. I will read the cash claims—some of the cash claims as turned over to you by the committee: No. 34, \$150; No. 80, \$50; No. 98, \$80; No. 107, \$50; No. 218, \$74; No. 247, \$185; No. 275, \$150; No. 318, \$150; No. 327, \$312.50; No. 333, \$250; No. 400, \$70; No. 425, \$135; No. 469, \$150. Now, every one of these were reduced to less than \$50?—A. Yes, sir; and many of them entirely withdrawn and canceled.

No. 608, \$75.50; No. 647, \$60; No. 714, \$68.75; No. 716, \$52; No. 790, \$157; No. 799, \$74; No. 800, \$68; No. 828, \$90; No. 859, \$87; No. 860, \$97.25; No. 884, \$340; No. 895, \$85; No. 904, \$75; No. 906, \$52; No. 908, \$65; No. 910, \$65; No. 912, \$82; No. 916, \$50; No. 948, \$75; No. 984, \$145. How were these papers selected as samples? Who selected them?—A. We selected them in part that day.

Q. It was in the consulate that these were selected and brought before the commission?—A. Yes, sir.

Q. These same claims finally—these were numbered at the time that the receipts were issued?—A. Yes, sir; in the order that the claimants came and signed.

Q. Will you look over this paper and show to the commissioners—take a sample and show to the commission, the style of reduction that was made?—A. I will say before this translation was made, the final translation, there were many reductions of the original contents to make out most of this issue, the English translation, that would make it very thorough, and I made again a translation; so just looking at this issue it can't be exact to show the reduction of the claims. The same thing happened that has already been testified to at the time of the signing of the original documents. They were like this, only this paper isn't so strong. To cancel it or to strike out, it would make the paper very dirty, so we just got another new sheet.

Q. Will you take out a few of these and state to the commission what was done? 813—what were those reductions?—A. That is taken back from the Aala warehouse; there wasn't in the original translation—

Q. 820 is a reduced claim?—A. Yes, sir; a reduced claim.

Q. That was the proprietor of a shooting gallery?—A. Yes, sir.

Q. Did he file a very big claim?—A. Yes, sir; he filed over a \$3,000 claim.

Q. Reduced to how much?—A. \$1,590.15.

Q. What is that?—A. That is a cash payment and reduction made by us.

Q. From what amount to what amount?—A. From \$80 to \$20.

Q. In each reduction of the claim, did the claimant assent to the reduction?—A. Some of them we have traced; we have examined them, but there is some we can not find.

Q. Do they know of these reductions?—A. If the claimant couldn't be found we have asked the assistance of the committee of thirty, who is in existence now to make the reduction, and if they on their decision made the reduction from their items.

Q. Here are certain reductions made from the original claim—it was

made, apparently. Now, has the claimant consented to that reduction?—

A. Yes, sir; so far as we can trace it.

Q. Have you traced them so that they have knowledge of the reduction?—A. Yes, sir; but there are some that we could not trace, those we have asked for the assistance of the committee of thirty.

Q. Are their claims in here?—A. Yes, sir.

Q. Some of them have not been brought before the consulate?—A. Yes, sir.

Q. Since the receipts were issued?—A. Yes, sir.

Q. Are they correct—the receipt issued by the consul and the claim would show the sum they are entitled to?—A. Yes, sir.

Q. Now, then, your proposition here is to introduce each claim so far as you can?

Mr. BALLOU. Yes, sir; and we will compare the receipt which will identify the claim that has been presented and has been approved by the commission, which is a duplicate of this. Now, at the time of the reduction they didn't know whether this reduction was made or not, some of the claimants; but now some of the claimants who assigned over—made an assignment—know their claim has been reduced by us and the committee.

Q. So they all assent to the reduction?—A. Yes, sir; we have made the reduction.

Q. Would you act arbitrarily in the matter, or advise them to do that?—A. Yes, sir.

Mr. BALLOU (to the witness). Claim 1833, what reduction was made on that?

A. Cash claim amounting to \$61.70 was entirely canceled.

The CHAIRMAN. Why did you cancel that entirely?

A. This, I think, was through the consent of the claimant himself.

Q. Then he admitted that he didn't have that, did he?—A. Perhaps he had it, but cash claims are very bad to prove, and from these statements he decided to disregard it entirely, all of these small amounts.

Q. And canceled in some cases; why did you reduce from eighty to twenty? Here are two cases; why did you throw those two out?—A. That depends upon the evidence, the statement; I think it seems to be the practice to leave small amounts, such as \$15 and \$20, small amount of cash.

Q. Claim 1853, \$80, disallowed?—A. Yes, sir.

Q. 1852—what are those items in that?—A. Taken back from the warehouse.

Q. Here is one, 1851, where there is no change in the inventory, but a money change in the valuation.—A. I think this was reduced by the consent of the claimant.

Q. But it is not reduced because of the return to him from the warehouse?—A. No, sir.

Q. Is there any distinguishing mark on it?—A. No, sir.

Q. The stamp canceled, does that always indicate the goods returned?—A. No, sir.

Q. It doesn't necessarily mean that those goods were returned?—A. No, sir.

Mr. BALLOU. It may mean that?

A. Yes, sir.

The CHAIRMAN. Well, as a rule, what does that mean? What is that canceled for?

A. Those are taken back from the warehouse.

Q. Well, there is nothing to distinguish whether it was taken back from the warehouse or whether it was the opinion of the committee that he didn't have it?—A. No, sir; we have a memorandum for these claimants, which was reduced, and by referring to that memorandum we can ascertain whether it was reduced by us or on account as to their being taken back from the warehouse.

Q. Have you a memorandum to show where the goods were returned from the warehouse?—A. Yes, sir; but I didn't bring it, because it is quite heavy.

Q. Claim 1860. I see here clothing, so many canceled. Do you know whether or not those were returned, or otherwise?—A. Yes, sir; those were returned from the warehouse.

Q. And a kit of carpenter's tools reduced from \$11.50 to \$3.75?—A. Yes, sir; because some of the tools were returned.

Q. No. 1864, what are those?—A. That is a reduction—that is, under the original translation was much bigger; and to make it clear we have made the reduction also.

Q. Is it possible to find that in the original?—A. I think so.

Q. Please do so. What was the size of the claim as it went in?—

A. At first, when we issued the receipt, passed it, the total amount of the claim, \$946.70.

Q. And it was reduced on the first translation to what amount?—

A. I can't tell you; that is the final reduction.

Q. From what to what?—A. From \$946.70 to \$713.

Q. When it was first reduced wasn't it reduced to \$895.95?—A. Yes, sir.

Q. And what is this memorandum on it?—A. That is the amount of the reduction.

Q. By the claimant or the committee?—A. I think the committee and the claimant; the claimant has consented to it.

Q. What is this red ink on the back of that, the pencil?—A. This is the reduction that was made by the assistance of the committee; one member of the committee went into an examination, and after the examination this reduction was made, so he has stated the whole proceeding.

Q. Stated on the back of it?—A. Yes, sir.

Q. In any of these cases have the claimants any pick or choice?—A. Yes, sir; in some cases they have such evidence.

Q. Very few are there?—A. The matter is this: At first when the goods were taken from Chinatown and stored at the warehouse the it was made from a certain block to a certain block in the orders; but that big fire on the 20th of January stopped that work, and there were many districts in which there were none stored in the warehouse.

Q. The fires where they were condemned at first, they were given time?—A. Yes, sir; to remove their goods in some cases, and in other places where the storing of goods was not done; those places—

Q. Take claim 1865. It is reduced how much?—A. Cash payment \$45 entirely canceled, and the items, a great many of the items, almost every item, is reduced more or less.

Q. What was the total reduction?—A. It was first \$785.25; it is now \$375.70.

Q. Did the original claimant object to the reduction in this case?—

A. In some cases they objected; at first they objected.

Q. Have you got the original of 1865?—A. Yes, sir.

Q. What is the memorandum?—A. That this claimant wasn't found at Waialuka, on the island of Maui, and had gone away from there, and on the advice of the committee this claim was reduced to \$375.70 and signed by the chairman of the committee.

Q. In every case where a reduction was made in the absence of the claimant it was done by a formal resolution and noted on the back?—A. Yes, sir.

Q. And signed by the chairman of the committee?—A. Yes, sir.

Q. Were there many of those cases?—A. Yes, sir.

Q. Do you mean by a resolution of the committee?—A. Yes, sir.

Q. Does the consulate make any charge against these claimants in doing this work?—A. A monetary charge?

Q. Yes, sir.—A. No, sir. When we make an assignment any expense that may be incurred will be borne and at the time of payment of the claim it will be deducted.

Q. For this work?—A. Yes, sir.

Q. So far as this work is done by the consulate?—A. Yes, sir.

Q. Is there any charge made?—A. No, sir; we have not made any charge. There are 48 claims reduced by the resolution of the committee.

Q. That was only done in the case where the claimant couldn't be found at that time?—A. Yes, sir.

Q. Claim 1865. There is here a list of kimonas, \$119.50, belonging to a fisherman's wife. Is it customary for a fisherman's wife to have such an elaborate wardrobe as that?

Mr. BALLOU. It is changed to \$39.50.

Q. They put it in for \$119.50. How did they come to put it in at \$119.50?—A. It was 7 kimonas; there was smaller items, and just covered it in this way, and after translating it they cut it this way.

The CHAIRMAN. Now, the question is this, the one that I asked: Is it customary for a fisherman's wife to have a wardrobe such as represented by this inventory?

A. The wife of a man in that business it is uncommon, but it is not uncommon to other women; for instance, the singing girl, they have more garments than any other women.

Q. What is that?—A. The singing girl.

Q. But the committee cut that claim down from \$119 to \$39 and some cents?—A. Yes, sir.

Q. Was there any reduction before that—was there any reduction made in the original?—A. Yes, sir.

Q. Before it was translated?—A. After it was translated and the amount reduced.

Q. That amount was put in at first \$796.60, wasn't it?—A. \$758.55.

Q. And it was reduced about one-half, over one-half?—A. Yes, sir.

Q. Three hundred and seventy-five seventy?—A. Yes, sir.

Q. 1869 silver coin \$70, reduced down to how much?—A. Twenty-five.

Q. 1873; do you remember anything about that cash?—A. One hundred and fifty-eight—and after it was canceled.

Q. Why did you cancel that altogether?—A. Well, because we had decided that all big cash claims are apt to be fraudulent.

Q. Not satisfied by any proof outside?—A. So we have decided to disregard the cash claims even at the risk of sacrifice some; that was the reason and the discussion in the matter.

Q. Yet some you canceled entirely and some you left for \$20 and \$25?—A. It depends upon the proof that came before us.

Q. 1874; what was the reason of striking out the watches, silver and gold, \$95?—A. Although it is so, it is not so common, as we understood it, for a teamster to have such a valuable item, so we cut it down.

Q. Did your investigation cover all of the Japanese claims?—A. Yes, sir.

Q. There was another Japanese claim that passed besides this one through the scrutiny of the Japanese consulate?—A. I understand so.

Q. If there was any outside of the Japanese claim that showed a discrepancy would you have discarded them just the same?—A. Yes, sir. There was no other outside claims filed outside of this committee.

Q. But if they had been disposed to exaggerate as to the amount of money, you took into consideration a man's standing as well as his occupation?—A. Yes, sir; because we have taken care and we lowered the cash claims. It is a little different, because the standing of a man may not count; he may have money in his possession, and others may have a great deal of cash and pay it right out; he may have lost it just the same; but so far as clothing and such things it is different.

Q. If he has it to-day, so probably will he have a week from to-day?—A. Yes, sir.

Q. But as to cash, he may have it to-day but not to-morrow?—A. Yes, sir.

Q. If he has it in his possession to-day it doesn't follow that he has got it to-morrow?—A. No, sir; that is the reason.

Q. Claim 1885, teamster and worker claim, cash \$169. What was done with it?—A. I took this claim and I examined this claim. Of course he didn't, and he was not in the habit of putting his money in the bank; he kept it in a trunk at the time of the fire, and he couldn't carry it out. Mr. Kobayashi looked the claim over, and I agreed with Mr. Kobayashi that this claimant was really in the possession of so many dollars, because this was accumulated in the duration of three or four years and kept in the trunk, and still we have taken care to reduce it to \$50; that is the cash item which we have reduced.

Q. From \$169 to \$50?—A. Yes, sir.

Q. What is the name?—A. Kobu Toma.

Q. Is this the memorandum that you handed me, showing the total amount of claims at the time when those receipts were signed?—A. Yes, sir.

Q. Will you read the items?—A. The total amount of receipts, or claims originally filed for which receipts were issued, for individual personal effects, \$579,543.11; merchandise, \$147,225.08; Kahaluihi claims, \$21,256.37.

Q. What is that merchandise and personal?—A. There was a fire at Kahaluihi, including both merchandise and personal property.

Q. Are those claims here?—A. Yes, sir. They were all appraised in Kahaluihi; they were condemned and appraised by the government at Kahaluihi.

Q. These claims all appear before you?—A. Yes, sir; we have them in consulate; a member of the consulate took an inventory at Kahaluihi.

Q. Why are the Kahaluihi claims taken different from the others merchandise and personal effects all together?—A. There were only two Kahaluihi claims which were merchandise claims, so we didn't separate them; we can separate them at any time.

Q. How many Kahaluihi claims are there?—A. Sixty-one, I believe.

Q. How many merchants' claims in the Kahaluihi claims?—A. Twenty-eight of them; only 28 merchandise claims in Kahaluihi.

Q. And how many personal-effects claims in Honolulu?—A. Twenty-five hundred and twenty of them.

Q. The list which I will file is 2,588. Some of them are marked canceled, and others which were canceled were fresh claims. Does that include Kahaluihi?—A. No, sir.

Q. (To the witness.) Then the next item is claims in the hands of the consulate still under investigation?—A. Yes, sir; this is deferred claims which are on the buildings of all of this leased land.

Q. Assigned claims?—A. Yes, sir.

Q. Claims in the consulate are what?—A. Twenty-two hundred and past.

Q. How many of them?—A. Two or three of them.

Q. The grand total of those is how much?—A. \$750,454.56.

Q. So at the time of issuing the receipt you had, did you make some reduction in the original claim?—A. Yes, sir.

Mr. PRATT. Now, you reduced it to \$495,610?

Mr. BALLOU. These claims, the individual claims, \$493,610.

Q. Now, you say the reduction made down to what?—A. The individual claims—I had my memory refreshed this morning—\$493,445.71; merchandise, \$132,550. That is the estimate, the reason being that those will have to be further cut before filed. There is no merchandise claim filed except Shimamoto.

Q. These were all filed?—A. Yes, sir; we are preparing them.

Q. So they are all to be filed?—A. Yes, sir.

Q. The Kahaluihi claims, have they been cut down?—A. Yes; \$13,528.74. The claims still in the hands of the consulate remaining is 2,200, the total now \$641,704.45; the difference between those claims and the claims at the time that the receipts were issued is \$108,550, a reduction by what we call the second investigation.

Mr. PRATT. That is taking out the cash and everything?

Mr. BALLOU. Yes, sir; originally.

Q. What did you say the personal effects were two weeks ago?

Mr. BALLOU. According to the statement that was handed to me at that time—at the time the legislature was in session—the personal effects in Honolulu was \$492,829.31.

The COMMISSION. Then they have been raised instead of being reduced.

Mr. BALLOU. They are still in the hands of the consulate. A man came over from Japan and found his original claim in the hands of the consulate and signed and verified it. Still, there is Mr. Tanaka; he can state definitely about those.

Q. (To the witness.) You say that this work began in June, 1900, or thereabouts, after the first claims commission had lapsed. Now, how long did it continue?—A. Well, it continued until recently; I can not attempt to state that now.

Q. When was the present committee of thirty appointed?—A. It was formed on the 5th of February of this year.

Q. Did you do any work in connection with that committee of thirty, or did that committee of thirty do all the work on these claims after it was formed?—A. Yes, sir.

Q. In what respect?—A. They have claims in their hands of which

the claimants are still unfound or is dead. The claimants put in their own statement, and we don't believe they had any such claims, and we put them to one side with the expectation of making a reduction, now that the committee of thirty are established, and we have left all of those claims we don't think are quite right with the committee of thirty.

Q. Those were the claims that were suspicious and hadn't yet taken action on?—A. Yes, sir. There were claimants that could not be found at the time—couldn't be traced—and there are claimants who haven't come to us and answered, and still there was some items on which we can't agree.

Q. And the committee took up the investigation of those?—A. Yes, sir.

Q. Have you a memorandum of those claims turned over to the committee?—A. This is the memorandum.

Q. Well, does this memorandum have the claims subject to reduction with the assistance of the committee since its correction in both lists?—A. Yes, sir.

Q. This memorandum doesn't show all the claims that were reduced by you from the month of June until the month of February?—A. No, sir; there is quite as many.

Q. You haven't the list?—A. No, sir.

Q. But it does show the claims that were reduced since last February?—A. Yes, sir; since that time.

Mr. PRATT. This committee is made up from the sufferers of the fire?

A. Yes, sir; the committee is the sufferers.

Q. The first Japanese committee was formed outside of the quarantine district?—A. Yes, sir; and this committee is composed of the sufferers within the burnt district.

Q. Is there any instance where the claim has been increased by this committee of thirty; any such claim?—A. No, sir; none increased at all from the original claims. Some reduction—359, from 2,300 to 1,600; 492, from \$365 to \$93.

Q. And these claims that you referred to the committee for investigation, of all there were three or four left at their original figure by the committee?—A. Yes, sir.

Q. All the rest were reduced?—A. Yes, sir.

Q. Didn't you also have a list of claims that you referred to the committee, in a black book?—A. That is a copy.

The CHAIRMAN. I understood that was a copy of all the claims.

Mr. BALLOU. This shows the result.

Q. There was one claim—one or two claims—that you called my attention to particularly at the consulate; do you recall that?—A. Yes, sir; that one is 1535.

Q. When you referred it to the committee for investigation it was \$3,676.75?—A. Yes, sir.

Q. And reduced by the committee to \$425.75?—A. Yes, sir.

Q. What was that?—A. A claim of cash of over \$3,000.

Q. And they couldn't prove it?—A. No, sir.

Q. Is the claimant here?—A. He is here now, but at the time of the reduction he wasn't here and the committee passed the resolution.

Q. That was one of those reduced by resolution?—A. Yes, sir.

Q. Has he assented to it?—A. Yes, sir; I think so. If he doesn't consent, then it all has to pass through our hands—

Q. 1583—that was reduced to \$471.40. What was that, a cash reduction?—A. In many things, in cash.

Q. What does this list show?—A. This list was made, I think, some time last August, just for the sake of reference.

Q. So it will show the cancellations and reductions made since last August?—A. Yes, sir. That is a fair sample of the claims reduced since last August.

Mr. PRATT. Has the committee of thirty had anything to do with those reductions?

A. These 200 claims, they were left with the committee; but we have many reductions.

Mr. BALLOU. Of these 200 claims made by the committee, are they copied on to this list?

A. No, sir; a new list.

Q. This shows the reduction made by you?—A. Yes, sir; between August and the time of turning the claims over to the committee of thirty.

Q. That is, between the turning over to the committee and August?—A. No, sir. To make a new list I have had no new forms; I have got it here; this was made some time about the first part of November of last year.

Q. This list that was turned over to you by the committee of 2,300 claims we will call "Exhibit A;" that consists of 63 pages of detail. I would like to complete a summary of that list, and we will call it "Exhibit B." This we will mark as "Exhibit C," the list that was made by the witness about August showing the change made between August and February of this year.—A. No, sir; not February; November of last year, not this new list.

Q. Between August and November of last year?—A. Yes, sir.

Q. I notice here claims canceled—2, 3, 6, and 16. Why were those canceled?—A. The goods were received back from the warehouse.

Mr. PRATT. Were all of these goods at the warehouse?

A. Yes, sir.

Q. Did you receive goods returned from either warehouse?—A. I think there was only two or three instances where the goods were returned from the government warehouse out at Kakaako; the goods were returned from the Aala warehouse.

Q. Now, when was this list marked "D" made up?—A. It was some time last November.

Q. And that was before the committee of thirty?—A. Yes, sir.

Q. And how many of the reductions have been put on here?—A. The result of our cross-examination and also the result of the reduction made by the committee.

Q. So that comprises the reductions up to date, practically?—A. Yes, sir.

Q. The reductions on Exhibit D will show the reductions up to date?—A. Yes, sir.

Q. Exhibit E is a memorandum of reductions made by yourself with the assistance of the committee of thirty since February of this year?—A. Yes, sir.

Q. At the time that committee was formed?—A. Yes, sir.

Mr. PRATT. Is this in your handwriting?

A. Yes, sir; and with the assistance of my colleague.

Q. Exhibit D and my list are copies of each other?—A. Yes, sir.

Q. The reductions are shown in Exhibit D?—A. Yes, sir.

Q. The statement made by the consulate is Exhibit F. (To the commission:) I would like to state after the examination of Mr. Tanaka I picked out this 100 as a sample. I would like to take the commission up to the Japanese consulate and let them see the 2,600 and go through them at random and see if these are a fair sample. They were picked out as canceled claims.

The CHAIRMAN. The commission would like to see a sample of the merchants' claims.

Mr. BALLOU. The merchants' are not filed, and are not ready to file as they stand now, and before they are filed there is going to be a revision of the action——

Q. Are there any merchants' claims filed?—A. No, sir; none except Mr. Shimamoto, who was in the hands of another attorney.

The CHAIRMAN. It shows merchandise, 28,147. They are not filed!

Mr. BALLOU. They are reduced before they are filed. That is the way they stand now ready for filing.

Q. They have not been filed yet?—A. No, sir. Finding that the merchants had not been attending to the matter, the consulate had me call a meeting of the merchants, and he gave them a little lecture as to what they should do with their claims before they are filed.

Cross-examination:

Mr. ANDRADE. All of your acts in regard to these claims have been merely clerical, or have you been a member of any of these committees of which you speak?

A. Well, I wasn't a member of any committee composed of the sufferers; I was only acting under the instructions of my superior, Mr. Saito, as he ordered me to do.

Q. You have simply taken these claims and prepared them, put them in form, in the form in which they are now?—A. That is in my handwriting now; that is clerical.

Q. You have overlooked this work?—A. Yes, sir; I supervised it.

Q. The data has been handed to you by other people, the material upon which you have worked?—A. Yes, sir.

Q. The information?—A. Yes, sir.

Q. Has been handed to you by others?—A. Yes, sir; the statements.

Q. The statements and all that you now possess have been handed to you by others, as we now see it?—A. By others of my own knowledge, knowledge that I had.

Q. What is the extent of your knowledge?—A. Well, what do you mean by extent?

Q. How much knowledge did you have in regard to this property that was destroyed?—A. Do you mean that I have personally seen the items?

Q. You say that you had certain official knowledge or information?—A. Yes, sir.

Q. What is the extent of that? How much have you had?—A. Well, I can't tell you how much it is; it is quite hard to tell you how much knowledge I had.

Q. You didn't go to the quarantine station and see these claimants,

did you?—A. I have been to the quarantine station many times before the fire; all through, officially, in the quarantine district of Chinatown and elsewhere.

Q. Securing this information?—A. Yes, sir; telling the sufferers, urging the sufferers to make out the memorandum; that is, after the fire and after the sufferers were detained in the camps. I have visited many times those sufferers in several quarters.

Q. Now, the information that you did get in regard to all the inventories which have been filed here, or was to be filed, was handed to you?—A. This paper—this was handed to me, as I have said just now, from the Japanese society to the Japanese consul; that is one of the papers handed. The information—the information in regard to every claimant, I or my assistant or my colleague and Mr. Saito himself have used every means to get this information from them.

Q. Did that consist in going to the detention camp, did it? Getting inventories which they might have made prior to the fire?—A. That was done by the Japanese society.

Q. Did this exist before the 20th of January?—A. Oh, yes.

Q. How long before the 20th of January?—A. Maybe about three or four weeks; I am not sure of it.

Q. What caused the Japanese society to be formed?—A. Well, that—I can't tell you exactly, because I am not a member. The society was formed for many objects, as my knowledge goes. I think it was formed for many objects in regard to this great event.

Q. And all the information that you had, did it come to you through this society?—A. At first, and then it was transferred to us.

Q. How late does that extend to?—A. It was on the 7th of March.

Q. Up to the 7th of March?—A. Yes, sir; they were in the work of gathering these statements.

Q. Then subsequent to the 7th of March you think you got your information?—A. Through many, several means. I can't tell you the distinct way of getting knowledge, but through many means, through the assistance of my colleagues and superior, and through the Japanese and among the Japanese, that is a fact I can't tell; I think some time last September the consulate thought it quite proper to a compact among the sufferers, and he appointed from the burnt district a committee of forty to consult and give information in regard to the many sufferers, and we have of course asked assistance in every quarter, and besides that we have as Japanese officials, we have of course several information and knowledge in regard to the sufferers. We haven't their names.

Q. How many were on this committee?—A. A committee of forty.

Q. Forty?—A. Yes, sir; a committee consisting of forty people. One committee.

Q. Now, is that anything like the committee of thirty now in existence?—A. No, sir; it is quite different; it was made to act and to assist and get information outside from the people who were quite familiar with the sufferers.

Q. Now, you say—you stated on direct examination that the consulate directed ambiguous and incorrect inventories?—A. Yes, sir.

Q. Now, how did he do that; by what means, and upon what information?—A. There were more than 1,000 claims the amount of which \$100, and for those claims and those items, which is quite unusual,

which may be taken as quite faithful, generally speaking, of course—I think so—more than 900 claims the amount of which is over \$100 to \$250; now, unless there is a very extraordinary and unusual item it may be said to be quite faithful, we did subject it to examination, Mr. Saito himself having thought it was proper to examine many of those people and all about the claimants. As to the \$250 claims, and even for those claimants, and we have had a great deal of assistance out of the committee of forty to make it as proper as possible, as faithful possible.

Q. What did you do and what did this committee do when they run across a claim which none of the committee were familiar with?—A. There was no such claim.

Q. Then this committee of forty practically knew every one of the claimants?—A. Even if the committee did not know him they could find it out. They could find who is the man that is familiar with that claim.

Q. And from that man you would get your information?—A. Yes, sir; they might have come in and said that his wife had 4 dozen silk kimonos.

Q. Would you take that?—A. No, sir.

Q. If he said that he had two, as a matter of fact what would you do?—A. As a matter of fact we couldn't know the fact.

Q. You don't know absolutely that any of these claims is a correct claim, do you?—A. We can't tell; it is quite impossible; that is a matter of common sense to be used in this case; we couldn't reach an absolute truthful conclusion in this case; we couldn't tell; we couldn't reach the truth by investigation; we couldn't reach the absolute truth, but the approximate truth, and that is the object we have had in view.

Q. Then when the inventory looks doubtful, then the consul would summon before him the claimant?—A. Yes, sir.

Q. Didn't the consul use his own discretion and say "You don't look like men that owned such and such property?" How did you go about that? Did he examine the witnesses or did the committee of forty?—A. No, sir; to summon all of these people was quite impossible; getting information through those sources he had to make it out as faithfully as possible.

Q. There is nothing absolutely certain?—A. I doubt if there can be the absolute truth about it.

Q. You testified to inspection and examination?—A. Yes, sir.

Q. Now, was that done in pursuance of the same order that you have just testified about in the examination and investigation of the claims?—A. Yes, sir; what I testified to is true.

Q. Was that also done by the committee of forty or the consul himself?—A. By the consul himself and with the assistance of the committee of forty.

Q. Then the consul has examined 25 claims which have been presented to this court?—A. Yes, sir.

Q. Personally?—A. Yes, sir.

Q. Now, the cash claims you have testified have been reduced and looked upon with a great deal of suspicion?—A. I didn't say that; I say it is apt to be fraudulent in many cases. I didn't say that the cash claims were suspicious; I say that the cash claims are apt to be fraudulent statements, so I thought it would be proper to disregard it at the risk of sacrifice of the faithful ones.

Q. Now, upon what information have you reduced the amount of cash claims that you have had no evidence to contradict his statement?—A. It was rather discretionary; I don't know that it was right, it was merely our discretion; we thought it would be the correct thing to disregard the cash claims.

Q. Then it was your belief that these doubtful cases—that they didn't have the cash that they represented that they had?—A. In my belief we canceled the claims.

Q. Then you found through your examination that some of these inventories were really not correct?—A. Well, sir, in order to satisfactorily prove their case there may be many witnesses, because it is expected to have cash claimants.

Q. They know that money was there?—A. We can't be sure; we can ascertain whether he was possessed of so much money or not.

Q. You testified about a certain gentleman saying that one of these claimants was entitled and no doubt did have a certain amount in his trunk?—A. 1885.

Q. Now, you allowed that claim?—A. We allowed that claim to a certain extent only.

Q. Did you allow it in full?—A. No, sir; only one-third; not exactly one-third. It was originally \$169 and a fraction. We have reduced it to \$50. It is a mixed claim. We have allowed it for \$50. These common people are generally—if they have anything at all, they are in possession of \$50.

Q. Well, did you feel at any time that you might be working an injustice to these people—to a man who might have \$150 when you only allowed him \$50?—A. No, sir.

Q. Then these claims that were put in were fraudulent, were incorrect and untrue?—A. All claims?

Q. All claims for money?—A. Yes, sir; apt to be. They are not all fraudulent, but they are apt to be in money cases.

Q. You found a great many incorrect inventories, did you not?—A. Yes, sir; at first.

Q. What did you attribute that to; a mistake or what?—A. Well, it may have been a mistake; it may have been a misunderstanding, or an attempt at fraud, in certain cases.

Q. There was something said about goods returned?—A. Yes, sir.

Q. Have you a list of goods that was returned from the various warehouses to the claimants?—A. I have of the personal effects; I have got the list, but in that list there is only one trunk and one basket, but there is no writing as to the contents.

Q. Does the inventory contain the contents?—A. No; because they got the information from the people who were there at the time.

Q. And your information is not entirely of that class, what has been given to you by the claimants or parties who must have been familiar with the claimant?—A. Yes, sir; in that way, but not our own knowledge, or in the knowledge of our assistants and the several sources; with only one source of information it is quite hard to make a definite order.

Q. As to that money in the trunk, were you satisfied that there was any money in the trunk?—A. Yes, sir; I really thought that \$100 might be faithful, but I was working not only for one claimant, but for the welfare of all the claimants; so far as the general welfare of all, I thought it best to reduce it to a certain amount.

which may be taken as quite faithful, generally speaking, of course—I think so—more than 900 claims the amount of which is over \$100 to \$250; now, unless there is a very extraordinary and unusual item it may be said to be quite faithful, we did subject it to examination, Mr. Saito himself having thought it was proper to examine many of those people and all about the claimants. As to the \$250 claims, and even for those claimants, and we have had a great deal of assistance out of the committee of forty to make it as proper as possible, as faithful possible.

Q. What did you do and what did this committee do when they run across a claim which none of the committee were familiar with?—A. There was no such claim.

Q. Then this committee of forty practically knew every one of the claimants?—A. Even if the committee did not know him they could find it out. They could find who is the man that is familiar with that claim.

Q. And from that man you would get your information?—A. Yes, sir; they might have come in and said that his wife had 4 dozen silk kimonos.

Q. Would you take that?—A. No, sir.

Q. If he said that he had two, as a matter of fact what would you do?—A. As a matter of fact we couldn't know the fact.

Q. You don't know absolutely that any of these claims is a correct claim, do you?—A. We can't tell; it is quite impossible; that is a matter of common sense to be used in this case; we couldn't reach an absolute truthful conclusion in this case; we couldn't tell; we couldn't reach the truth by investigation; we couldn't reach the absolute truth, but the approximate truth, and that is the object we have had in view.

Q. Then when the inventory looks doubtful, then the consul would summon before him the claimant?—A. Yes, sir.

Q. Didn't the consul use his own discretion and say "You don't look like men that owned such and such property?" How did you go about that? Did he examine the witnesses or did the committee of forty?—A. No, sir; to summon all of these people was quite impossible; getting information through those sources he had to make it out as faithfully as possible.

Q. There is nothing absolutely certain?—A. I doubt if there can be the absolute truth about it.

Q. You testified to inspection and examination?—A. Yes, sir.

Q. Now, was that done in pursuance of the same order that you have just testified about in the examination and investigation of the claims?—A. Yes, sir; what I testified to is true.

Q. Was that also done by the committee of forty or the consul himself?—A. By the consul himself and with the assistance of the committee of forty.

Q. Then the consul has examined 25 claims which have been presented to this court?—A. Yes, sir.

Q. Personally?—A. Yes, sir.

Q. Now, the cash claims you have testified have been reduced and looked upon with a great deal of suspicion?—A. I didn't say that; say it is apt to be fraudulent in many cases. I didn't say that the cash claims were suspicious; I say that the cash claims are apt to be fraudulent statements, so I thought it would be proper to disregard them at the risk of sacrifice of the faithful ones.

Q. Now, upon what information have you reduced the amount of cash claims that you have had no evidence to contradict his statement?—A. It was rather discretionary; I don't know that it was right, it was merely our discretion; we thought it would be the correct thing to disregard the cash claims.

Q. Then it was your belief that these doubtful cases—that they didn't have the cash that they represented that they had?—A. In my belief we canceled the claims.

Q. Then you found through your examination that some of these inventories were really not correct?—A. Well, sir, in order to satisfactorily prove their case there may be many witnesses, because it is expected to have cash claimants.

Q. They know that money was there?—A. We can't be sure; we can ascertain whether he was possessed of so much money or not.

Q. You testified about a certain gentleman saying that one of these claimants was entitled and no doubt did have a certain amount in his trunk?—A. 1885.

Q. Now, you allowed that claim?—A. We allowed that claim to a certain extent only.

Q. Did you allow it in full?—A. No, sir; only one-third; not exactly one-third. It was originally \$169 and a fraction. We have reduced it to \$50. It is a mixed claim. We have allowed it for \$50. These common people are generally—if they have anything at all, they are in possession of \$50.

Q. Well, did you feel at any time that you might be working an injustice to these people—to a man who might have \$150 when you only allowed him \$50?—A. No, sir.

Q. Then these claims that were put in were fraudulent, were incorrect and untrue?—A. All claims?

Q. All claims for money?—A. Yes, sir; apt to be. They are not all fraudulent, but they are apt to be in money cases.

Q. You found a great many incorrect inventories, did you not?—A. Yes, sir; at first.

Q. What did you attribute that to; a mistake or what?—A. Well, it may have been a mistake; it may have been a misunderstanding, or an attempt at fraud, in certain cases.

Q. There was something said about goods returned?—A. Yes, sir.

Q. Have you a list of goods that was returned from the various warehouses to the claimants?—A. I have of the personal effects; I have got the list, but in that list there is only one trunk and one basket, but there is no writing as to the contents.

Q. Does the inventory contain the contents?—A. No; because they got the information from the people who were there at the time.

Q. And your information is not entirely of that class, what has been given to you by the claimants or parties who must have been familiar with the claimant?—A. Yes, sir; in that way, but not our own knowledge, or in the knowledge of our assistants and the several sources; with only one source of information it is quite hard to make a definite order.

Q. As to that money in the trunk, were you satisfied that there was any money in the trunk?—A. Yes, sir; I really thought that \$100 might be faithful, but I was working not only for one claimant, but for the welfare of all the claimants; so far as the general welfare of all, I thought it best to reduce it to a certain amount.

Q. What was the nature of the information that you got from Mr. Kobayashi in regard to this one claim?—A. Well, that he was there. Now, with Mr. Kobayashi and this man, he was there proving his claim, and he proved that in the course of three or four years such amount of money he put in the trunk, in a safe place—he thought it was a safe place—and he put it in his trunk, and Mr. Kobayashi he certified to it on the back of the paper.

Q. That is Mr. Kobayashi's handwriting—this memorandum?

Mr. BALLOU. The whole memorandum?

The WITNESS. This money was claimed by him; that he had saved it up for two years—over two years, and it was put in the trunk.

Mr. BALLOU. What is this?

A. This is the amount. It was reduced to \$100—\$118.15.

Q. Was the acts of the board of health such as prevented anyone going to their rooms and taking out money and jewelry, and things of great value?—A. I can't answer that. I don't know.

Q. What was your real opinion of the board of health?—A. I don't know what was the real action of the board of health.

Q. Had the fire extended to such an extent and so rapidly that it was impossible to get these things?—A. Yes, sir; especially on the 20th of January, when the great fire happened.

Q. Now, in regard to the merchandise, did you follow the same course that you did with the personal effects?—A. No, sir; we did not follow the same course. For the personal effects, you see, the lower class don't know enough to make up claim, but for the merchants' claims, they are men that can form very accurate claims, and so we didn't think it was necessary to go into them or go through them.

Q. Have you examined these merchants' claims; have you gone through the same routine that you did with the others?—A. No, sir; we didn't go through the merchants' claims. We have just acted on the individual claims, and we have looked through it, and in cases where there was speculative or indirect claims, then we have advised such man to put his claim on another sheet—separate sheet. That is the way we have made an examination. We didn't go into every item of valuation.

Q. Did you find any merchants' claims in fault—larger than what really they might be?—A. I didn't find any. I am not much acquainted as to whether it was too much or not.

Q. Have you made any kind of an examination of the merchants' claims?—A. I received it and filed it, and I looked it over, and in case it was ambiguous I then advised them to take it out. That is all.

Q. Any item that might be too big, you say?—A. No; I will call it mixed, and if I saw an item that I thought was wrong I would advise the claimant to take it out. Such was the examination, if it may be called an examination.

Q. Did you go into the matter of finding out how much of the goods the claimant had in his store at the time of the fire?—A. We didn't know exactly, but we have left out in many cases the amount of tax that he was paying prior to the fire.

Q. You took it for granted at the time of the burning there was such property in the store as there was at the time the tax assessors assessed the property?—A. Yes, sir; I think so.

Q. You took that for granted?—A. Yes, sir; not exactly the same amount.

The CHAIRMAN. Going back to these individual claims, in all cases have you a memorandum of each man paid taxes?—A. Yes, sir.

Q. And also know what each man's taxes was for merchandise?—

A. In some cases the merchandise, and other cases fixtures and buildings.

Q. You have that information?—A. Yes, sir.

Q. Now, if a man presented you a claim for a certain amount of merchandise, you simply took that and filed it away and then sent for him to examine him, or what did you do?—A. No; I don't think there was any necessity of examining the man, for we took it as faithful.

Q. Now, as a matter of fact, sometimes men are not faithful.—A. Yes, sir.

Q. There may be claims here that show untruth and that are incorrect?—A. Maybe.

Q. Yes; both?—A. Yes, sir.

Q. Your examination was not so thorough of those claims for merchandise as would avoid anything like that?—A. I don't believe there was any unfaithful claims.

Q. But the amount of attention that you did give would not prevent fraud, would it, if a man was determined to commit fraud upon the government, put in an invalid claim, your work was not of such a minute nature that it would detect that?—A. You mean the amount of the claim?

Q. Yes, sir.—A. If such is the case, I can't believe that we couldn't detect it; we didn't try to detect it.

Q. Your work was not of the nature that you would have detected the fraud if a fraud was attempted; and the same way with the personal effects?—A. We did not follow the same line with the merchants' claims.

Q. But with the merchants' claims you admit that there might have been practiced fraud and you not know it?—A. I can't admit that; we didn't look or make a thorough examination; we thought it was unnecessary.

Q. The merchandise claims, they have been compared with the books of receipts in the previous years?—A. Yes, sir.

Q. Did they correspond very well?—A. In some cases very well and in some cases not.

Q. What is the majority of the cases? Do they exceed the amount of taxes or are they below the taxes of the previous year?—A. Many of the merchants have taken back some of their goods from the warehouse, so that the claim isn't exactly the same amount as they had seen before the fire.

Q. The whole of the inventories approved and showed the amount of the property returned?—A. Yes, sir.

Q. Do they do that in the merchandise?—A. Yes, sir; I believe so.

Q. Are you positive about that?—A. I believe so.

Q. You are not sure about that?—A. I haven't received any information of the other claimants; I believe it does.

Q. Did you go into it so far as to find out whether or not this merchandise was insured?—A. No, sir; about that—

Q. The Japanese merchants are careful people, are they not?—A. Every merchant is careful.

Q. They are careful to that extent that they have their merchandise insured generally?—A. I think so, but I am not sure about that.

Q. Did you find in your examination any goods of merchants which were insured?—A. Well, I didn't make any such examination.

Q. Then your examination was not very thorough?—A. It wasn't

of the same nature that we have done in regard to the personal things.

Q. If you found any of those claims which were insured—which might have been insured—the insurance was paid by the claimant?—A. I believe so; I don't know of an instance.

Q. Outside of your inventory, you do not know of an incident?—A. No, sir.

Q. Did you ever compare any of the inventories with any bills that might have been in the possession of the merchant, or any invoice of the stock books?—A. In the personal claims—the personal effects—we didn't take that pains.

Q. And you didn't go into it so far as to ascertain how long the goods might have been in the store; some might have been lessened in value; they might have been there too long?—A. The only thing that I can say, we received the amount of the claim just as it was filed; we just inspected it; we took the items and the values to be faithful; unless there was some ambiguity in the claim we didn't make any examination of it at all.

Q. Well, that was the extent of your knowledge as to these merchandise claims?—A. Yes, sir.

Q. How many of those are there?—A. Twenty-eight claims.

Q. How did you get your information in regard to the Kahaluihi claims?—A. In Kahaluihi at the time of the fire there was a Japanese society of which Mr. Mouri was chairman; he was gathering claims, but I am very sorry to say that the Kahaluihi sufferers were 61 persons; it might have been more—maybe 300.

Q. How do you know that?—A. Because I worked on the commission, and there was more than 300 Japanese persons in Kahaluihi district, but we have just gathered those claims which were verified by the claimants. A member of the Japanese consulate was over on the island, so there may be a few left, but we can't help it.

Q. And those claims are now in your possession?—A. Yes, sir.

Q. In the same way as the Honolulu claims? But your information in regard to those claims is very limited, is it not?—A. Well, only 6 in the party, so we can get the information of them.

Q. You have no personal information?—A. Yes, sir; we have personal information, because a member of the office was down there and made the examination and summed up every claim and summoned every claimant and examined him.

Q. Now, is it not a fact that a great many Japanese have but very little clothing?—A. What do you mean by a great many Japanese?

Q. In the city, speaking of the town—speaking generally?—A. Well, speaking generally, as a general thing in the city it is not so scanty as it is out in the country; it is very slight, as you might suppose.

The further hearing of this matter is continued until 10 o'clock a. m. the 7th day of June, 1901.

JUNE 7, 1901.

MORNING SESSION.

T. TANAKA resumed.

Mr. ANDRADE. You admit that Japanese as a general thing have the greater part of their clothes on?—A. Not only the Japanese, but I think that is the case with other countries.

Q. But we have only the Japanese under question at the present time?—A. Yes, sir.

Q. Is there any possibility of some of these claims being the claims of some of those other Japanese in question?—A. Yes, sir; that is right.

Q. Can you tell the commission what the smallest claim amounts to, that is presented here, that has been brought to your notice?—A. I think the smallest claim is \$2.75; I don't remember.

Q. Is that the claim where the person lost all of his possessions?—A. No.

Q. Just a part?—A. Just a part.

Q. Are there many of those?—A. Well, the next smallest claim, so far as my memory serves me, is \$12 and some fraction; I don't remember now.

Q. But as a general thing do you believe that the ordinary Japanese has more than \$100 worth of personal effects?—A. Oh, yes, there are cases; there is a case in every nationality as to their wealth; \$100 personal effects, I think, is just. It depends upon the degree of the wealth that a man has; I can't say definitely on that point.

Q. Have you not seen a great many Japanese people—their room—where they simply have a bunk, and probably they sleep on a mattress, and a mosquito net, and just a very few things other than that? Have you not seen a great many of those?—A. I have seen, so far as the Japanese in the city are concerned—I have seen those that are in the lodging houses and the hotels; they have more than that, and they have some clothing and other things. The Japanese are rather a cleanly people, and like to have things clean around them. They want many things other than money; things that you are not apt to see.

Q. Do you not believe that some of these claims where the claimants say they have lost silk kimonos—do you believe that those are absolutely true?—A. That they are absolutely true, that I can not say, but, as I said yesterday, I am seeking for the truth as nearly as possible; so as the silk kimonos in Japan is the most cheap product, it is customary in Japan—most every woman has plenty of clothing. Silk gowns are found on every nationality, and because it is cheap in Japan, and the price which has been fixed here in these inventories.

Q. Do you know whether or not they are the cost price of those articles as now or as partly worn or as old articles? Do you know that?—A. Some of them must be, as a matter of fact, partly worn and part of them new, and some of them a little slow, as the case may be; but one thing that I want to call your attention to is that I didn't inquire myself, nor do the committees—they don't pretend at all to be a competent appraiser in that respect, because, while we might pretend to be so, so we can not be imposed on in any way, so we don't pretend to be appraisers at all; we have used our common sense.

Q. You just took a claim and cut it down as you saw fit?—A. Not each claim; there are claims that were not cut down, because they are fair.

S. OZAKI, called and sworn.

Mr. BALLOU. You are in business in Honolulu?

A. A merchant.

Q. Wholesale or retail?—A. Wholesale and retail both.

Q. Do you import your goods from Japan?—A. Yes, sir.

Q. How long have you been in the wholesale merchandise business in Honolulu?—A. About eleven years.

Q. How many stores have you in Honolulu?—A. Three.

Q. Where are they situated?—A. Two stores on King street and one on Hotel.

Q. Were you in Honolulu during the prevalence of the bubonic plague?—A. No, sir; I was in Japan at the time.

Q. When did you return from Japan after the plague?—A. July of last year.

Q. Was any of your property destroyed in the fire?—A. Yes, sir.

Q. Outside of your own personal claim, what interest have you or what steps have you taken in regard to the general claims of the Japanese sufferers from the sanitary fires?—A. I was appointed as chairman of the mass meeting of the Japanese sufferers had in February 5 of last year—this year; and since then I am working for the benefit of all of those sufferers.

Q. Did that mass meeting include merchants and merchandise?—A. Yes, sir.

Q. And if the merchants themselves, holding merchandise claims, also had their own meetings in this matter, at that mass meeting what committees were appointed?—A. Committee of the number of thirty were appointed at the mass meeting.

Q. By the chairman of the committee?—A. Yes, sir.

Q. And that committee has held frequent meetings?—A. Yes, sir.

Q. Now, have the merchants themselves, those holding merchandise claims, held a meeting?—A. That is, a meeting different from the sufferers.

Q. Now, hasn't the committee of thirty, the full committee of thirty had full charge of the merchandise claims?—A. No; I never heard that the merchants had any special meeting, but the entire claim was turned over to the committee of thirty.

Q. What was done by the committee of thirty in regard to the preparing of the claims which are now before the commission?—A. We have been acting with the consulate to file claims which is faithful and honest. For that end we have always been working.

Q. Did you make an examination of certain claims?—A. Yes, sir.

Q. Is this Exhibit E a statement of the claims on which you worked together with the consulate?—A. Yes, sir.

Q. What was the result of your work on those claims? Were the claims reduced or left as they were?—A. Some of them might have been passed entirely; some of them, I think, was cut.

Q. Do you know how many were passed without being reduced?—A. I can't tell you the exact number of claims which passed through the committee, reduced by the committee, but it must be over 20 claims.

Q. How many were not reduced by the committee?—A. Seven or eight, I believe.

Q. How was this investigation carried on by your committee in connection with the consulate?—A. All the claims were ordinarily filed at the consulate. After the consulate examined the claim and found to be a claim, then it was handed over to the committee for investigation, and then we started on to investigate whether the claim was right or wrong.

Q. Whom did you summon before you in your examination in your investigation of that question?—A. We had a special committee whose duty it was to personally attend to see and notify the claimant who

claim is not right and have a conference with him. I generally talked with the person, the claimant.

Q. And was that done in every case, or were there other means used?—A. Yes, sir; there was some cases; the claimants themselves were away from Honolulu, staying on some other island; in those cases the committee took hold of the whole thing, and the majority of the committee would decide, one way or the other.

Q. Did you examine witnesses outside of the claimants in any individual case?—A. Yes, sir.

Q. There are a great number of these claims assigned, are there not?—A. Yes, sir.

Q. On whose advice is that done?—A. By the advice of our lawyer, Mr. Ballou.

Q. What reason, if any, did he state to the claimant that was advisable?—A. Yes, sir; the only reason for that was the filing of the claims, there was so many thousand claimants; and having an assignee, it will be very convenient for them to file all the claims, there being so many thousand claimants; anyway, it was the opinion of the committee and also the advice of Mr. Ballou. There might have been cases where the assignee was not here and then something might have been done, and then it could all be done at once, there was so many claims, and would get along better in one man's hands.

Q. Can you explain how that would do it, in what manner, and toward what end?—A. One way, you would save the time of the court through one man handling, and there might be such a case as the government compromising, and then so many claimants; in that case it could be much easier to adjust.

Q. Were those assignments made by the claimants to you all just alike, or were they different? Were they made on one form?—A. Only one way.

Q. On a printed form?—A. Yes, sir.

Q. Is that the printed form upon which the assignments were made [showing the form]?—A. Yes, sir.

Q. That is, both the Japanese and the English; is one a translation of the other?—A. Yes, sir; it is a translation of the other.

Q. "In consideration of one dollar received by me I hereby assign my claim for property destroyed in consequence of the order of the board of health in 1900 to Mr. S. Ozaki, trustee, with full power to collect the same for my benefit, and to compromise the same, or to assign this claim to such other person as he may select upon the same trust." That is filed as Exhibit G.

Q. (To the witness.) At that time did you give the claimant any return paper?—A. Yes, sir.

Q. On a printed form?—A. Yes, sir.

Q. (Here the witness is shown a paper.) Is this the printed form of the return paper that you gave to him, the claimant, in each case?—A. Yes, sir.

DECLARATION OF TRUST.

Claim No. —, for property destroyed in consequence of an order of the board of health in the years 1899 and 1900, having been assigned to me as a trustee, with full power to collect the same for the benefit of the claimant, or to compromise the same. I hereby declare that I hold the same upon trust to obtain as advantageous a settlement of said claim as it is possible for me to obtain, and to pay the full proceeds of any judgment or settlement obtained by me over to the claimant, deducting only claimant's proportion of the legal charges and expense actually incurred.

The foregoing declaration of trust provides for the faithful payment to the claimant of money received on that account is hereby guaranteed.
Imperial Japanese Majesty consulate.

Q. (To the witness.) Who were these declarations signed by?—A. Below the consul's signature and seal mostly.

Q. (To the commission.) I file that as Exhibit H.

Q. What attention do your committee of thirty give to the merchants' claims? In the first place, will you tell us how many of the merchants' claims there are?—A. The merchants' claims—claims filed by the merchants—is 28. There are several more that would belong to Exhibit A.

Q. What is the nature of those?—A. Where goods are consigned to a party who is not a merchant here and which were destroyed before he disposed of them, and all of those things that a man has no license for as a merchant, sold to the merchants at the time of the fire, clothing, and all of those kind of things.

Q. Well, now, those claims, not the regular merchants' and dealers' goods and things of that sort, do we understand that those only, that the claims we have heretofore classed as personal property, they were investigated by the consulate and those that were merchandise claims were not investigated?—A. Well, it was mixed in the consulate with personal claims.

Q. How many are there of such claims for goods that properly belong to Schedule A and not as to the class of regular merchandise claims?—A. I can't tell you just now the number.

Q. Can you give us an idea, approximately?—A. I can't tell you the fact; the committee are assorting it.

Q. Are those claims large or small claims?—A. I don't know what you mean by great, but I could say that it is more the personal effects the rest are merchandise claims.

Q. Now, of the 28 regular merchants' claims, what attention was given them by your committee; what was done in your committee?—A. It has not been filed yet; they are in progress of investigating they are under investigation by the committee at present.

Q. What is the nature of the investigation which is being carried on in those cases?—A. Principally by the valuation of the merchants.

Q. And you say they are still under consideration by the committee?—A. Yes, sir.

Q. Does this 28 include the claim of Mr. Shimamoto?—A. Yes, sir.

Q. And you say none of them have been filed; were you thinking of Mr. Shimamoto?—A. It was a mistake, 27—one filed by Mr. Shimamoto.

Cross-examination:

Mr. ANDRADE. You say you have been a merchant for eleven years? A. Yes, sir.

Q. Will you distinguish the difference between the committee of thirty and the committee of forty?—A. The committee of thirty was elected by the mass meeting of February 5, and the committee of forty was appointed by the consulate.

Q. You were not here during the plague time?—A. No, sir.

Q. Did you suffer any loss from these fires during the plague time? A. Yes, sir.

Q. How many of your stores were destroyed?—A. One.

Q. Where was that located?—A. On King street, Maunahala street.

Q. Have you personally examined all of these claims for merchandise and personal property?—A. Yes, sir; I have looked over nearly every one.

Q. Is that the extent of your examination of these claims?—A. Yes, sir; the committee of thirty was appointed on the 5th of February of this year, and prior to that time the claims had been filed with the consulate, and the consul had been investigating them and working on them, standing pretty near a year. Then, after the 5th of February, after the committee was created, then it was transferred to the committee. The committee brought them to their office and investigated them. I had much to do with it. Those that were passed by the consulate I only looked over, taking the consulate's investigation as a guaranty.

Q. And that is the extent of your examination?—A. Yes, sir.

Q. Have you personally gone into the details of any claim as to the fact?—A. Yes, sir.

Q. How many of them?—A. It might have been over 200.

Q. Why did you go into an investigation of those?—A. Because I thought their claim wasn't right.

Q. Did you find any defect in the claims?—A. Yes, sir.

Q. What was the nature of the error?—A. The amount of money.

Q. Was that in excess of what it really should have been?—A. Yes, sir; it was in excess.

Q. And you only found 200 of those?—A. Yes, sir; over 200.

Q. Were you satisfied that the balance of the claims were absolutely correct?—A. Yes, sir.

Q. Why did you think that?—A. The rest of the claims besides the 200—over 200 passed such a rigid examination in the hands of the consulate that the committee thought it was all right.

Q. These 200 claims that you investigated personally in which there was a defect had been passed by the consul and those under him and examined by yourself personally?—A. Yes, sir; it was first detected by the consulate and reported to the committee, and the committee confirmed that opinion of the consul and started the examination.

Q. Did you not find 200 claims personally that were erroneous?—A. No, sir.

Q. The 200 claims that you found, that you found to be incorrect, were not found by yourself, but by those working in the consulate or the committee?—A. By the consulate.

Q. Did you yourself find any inventory that wasn't purely correct?—A. No, sir.

Q. Then your investigation was not so thorough as to find any mistakes?—A. If you mean the 200 claims that were found by the consulate, we did everything on those claims. We have done all right on those 200 claims; we have done it all right.

Q. Those 200 claims were somewhat invalid, were they not?—A. Yes, sir.

Q. Now, what was the nature of the error in the amounts in excess of what they really should have been?—A. Their valuation was higher than it ought to be, and a cash claim also.

Q. Other than cash claims, did you not find that the other claims were somewhat fraudulent, somewhat swollen up?—A. Yes, sir.

Q. Did you find the excess in the number of the articles or excess in price?—A. Principally the price of some of the goods.

Q. In some cases did you not find there was excess in price as well the excess in the number of the articles?—A. Yes, sir.

Q. Did you or do you think those claims were conscientious claims or were they intended to be a fraud upon the government in the final settlement?—A. There must be some mistake.

Q. As a matter of fact, was it not a fraud upon the Government?—A. I don't think it is, although I wasn't at the time of the plague in this country, but I am told that at the time of the fire there was such confusion prevailed because some of them might have lost their memorandum and their memory; when they made the list of claims they might have inserted something that didn't belong to them by mistake.

Q. Do you believe they were conscientious claims?—A. Yes, sir.

Q. Do you know when the inventories were taken? Was it on the day that the Japanese were taken to the detention camp, or some subsequent time?—A. Some time before they were sent to the detention camp, and some after that.

Q. Do you believe the most of these Japanese were in such confusion that caused them to put in their inventory the cost price of article and excess of the number of articles?—A. Yes, sir; I believe so.

Q. Now, in adjusting those claims—the claims of the merchants—did you take their own personal inventories, or did you have outside evidence in adjusting those claims before bringing them here?—A. My opinion.

Q. Now, in adjusting the claims of the merchants, did you take their own personal inventories, or did you take outside evidence in adjusting those claims before bringing them here? The personal claims are now in question just now.—A. It was done by the merchants themselves and filed with the committee.

Q. Were they true inventories?—A. I can't tell you; that is in progress of investigation now—the merchants' claims.

Q. Were the inventories of these merchants compared with the returns returned for the previous year?—A. I can't tell you; I didn't go over and compare them.

Q. Were they compared with the stock books of the various merchants?—A. You ask me for mine, I say yes; all the others are still under investigation. I can't say as to that.

Q. As a matter of fact, do you know anything at all about the merchants' claims, except just your own?—A. These other respective claims went to the committee; that is all that I know. For further information I can not give you anything; it is in progress in the investigation at the present time.

Q. Now, as to the personal effects, did you go into that with a particular degree of care, into the claims for the personal effects, any more than you did with the claims for the merchants?—A. As to the personal effects, we did that first; the first duty was to the personal effects. After we finished the personal effects we took up the merchants, and we are just investigating the merchants now.

Q. But, as a matter of fact, you did not go into—more into dealing with the personal-effects claims than you did with the merchants?—A. I did not make any further inquiry, other than what you received from the claimant himself, in regard to their respective claims of personal effects? Did you make any further investigation than what information you really got from the claimant himself?—A. No, sir.

Q. Is it not the custom of Japanese merchants to have their stock and fixtures insured?—A. Very few.

Q. During the investigation by this committee, did they find them insured? Were they insured—the most of them, or any of them?—A. I can't tell, except mine.

Q. Then your investigation was not to the extent that covered all the particular details pertaining to these different claims?

No answer to the question.

Redirect examination:

Mr. BALLOU. Now, I would like to have you give once more a summary of these three kinds of claims. First, was anything done with the personal property, personal-effects claims, and which were not referred to your committee, that were passed by the consulate? What was done with those?

A. Nothing done by the committee, with the exception that both claims were passed upon by the consulate, and so on.

Q. You just testified that you looked over them. Is that so, or did you simply look through them?—A. Yes, sir; I looked over the whole thing.

Q. Now, second, what was done with those claims which were reported to you by the consulate for investigation, amounting, as you stated, to over 200 claims?—A. Of those 200 claims I had cause to examine rigidly.

Q. And the result of that examination is shown in this Exhibit E. For instance, 2273; do you remember anything about that claim?

Mr. ANDRADE (to the witness). Do you mean that you examined the most of the claims rigidly and personally? You stated a little while ago—now, state a little more in detail the nature of the investigation made by your committee of the 200 and more claims which were referred to you by the consulate?

A. We have special committees consisting of five members, called conference men, and those five men called on the claimant personally, in each case—those claimants who were present in Honolulu—and had a talk with him, or the claimant's friend who has a full power to act for him, and had a talk, a full conference, and then the committee came, and that is the way it is done with those parties who are not here, who are away at the time on the other islands; there was no other means but to vote on the matter in the committee and decide either way.

Q. Did your committee examine any other witness than the claimant himself?—A. Yes, sir.

Q. What were those witnesses called for, and what kind of questions would be asked of them?—A. Asking about whether he had any knowledge of the claimant's possession, and such things like that.

Q. It was only done in a few cases, few instances?—A. It was done in some cases.

Q. Did you ever add up the total reductions made in those 200 claims?—A. No, sir.

Q. But they are shown here in Exhibit E?—A. Yes, sir.

Q. You don't remember anything about this claim 2273 that was reduced from \$1,094 to \$278?—A. I can not give it to you, but it was passed by the committee and was transferred to the hands of the consul.

Q. And you say that the merchants' claims have not been investigated, with the exception of Mr. Shimamoto—have not been filed?—A. Yes, sir.

Q. Is it the intention of the committee in investigating the merchants' claims to go into the insurance, stock books, taxes, etc?—A. Yes, sir.

Recross-examination:

Mr. ANDRADE. How much of this investigation and examination of the claims did you personally conduct?

A. Part of the claims.

Q. How much outside of your own claim?—A. I don't understand the question. I can't answer. I have not been working much.

Q. How much of this investigation did you do personally?—A. A number.

Q. How many of these 200 and odd claims did you personally investigate—of these claims that is in Exhibit E. How many of these claims did you investigate personally?—A. I can't tell you how many; but all of these that passed my own hand personally, as shown by my schedule as filed in the consulate with the claim.

Q. Is there any of this writing your own?—A. No, sir.

Redirect examination:

Mr. BALLOU. Whose handwriting is that?

A. I think it is Mr. Tanaka's handwriting.

Q. Who was of that committee of five that you spoke that were in conference with the claimants; who was that committee?—A. Susimaura, Kawaski, Kobayashi, Nakaruo, and Mysawa.

Q. Did Mr. Tanaka work in connection with the committee?—A. Yes, sir.

Q. Mr. Kobayashi that you referred to was the witness that testified here yesterday?—A. No, sir; the other one.

Q. What are his initials?—A. U. Kobayashi.

Q. I now refer to claims 1828 and 1833, which bore your signature. Will you explain what was done in connection, in relation to those claims? Read the memorandum.—A. This tag reads: "This claim No. 1828," the claimant himself. The location of the claimant is not ascertainable; can't be found out, and couldn't have talked with him therefore special committee—after an investigation by the special committee it was decided by the whole committee at \$254.90 that should be deducted from the total amount of this claim. Signed by S. Ozaki chairman of the committee.

Q. What was the nature by the committee, nature of the investigation by the committee on which that was passed?—A. The special committee found out that the charge was too high; the price was too high and some of them were taken out entirely.

Q. What was the nature of those that were taken out entirely?—A. That is where the claimants charged \$10 for two pieces of blanket. The committee didn't agree with the claimant, and so the committee took it out. There is an item of 7 pieces of dress goods reduced to 5 that 7 was too many.

Q. What was the occupation of this man?—A. Stonecutter.

Q. Is there any date on your memorandum there of the investigation—is there any date in your memorandum?—A. Yes, sir; 23d of

February, date of the Japanese calendar. I think it was February 23, 1901.

Q. Claim No. 1811; what is the nature of the memorandum signed by you?—A. Wrote the very thing, the same as last case, only the amount is \$75.60. The amount was reduced \$75.60.

Q. What was the nature of the reduction as shown on the claim itself?—A. Claim shows here for \$75; committee reduced it to \$15.

Q. Do you know this claim 1833? What is the memorandum on that?—A. This starts in with the resolution of the committee; cash claim, amounting to \$61.70, entirely reduced, taken away.

Q. Was Mr. Ozaki the assignee in this claim or not?—A. Yes, sir.

Q. Were they assigned to him before the reduction?—A. After the reduction was made.

Q. And this assignment was made how recently?—A. In the month before.

Q. What do you mean by the month before?—A. In the first part of May.

Q. They were made after the legislative bill appointing this fire commission was passed and signed, wasn't it?—A. Yes, sir.

Q. I would like to ask for claim 1828. I would like to ask what is the name of the claimant?—A. H. Muramoto.

Q. You testified that he could not be found, did you not?—A. Yes, sir.

Q. When could he not be found; after the fire?—A. At the time the investigation was going on was the time when that person could not be found.

Q. Had he made an inventory and filed it with you?—A. Not to me.

Q. Well, then, how did you get the list of the property which he owned prior to the fire?—A. The claim was handed over from the consulate for investigation, and we went and investigated it; that is all there is; never been referred to me direct.

Q. But was there an inventory ever filed by this claimant with the consulate or anybody?—A. Yes, sir.

Q. Who was it filed with?—A. It is hearsay, what I heard, that the first claim was filed with the Japanese association; either the Japanese association or the consulate it must have been.

Q. You are not positive of that, are you?—A. I can't say positively, but I would say that it was before the Japanese relief society.

Q. Is this one of the claims that was in Schedule E?—A. Yes, sir.

Q. I will call the attention of the commission to the schedule, \$314.90 to \$254.90.—A. That is the total amount.

Q. Do you know where that claimant is now?—A. I can't tell you.

Q. Who assigned you the claim?—A. The man that signed it I don't know if it is that very day, but there are men coming in every day and assigning to me, and unless I refer to my books I can't tell you whether he assigned it or not.

Mr. PRATT. I would like the original schedule for this particular claimant, and if it was presented to this committee by the consul or whether the original schedule was retained by the consul in this translation.

Mr. BALLOU. That is the original.

Mr. PRATT. Of the inventory—the original of the inventory made?

Mr. BALLOU. The testimony of Mr. Tanaka was that the society

made it up on these blanks; that in some cases even in making them up these blanks were devised and it was kept in Japanese upon the back of that.

A. Was this original one certified to or did the people go into the detention camp—go in and make up statements from the oral statement of the claimant?

Mr. BALLOU (to the witness). Has there been any statement that has reached this stage that has been put on that blank like this that has been signed by the person, signed by the claimant personally?—A. Personally signed?

Q. That is the signature?—A. Yes, sir; that is the signature and the date of his signing.

Q. And that is the style?—A. Yes, sir.

Mr. PRATT. That is the claimant's inventory; that is not in the handwriting of the claimant that memorandum.

Mr. BALLOU. The testimony of Mr. Tanaka was, that most of the society's were made on a piece of paper, on slips of paper which was brought out of the detention camp when it was signed.

Mr. PRATT. Then it was transferred and preserved with some uniformity?

Mr. BALLOU. No, sir; the testimony is this, that those were mostly signed by the claimant on these original blanks and in some cases the claims were reduced before the signature.

Q. By whom?—A. By the Japanese society. No copy shows it, but as a matter of fact the claim was copied in Japanese and then signed by the claimant.

The CHAIRMAN. Why is it that these claimants have not appeared for their claims?

The witness said that he couldn't be found; he said that this man could not be found now.

Mr. BALLOU. The statement is that this man came up and signed the claim shortly after the fire on the 6th of April, presumably 1900, and this claim was under investigation in February, 1901, by this committee, and at that time the man couldn't be found.

The CHAIRMAN. I would like to ask this question: Who fixed the price for all the articles in speaking of personal effects; who submitted the price in there, for all of these articles; did the claimant himself do it, or receive help from your committee or from somebody else; who fixed this price for the personal effects in the claimant's claim?

Mr. BALLOU. I would like to say that Mr. Ozaki—he wasn't in the country.

A COMMISSIONER. I think it is stated——

Mr. DOLE. I think it is stated that the claimants themselves did, and some times they were cut down by the committee afterwards, but in all claims the claimants fixed their own values.

The CHAIRMAN. Who extended these claims; who helped to extend these claims, the figures on these claims; so many kimonos, so much; who did that work making out these columns?

A. I can not tell; I was not here at the time; I was absent; the claimant himself or some friend assisted him to do it.

Q. You talk about the committee had more or less to do with the filing of these claims; what did you have to do; what was the practice; who extended these columns?

Mr. BALLOU. This witness had nothing to do with the completing of these claims.

Q. These claims were made up after the fire of 1900 by the Japanese society; they were, on the 7th of March, 1900, turned over to the consul and investigated by the consulate from the 7th of March, and some time following in 1900. This committee, of which Mr. Ozaki is or was president, was not organized until February 5, 1901, and at once commenced to investigate about 200 claims, which the consul had marked as doubtful, and which they could not investigate themselves and were turned over to this committee in February, when they were informed—Mr. Ozaki was not in this country until last July, at the time they were completed—that these were compiled by the Japanese society and turned over to the consulate, but when the consulate began to investigate, he wasn't here at all.

The CHAIRMAN. Did the consulate in these claims that were filed in the consulate—did the consul go over? Did they verify? Who was he verifying party of these claims? Who went over the figures and verified the extensions? Where was that work done?

Mr. BALLOU. Mr. Tanaka has testified to that.

The CHAIRMAN. Do you know, Mr. Ballou?

Mr. BALLOU. No, sir.

Q. Seven kimonos, \$17; at so many dollars—that would be multiplying and the adding of the columns? Who did that work? Who did the work of extending the figures?—A. Some were made by the claimants themselves, mostly by the Japanese society, who employed officers and clerks; they made up these figures for the presentation by the claimant.

T. TANAKA, recalled.

Mr. BALLOU. Do you know whether those figures and those extensions and the additions were verified; and if so, by whom?

A. Well, I verified many of the claims; it was the work of the society before your work. I can't say positively, but I think the society has taken the memorandum of the claim and extended it down that way.

Q. I find a number of claims that were reduced, that you said was a clerical error. Who discovered those clerical errors?—A. We have looked over every item.

Q. Who do you mean by we?—A. Most of the three men appointed by the Japanese society—Mr. Ono, Sugi, and Soma.

Q. And were all the people that had charge of these claims all through the summer of 1900 and all through the fall of 1900?—A. Yes, sir; to the 7th of March, and then this sign was fixed; I couldn't say what it was on every claim or not.

Mr. PRATT. Under oath?

A. No, sir; the oath is not customary in Japan.

Q. Was there any formality of the assignee of verifying the signature?—A. He looked at it and said—

Q. Is there any particular significance of a seal; does it make it any more solemn or just identify it?—A. The seal does verify the statement.

Q. As to giving it any more security, the seal any more solemnity, is it attended with the signing of this?—A. In Japanese court the seal—but this time did have a seal—we didn't have any, so we took this.

Q. And the intent of that is to give solemnity to the document?—A. Yes, sir.

Q. Which supplies the place of the oath—is it intended to supply the place of the oath? Is the seal intended as a solemnization of the understanding by the claimant; is that intended, or to take the place of the oath?—A. Yes, sir; in Japanese custom.

Q. (to the commission). I will call the attention of the commission to the seal on No. 1805. On this claim 1805, is that the customary kind of a seal?—A. Yes, sir.

Q. It is the actual seal?—A. Yes, sir.

Q. Then people have different seals?—A. Yes, sir.

Q. But it is understood when they affix the seal they are very careful to see what it contains?—A. Yes, sir.

Mr. PRATT. Then these claims that have a stamp are of greater stability than they would be without it?

A. Yes, sir.

Mr. DOLE. Do you understand, Mr. Ballou, whether or not the seal is a substitute for the oath—in the sense that we understand an oath—or simply whether it is a verification or identification?

A. I understand, as Mr. Tanaka tells us, it is like our oath in the sense that it is formed if the courts of Japan require. It is a custom of identification that the courts of Japan require.

Mr. ANDRADE (to the witness). Just a few questions in regard to the seal. The testimony has been that several of these claims were found to be incorrectly prepared, were they, Mr. Tanaka?

A. Yes, sir; some of the claims.

Q. Those claims, were they sealed?—A. Yes, sir.

Q. Then, of course, if those claims were meant to deceive the consul or anybody that might have to settle those claims this stamp didn't make them any more truthful than these other claims, did they?—A. No, sir; I don't mean that. I mean by putting the seal on that the statement therein contained to his knowledge as to his knowledge that it is just the same that he has filed before the Japanese committee.

Q. But these claims that were found to be correct were also sealed?—A. Yes, sir; but that does not necessarily say that the whole statement is wholly true and nothing but the truth and the whole truth. Because in Japan there is no such thing, but it may be equivalent to an oath.

Mr. DOLE. That is equivalent to the identification of the signature?

A. Yes, sir.

Mr. PRATT. Is it more than that, as well as identifying the person himself?

A. The seal identifies the signature and identifies the person. It is a solemnity in the mind of the claimant when he stamps with his seal.

Mr. DOLE. As I understand it—the seal—a thousand years ago, the seal was an identification of the signature or of the character. Most of the people couldn't write their names, and they put the seal on to identify the signature.

Mr. PRATT. These claims are stamped as the claim of the claimant added to which is the seal; now does the seal give an additional solemnity to the signature, does it impress the claimant with an additional solemnity, that it is a true statement; does he see the importance of the seal?

A. In Japan we give it more importance—the seal—than we do to the signature; the signature may be fictitious, but if the seal is on it it is taken as a ratification.

Q. As a verification of the signature?—A. Yes, sir.

Mr. BALLOU (to the witness). If a man is telling a lie would he use any seal; is there anything more binding on his conscience if he puts his seal on it?

A. If he puts his seal on it he is bound to follow its contents.

Q. Just a little more solemnly than if he just signs it?—A. Yes, sir.

Q. That is, it might be a lie or a false statement under the seal, but the signature is different?—A. We put more importance to the seal than to the signature.

Q. Is there any special law corresponding with our law for perjury; if a man sealed an instrument that is not true in court is he punishable?—A. Yes, sir, in that case; according to Japan, we can not take any other means than that to verify claims.

Mr. DOLE. I think there is no reason; I don't know anything about the Japanese writing, but it seems to me that Japanese writing could very easily be forged, that the characters are not similar to our form of writing, and that the seal that would identify a man, if it was a thumbmark, would be an identification of the signature, that 50 others might write the name.

Mr. BALLOU. Is there such individuality in the different handwritings of Japanese as there is in the corresponding handwriting of many English?—A. Yes, sir; but in Japan we put more importance to the seal than we do to the signature. For instance, my signature may change, but the seal never changes. Your signature don't change with the seal.

Q. Here is Mr. Ozakis's signature in English. You know that it is very difficult—that only a few experts can imitate that signature?—A. It is just the same in Japan, but the custom is that the seal is of more importance.

Q. If to an instrument is affixed the seal, would that add any weight or would it give the evidence any more effect, that are not discovered as forgeries or that there was no mistake—is the fact that the instrument sealed—would that be more binding under the law?—A. Yes, sir.

The further hearing of this case is continued until the 12th day of June at 10 o'clock a. m.

JUNE 12, 1902.

MORNING SESSION.

S. SEGI recalled.

Mr. ANDRADE. You have testified that you were manager for S. Shimamoto for some time prior to the plague epidemic until date, have you not?

A. Yes, sir.

Q. You have testified that certain goods were in the warehouse in the rear on Nuuanu street, and a part were destroyed and damaged to such an extent that they were ruined?—A. Yes, sir.

Q. That these goods were taken from this warehouse to the Bere-tania street warehouse, and that you have not seen any of those goods since?

Mr. BROOKS. This witness was at Kauai; he has not testified to anything of that sort.

Mr. ANDRADE. He testified that he knew that the goods were taken from the warehouse to the Beretania street warehouse; he has also testified that he has never seen those goods since.

Mr. BROOKS. I didn't understand it; I don't remember; I will let it go in.

This witness has not testified that these goods were taken from the Beretania street warehouse; all of these Japanese knew that the board of health took possession and cleaned that thing out.

Mr. ANDRADE. Isn't it testified to that he has never seen those goods since they were taken from the warehouse?

Mr. BALLOU. Yes, sir.

Mr. ANDRADE. Will you admit that? (To the interpreter.) Will you ask him that question?

(The interpreter repeats the question.)

The WITNESS. Yes, sir.

Q. Who had authority to sign for S. Shimamoto?—A. Myself.

Q. Only?—A. Myself alone.

Q. What was the date of your return from Kauai?—A. January 6.

Q. Did you at any time after your return from Kauai know that any of the goods went to S. Shimamoto that were in Aala warehouse?—A. Yes, sir.

Q. Knew that they were there? Did you ever have any of those goods returned to you as the agent of S. Shimamoto?—A. Yes, sir.

Q. Had goods returned?—A. Yes, sir.

Mr. BALLOU. Were the goods that were returned from the Aala warehouse part of the goods that were taken out of the Nuuanu street warehouse?

Mr. ANDRADE. Were those goods that were returned to you from the Aala warehouse the same lot—the same goods—part of the same lot of goods that were taken out of the stone warehouse on Nuuanu street?

A. No; that is goods quite different from the goods from the stone warehouse on Nuuanu street. These goods that I received from the Aala warehouse is a part of my goods that was in the store proper on Nuuanu street—all of them dry goods.

Q. Did you not testify in your direct examination that you had never received any goods which were taken from either the store or the warehouse?—A. No, sir.

Q. Where was your store—the store of Shimamoto?—A. On Nuuanu street, this west side, a kindergarten on the opposite side, and Queen Emma's place—

Q. Did Shimamoto store any dry goods in the store?—A. I can't tell you exactly; there was some, of course, in the back end of the store.

Q. How many packages were taken out of the store?—A. I can't tell you exactly the number of packages taken out; there might have been about 250 packages or 230—something like that came back—because it was in such confusion, bundles were broken, and I couldn't tell exactly how many came back. I saw the most; the principal things came back, with the exception of a few things all tied up came back last; I can't tell you how many packages were missing.

Q. You didn't get back as many as 300 packages, did you?—A. Well

if you mean this way: There was a regular package carried away to the Aala warehouse in the shape of a dozen or two dozen in a bundle, and they came back in pieces; if you mean that piece as one piece, then there might have been 300.

Q. In how many different teams did you receive back these goods?—A. I can't tell you how many teams. As soon as the plague was over the freight was sent back to me; I can't tell how many teams.

Q. Was it eight or nine times or only twice?—A. No; I can't tell you how many times, approximately.

Q. You can not tell?—A. No, sir.

Q. How did you know that any of the goods taken from the warehouse on Beretania street were in the Aala warehouse?—A. I never told you that I knew as a fact that the goods were transferred from the Beretania warehouse to the Aala warehouse, only from the store into the Aala warehouse, not from the warehouse.

Q. Then you do not know of any goods taken from those warehouses that were ever in the Aala warehouse?—A. No, sir.

Q. Did you ever try to find out?—A. I never tried it, because I understood that the goods at the warehouse were destroyed—were thrown into the sea—so I never tried to find out.

Q. Did you believe that?—A. Yes, sir.

Q. Did you not know that a great many goods taken from your own warehouse were not damaged?—A. When I came back from Kauai, after it was thrown out, the understanding was that it was all thrown out into the sea. I don't know anything about it.

Q. In taking the goods away from your store, how many different times did you do that?—A. I can't tell, because when I came back—after I came back from Kauai I stayed outside of quarantine altogether. I don't know how many times the goods were taken out of the store.

Q. What was the date? Was your store on Nuuanu street destroyed by fire?—A. Yes, sir; afterwards.

Q. What was the date of that?—A. I don't remember just now. It was known as block No. 10.

Q. Was that before or after your return from Kauai?—A. After my return from Kauai.

Q. You don't know the date of that?—A. No, sir.

Q. Well, were the goods all taken out on the same day?—A. I can't tell you.

Q. Well, as a matter of fact, do you know in the return of those goods whether or not many of those goods—there were some goods returned to you that were formerly in your own warehouse?—A. Nothing returned out of the warehouse. Goods in the warehouse and goods in the store were entirely different.

Q. How were they different?—A. The warehouse has the provisions, while the store has the dry goods mostly.

Q. The store was mostly dry goods?—A. Yes, sir.

Q. Were there any kegs of merchandise of that class in your store?—A. No, sir.

Q. There were no kegs in your store?—A. No kegs.

Q. Then, would you testify that if the records of the warehouse showed that there were a number of kegs there that those records would be wrong?—A. I remember that I have seen several empty beer barrels in the store. If you call those barrels kegs, then there might be kegs.

Q. I am asking about kegs, not barrels.—A. No; no small kegs were in there.

Q. Then the records of the warehouse are wrong if there is any such records?—A. There might have been 4 or 5 small kegs of salmon on a shelf in the store, which were sent up to the warehouse.

Q. Could there have been 8 kegs?—A. I can't tell exactly how many.

Q. You can't testify as to the number of individuals or times in which these goods were returned to you, can you?—A. No, sir; I can not tell.

The CHAIRMAN. I would like to ask the witness if there is any claim in for goods destroyed in the store.

A. No, sir.

Mr. PRATT. How far apart were the store and the warehouse?

A. On the opposite side of the street, about 300 yards.

Mr. BALLOU. Describe the relative position of your store and the warehouse; make a diagram showing the position of the store and the warehouse.

A. (Here the witness makes the diagram.) There is a kindergarten in here, and the store, the line of the warehouse was down here [showing]. That is the stone wall; the building where the stone wall is still standing.

Mr. BALLOU. Was your warehouse and building where the stone wall stands?

A. Yes, sir.

Q. Are the walls of the store building standing?—A. No, sir; the walls of the warehouse.

Mr. PRATT. Originally it was a two-story or a story-and-a-half building, was it?

A. Two stories and a cellar.

Mr. ANDRADE. How long have you been manager for S. Shimamoto?

A. About five years.

Q. Have you paid the taxes on that business for the last five years?—A. Yes, sir; with the exception of the year that the store was burnt.

Q. Didn't pay any taxes that year?—A. No, sir.

Q. What were the taxes that you paid the year before the burning of the store?—A. A little over \$30.

Q. What was the business assessed at?—A. It was assessed by the assessor, cash, \$30.

Q. That is taxes on how much?—A. I don't know; only charged \$30 that is all that I know.

Q. You don't know what the business might be worth when the government taxes it at \$30?—A. I have the assessment on the book the tax assessor covered.

Q. All the goods in the store as well as any goods in the warehouse?—A. Only goods in the store, for the reason I didn't have a warehouse at the time.

Q. Then you have testified also that your business increased within one year over \$3,000 to \$9,000. Is that right?—A. I didn't say that.

Q. You stated that your business was assessed at \$3,000, or the taxes paid on your business was \$30. Isn't that right?—A. Yes, sir.

Q. And the amount of your claim is \$10,923?—A. Yes, sir.

Q. And that doesn't include the goods in that store?—A. No, sir.

Q. Now, what taxes did you pay on the business the year before you paid \$30 taxes?—A. About the same.

Q. Thirty dollars?—A. About that; I can't tell you exactly.

Q. But in 1897; don't you remember what you paid that year?—A. I don't remember exactly, but it might have been \$15 or \$20.

Q. But you can't say now what taxes you paid the first year that you took charge of the business?—A. The first two or three years I remember of it being about the same; \$9 up to \$20.

Q. How do you account for the increase in Shimamoto's business; that there was a jump immediately from \$3,000 to \$10,923 within one year?—A. That was when the merchants from Japan shipped more goods from Japan.

Q. That is not the question. What was the reason for any such increase in the business?—A. In that year there was many thousand immigrants come from Japan, and the business increased and the store had to keep more merchandise on hand than the year before.

Q. Did you import all of your goods?—A. Yes, sir.

Q. Did you pay cash for them or buy on credit?—A. Shimamoto was most of the time in Japan buying goods and sending them over to the store here, and whatever cash I had I remitted to Shimamoto, or whatever came through the bank I paid the draft.

Q. You already testified that you kept the dry goods in the store?—A. Yes, sir.

Q. Did you also keep any dry goods in the warehouse?—A. Yes, sir; there was boxes and packages all ready to ship to the islands, several of those boxes packed for the island stores.

Q. Were those the only dry goods in the warehouse?—A. Yes, sir.

Q. What was the nature of the goods in the warehouse?—A. Mostly provisions, beans and canned goods. There was some matting there in the warehouse; you will find it in the store.

Q. Did you keep shoyu and canned goods in the store also?—A. We had a few canned goods in the store as a sample and two or three kegs of shoyu in the store for the same purpose.

Q. Now, in regard to the Beretania street warehouse. Do you remember going to the Beretania street warehouse?—A. No, sir; never have been there.

Q. Why didn't you go there?—A. I had no business at the warehouse. I understood that all our goods were destroyed in the sea, so I didn't go after it.

Q. Then you don't know that you had any goods at all in the Beretania street warehouse?—A. No, sir.

Q. Did you believe that the Government would throw away goods that were not damaged at all?—A. I am told that the Government threw that away, and I believe it.

Q. Did you ever go particularly to the headquarters of the board of health to find out what became of those goods or any part thereof?—A. No, sir.

Q. Didn't you believe that it was your duty to go and find out what had become of those goods?—A. I know it is my duty to find out, and that is why I handed it over to the attorneys, this inventory to be presented to the board of health.

Q. But you yourself didn't go to the board of health to find out what was done with the goods?—A. No, sir; I did not go to the board of

health myself, because I can't talk English so well, and I asked Attorney Brooks to do it for me.

Q. As a matter of fact didn't you believe this way, that if your goods were not returned to you, were carried away and were not returned, that the government was good for their price?—A. Yes, sir, when I came back from the island of Kauai I was told that Mr. Kooper himself said that all of those goods that were in the warehouse would be paid for by the government, so I had to believe that.

Q. And for that one reason you did not exert any energy to find out what the final determination of these goods were?—A. Yes, sir.

Q. Thinking that the government would pay for them?—A. Yes, sir.

Q. Did you believe that the government would pay for goods that was not at all damaged, only on the outside by water that might have fallen on them?—A. Not having any special inspection of the goods myself, I was told that the government was charged for goods taken out to sea and destroyed, and I believed that the government would pay for it.

Q. You didn't actually believe that?—A. Yes, sir.

Q. How soon after your return from Kauai did you place this in the hands of an attorney?—A. When I came back it was already in the hands of an attorney.

Q. What attorney?—A. Mr. Brooks.

Mr. ANDRADE (to the commission). I will say that I am just about through with the witness. I have sent for Mr. Wakefield and Mr. Humbert and Mr. Keiser.

Mr. BALLOU (to Mr. Andrade). What do you expect to prove to them; we might be able to admit it?

Mr. ANDRADE. I expect to prove by Mr. Keiser and Mr. Wakefield the final determination of these goods; of course it is of a great deal of importance to show what was the final disposition of the goods at the Beretania street warehouse. I believe the goods were taken from the Beretania street warehouse to the Aala warehouse; I can't prove it directly.

Mr. BALLOU. I have requested Mr. Andrade to produce the letter that was here in court of Mr. Brooks to the board of health. We want it in evidence.

Mr. ANDRADE. I think there is such a letter.

W. WAKEFIELD, called and sworn:

Mr. ANDRADE. What was the nature of your duties there about the latter part of December, 1899, until about the middle of June or July or the middle of the year 1900, in connection with the board of health and the saving of merchandise, etc.?

A. My duties from the 1st of January until the 20th of January were mostly in taking charge of the buildings that were being about to be condemned by the board of health, the merchandise, and taking care of it and storing it on account of merchants to whom the property belonged.

Q. Were you a member of any committee during that time?—A. Yes, sir.

Q. What was that committee?—A. It was known as the merchant committee.

Q. Who composed that committee?—A. Mr. Humbert, Keiser, and myself.

Q. And the nature of your duties were what?—A. In superintending the removal of merchandise, storing it, and saving it from injury, with a view of saving it from destruction, with a view of preserving it and returning it to the owners when they could take care of it.

Q. Did you, as a member of this committee, have charge of a warehouse on Beretania street?—A. Yes, sir.

Q. You had it rented?—A. Yes, sir.

Q. Who was in charge of that warehouse?—A. The Beretania street warehouse was in charge of—I have really forgotten the man's name for the moment.

Q. Some one in your employ?—A. Yes, sir; he is in town at the present time.

Q. When did you have possession of the warehouse? Will you say?—A. I can't swear as to that.

Q. Approximately?—A. In January.

Q. You gave up this house in January?—A. Yes, sir.

Q. What did you do with the goods that were in that warehouse? How many houses did you have on Beretania street?—A. One.

Q. Whom did it belong to?—A. It was a warehouse opposite to the Queens Hospital grounds.

Q. Was that the warehouse that belonged to Mr. King—the California Warehouse Company?—A. Yes, sir.

Q. You say that you gave up that warehouse in the early part of January?—A. Yes, sir.

Q. What became of the goods which were in that warehouse?—A. They were returned to the owners.

Q. Were there any of those goods taken to the Aala warehouse?—A. Some portion of them were, because the person to whom they belonged had no warehouse to take charge of them. What amount was taken to the Aala warehouse I can't tell you, but our books will show it.

Q. Now, are you familiar with these books?—A. No, sir.

Q. You are not familiar with the books?—A. No, sir; not personally familiar with them.

Q. Are you personally familiar with any books that might have been kept in the Aala warehouse?—A. Only by general observation. I didn't keep them.

Q. You did not keep them?—A. No, sir; Mr. Plunksey kept those books. Plyler assisted Mr. Plunksey at the latter portion and at the early portion.

Q. And can you tell the commissioners, Mr. Wakefield, what final disposition was made of all of the goods that came into the possession of this merchants' committee?—A. They were returned to the owners, except in cases of a perishable nature, which were destroyed. There was a small portion of the goods that were destroyed.

Q. Didn't other goods that was left in your custody at that time—do you know anything about the claimants?—A. Yes, sir.

Q. Among those do you know anything about the goods of S. Shimamoto?—A. No; we saw those goods were damaged, to the best of my recollection, by water and fire, in the fire of the 31st of December, and the best of my recollection is that the merchants' committee didn't attend to the hauling of any of Mr. Shimamoto's goods. Some portion might have been hauled to the Beretania street warehouse for storage purposes. It wasn't hauled by the merchants' committee.

Q. You know that all the goods that were in the Beretania street warehouse were returned to their respective owners?—A. Yes, sir; most decidedly.

Q. But you can not take any one case and say that party received his goods?—A. In a number of cases I could, but not in every case; I can not.

Mr. PRATT. It was customary to take a receipt from parties by whom the goods were taken?—A. Yes, sir.

Q. And they gave a receipt when the goods were taken?—A. Yes, sir.

The CHAIRMAN. I understand you to testify that all of the goods from the Beretania street warehouse went to the Aala warehouse?—A. What were not delivered to the owners. There was some delivered almost immediately afterwards to the owners of the merchandise. What was left there was taken to the Aala warehouse; also merchandise that we had stored in the Union Feed Company's warehouse. What we did not deliver to the owners was transferred to the Aala warehouse.

Q. If these goods were delivered to Mr. Shimamoto would his receipt therefor appear anywhere?—A. Yes, sir.

Q. If taken from the warehouse?—A. Yes, sir; receipts given to the teamster as far as possible. As far as the delivery was concerned in every case. In some cases when we took the goods we couldn't give a receipt; there was no one there to give it to.

Mr. ANDRADE. Here is a book showing a number of little marks for goods received and taken away and signed by the respective parties. There are receipts there showing that Shimamoto had received 300 packages. As far as I can find out some one has testified there were over 200, but the man doesn't seem to be clear of the number of packages.

Mr. BALLOU (to the witness). When you testified that all of these goods were returned to the owners, was that handled by the merchants' committee or others?

A. Those were handled by the merchants' committee.

Q. Now, the case before the court at present is the case where there is some evidence on the part of the government that they believed that some of the goods out of the Shimamoto warehouse were hauled to the Beretania street warehouse. Now you say that those were not handled by the merchants' committee?—A. They were not hauled; they were handled, inasmuch as stored insured delivery to the owners again afterwards.

Q. Now, have you any books that show the disposition of those goods in the Beretania street warehouse and whether they were returned to the owners or transferred to some other warehouse?—A. Yes, sir; that book is in existence and in the possession of the board of health.

Q. And that will show any other goods?—A. Yes, sir; the Shimamoto freight, as I call it, freight that is touched by two parties, that was hauled there by parties outside of the merchants' committee.

Q. But when it was hauled there do you remember of some of it being received there?—A. I didn't have charge of the warehouse; wouldn't swear to it, but to the best of my belief it was hauled there.

Q. That some of the Shimamoto goods were hauled there?—A. Yes, sir. I think they were hauled there; those books will show.

Q. Whether returned, transferred to another warehouse, or destroyed?—A. Yes, sir.

Q. And if returned there would be a receipt?—A. Yes, sir.

Q. And goods placed there after the fire and before the fire and before you had to deal with these matters, until the matter came into your hands afterwards, what was there to identify the goods in the warehouse, the goods of Shimamoto in your possession, is there any inventory that was taken of the goods then in the warehouse at the time that you took over the warehouse?—A. The government didn't engage that warehouse directly; it was engaged by the merchants' committee.

Q. Before the Shimamoto goods were placed in there it was engaged by the merchants' committee?—A. To the best of my recollection and belief, before anything was taken there at all.

Q. I have it in my mind your merchants' committee was organized after the fire on December 30?—A. Yes, sir; on the 1st day of January. This merchandise of Mr. Shimamoto wasn't touched until afterwards; it may have been the 2d, 3d, or 4th of January that this hauling was done.

Q. If the goods as you have no receipt of the return of the goods to Shimamoto, and they were taken to the Aala warehouse, what prospect would there be of their reaching Mr. Shimamoto? Was there anything to identify these goods as the goods of Mr. Shimamoto, taken from the Beretania street warehouse to Aala warehouse?—A. Some of the marks and the number of packages would be transferred. It may be possible that book will show where the merchandise was hauled from.

Mr. ANDRADE. These books do not show whether the merchandise came from, through, or went out of the warehouse. It shows that Shimamoto received 329 packages, the receipt is signed for that, and he testified that some two hundred and odd packages were returned.

Q. Does that mean the delivery book?—A. Yes, sir.

Q. Do you know in the Aala warehouse there was a receipt book?—A. Yes, sir.

Q. Where did you see it last?—A. In the Aala warehouse.

Q. It was taken from the warehouse?—A. All that remained, everything: the books and papers and documents were taken from there by the officers of the board of health.

Q. Could you identify that book if you were to see it—the receipt book for the Aala warehouse?—A. Yes, sir.

Q. Is it like this one [showing]?—A. As I recollect the receipt book it was somewhat smaller and narrower than this one.

Q. Was there a receipt book kept in the Beretania street warehouse?—A. Yes, sir.

Q. And was that turned over to the board of health?—A. All the documents we had, the books that were kept, were turned over to the board of health.

Q. There ought to be a book in the Beretania street warehouse to show the delivery back by the Beretania street warehouse, the disposition of those goods. The receipt book of the Aala warehouse shows what was received there?—A. Yes, sir.

Q. And these books represent the delivery books of the Aala warehouse?—A. Yes, sir.

Q. Were there any other delivery books except these in the nature of receipts to be seen?—A. As far as I know not

Q. As far as you know, these are the delivery books you gave in the form of a receipt to be signed by the parties?—A. Yes, sir.

Mr. ANDRADE. Here is the form that contains the number and the name of Shimamoto. The name, but the number of the packages doesn't show in the receipt. Do you know what these leather-covered books marked "ledger" is?

A. No, sir; I think it is intended to cover the personal effects, although it does not cover the personal effects.

Q. Here is an entry April 5, 870 packages?—A. Yes, sir.

Q. What do you think this represents on the book?—A. A receipt by the warehouse delivery to Muaramoto; I should say a delivery to Maumato. There was a record kept of them when they went in and when they came out.

Q. On April 5 they were still delivering?—A. Yes, sir.

Q. And they were vacating along until April 30?—A. Yes, sir; as the merchandise was delivered.

Q. This book begins June 12, 1900. What was going on then?—A. Delivering the personal effects mostly at that time.

Q. Through July?—A. We had nothing to do with it after—

Q. Whose record is that? Can you identify that record?—A. No, sir; I think Mr. Keipfer—some of it, I think.

The CHAIRMAN. If a man's goods, for instance, went to the Beretania street warehouse—for instance, several hundred cases of shoyu or 300 or 400 cases of canned goods were taken to the Beretania street warehouse—could they disappear without the claimant knowing it in some way or other?

A. No, sir.

Q. They must get back to the claimant in some shape or other?—A. Yes, sir.

Q. No matter the amount of the goods?—A. Yes, sir; even a half a dozen packages, unless a single case or small package, might be stolen; but I think everything was watched pretty carefully; but no considerable amount could have possibly gone astray from one building of the other.

Q. Were there any goods in the Beretania street warehouse that was afterwards destroyed or spoiled?—A. To the best of my recollection, no.

Q. Was there when the Aala warehouse that was burned in the big fire?—A. No, sir; the outside of the building was scorched—no burned.

Q. I thought you testified that some of the goods at the Aala warehouse was destroyed; do you know what goods they were—what proportion of the goods that were in the warehouse?—A. There was a small proportion. We had a man going around constantly seeing if there was anything that smelt objectionable. I think it was mainly eggs that were packed.

Q. Not a large proportion?—A. Very trifling.

Q. Are you familiar with this article that they call shoyu?—A. I'm not an expert on the value of it.

Q. You know what it is, you know what it is, you have seen the tubs?—A. Yes, sir.

Q. Are they such that if a lot of water happened to fall on it in this room that it would be injured to such an extent that it would be totally destroyed?—A. It would depend on the force of the water. If the kegs were tight I don't think the force of the water would hurt it

Q. If the water was sufficient to knock the tub over and to pieces?—

A. Sufficient to strike the cover, that would be the weakest portion of the tub.

Q. If we could show that there had been 400 or 500 packages taken to the Beretania street warehouse, would you say they had been taken by some one who had no right to them or that they had reached the proper person who owned them?—A. I should say they reached the proper person.

Mr. PRATT. Were they so marked that they could identify the goods as the goods of the firm or individual when they were put in?

A. Yes, sir.

Q. Could be traced by the marks?—A. Everything was not marked, every package that we received was not marked.

Mr. BROOKS. I would like to ask Mr. Wakefield if shoyu was stored in the warehouse where the adjoining building was being burnt and the warehouse where the shoyu was stored, became so hot that the roof burned and one end of that house was suddenly pulled down for the purpose of putting out that fire, to preserve the warehouse what would you say then as to the liability to destroy the shoyu?—A. Destroy it by all means.

Q. By water heat or both?—A. Here is an article that you boil in the manufacture, I don't think the heat would. When the heat and water would strike the tubs there is everything to determine.

Q. You don't know?—A. I don't know; I don't think there would be sufficient heat to destroy the shoyu.

Q. So that it would be enforced from the tub. You don't know anything about it? Do you know anything about it?—A. I was looking out for the fire; I was not looking out for shoyu.

Q. Now, your answer to this general question, that if we could prove that a certain amount of shoyu went there to this warehouse, would that determine, in your best judgment, that it must have been got by the claimant; that is the general proposition—you don't know anything about this case?—A. I gave my opinion from the manner that I know the business was conducted, the receiving and delivery of the goods.

Q. So that it might apply to the cases generally. Under those circumstances you don't remember anything about it, the delivery of these goods?—A. The Shimamoto goods?

Q. Yes, sir.—A. No, sir.

Q. You don't know what became of them after they came in the possession of the board of health?—A. I don't know everything that was delivered. It was delivered according to the marks and through the man in whose name the mark was had.

Q. And everything that was delivered was put on the books, was it not?—A. Yes, sir.

Q. So that the books will show it?—A. Yes, sir.

Q. You saw that fire?—A. Yes, sir.

Q. You saw that warehouse—you know it?—A. Yes, sir.

Q. You know that it has a very thick wall of coral?—A. Yes, sir.

Q. Do you believe, Mr. Wakefield, that the fire at that time produced such heat that would cause goods in the house in cans, in barrels, goods in tubs, to be totally ruined, or even partially ruined, from the effects of the heat and the water afterwards poured on?—A. It might have been the case with some barrels exposed. I don't think it

would damage it in the bulk. But the Government appraiser examined the goods at that time; he should be able to give you the information.

Q. The goods—it has come out here in the examination of this case to show that the goods—some of the goods taken out of this warehouse—went to, if my recollection serves me right, went to this Beretania street warehouse, and the others that were taken out of this same house, that was Shimamoto's, you thought not to be good, was destroyed. Now, did they take any goods in the Beretania street warehouse that was not in sound condition?—A. No, sir.

Q. Nothing but that was in sound condition?—A. No, sir; except in as far as they could.

Q. In case they were smelling loud, or anything of that character, any damaged goods or leaking kegs in there?—A. No, sir. Anything that showed a sign of leak or damage, we refused to take charge of it; and many of the goods were returned to the store where they were taken from.

Q. Was it your custom to accept the parties? Do you know of this instance where Shimamoto and their respective agents had any notice of their goods being stored in the Beretania street warehouse?—A. I can't swear positive as to that, but we were very careful in delivering the goods and taking possession of them. We were shorthanded in the warehouse. I presumed that Shimamoto would be notified. We were short of space.

Q. You were short of space for storage; these goods that were stored there at the early stages of this period, would you take any steps—did you make any attempt—to restore the goods to the owner? What would the owners do? Did they apply to you at the time—at any time—for the restoration of the goods?—A. Yes, sir; we were frequently seeking the owners of merchandise to deliver goods to them just as soon as the board of health would permit us to do, or as soon as they would get possession and a team to deliver them.

Q. Was that after the goods were stored and some little time after?—A. Immediately.

Q. You do not recollect any goods that were stored of Shimamoto after they were taken to the warehouse on Beretania street?—A. No, sir.

Q. Do you know who kept the receiving book at the Beretania street warehouse?—A. I know the man, but I can't recollect his name just now; he is in town.

Q. Do you know where he was working?—A. He was employed by the Honolulu Tobacco Company; I can not seem to get his name.

Q. Do you know whether the same man kept the delivery book at the Beretania street warehouse?—A. Yes, sir.

Q. The same man?—A. Yes, sir.

Q. I want to ask you one more question: The methods that the committee—the merchants' committee—adopted for the management of this warehouse. Would it be possible for goods that were in the warehouse to reach any other party but the rightful owners?—A. No, sir.

Q. And in every case that there was a delivery there would be a receipt for those goods?—A. Yes, sir; in all probability given by the driver.

S. SIGI, recalled.

Mr. BALLOU. When the goods that were taken from your store to the Aala warehouse were returned to you where were they returned—where were you receiving for?—A. Receiving in the warehouse in Kakaako.

Q. When were these goods taken away delivered back from the Aala warehouse to that warehouse in Kakaako?—A. I don't remember; there was so much excitement prevailing I don't remember the date.

Q. Was it shortly after the great fire or sometime afterwards?—A. Well, it might have been a month or two; I can't say.

Q. Were you in charge of the Shimamoto warehouse at Kakaako during the time that these goods from the store were returned from the Aala warehouse?—A. Not myself, but a man named Tansaki.

Q. Did you at any time inspect those goods which were returned from the Aala warehouse so that you know what goods they were?—A. Yes, sir; I inspected them.

Q. Can you say of your own knowledge whether all the goods that were returned to the care of Mr. Shimamoto from the Aala warehouse were goods which had been taken from the store, or whether any portion of the goods which were returned to Mr. Shimamoto were goods taken out of the warehouse which is the subject of the present claim?—A. There was no goods which originally came from the warehouse; all the goods belonged to the store, out of the store.

Q. You say that of your own personal knowledge, your best opinion from personal inspection of the goods?—A. Yes, sir.

Q. Could you distinguish the goods that were in the store from the goods that were in the warehouse?—A. As I told you once before, the goods was entirely different from the ones in the warehouse; in the store, entirely different.

Q. But you have testified that you had some kegs of shoyu in the store, and there were other kegs that was in the warehouse; could you tell one from the other?—A. I told you once there might have been four or five kegs as a sample lot in the store; that is all.

Q. But if you have identically the same article in the store which you had in the warehouse could you tell one from the other?—A. No, sir; I could not tell.

Q. Why, of course you could not tell.—A. No, sir.

Q. The goods in the warehouse and the store bore the same mark, did they not?—A. Yes, sir. Those in the store were kept in there for samples, and were of the same character as the goods in the warehouse.

Q. Then this 300 packages of goods that were returned to you, were they samples of the general merchandise kept in your store?—A. No. I said there was only two or three kegs sample lots—two or three lines of rice and general merchandise in the store.

Q. Did you carry any insurance on the merchandise?—A. No, sir.

Q. You mean the merchandise in the warehouse and the merchandise in the store?—A. No, sir; no insurance.

Q. Is it not the custom of merchants to have their goods insured?

Mr. BALLOU. I object. Counsel is, simply by general inference, trying to rebut the particular statement which has been made, and I submit that it is not relevant to this inquiry, after the man has stated,

not only to-day, but the other day, if Mr. Andrade has forgotten. I submit it is not relevant to go into the question whether it is customary for the Japanese merchants to do it, after a particular question is asked, and then in a general way to find out what the general course of conduct was. I submit, in this particular case, it is going too far.

The CHAIRMAN. I think there has been enough said. My recollection is the same question was propounded before—whether he was insured, and the answer was no. I think you propounded that question before—if it wasn't customary for the Japanese to insure. I take exception with Mr. Ballou further in the examination of Mr. Wakefield, because everything that was said by Mr. Ballou and was brought to the attention of the attorney for the government I thought it was very valuable information.

Mr. ANDRADE. I will withdraw the question.

C. KEISER, called and sworn.

Mr. ANDRADE. Mr. Keiser, were you connected with what is called the merchants' committee here during the plague?

A. I was.

Q. How long were you a member of the committee?—A. Well, from the origin until it went out of existence.

Q. When was the committee organized?—A. The 1st of January.

Q. Of what year?—A. 1900.

Q. By what authority?—A. By the merchants of Honolulu. The merchants appointed the committee and tendered our services to the president of the board of health, who was President Cooper at the time.

Q. What was the nature of the duties that you had to look after?—A. We served trying to save such things for the people that were burned out, that were in the burnt district, and save as much as possible and keep them stored until after.

Q. Did you have a warehouse at your hand?—A. We had.

Q. Where was your warehouse?—A. One at the Union Feed Company's and the Asala warehouse, and also the California Feed Company's warehouse.

Q. Where was it?—A. On Beretania street.

Q. Opposite to the hospital?—A. Yes, sir.

Q. How long did you have that Beretania street warehouse?—A. But a very short time.

Q. When you gave up that warehouse, what did you do with the goods that were in there for storage?—A. There was only three or four parties, to my recollection, whose goods were stored in there.

Q. Could you say whose they were?—A. Well, the principal bulk of them was Pajini's, and some goods that belonged to Harmonos; I can't recollect; but if I remember, there was some of Shimamoto goods in there.

Q. Could you refresh your recollection whether or not there was a large quantity of the goods belonging to Shimamoto or simply a small quantity?—A. That I can't say; I think it was a small quantity; I can't tell you exactly how much; we never had charge of these goods; you see Shimamoto had the first fire which took place—was in the Ahlo block, and Shimamoto had his warehouse, and this warehouse was accidentally destroyed, and a great many of the goods were damaged; to what extent I don't know. The government wanted those goods removed. Some of the Shimamoto goods were dumped out at sea; some

of the packages were apparently in good order, and they were taken to the Beretania street warehouse. This first fire happened before his committee was in existence. On the strength of this fire this committee was organized, because the goods were just simply thrown out in the street and a good deal of loss, and for the protection of the merchants we formed this committee. Of course the government did their own carting; they sent some of these goods which they considered good. They sent them to the Beretania street storehouse. We asked permission to send them, and they gave them permission; we never had charge of them.

Q. You were really in possession of the warehouse where the goods were taken?—A. Yes, sir; we had charge of the warehouse.

Q. After the goods had been taken to the warehouse?—A. That was the first time, when we organized. Sunday, I think, was the 1st of January, and before we got things started they commenced to cart these things away. On Saturday, I think, they started to move, and this was our first warehouse that we rented. In the meantime the government—I think there was some shoyu that went into that warehouse.

Q. But you were in possession of the warehouse when the goods were taken from it?—A. Yes, sir.

Q. Now, when you gave up that warehouse, what became of the goods that were in the warehouse?—A. I should say that Shimamoto took those goods, because we had a man at the warehouse who had charge of it. I know that Shimamoto must have taken the goods out of that warehouse, because the man was entitled to his goods, and nobody else would take them.

Q. What makes you think that Shimamoto took those goods?—A. Because, as I say, we had goods there for two or three parties and they got their goods, so I should infer that Shimamoto got his goods. Those parties in there got their goods and I don't see why Shimamoto didn't get his; they were all marked.

Q. Was there any possibility of anybody else appropriating those goods?—A. No, sir; I don't think so.

Q. Was there any possibility that those goods might have been taken to the Beretania street warehouse or the Aala warehouse?—A. I doubt that very much.

Q. You don't think there was any possibility?—A. No, sir.

Q. Could you say who was in charge of the warehouse?—A. A man by the name of Plunkey had charge of the warehouse. He went down to the Philippines since then and then went to New York, I understand; but at the start there was a man by the name of Gottleman; he had charge of the Beretania street warehouse, and since this morning, while I was at the court room, I went to see the man. He is working for Remy & Co. I was told that he was sick and I went up to the California House, where he is staying, and couldn't find him; so I didn't find him. I wanted to fix whether he delivered these goods to Shimamoto.

Q. He works for what company?—A. The cigar store. He had charge of the warehouse at the time and I thought perhaps he would know.

Q. Is he a German?—A. No; he may be, by that name, for all I know.

Q. It was then a common thing for your committee to return goods that were not perishable goods to the claimant?—A. We returned

goods; suppose they made application. Some of those people started in business much sooner than others did, and we were cramped for room. This was really at a time when we didn't want the Aala warehouse; we were anxious to get rid of some of these goods. Paynia's goods were removed from Smith lane up to the Beretania street warehouse, whether he couldn't rent the warehouse, as it was I gave him permission. Shimamoto was on the outside. I think some goods were saved; I couldn't say. The matter was in the government's hands. If I remember right, his goods were standing right in the front part of the warehouse, and, if I recollect right, he was on the outside. There was some goods shipped by Shimamoto right from that warehouse, if I can recollect right.

Q. What have you in mind?—A. This Aala warehouse in Ahlo's block, where some of the goods were moved by the government over to the Beretania street warehouse.

Q. Do I understand that Shimamoto may have shipped some goods from the Beretania street warehouse away from the island?—A. No, sir; there was a good deal of Shimamoto's goods, Japanese goods for quarantine camps, such things—I didn't know their business—but there was a good deal of goods that changed hands; I think that some of the goods went out of it.

Q. Who received the proceeds of such sale or disposition?—A. We had nothing to do with the selling part; we just simply held the goods in custody for the people at any time they were ready to receive them to take them; that is all.

Q. These goods were in the hands of the board of health when they were put in there? Did you see Mr. Brooks? Were you consulted at any time by Mr. Brooks as to the reception of the goods of Shimamoto, as to Shimamoto's goods in the warehouse, do you recall?—A. No, sir.

Q. Then if new goods were shipped out of the warehouse, or taken out of the warehouse and distributed around the city, who would receive the money that was received from the sale of such goods, if any was made?—A. Shimamoto, of course.

Q. You say that some goods were shipped by Shimamoto from this warehouse?—A. I can't say that positively; but we kept the goods stored, that shoyu the different grades; that was Hamanos, and this was Skojima, and this was Shimamoto.

Q. Those are the only three that had goods in the Beretania street warehouse?—A. Yes, sir; to my recollection.

Q. How long were they in the warehouse?—A. Well, we had charge of the warehouse just about one month.

Q. The goods were taken out just before the expiration of your time. Were the goods all taken out before you gave up possession?—A. I don't know whether Shimamoto took out all of the goods or whether he did not. He knew that the goods were in the warehouse.

Q. How do you know that he knew it?—A. Well, his man was on the outside and his man knew that the goods were there.

Q. What man was on the outside? Can't you speak more definitely as to the individual who received the burden, that represented Shimamoto immediately after the fire, that would have knowledge of these goods and could possibly tell that the goods were Mr. Shimamoto's?

Do you know his name?—A. I don't know his name; but it is the store kept by—

Q. Would you know him if you were to see him?—A. Yes, sir.

Q. Will you see if you can pick him out?—A. No, he isn't there.

Q. Was he in Shimamoto's employ?—A. Yes, sir.

Q. Is he now?—A. Yes, sir; he is in his employ.

Q. He wasn't the manager?—A. No, sir.

Q. Was he the bookkeeper?—A. No, sir; he does the general store work.

Q. Does he speak English?—A. Yes, sir; he speaks English.

Q. Did you talk with him personally at any time that you recall as to that warehouse and the goods?—A. No.

Q. That had nothing to do with that part of the goods at all, but that came into your knowledge by having charge of the warehouse?—A. They were simply stored there by the government—by the board of health. We had no records or anything else.

Q. But did you have as to these other parties?—A. We were not organized at the time when Shimamoto's house was burned.

Q. But you were organized when Hamano and Skoyimo was there?—A. Yes, sir.

Q. And you have a more accurate record of their goods?—A. Yes, sir; of those goods; yes, sir.

Q. Than you have of Shimamoto's?—A. Yes, sir.

Q. You recollect of seeing Shimamoto's goods in there, too?—A. Some of the goods.

Q. You don't know how much there was?—A. I can't tell you.

Q. What was the condition of the goods as far as being damaged or otherwise—their appearance?—A. I don't think there was much damage to those goods that were there.

Q. Can you recall any particular class that was there that belonged to Shimamoto?—A. Only shoyu.

Q. Did you see any crated crockery?—A. No, sir.

Q. Considerable number of crates?—A. No, sir; I can only say positively that I saw some shoyu there; how much I don't know.

Mr. BROOKS. Well, you saw only a few of Mr. Shimamoto's?—A. Yes, sir; I seen drayloads and drayloads come down to the wharf to be dumped. They were usually from Shimamoto's warehouse, from Ahlos lot warehouse in the rear of Ahlos lot.

Q. Do you know anything about that warehouse, whether or not there was an immense amount of goods there or not?—A. I understood at the time that there was \$8,000 worth of goods in there.

Q. In the Ahlos warehouse?—A. Yes, sir.

Q. Now, it would be possible or even probable, would it not, for shoyu that had been fresh and gotten heated in that warehouse and taken from the Beretania street warehouse, and isn't it possible that the board of health would destroy it?—A. No, sir; that was not destroyed by the board of health.

Q. It was not?—A. No, sir; it was not. I don't think the shoyu that was taken from there was damaged.

Q. Now, are you positive from what probably occurred, or outside of your own absolute knowledge as to what generally took place, or what probably occurred of your own positive knowledge?—A. I can only tell you that I had nothing to do with those particular goods in

the warehouse, that that I have seen was apparently good and in good condition, and we have handled so many other tubs for other people that were returned to them, and they seemed to be in good order, and I infer that these were in just as good.

Q. That is merely a matter of inference on your part?—A. That is all I can tell you. I have never examined this shoyu; I have never had anything to do with it any more than I saw it there in the warehouse.

Q. And it is nothing more than mere inference that Shimamoto ever got it again?—A. That is all that I know.

Q. Now, it is almost improbable that any of that was ever taken down to the Aala warehouse from the Beretania street warehouse?—A. I am positive it was not taken—this which Shimamoto had in the Aala warehouse.

Q. Could any of the merchandise that had been taken to the Beretania street warehouse?—A. No, sir; all of those goods down at the Aala warehouse came from his store on the opposite side of the street, and those were moved down to the Union Feed Company's warehouse and then taken out to the Aala warehouse. The goods from the store were all saved, even the fixtures, and they were not mixed at all—the Beretania street from the Ahlos warehouse—with the store goods at any time.

Q. Now, you say you kept books there; that your committee kept books there at the Beretania street warehouse; didn't they?—A. We didn't keep books of the Shimamoto account.

Q. Was there any book showing how much you received, and who got it, and where it went to?—A. No, sir.

Q. You know that as a fact, do you?—A. Yes, sir. Once Mr. Gottleman, who was there to receive Pajmin's goods, and delivered the goods, might have delivered them to the expressman also.

Q. Then those books; what were done with those books; who turned them over when your committee ceased to operate?—A. Mr. Plunkeski; he had charge of the warehouse, and after the plague was over, or just about the time that the plague was over, he told the board of health, the president of the board of health, that he would take charge of this watch and deliver a good many of the goods from the warehouse. There was only remnants left, and we told the president of the board of health to take charge of that work at the Aala warehouse, which was the only warehouse that was left, and to retain Mr. Plunkeskey. He had charge of all of the goods.

Q. Now, you have stated in regard to the number of packages of shoyu that was safe; you say that Payjima had a great many and that Harmano a great many, and Mr. Shimamoto had a few taken from there. I don't expect you to remember the exact number, but would you tell me your best judgment just about the number of packages; you stated a few; about how many of Mr. Shimamoto were taken in the Beretania street warehouse, may be 200 or 300, may be 400, or it may have been less?—A. Well, I can't say positively, but I think there were 200 anyhow.

Q. Do you know whether or not there was a book kept there when that stuff was taken in by anyone? When it was received at that warehouse, if some one called there and said he represented Shimamoto and came for that merchandise supposed to be there, wouldn't they take a receipt from the man that called to get it?—A. For that reason I want to see Mr. Gottleman to know positively before I answered

that question whether he might have taken a receipt. I think we told him at the time it was put in there by the board of health if he did it he did it on his own responsibility. I don't think he was told to do it.

Q. The board of health had charge of that?—A. As a fact, they rented the warehouse. We didn't have our men there when these goods were taken there to that warehouse. We had nobody there about the warehouse, and the goods were just thrown in.

Mr. PRATT. And thrown out?

A. The goods stayed there for some time.

The CHAIRMAN. You say that the merchants' committee were in charge of the warehouse; they were the ones that ran it?—A. Yes, sir.

Q. Do you mean to state as being within the judgment of that committee that you would make a statement here that they would receive goods, and that nobody was authorized to give a receipt or take the goods—is that the manner that you conducted the delivery and reception of the goods at those warehouses?—A. The committee was agent voluntarily for the best interest of all. At the same time we couldn't hold ourselves responsible for any number of packages that we might have received if not deposited afterwards. We just took them in custody; whatever was there belonged to outsiders.

Q. Didn't you say that you were responsible for 100 cases if they were brought there?—A. Just so; I gave my receipt for 100 cases; we didn't know the contents of any package.

Q. Didn't you say that if a man brought 100 packages—is there any responsibility in giving him a receipt for 100 packages?—A. Yes, sir; I would give my receipt.

Q. Did you count them?—A. No, sir.

Q. What were you there for?—A. To take charge of the warehouse and to take charge of the goods. We couldn't tell what they were; we could tell what they were, whatever there was in those goods. You must remember that this one particular instance, in the other instance where we had to vacate some three or four times.

Q. I am not speaking of the Beretania street warehouse, where goods went, and went out very shortly afterwards, but your colleague, Mr. Wakefield, testified that there was a receipt to the regular wagons moving things of Shimamoto, and in every case that it was identified with the mark, and receipts were given for it, and when the goods went out of the warehouse also receipts were given, and they would have to identify the mark. Have you any recollection of such a thing?—A. Mr. Plunkskey knew all of the trade-marks. I told you we didn't have anything to do with the Shimamoto goods; they were turned in by a drayman without our knowledge, without our taking any account of it; they came early, before we were really organized.

Q. But you let them go out again after the warehouse was in the charge of your committee, after the goods were in there. Would you let anybody come and take those goods off if the warehouse was in your charge?—A. Well, certainly.

Q. You would?—A. Yes, sir.

Q. Without giving a receipt?—A. I have the receipt for the other goods. I don't know these particular goods of Shimamoto.

Q. I am speaking of the goods of Mr. Shimamoto. I ask you as a member of that committee in charge of that warehouse, representing the merchants of the city of Honolulu, that you would let anybody

come and take those goods out of that warehouse and not stop them without giving a receipt?—A. I can not say that the man did not keep a receipt.

Mr. DOLE. Could anybody that didn't represent Shimamoto, could they come in there?

A. No, sir.

Q. You spoke of a storekeeper. Would you be able to secure for the information of this commission the name and give it to Mr. Andrade of that storekeeper, so that he can identify him, so that we can have his evidence on this at the time and shortly after, at the time these goods come into the possession—these goods of Shimamoto—came into the possession of the merchants' committee, and whether in their custody that he had some conversation with this storekeeper?—A. In this case of the Beretania-street warehouse, Mr. Payjimo, whose goods were there in the warehouse—he done business there, and the man started in right there to do business right from that stand.

Mr. PRATT. Is it possible that he sold out some of Shimamoto goods?

A. No, sir.

Q. Could you identify any of these persons whom you say that you saw about there who is in the employ of S. Shimamoto, around about the warehouse, do you think you could identify the name if we repeated it to you?—A. The man that had charge of the warehouse would be more likely to tell you than anybody else.

Q. O. Taka, that is the person; a small man that speaks English?—

A. He was the one that had charge, and I think he did the shipping.

Q. What connection had this man to do with Mr. Shimamoto's business?—A. Mr. Shimamoto wasn't here at the time and this man sort of supervised the business.

Q. Did you see Mr. Seji around there at all?—A. He was down in the main store, sometimes managing the business and making packages.

Q. He is your English-speaking clerk?—A. No, sir.

Q. Mr. Pratt asked you the question, Was Mr. Segui around the warehouse?—A. I have never been there; just dropped in to see if the work was done.

Q. And you never saw him around there?—A. No, sir.

Q. This man that you speak of, you heard this man that you speak of, Ozaka—would he be the principal man himself in the absence of Mr. Ozaka?—A. No, sir; he was just working, managing the account and work.

Q. Who would be, in the absence of Mr. Ozaka, the principal man to transact the business?—A. In the absence of Mauramoto, the bookkeeper, at the time he was in quarantine.

Q. He was in quarantine, the bookkeeper was?—A. Yes, sir.

Q. Would this other man that took charge, would he have anything to do with it?—A. If he was outside of the quarantine, the work, he the messenger of the house.

Q. He would do some of the shipping, wouldn't he?—A. No, sir, there was no shipping, because at the time it was during my absence and there was no shipping.

Q. Did this thing follow every day while you were absent?—A. Delivered around town, a few tubs around town.

Q. Who did that work while the bookkeeper was locked up in quarantine?—A. During my absence there was no goods to be shipped or delivered. When I came back from quarantine Mr. Keiser told me

that the goods in the warehouse is ready to be delivered to him; I had no store nowhere, so I shipped received from Mr. Keiser, and my goods went into the Aala warehouse.

Q. I want to know, Mr. Keiser, if Mr. Otaka or the representative of Mr. Taka, that he would give an application to take any of these goods?—A. If Taka had made application to the warehouse man, and the warehouse man might have some of those goods, would the Shimamoto goods, would they have been delivered to Taka as representative of Shimamoto?—A. Yes, sir.

Q. Now, why would you deliver those goods to Mr. Taka, Mr. Keiser?—A. Because I have personal dealings with those people, and I consider Taka more than a messenger; he does the buying and does the shipping, and when Mr. Segui is here sometimes, but Mr. Taka keeps the thing straight, but Mr. Suigi is really the man—the chief book-keeper.

Q. You have had personal dealings with this man Taka?—A. Yes, sir.

Q. Before and since the fire?—A. Before and since the fire.

Q. As I say, at the time—Mr. Suigi wasn't here at the time of the fire?—A. He did all of our dealings, and took away the goods from that store on Nuuanu street.

Q. So that if Mr. Taka had called for the goods you would have been perfectly willing to give them to Taka?—A. Yes, sir.

Q. And the manner in which you conducted this warehouse system, was there any possibility of goods reaching any other person than the rightful owner?—A. With the exception of that one lot of Shimamoto's, I would say no, because to my knowledge that every dray load of goods aside from Shimamoto's was taken and receipted for, everything; but in this case of Shimamoto's there might have been a receipt given for the receipt of his goods, I can't say.

Q. Well, you testified a while ago that the goods were worth about \$8,000. Now, what goods were those?—A. The whole warehouse, as it stood at the time. I never have been in the warehouse. I understood that warehouse was full of goods. I have seen a good many drays piled up with the goods during the time of the taking of those goods away, and the biggest bulk of those goods was Shimamoto's, and they were dumped out in the sea.

Q. Now, do you mean the goods that were in the warehouse after the fire?—A. After the fire, the damaged goods, as I understand—as I say, some of the goods were damaged and some of the shoyu; the good goods were taken to the Beretania street warehouse.

Q. How do you fix the valuation at \$8,000?—A. The whole contents of the warehouse at the time of the fire there was supposed to be \$8,000 worth of goods.

Q. How do you fix that valuation? Who do you understand that by?—A. That is what I understand.

Q. Just the general valuation?—A. Some one told me.

Q. Could you say who that was?—A. No, sir; I don't remember.

Q. Do these people owe you any money?—A. They do.

Q. Do you know whether Shimamoto has any other store on this island or elsewhere, where that could be shipped?—A. He has several stores in the country.

Q. You mean on the islands adjacent to the island where Honolulu is?—A. Some on this island.

Q. Did he have the other store at the time of the fire?—A. He had some.

Q. Where?—A. I think there is one at Waialua and one out here.

Q. He had those stores at the same time he had the warehouse?—A. Yes, sir.

Q. Do you know whether those stores were supplied from this warehouse?—A. I don't know.

Mr. BROOKS. He is considered a big merchant?—A. Yes, sir.

Q. And do you keep a general account with the Japanese business that is done by the different Japanese houses?—A. No, sir.

Q. You don't know whether there is any increase?—A. It seems that all of them have had a big stock of goods at that time on account of the annexation on June 14. I was surprised at some of the stores that were injured—the amount of stuff and China stuff.

Q. On account of the annexation, in anticipation of the higher tax?—A. Yes, sir.

Q. Do you know whether in Japan there was any cause for the increased emigration?—A. That I can't tell.

Q. Don't you know that a great many Japanese laborers came to this country in 1899?—A. There was quite an influx; I don't know how much.

Mr. ANDRADE. Do you believe the influx of laborers, immigration, was to such an extent that it caused Shimamoto's business to rise from \$3,000 to \$8,000 or \$10,000 in one year?

Mr. BALLOU. You mean the value of the stock on hand?

Mr. ANDRADE. For one year. From three-thousand stock on hand to ten thousand.—A. That depends, at times. Sometimes the Japanese store will run their stock low, and when a big shipment comes in fill it up. It doesn't always run even.

Q. With the influx of labor and other conditions, would it be so great as to cause his business to increase from \$3,000 to \$10,000 in one year?—A. I know this, judging by the other warehouse, Wy Sugo that in the removal those people carried an immense stock of goods and you will see that, by referring to the warehouse book, by the stock, it seems that the stock run pretty even.

Q. What would you think the increase of the business under the conditions at that time—that it was increased from \$3,000 to \$15,000 in one year?—A. You was first speaking about the increase of the stock from three thousand to ten thousand; now you are talking about the business.

Q. No; the increase of the stock is what I mean.—A. From three to ten thousand in one year.

Mr. BALLOU. If there is any testimony in this case of that—the proposition is Mr. Shimamoto paid taxes on \$3,000, and then in this first of last December—December, 1899—there is a claim for \$106 particularly for goods in the warehouse, and some goods with which you are familiar in the store besides—would you think from the existing conditions—would you think there was anything improbable from the state of affairs, or should you think it was warranted by the general state and condition of things that you have testified about?—A. I think, as much as I know of the business relation, that the man was doing some business at the time, that his purchases were larger than the purchases of the year before, that the business was on the increase.

Q. But the amount wouldn't be \$10,000 if he has \$3,000 stock in there?

Q. The question of the increase on the 1st of January on the \$3,000 and then the last of December of the same year, assuming him to have a stock of \$10,000 in this warehouse—anything improbable in that?—A. I don't think so; I don't know whether there was \$10,000 in the warehouse; I can't say; I can only go by the value of the goods that were in there. I know there were quite—at least 30 or 40 dray loads carted away from there.

Q. When will that witness be here?—A. I can't tell you, sir.

The CHAIRMAN (to Mr. Andrade). When will that other witness be here?

Mr. ANDRADE. I can't tell you.

Mr. BROOKS. He went over to Kauai on his own affairs, and I can't tell you when he will return.

Q. What part of the island of Kauai is he on?—A. Lihui.

Q. Is he in Mr. Shimamoto's employ?—A. Yes, sir.

The further hearing of this matter is continued until 2 o'clock p. m. this the 12th day of June, 1901.

AFTERNOON SESSION.

J. PIVER, called and sworn.

Mr. ANDRADE. Were you connected with—what position did you hold in the merchants' committee during the month of December, 1899, and the early part of the year 1900?

A. Well, as to those dates, I don't believe that I was working for the merchants' committee in December. I think I commenced later.

Q. When, do you think?—A. Well, I wouldn't say; it might have been in January.

Q. Nineteen hundred?—A. Yes, sir.

Q. What was the nature of your duties?—A. Well, I was employed by the merchants' committee and stationed at the Aala warehouse. I was there simply as an assistant to Mr. Plunkesky, who was in charge.

Q. And as an assistant to Plunkesky, did you have the immediate charge of the warehouse, or did Plunkesky have charge of the warehouse?—A. He had charge of the warehouse. I was simply to help him. It was more than he could do, and I was there to help.

Q. Do you know whether or not any books were kept—any records of what was taken out? Was there any record kept of those transactions?—A. Well, there was a kind of a record kept of them. If you got hold of the books you would be able to trace everything that went in there.

Q. Were they accurately kept?—A. They were done in shipshape; everything was handled properly. The stuff was hauled there by different trucks and drays and simply left there and checked in and entered into the book.

Q. How would you identify those goods?—A. Well, they were all marked there with the full name of the party that owned them; he does the shipping and marked them with initials.

Q. Did you assist in keeping this record?—A. Yes, sir.

Q. Now, do you remember this book marked "Ledger?" I refer to the small leather book marked "Ledger."—A. No; I don't remember of ever having seen that book before.

Q. Then you can not in any way identify the book as being one of the books kept at the Aala warehouse?—A. No, sir; I never saw the book before. I wouldn't say that I recognize the handwriting. It

looks like handwriting that I have seen, but I don't know; I wouldn't identify it.

Q. Is it Plunkesky's handwriting?—A. I can't say; I haven't seen any of his handwriting for a long time.

Q. Were you at any time connected with what is called the Beretania street warehouse?—A. No, sir; never had anything to do with it; that was before my time.

Q. Now, do you recognize that book, that canvas-covered journal?—A. I know that book.

Q. Who kept that book?—A. I guess that I kept a good deal of it, and Plunkesky kept a good deal of it. Nearly all of this stuff is in my handwriting. All of that is my handwriting. I don't know anything about that.

Q. Do you remember, while you were connected with the Aala warehouse, of a party by the name of Shimamoto having goods there?—A. The name is familiar—Shimamoto, Shimamoto—there were many of them, but I think I remember his name.

Q. Well, if you were to refer to some of the receipts which you got from Shimamoto for certain articles which were taken from the warehouse, would that have recalled to your mind what they might have been?—A. No; that would be in here.

Q. That wouldn't recall to mind?—A. Although that stuff is there there would be here no charge; this book is where the articles were merchandise, general merchandise, and the goods contained in store entered as merchandise, and where they are personal effects they are entered as effects—household furniture.

Q. Most of the entries in that book are so many packages of merchandise?—A. Well, that means general merchandise.

Q. Now, in referring to this particular claim, if I was to show you the receipts could you say whether they were packages of dry goods or kegs of shoyu?—A. The stuff is all entered as merchandise.

Q. Could you say what the majority of the packages contained?—A. Well, I don't remember of ever having seen a tub of shoyu down in the warehouse; I can't remember of ever having seen any.

Q. What was the greater proportion of the goods in that warehouse were they dry goods or canned goods?—A. There was everything. I think there may have been dry goods and anything else; there was quite a lot of provisions, dry goods, personal effects, and household furniture.

Q. What was finally done with all of the goods that were in there in that warehouse?—A. I can't tell you, because Plunkesky left there before the summer—around June; in June, I think, we left.

Q. And there were still goods at the warehouse when you left?—A. When we left there was very little merchandise; only personal effects household effects.

Q. Was the majority of the stuff there when you left?—A. Very little stuff when we left.

Q. Under the system by which you conducted that warehouse was it possible for any goods to reach anybody but the rightful owner?—A. No, sir; because the manner in which the place was conducted was this: If a man had stuff in the place he would go to Humbert or Mr. Wakefield, or Theo H. Davies, and they would identify him and give him an order on Mr. So and So, which we would receive, and without

that order we never delivered any merchandise. Personal effects and household furniture we would deliver, but not merchandise.

Mr. PRATT. You identify that as the book that was kept?

A. Yes, sir.

Q. Was there any other book kept than that? Did they keep a receipt book, or is this the only book that they kept?—A. To the best of my knowledge that was the only book that was there—that was kept there for that purpose.

Q. Any receipt given out to the parties that would bring goods—a cart load of goods came up there, you would take them in?—A. The stuff that the owners didn't bring up there to the warehouse they were brought by the board of health drays. This stuff, when it was in there, we would take it and put each man's stuff by itself; it was all marked.

Q. No receipt was given?—A. I never gave any receipt. I don't remember of Plunkesky giving a receipt, he may have given a receipt before I came; he was there some time before I came.

The CHAIRMAN. If Shimamoto had any goods in there, in that warehouse, he couldn't get them out without signing a receipt in that book, could he?

A. No, sir.

Q. And you don't know anything about the Beretania street warehouse?—A. No, sir; I never knew such a place had been in existence; I have no personal knowledge of it.

Q. Do you know whether any goods were transferred from the Beretania street warehouse to the Aala warehouse?—A. Yes, sir; I know that from having heard Plunkskey say so; of my own knowledge I don't know.

Q. It wouldn't appear any differently in that book whether they came from Chinatown, the Beretania street warehouse; no way of identifying that?—A. No, I don't think so; it is a long time ago, "January 31, 53 packages, marked 'O. K.'; one dray load."

Mr. BALLOU. We offer in evidence the letter from Shimamoto to the board, dated "January 5, 1900. To the board of health." Indorsed "This claim filed by Attorney F. M. Brooks, transmitting a copy of the claim." It is marked "Exhibit A." We will show that claim has been in the board of health since that time—

The further hearing of this matter is continued until Monday, June 18, 1901.

JUNE 18, 1901.

MORNING SESSION.

Mr. BROOKS. We desire to deduct from this claim 560 tubs of shoyu at the market price, that is 12 cases, and 12 cases of porcelain at the market price here.

Mr. ANDRADE. Do you admit, will you admit, that all the goods in the Beretania street warehouse, all the goods placed there came from the Nuana street warehouse?

Mr. BROOKS. If you have any means of showing any more than that we will not admit the entire amount; 560 tubs from the Beretania street warehouse we found the date we delivered, and we ask that be deducted and make no claim for that.

The CHAIRMAN. When did they take this Beretania street warehouse? Some time about the first of March, about three months afterwards?

Mr. BROOKS. Well, Mr. Segui was in Kauai? No, Mr. Segui was acting on the Japanese committee, on quarantine business, and had nothing to do with the removal of the goods from the warehouse, the Kakkaako warehouse. He never was at the Beretania street warehouse. We have Mr. Otaka and Segui, and we desire to examine Mr. Otaka.

Mr. ANDRADE. I will insist upon the examination that you took away from the warehouse all the goods that was placed there.

Mr. BROOKS. What we receipted for we only took, nothing more. Furthermore, I believe absolutely that was all that was there. We just simply desire to admit what we got from there and nothing more.

This bill has not been changed since it was placed in the hands of the board of health, not a bill that has been manufactured. The claim is perfectly legitimate. We have kept the thing just as straight as we can; we find from what our own witnesses say; we come in and admit if the government can't prove anything else we are willing to admit anything that the government can prove. As we said, we are willing to admit anything that the government can prove. Then the government will not have to prove it. Anything which we find in this claim which was put in three days after the fire we desire to admit it and will give the government no trouble in proving it.

Mr. ANDRADE. I wish to offer in evidence this paper, which appears to me to be the inventory in the case and inventory of the goods that were in the warehouse at the time. We have not been able to show who prepared it, but in comparing the articles there are several different articles that correspond exactly with the inventory of the claimant, and in other particulars it bears an explanation as to the number of articles, as, for instance, the cases of canned goods that you remember some time ago the claimant claimed—256 cases; this shows 40 cases; tubs of shoyu—this inventory shows 682 cases and 924, and this claimant's inventory filed here an estimation they claim. We find in this inventory 344 to 472; mossa we find 323 to 210, and another article, katakuri, we find 630 cases and upward to 28 in this inventory, and beans we find 218 to 653. There are three different kinds of beans, now making the total figure of the beans 653. There is another article here which this inventory shows 3 to the other 41; there is also another article this inventory shows 4, and that inventory of the claimant 22. I wish simply to offer this in evidence for what it is worth.

Mr. BROOKS. Why do you wish to offer it?

Mr. ANDRADE. For the purpose of comparing the two articles. This wasn't drawn up at random; there is a person that could complete that we have something to go by. I think the court should give that considerable weight. Here are the goods that you admit the other side admits were taken to the warehouse—crockery.

Mr. BROOKS. Forty-five cases of crockery.

Mr. ANDRADE. This item 36½ in the inventory shows 45 cases of crockery, and all of this inventory marked as taken to the Beretania street warehouse. Mr. Weedon says it was shown to him, and he said it wasn't his handwriting—

Mr. BROOKS. I absolutely object to this being introduced in evidence for what it is worth. There is no court in the world that ever

allows evidence of that kind; it has got to be legal evidence. We will admit that this court is not quite up to the technicalities of hearsay evidence, yet the evidence—it must be legal evidence. The gentleman will remember there is no appeal from this court, and we are placed in that position. We are willing to admit anything that is reasonable, but I will ask you in all fairness not to admit a paper which is not signed by anybody, and which there is not the slightest proof that it purports to be anything; there is no evidence that it is an inventory at all, or that it was prepared by anyone, or by whom it was made, or when it was made, but they just introduce that and ask to admit it for what it is worth. I submit to any of you who may be attorneys that would be no kind of evidence. They offer no proof by whom it was made, or to what it refers, or when it was made. I submit that as far as tending to disprove the direct testimony of Mr. Weeden and the other gentlemen who were there and took the inventory and made the appraisal, I submit that it would be absolutely unfair to this claimant. We have no way of disproving it.

Mr. ANDRADE. I only offer it for what it is worth.

Mr. PRATT. The evidence shows that there were three appraisers that inventoried the property; one was Mr. Max Berger, one was Mr. Weeden; but I don't recollect that was the one that subscribed to that being an accurate schedule of the goods that was in that warehouse. Do you recollect that he identified that?

Mr. BROOKS. He did not identify that.

The CHAIRMAN. We all understand in this case, as well as in other cases, there is going to be more or less direct testimony, therefore the Commission have got something more to consider besides legal testimony that is brought before us; and I think, Mr. Brooks, it would be permissible, and it would be right and proper, to take this for what it is worth. I will admit that it is not direct evidence, consequently it must be considered as such; but you will admit that in the deduction of these claims, in the presentation of the evidence, and to adjudicate on these claims we are going to have a great deal of contention—that it will be as I said before. So far as we are concerned, we are here for the Government and claimant alike, and in the absence of direct testimony bearing upon this matter both pro and con—and I think in this case this can be admitted for what it is worth. Admitting that it is not direct evidence, as Mr. Brooks says, it may be referring to some goods in some other warehouse, while at the same time I feel certain that the Commission will do no wrong to admit it for what it is worth; we will only take it for what it is worth; it will in no wise prejudice the claimant's case, and it will be admitted in those words, for what it is worth.

Mr. PRATT. Can you show that it is in the handwriting of either one of those men? The Government will try to have to see if they can't identify it; it will be admitted subject to that course.

S. OTAKA, called and sworn:

Mr. BROOKS. By whom were you employed on the 31st of December, 1899?—A. Shimamoto.

Q. The claimant in this case?—A. Yes, sir.

Q. Do you know this warehouse on Nuuanu street?—A. Yes, sir.

Q. You may state whether or not you were quarantined at the time

that this warehouse on Nuuanu street was taken charge of by the board of health.—A. I was quarantined.

Q. Where was Mr. Segui at that time?—A. He was on Kauai.

Q. State whether or not Mr. Shimamoto had a warehouse in Kakaako a short time after this warehouse on Nuuanu street was destroyed.—A. He had.

Q. State how long after that—how soon after that—did you go to the warehouse in Kakaako.—A. In the month of February.

Q. Some time in February?—A. Yes, sir.

Q. Were you or not importing goods from Japan at that time?—A. Yes, sir.

Q. What became of the goods that you imported from Japan in the latter part of December, 1899, and in January, 1900; what became of those goods in reference to these down here?

Mr. PRATT. What is the object of this, because this is the list of destroyed; why don't you begin with the goods at the time of the fire and trace them, and see if he knows anything about that?

Mr. BROOKS. How soon after the destruction of your warehouse on Nuuanu street—that was on December 31, 1899—how soon after that did you learn that there was any of your merchandise in the Beretania street warehouse; do you know whether or not there was any merchandise taken from the Nuuanu street warehouse to the Beretania street warehouse that you knew of, or first learned it?

A. I don't know, sir.

Q. Don't you know when you first learned that there were goods in the Beretania street warehouse. How did you learn that there were goods there?—A. After I came out from quarantine I was told by Mr. Humberg about the goods in the Beretania street warehouse.

Q. Is that the first that you knew there were goods in the Beretania street warehouse?—A. Yes, sir.

Q. What were you doing at the time that Mr. Humberg told you that the goods were in the Beretania street warehouse?—A. At the time when I saw one of the drays which was piled upon the wharf, and when Mr. Humberg came around and told me that there was merchandise inside of the Beretania street warehouse; also that I should take it away; that is the way that I came to know it.

Q. And that was the first that you knew it; when was that, do you remember when that was?—A. I can't remember, the latter part of February or the first part of March.

Q. Now, then, in consequence of what Mr. Humberg told you, what did you do with this freight in the Beretania street warehouse?—A. I went to the warehouse and inspected the goods, and after I saw the wagon up there I got them, what goods were there.

Q. There was some shoyu?—A. And about 10 cases of crockery.

Q. How much shoyu?—A. I didn't count at that time when I went to inspect the goods, but when I got the goods by the information I found that there was 560 tubs of shoyu and also 12 cases of crockery.

Q. Is that the merchandise that was there belonging to Shimamoto?—A. That is all.

Cross-examination:

Mr. ANDRADE. What position did you occupy in Shimamoto's store?—A. Well, there is no fixed duty for me, but mostly receiving freight and sending out freight, and I did other work besides that.

Q. You had authority, did you not, to receive goods and to follow goods to any designation for Shimamoto, did you not, or ship goods?—A. Yes, sir.

Q. You say in the latter part of February or the early part of March you learned of certain goods being in the Beretania street warehouse, and you took those from there to where?—A. By the expressman I sent the goods down to the warehouse at Kakaako.

Q. Did you sell any of the goods that were taken out of the Beretania street store or warehouse directly?—A. No, sir.

Q. Did you ever tell Mr. Segui that you had taken any goods from the Beretania street warehouse?—A. I don't think I did tell him about the freight that I received from the Beretania street warehouse, but at the same time I thought Mr. Segui knows until he came back from Kauai. That is the time that I was told that Segui never knew about it. I was really surprised, but I don't think I ever told him about it.

Q. Well, do your books, did the books of Shimamoto show that any goods had been taken out of the Beretania street warehouse or put in the Kakaako warehouse?—A. No; I just made out the memorandum of what I received from the Beretania street warehouse. I don't know anything about the time I made out my own memorandum.

Q. Does that date or did that ever appear on the books of S. Shimamoto?—A. I don't know about that.

Q. Had you any power to go for Shimamoto without his knowledge?—A. No, sir.

Q. Then, why did you take the goods from the Beretania street warehouse to the Kakaako warehouse and your store not know anything about it?—A. I told about this thing to Mrs. Shimamoto.

Q. What did Mrs. Shimamoto have to do with it?—A. Of course, all of those things went to Mrs. Shimamoto. I naturally told her about it.

Q. Did you not know that Mr. Segi was the manager of S. Shimamoto?—A. Yes, sir; I know it.

Q. Why did you not tell Segi instead of Mrs. Shimamoto?—A. At the time Mr. Segi was very busy on account of some meeting he had. It was about some Japanese fire and he used to come home late at night; many times I never saw him when he went, so I told Mrs. Shimamoto instead of Mr. Segi.

Q. On business matters, did you consult with Mrs. Shimamoto or the manager of the store, Mr. Segi?—A. I always consulted with both one or the other or either.

Q. Who was really the owner of the store, Mr. Shimamoto or Mrs. Shimamoto?—A. Owned by Mr. Shimamoto and Mrs. Shimamoto.

Q. Whenever it was necessary to employ a lawyer, who employed the lawyer, Mr. Shimamoto or Mrs. Shimamoto or Mr. Segi?—A. I don't know about that.

Q. Do you know when the fire claim, the claim for these goods, had been prepared?—A. When do you mean? I don't know what you mean.

Q. There has been only one action to present fire claims, has there not?—A. I don't know; I never worked with the lawyers and I don't know about those cases.

Q. Didn't you have anything at all to do with the preparing of the list, the claim that was going to be presented to the Government?—A. I have nothing to do with it.

Q. Did you not know that the Government was going to pay some of the claims for goods lost in the fire in Chinatown?—A. Yes; I heard about it.

Q. And did you not believe that Shimamoto was going to present a claim for the goods that he might have lost during the fire?—A. That all belonged to the bookkeeper and the manager; that is not my work.

Q. Did you not know that such a thing was being done?—A. Yes, sir; I am told.

Q. You were told about it?—A. Yes, sir; I heard of it.

Q. When you heard of it, did you believe it? Did you not believe that it was your duty to tell him how you had taken these goods from Beretania street warehouse to the Kakaako warehouse?—A. Yes, sir; it is my duty.

The INTERPRETER. He doesn't understand that.

Mr. BROOKS. I don't see the necessity of proving something that we have admitted; I think that is taking up the time.

Mr. PRATT. Mr. Shimamoto has testified no part of the proceeds in this case were ever returned to Shimamoto or came into his possession after the fire. It has developed now after that time there were certain goods returned to Shimamoto of which this man has personal knowledge. Now, of course it may not be possible to do that or this but was all the goods that was taken into the Beretania street warehouse at the time they were taken and subsequently transferred to Kakaako, but it doesn't seem as though Mr. Shimamoto knew, but Mr. Segi, acting as manager of Shimamoto, would have or should have some knowledge of such possession of the goods; they were shipped into the Kakaako warehouse, and when he comes to move these goods some 500 kegs of shoyu, it reflects somewhat upon Mr. Shimamoto.

Mr. ANDRADE. When you heard of this, did you not believe it was your duty to tell him that you had taken these goods from the Beretania street warehouse to the Kakaako warehouse?

A. I think it is my duty to tell him.

Q. Why didn't you tell him?—A. Oh, I told Mrs. Shimamoto first about it, and I supposed Mrs. Shimamoto would speak to Mr. Segi.

Q. On a big transaction did you consult Mr. Segi or Mrs. Shimamoto?—A. When Mr. Segi was there I consulted with Mr. Segi; when Mrs. Shimamoto was there, why then I spoke to Mrs. Shimamoto.

Q. When you knew that this claim was being prepared why did you not then tell Mr. Segi about the return of those goods to the Kakaako warehouse?—A. At the time I was at Kauai, when they were preparing that claim for this court.

Q. At any time when you knew that the claim was going to be filed for those goods, why did you not tell Mr. Segi?—A. Because there was no necessity; I understood right along that Mr. Segi knew it from Mrs. Shimamoto. That is why I didn't tell it. I believed that Mr. Segi knew it.

Q. Did you have any reason to believe that Mr. Segi knew it from Mrs. Shimamoto?—A. Well, because Mrs. Shimamoto is the owner of the store and Mr. Segi is the manager, and, naturally, I always thought that they had talked of such subjects as those.

Q. Did you know that Mr. Segi would appear here for Mr. Shimamoto instead of Mrs. Shimamoto?—A. I supposed so, but I don't know really; they are manager and owners; the stores here I didn't know.

Q. Now, in regard to the goods that was in the Beretania street warehouse, you testified that you didn't know—that you took away from there all the goods that were at that place, did you not?—A. No, sir.

Q. What part of those goods did you take away?—A. Only a barrel of crockery.

Q. What other goods did Shimamoto have there?—A. That is all; shoyu and crockery.

Q. Did you not take away from the Beretania street warehouse all the goods belonging to Shimamoto?—A. Yes, sir.

Q. Now, could you tell the court about how many packages of each article there was—how many packages of shoyu and how many of crockery?—A. Five hundred and sixty tubs of shoyu and 12 cases of crockery.

Q. You say that there were 560 cases?—A. When the expressman took the shoyu down to the warehouse in Kakaako the total I found to be 560.

Q. Have you any memorandum from which you can recall that?—A. No, sir.

Q. That is your knowledge from memory, then?—A. Yes, sir; that is only memory. I have got a slip of paper at the time; since then I found the last day.

Q. Isn't it possible that you might be mistaken—that it was 650 tubs?—A. No, sir; that was 560.

Q. I asked you as to the number of cases of crockery; how do you recall that?—A. The same way. I tried from the expressman and found out.

Q. You spoke naturally from memory of those?—A. Yes, sir. At the time I had a memorandum, but it is lost.

Mr. ANDRADA. Isn't it possible that there were 36 cases of crockery there instead of 12?

A. No, sir.

Q. Then, if we could produce a document to the effect that there were 36 cases of crockery in that warehouse, that would be incorrect, would it?—A. Yes sir; that must be a mistake.

Q. In what part of the warehouse did you find the goods belonging to Shimamoto?—A. In the corner near the stable.

Q. Wasn't it inside of the stable?—A. Yes, sir; inside of the stable in one corner.

Q. Weren't these goods inside of four horses' stalls?—A. Yes, sir; and some outside of the stalls, too.

The CHAIRMAN. Do you speak English?

A. Not very much.

Q. Do you speak English at all?—A. A little.

Q. Do you understand the questions that I am asking you?—A. A little—just a little.

Q. Did you ever buy any goods for Shimamoto from Heyman Brothers.—A. Yes, sir.

Q. Have you ever bought any from Hackfield & Co. for Shimamoto?—A. Yes, sir.

Q. Then you were authorized by the firm to buy goods from these various firms?—A. Yes, sir.

Q. Then you are the buyer for the firm of Shimamoto?—A. Not myself alone, but sometimes I act buyer and sometimes some of the other boys buy.

Q. Don't you do the most of the buying for the firm?—A. Yes, sir.

Q. When did you tell Mrs. Shimamoto about recovering these goods from the Beretania street warehouse?—A. Right after I came back from the warehouse I told Mrs. Shimamoto about it.

Q. Who made up the claim against the government here for the list of the goods, Mrs. Shimamoto or Mr. Segi?—A. I don't know anything about it; I am not the bookkeeper.

Q. Do you understand everything that I have been saying now?—A. Not all.

Q. Most of it?—A. Most of it.

Mr. PRATT. Where were you at the time of the fire when the warehouse was destroyed?

A. I was quarantined inside of the quarantine.

Q. Did you see any of the goods taken out of the warehouse?—A. No, sir.

Q. When did you get out of quarantine?—A. About the middle of January the same year.

The CHAIRM N. Did you ever sign a note for the goods bought from any firm in town for the firm?—A. No, sir.

Q. Mr. Brooks, I will ask this question, as my memory serves me: Mr. Segi, the manager, testified here before this commission that this man, acting as messenger only for the firm, that he attached no importance whatever, no responsibility, as I understood, to the work that he did. He laid particular stress on the fact that he was a supernumerary in there.

Mr. BROOKS (to the witness). When you say that you go out to buy things of Hackfield and Davies, how did it happen that the firm should give you authority to go out and buy?

A. When Mr. Segi was here he would tell me to go out and buy, and Mrs. Shimamoto and sometimes the bookkeeper tells me to go out and buy.

Q. You may state whether the bulk of your business, the merchandise, is bought here or comes from Japan?—A. Yes, sir.

Q. Where does it come from?—A. From Japan.

Q. You say that you removed 560 tubs of shoyu from the Beretania street warehouse; was that all the shoyu stored there?—A. That was all of Shimamoto's.

Q. All that was stored in that warehouse?—A. Yes, sir; that is all that belonged to Shimamoto.

Q. Anything else; any more shoyu outside of that 560 tubs in the Beretania street warehouse?—A. There was plenty that belonged to some other houses.

Q. Did you remove everything else from that warehouse?—A. Twelve cases of crockery besides the shoyu, 12 cases of crockery.

Q. When were you put into quarantine?—A. I was quarantined from the second time; I don't remember the time exactly.

Q. You mean the general quarantine?—A. The general quarantine.

Q. When that district was quarantined, that was before the fire that destroyed this warehouse on December 31?—A. Yes, sir, before.

Mr. PRATT. Who had the Kakaako warehouse; was it a Government warehouse or a private warehouse?—A. Belonged to Shimamoto.

Q. And all the goods in that warehouse were the goods of Shimamoto?—A. Yes, sir.

Q. The goods that were removed from the Beretania street warehouse, the 560 tubs of shoyu and the 12 cases of crockery, were those all the goods belonging to Shimamoto in that warehouse?—A. Yes, sir.

Q. Only yours?—A. Yes, sir.

Q. Shimamoto had nothing else stored in that warehouse?—A. Nothing else.

Q. That is the Beretania street warehouse?—A. Yes.

Q. Did he have any other goods than those that was in the Beretania street warehouse go into the Kakaako warehouse; what other goods than those that came from the Beretania street warehouse was in the Kakaako warehouse at the time that you put this in?—A. There was plenty of kegs of shoyu there.

Q. Who had charge of them?—A. Nobody that was to look after the shoyu; the warehouse was looked after by several persons.

Q. Who had charge of the Kakaako warehouse at the time that you sent these goods from the Beretania street warehouse; who was there in charge of the Kakaako warehouse?—A. Always one besides me; there was another employee there, too.

Q. Where did this shoyu come from other than that was from the Beretania street warehouse?—A. From Japan.

Q. From the steamer landing, taken from the steamer landing to the Kakaako warehouse?—A. Yes, sir; from time to time, from the time these goods were first taken, from the first part of February to April.

Q. Was Mr. Segi there at the time—about that warehouse at the time these goods were taken to the Kakaako warehouse; did you see Mr. Segi about there at the time?—A. No, sir; he was at his office, down town.

Q. Who signed the receipt for those goods when they were taken away from the Beretania street warehouse?—A. I don't know who they were signed by; I was at Kakaako, and the expressman brought them down to me.

Q. Who was the expressman?—A. A Japanese.

Q. What is his name?—A. Evasacka.

Q. Where does he hold out?—A. Somewhere in Honolulu; he is an expressman at the present.

Q. Whereabouts in Honolulu; didn't he have a place, a stable?—A. Palama.

Q. How did the expressman—how was the expressman able to get these goods from the Beretania street warehouse without an order?—A. I was at the Beretania street warehouse myself, and then I came back and the expressman was sent after the goods.

Q. You told the people there to give the expressman the goods, did you?—A. Yes, sir.

Q. Did you count the tubs and cases when they were taken off of the wagon?—A. Yes, sir.

Q. And you gave him a copy of the memorandum? Did you keep the tally on a piece of paper for each load, the number of tubs?—A. The expressman made a scratch out for so many tubs of shoyu and so many kegs on this wagon; I gave it to him, and I watched the count to see that it tallied.

Q. Then the expressman had a little memorandum of the number of tubs on his wagon?—A. Yes, sir.

Q. And the number of tubs delivered tallied with the number of tubs; the memorandum were the same?—A. Yes, sir.

Q. Did you ever go back to the Beretania street warehouse to see that the expressman took them all?—A. No; the expressman told me that was all.

The CHAIRMAN. Did you know what goods went from the warehouse to the Beretania street warehouse; do you know just exactly what went from there, from the house that was destroyed by fire; do you know what goods, just what goods, went from the Beretania street warehouse?—A. No, sir.

Q. Who did that, anybody in the firm?—A. I don't know about that.

Q. Can you remember the number of cases in the Nuuanu street warehouse and the different variety of goods?—A. No, sir; I can't tell that.

Q. Do you remember how many tubs of shoyu were stored in that warehouse before the destruction?—A. There may have been a couple of thousand; there may have been more.

Mr. BROOKS. Packages of shoyu?

A. Yes, sir.

Mr. ANDRADE. Did you see the goods after the fire, when they were outside of the warehouse just opposite the warehouse—the Nuuanu street warehouse?

A. Yes, sir; I saw it immediately after it was put out, and the representatives of the government were there.

Q. Now, was there any great portion of the shoyu which was formerly in the warehouse damaged to any extent, so that it couldn't be taken over to the Beretania street warehouse?—A. Yes, sir; quite a number.

Q. Well, I ask what portion?—A. Well, I can't tell you so many, the portion of it. I know that there was quite a number, that some of it burned and some of it leaked and was broken.

Q. Some were burned?—A. Yes, sir; the corner was burned by the heat.

Q. By the heat of the fire?—A. Yes, sir; by the fire.

Q. How did you see the goods? I understood that you were in quarantine.—A. The board of health sent word for one man of Shimamoto to come there and see. I was commissioned by Mrs. Shimamoto to go there and represent Mr. Shimamoto, and I was there in that capacity.

Q. And returned to quarantine afterwards?—A. Yes, sir.

Q. Did you make a list of the stuff that was in the warehouse?—A. Not I; no, sir.

Q. Were you present when any was made?—A. Yes, sir; I was present when somebody else made the list.

Q. Did you see that in the hands of any of the people?—A. No, sir; I believe that it was in a book that they had in their hand, not a paper like this.

Q. What now fixes it distinctly—was it either before the fire or after the fire, and how long; you say that you were not present at the time of the fire?—A. It must have been two or three days after the fire.

Q. Were they hauling the stuff away from there at the time?—A. No, sir.

Q. Was it stores stacked up around there at the time?—A. Yes, sir.

Mr. BROOKS. What did you learn, if anything, after you got out;

that became of this merchandise from the board of health; what did you learn? Have you got any means to find out where these goods went? You may state if you did, or not, learn and what you did learn where these goods had gone that were taken out of that warehouse.—A. I was in quarantine in sight of the stuff. Shimamoto's store and from the position where I was quarantined I could see the wagon taking away the stuff, the merchandise, to somewhere else, I don't know where.

Q. Did you go there after you got out where or what became of your things; and, if you inquired, did anybody tell you what became of the goods?—A. I asked, at the time, a man who was in charge of the property, and the drayman told me they are going to throw away all of those merchandise.

Q. That they were going to throw it away?—A. Yes, sir.

Q. The first that they learned that anything was saved was what you learned from Mr. Humbert?—A. Yes, sir.

Mr. PRATT. Now, what is the name of the drayman that took the goods from the Beretania street warehouse down to Kakaako?

A. Iwazaki.

Q. Where can he be found?—A. Somewhere in Palama.

Q. Where?—A. I don't know.

Q. Who would know?—A. I can't tell; I have been at Kauai.

Q. Where did you find him when you wanted him?—A. He was pretty near the corner, and sometimes I would see him on the street; I had no trouble to catch him.

Q. Doesn't he do your draying now, your carting?—A. Shimamoto own their own dray now.

The further hearing of this matter is continued until 2 p. m.

AFTERNOON SESSION.

H. IWAZAKI, called and sworn.

Mr. ANDRADE. What was your occupation during the latter part of 1899 and the early part of 1900?

A. Expressman.

Q. During that time did you have any business connection with Shimamoto?—A. Yes, sir.

Q. What was the nature of that business between yourself and Shimamoto?—A. Carrying freight from the landing to the store and from the store to the landing; all of those things for an expressman.

Q. Or for any other purpose that Shimamoto might desire in the express business, is that so, or for any other purpose in that same line of business, you might take goods up Nuuanu street or some other place?—A. Yes, sir.

Q. Do you remember during any part of the year 1900 taking any goods belonging to Shimamoto from the warehouse on Beretania street near Chaplin lane to some other place?—A. Yes, sir.

Q. What part of the year was that in?—A. I don't remember exactly the date—I didn't put it down in my book—it is such a long time.

Q. Was it in the early part or the latter part of 1900?—A. I can't tell.

Mr. PRATT. With respect to the fire?

Mr. ANDRADE. Was it during the plague time?

A. I guess it was after the plague, but I am not sure.

Q. Was it after the big fire in Chinatown?—A. Yes, sir; it must have been after that fire.

Q. Did you take goods from the Beretania street warehouse?—A. Yes, sir.

Q. Where did you take those goods to?—A. To the warehouse.

Q. What warehouse?—A. Shimamoto warehouse.

Q. Where is that?—A. Kakaako.

Q. Is that the only place to which you took goods from the Beretania street warehouse?—A. That is the only place.

Q. Who ordered you to take those goods from the Beretania street warehouse to that warehouse?—A. Otaka.

Q. In your transactions with S. Shimamoto it was a common thing for Otaka to deal with you?—A. Yes, sir; he was taking charge of all the freight, and he used to all the time give me my orders.

Q. Now, could you tell, more or less, how many loads of goods that you took from Beretania street warehouse to Kakaako warehouse—goods belonging to Shimamoto?—A. Four full loads, and one load only, I remember.

Q. Two-horse wagon loads—two-horse drays?—A. Yes, sir.

Q. Large drays?—A. No, sir; not drays, just common size drays, and I used a single horse, too.

Q. Now, could you tell what were the goods?—A. The full load was kegs of shoyu—it might have been shoyu. The last one was partly shoyu and partly cases.

Q. That was the fifth load?—A. Yes, sir.

Q. How many kegs or tubs of shoyu could you carry in one load?—A. There is no biggest amount of it, 120 to 130 on one load.

Q. There were four full loads of these tubs of shoyu?—A. Yes, sir.

Q. What did the fifth load consist of?—A. I don't know how many tubs there was; there was so many tubs besides the 11 cases of some thing, I am not positive, for sure.

Q. Well, how do you fix the number of loads when you can't remember the season of the year in which you did this work?—A. I can't tell the reason why I remember; but I remember it well.

Q. Don't you remember why you can't tell the season of the year?—A. I remember it well, because I received money for that for the loads.

Q. Who paid you for the hauling?—A. Otaka.

Q. Was it a common thing for Otaka to pay you for work you did for Shimamoto?—A. Yes, sir; I always got the money from whoever ordered me to do the work; I go after him.

Q. Did you have a receipt or give a receipt for the loads to the keeper of the warehouse?—A. No, sir.

Q. How did you know what goods to take?—A. I was told by Mr. Otaka to take from this corner to that, and on that order I took it.

Q. Were the goods marked in such a way that you could distinguish one from the other?—A. Oh, yes; all marked.

Q. Was Otaka there at the time they were being taken out to load on the wagon?—A. No, sir; he went off to the warehouse, the other warehouse.

Q. Did you have an order in the warehouse for the goods—any written order on the warehouseman that was in charge of the warehouse for the goods, or did you go there and take them out?—A. Yes, sir.

Q. And nobody being there?—A. I don't know anything about that

I thought Mr. Otaka made arrangements already. I just simply went there and took it; took out the goods and took it away.

Q. Where did you take these goods to from the Beretania street warehouse?—A. Shimamoto warehouse, Kakaako.

Q. Anybody ask you to sign a receipt when you took the goods away?—A. Nobody was there.

Q. The place open?

Mr. ANDRADE. I will say this, Mr. Macfarlane—the Government gave up that warehouse some time in January.

The WITNESS. At the time the warehouse was wide open, and there was only one old man there that belonged to the feed company. He had nothing to do with the freight; he didn't say anything to me. I just took out the goods and took it to the other warehouse.

Q. Did you haul the goods of Shimamoto to any other place?—A. No, sir; it was done in one day; that is all.

Q. Did you tell Otaka how many tubs you had on the loads when you got there with the loads?—A. Each load that I brought in I told him so many tubs, and tallied over and gave it to Mr. Otaka.

Q. Was the Shoyu tubs in good condition?—A. No. One-third of them is in bad condition; some of them scorched by fire, and water damaged the most of them. Then, of course, I counted every one, for one, whether it was damaged or not.

Q. When you were in the warehouse did you see any other goods marked with Shimamoto's mark on it?—A. I don't know.

Q. You spoke of a great deal of this goods damaged; how many tubs can you carry of goods, tubs in good condition, can you carry on a load; how many tubs are you instructed to carry on a load?—A. One hundred and twenty to one hundred and thirty.

Q. That is the usual load?—A. Yes, sir.

Q. The tubs that you would haul from the landing up to the place of business?—A. Yes, sir.

Q. And you would have one tub on top of the other so as to make the load; three or four tubs on top of each other?—A. Yes, sir.

Q. And after you took these goods from the Beretania street warehouse to the warehouse at Kakaako, at that time you piled them one on top of the other the same as any other load?—A. Yes, sir.

Q. If it had been badly burned could you have done that?—A. Oh, yes, it could be done; it is only a little scorched; there was no caving in of any keg; it was in its original shape, only damaged, that is all; I could pile them up in the same way.

S. SEGI recalled.

Mr. ANDRADE. Mr. Segi, when was this inventory of goods prepared?—A. When I came back from Kauai.

Q. When was that?—A. The 6th or 7th of January. It was made the day before I came back from Kauai.

Q. Who made up this inventory?—A. I understood that it was made already by the board of health—the inventory of the goods was made by the board of health, and they were turned over to the bookkeeper to put the valuation on.

Q. Did you go over this claim before presenting it?—A. When I came back I found that it was already made up, and that it was in the hands of Mr. Brooks—now come to think of it—I can't tell exactly or surely, but it was presented to the board of health before I came—it

might have been after I came back; I can't tell—right after I came back.

Q. But did you not sign this claim on the 25th day of May of this year—the claim that was presented to this court?—A. Yes, sir.

Q. And that is the claim you signed, is it not?—A. Yes, sir.

Q. Did you consult any one when you signed this claim to present to this commission?—A. It was in the hands of Mr. Brooks right from the time of the fire up until now.

Q. Did you consult Mrs. Shimamoto when this claim was filed prior to the filing of this claim in this court?—A. Mrs. Shimamoto left here September last for Japan, and she is away; since I never consulted with her regarding this claim.

Q. Has she returned as yet?—A. No, sir.

Mr. BROOKS. I will admit that I never have gone over this claim with Mr. Segi before it went into court.

Mr. ANDRADE. Did you and Mrs. Shimamoto ever consult or ever talk about this claim?

A. Yes, sir; I have talked with her.

Q. You have talked with Mrs. Shimamoto?—A. Yes, sir.

Q. Was it a common thing for you and Mrs. Shimamoto to talk about business transactions which were to take place?—A. Yes, sir; when I transacted any business I spoke to her, and sometimes she would talk to me on different things.

Q. In talking about this claim did Mrs. Shimamoto ever tell you that any of the goods represented in this inventory had ever been returned to S. Shimamoto?—A. No, sir; never heard her.

Q. Did you ever ask her?—A. No, sir; never.

Q. Did she never ask you to inquire as to the disposition of these goods or any part of them?—A. I have heard her talking about the claim and we used to talk about business, and when we talked about this claim I would say, That claim is in the hands of Mr. Brooks and you better leave it to him; but we never went into the particulars about the disposition of the goods.

Q. Did Mrs. Shimamoto ever, to your knowledge, go to Mr. Brooks in regard to this claim?—A. I never heard of her—I can't tell you whether she did or not.

Mr. BROOKS. I will tell you that she never did.

Mr. ANDRADE. Did Mrs. Shimamoto ever tell you that a certain portion of the goods taken from the Beretania street warehouse from the Nuuanu street warehouse were ever returned to Shimamoto?—A. No, sir; I never heard of it.

Q. What did you mean, then, in the examination carried on last week in answer to the question that I put to you, "Whether or not you were in a position to know whether any goods had been returned, if any were returned?" And your answer to that was "Yes?"—A. No, sir; I never heard such a question.

Mr. BROOKS. I object on the ground that it is immaterial and irrelevant and in nowise strengthens or weakens this case.

The CHAIRMAN. I don't see if the question is put to him—I don't believe in putting a question to the man and forcing him to answer or forcing the question in his mouth—but I don't see any objection to the question put in this way: Did he make a statement on a previous examination that he would have known about the amount and would have

knowledge of it as the manager of the concern? If he did at any time make that statement, to ask him again; I don't see any objection to it. (To Mr. Andrade) Ask him the question if he did say so and so; put the question in such a way that he would not have to commit himself.

Q. Did you state in the previous examination that you were in a position to know as manager that a considerable amount of the goods was taken from the Beretania street warehouse to any other place for Mr. Shimamoto?

Mr. PRATT. Were you in a position to know whether or not if any considerable amount of goods were returned to Shimamoto at any time to you if you would have known of it?—A. Yes, sir; I would know it.

Q. Who constructed the warehouse at Kakaako?—A. It was constructed by my orders.

Q. How often did you go there?—A. Sometimes I went there once or twice a day, and other times I never went there for several days, on account I was so busy in town.

Q. What was the character of the goods stored there?—A. Oh, provisions; it was only a warehouse; we had almost everything in it—shoyu and provisions.

Q. Then the putting in of 500 tubs of shoyu and 12 cases or barrels of crockery wouldn't attract your attention?—A. Yes, sir. At times I didn't have anything to do, but other times I was in a position; we had lots of shoyu coming in most every shipment; I remember that there was about 3,000 tubs of shoyu, and we were continually shipping out to the other islands, and a great supply coming in from Japan, and in that way I never could find out whether there was any more or less than there ought to be; I never took notice.

Q. As a reason of the confusion that you are not able to recall having seen the extra shipment in there—owing to the confusion that you were unable to discover any increase or diminution of the stock?—A. Yes, sir.

Q. Did you testify on the previous examination that you had not, or that Shimamoto had not, received any of those goods which were taken from the Nuuanu street warehouse?—A. Yes, sir.

Q. Did you not testify that you would have known it if any goods had been returned to you?—A. Yes, sir.

Q. Then, why did you not know that the 500 tubs of shoyu and 12 cases of crockery had been returned?—A. If I found out that before, I would have testified so long ago about that. All that I know was, when Otaka came back from the other island—from his statement I found out for the first time, so I sent him right up here to tell about it.

Q. Did you ever ask any of your clerks whether or not any goods had been returned to you?—A. No, sir; never.

Q. What did you mean a few days ago when you testified that Mr. Otaka was only a messenger for Shimamoto?

Mr. BROOKS. I object to that. I don't understand that he was simply a messenger. When you put the question "What do you mean by simple messenger?" I have a right to object to it. He was doing the general work, and messenger.

The WITNESS. I testified that he was doing the work of messenger, and also freighting and shipping, and all of those things.

Q. Now, did Mr. Otaka act as agent for Shimamoto sometimes?—A. I would like to explain to you, tell you about this Otaka: He was a little different from any other employee, because when we had confi-

dential positions I think he was sent down as the freight clerk; because he is a son of the brother of Shimamoto, naturally we used him sometimes on that account—on account of the confidential relations.

Q. And it is an ordinary thing for him to contract for Shimamoto, is it not?—A. No, sir; he had no such power; he has no authority to do such things.

Q. Has he never contracted with Hackfield & Co., or Heyman Bros., for goods?—A. Yes, sir; sometimes it was not a contract exactly. I used to send him over to Hackfield & Davies for me to buy that thing and that thing because the article is fixed; I knew the price of everything I sent him for; a sort of messenger; when I am busy I let him take the order and go over to Hackfields or Davies and come back with the goods and unpack the goods; he was authorized by me to do it.

Q. Were you quarantined to somewhere near the store on Nuuanu street?

Mr. BROOKS. We admit that he never was in quarantine.

The WITNESS. I was quarantined the first time, but after that time, the second quarantine, I was up to Kauai.

Q. Did you ever know that Mrs. Shimamoto sent Mr. Otaka to look after Shimamoto's interest when the government was taking away these goods from the Nuuanu street warehouse?—A. I was told about that afterwards, when the board of health wanted somebody from Shimamoto's store to be present when they took it away. I was told afterwards about it.

Q. Did you consult Otaka in regard to what proceedings took place during the time of the taking away of those goods from that warehouse to the Beretania street warehouse?—A. No, sir.

Q. Why did you not do that when you knew that Otaka represented S. Shimamoto or Mrs. Shimamoto at that time?—A. All I know about that subject I was told at the time that Mrs. Shimamoto was quarantined and Otaka was quarantined. Everybody in the store was quarantined except myself, and I had means to have a conversation with them. What knowledge that I have I learned afterwards. At that time everything was in Mr. Brooks's hands. There is no necessity of going into that. The goods which were destroyed were always understood that they were destroyed by order of the board of health altogether.

Q. But did you not learn that before the 25th day of May of this year?—A. There was no such necessity, because when they came out they were quarantined three or four months, and when they came out everything was in the hands of the lawyer; we trusted the lawyer would get the money for us, and Mr. Brooks said he would get the money, and we left everything in his hands and we never thought anything else—we left everything in his hands.

Q. Don't you know as a matter of fact that it would be a very serious thing for Shimamoto to get \$500 or \$600 more than belonged to him?

Mr. BROOKS. We admit that.

The WITNESS. Yes, sir; sure.

Mr. PRATT. When did you first learn that any goods were taken from the Beretania street warehouse to the Kakaako warehouse?

A. Right after the arrival of Mr. Otaka from Kauai, I was ordered by the court to produce him. I sent for him, and when he came I had

a talk with him about this, and he told me for the first time that he moved so much goods out of the Beretania street warehouse to Kakaako, and I was very mad because he hadn't told me about it, and I talked to him on the subject.

Q. You knew that prior to this time that the board of health—that the goods were taken from the Nuuanu street warehouse to the Beretania street warehouse?—A. Yes, sir; I was told about it.

Q. Why didn't you send for him then?—A. Otaka, as I said before, did the whole thing, and the whole thing was in Mr. Brooks's hands; I say three or four months they came out of our hands into the hands of Mr. Brooks, and there was no necessity of investigating that thing; everything was investigated.

Q. Did you come to Mr. Brooks and tell him anything about this?—A. Yes, sir; I went to Mr. Brooks and had a talk with him in regard to this claim, and the day following Mr. Brooks informed me that he went to the board of health to get a settlement of his claim and he couldn't do it. I understood that the board told Mr. Brooks that there would be a number of claims pretty soon and to wait until that time.

Q. During your consultation with Mrs. Shimamoto did you ever talk to her that this claim looked too big or that it was too small or that it was a just claim?—A. No, sir; I never had any such particular talk about this claim, because it was the things that the board of health took at the time that the freight was destroyed by the board of health. They had a man down to take an inventory, and also Mr. Cooper himself he assured us that everything would be paid for by the board of health; that such an investigation and examination was to see that everything was O. K. by the government, anything taken by the government, and he was there to see who got the money and to see that the claim was fair and that nothing else but what was lost should be claimed. This claim was made up and in the hands of the attorneys, and besides that we were busy at something else at that time.

Q. Did Mrs. Shimamoto know that you had filed the claim with Mr. Brooks?—A. She knew it.

Q. Did she look the claim over herself?—A. I don't think so; I think he heard about it; she was informed what the claim is.

Q. When was the last time that you and she talked about this claim?—A. I don't remember.

Q. Well, can't you tell? It was before May of this year, wasn't it?—A. It might have been; she left here in September of last year.

Q. It might have been before September; it must have been before September?—A. Yes, sir.

Q. You heard the testimony of Mr. Otaka this morning, did you not?—A. Yes, sir.

Q. You heard him testify that he had told Mrs. Shimamoto that a considerable number of kegs of shoyu had been returned and a lot of rockery?—A. Yes, sir.

Q. And you were positive that you never knew of that before?—A. Yes, sir.

The CHAIRMAN. Mr. Segi, these goods that were returned to your Kakaako warehouse from the Beretania street warehouse, did you ever see them before to-day, or did you ever hear or see them after their return there?—A. I might have seen them; of course, I can't tell. If

the thing was there I must have seen it, but I don't know; I couldn't identify it; I don't know about that at all until Mr. Otaka came back.

Mr. PRATT. They are all disposed of; none of these goods in this case are in the warehouse at the present time?—A. I can't tell you right away here; there may be many there, because goods always come in and goes out. We generally take care in sending the old ones out. I can't tell; the oldest ones might be left in there; I might have it on hand now.

Q. The expressman testified that some of these goods that he had taken down there to this warehouse were damaged and some of the tubs were half full. Have you seen any goods down there; is there any goods down there that was damaged, or was there where the tubs were half full; have you ever seen anything of that sort?—A. Oh, yes, I have sold a good many of the broken ones; they are damaged when they are broken off; every time the steamer from Japan comes in there is a lot that is damaged.

Q. Did you see any—I am not speaking of any damaged from Japan that would be in the nature of sea damage, sea water; I am speaking of fire—were there any there that had the appearance of being burnt?—A. No, sir; I never found any that were burnt; they never came to my notice.

Q. Have you been in charge of the warehouse down there since these goods were put in it?—A. Yes, sir; I have overlooked the place.

Q. Did you hear the expressman say that he took down there tub half full of Shoyu and tubs that were burnt; did you hear the expressman testify that way?—A. Yes, sir.

Q. Do you believe the statement that the expressman made is true statement?—A. I can't say otherwise; he has seen the goods those tubs and kegs, and I never saw it, so his statement must be true.

Q. Is there any shoyu down in that warehouse now?—A. Yes, sir, some there.

Q. Is there any of the Shoyu down there now that came from the Beretania street warehouse?—A. No; I don't think so. It may be but I don't think so. Sometimes we took 1,000 or 2,000 tubs a month and shipped it out to the outside islands. I don't think there is any left there from such an old time.

Q. Have you kept a record book of the shoyu that was sold since you went in there—since this other shoyu went into that other warehouse?—A. Yes, sir; we have that book.

Q. Have you had charge of all of the sales of all the goods that have gone out of the warehouse; did you have charge of all of sales of goods that have gone out of the warehouse at Kakaako?—A. I have no separate book of charges.

Q. Have any sales been made that you know of?—A. There might have one or two tubs gone out of the warehouse, but not any large amount.

Q. If over 20 or 25 tubs were sold would you know about it?—A. Always go through the main store first; and then the warehouse was authorized to deliver 25 tubs of shoyu. That was sold out of the warehouse.

Q. Have you ever sold any for less than full, full kegs that were damaged?—A. In cases of damages sometimes we sell below the market price.

Q. Do you recall of having sold any number of kegs or tubs for less than the average value—if so, name the person.—A. No; I don't remember it.

Q. If there had been any considerable quantity damaged you would have remembered it, would you?—A. Yes, sir; I would have remembered it.

Q. When a bill of goods comes in there from Japan, do you take note of it and enter it in your books to that effect?—A. That is the bookkeeper's work.

Q. Now, the coming in of 500 or 600 tubs of shoyu, would that be entered in that same book?—A. No; those 500 or 600 tubs were entered, then I would have no difficulty right here.

Q. Well, how do you understand that?—A. I don't understand it; but is, because the bookkeeper never knew of it, or myself. If the bookkeeper was never notified about the presence of that 500 tubs of shoyu it was left out of the books.

Q. Mr. Otaka was the gentleman that handled the goods, was he not?—A. Yes, sir.

Q. Was he a confidential clerk?—A. Yes, sir.

Q. And he made entries of goods that were received, did he not?—A. Not every error—

Q. But you have just testified that he was the gentleman that had charge of the goods?—A. Yes, sir; but he carried out my order; that is, there is no regular books that he entered it up in.

Q. When a shipment of goods came into the warehouse you would tell Otaka to go and enter it?—A. He would do it.

Q. Of his own accord?—A. Yes, sir; he would tell the bookkeeper and he would enter it in the book; he didn't make any entry in the books.

Q. Well, then, you had nothing to do with keeping a record of any of the goods?—A. No, sir.

Q. Well, will you say who had absolute charge of the warehouse?—A. There is no particular person that had charge of the warehouse; the watchman, a Japanese, looked after it.

Q. Is it possible that 600 tubs of shoyu could be put in the warehouse and nobody know anything about it? Are you the only person that had charge of that warehouse?—A. There was another fellow in the warehouse.

Q. Who was the other fellow?—A. Kawasaki.

Q. Where is he?—A. He is up to the country on account of sickness from Japan.

Q. Was the other fellow employed by Shimamoto?—A. Yes, sir.

Q. Then he might have assisted Otaka in putting the goods away. Is that so?—A. Might have been.

Q. Did he ever report receiving of any goods into that warehouse—that is, any part of these goods in this case—into the kaka Kakaako warehouse?—A. No, sir; he never did. Otaka he was head of this, and that man Kawasaki he had charge of the draying work.

Q. Under that system of keeping that warehouse did you ever know how much goods you had in that warehouse?—A. If you asked me under those circumstances I could never tell, but at present it is quite different; now we have books and everything is marked. I can tell you at the present time.

Mr. PRATT. What is the condition as to the character of the goods in the Beretania street warehouse?

Mr. BROOKS. We gave them the benefit.

Mr. PRATT. It was testified to by the drayman they were in bad condition.

Mr. BROOKS. We make no claim. We asked the highest price—put it \$1—and have given credit of 560, and some nine dollars a case, 12 cases.

Mr. DUNNE. Suppose the commission should draw the inference from the evidence before them that there was a willful suppression on the part of the claimant on these returned goods that he sued; in other words, knowing that the goods had been returned to his jurisdiction and obtained from these commissioners his full value; suppose they should draw that inference from the evidence, would that be such a fraud as would vitiate the entire claim? If, on the other hand, it wasn't such a fraud as would vitiate the whole claim, would it be such a fraud as would vitiate those items in your claim?

Mr. BROOKS. There is something in the Hawaiian law, if I am not mistaken, somewhere in regard if the claim is against the government—proof against a false claim or part of it—I am under the impression that it is in the civil code—that claim vitiates the whole claim. It seems to me, however, in this case—

The CHAIRMAN. Do you understand in presenting these different claims to the commission it will be necessary to make an argument?

Mr. BROOKS. No, sir; I don't understand that.

The CHAIRMAN. The case is submitted, but if during the time that this case is under consideration anything should develop as regards to this paper certainly nothing will be done until Mr. Brooks has made a thorough examination for it.

And we reserve the right if the government should see fit to offer any information that they have, then that information can be made known, and you can submit it to the commission; certainly the commission will act in good faith.

The further hearing of the case is continued until the 8th day of July, 1901.

JULY 8, 1901.

G. BERGINO called and sworn.

Mr. PRATT. Did Mr. Weeden understand that the goods were being inventoried, a memorandum being kept; was this his understanding was he there at the time—at the time you took this inventory?

A. Yes, sir.

Q. And assisted you, I understand?—A. Yes, sir.

Q. Do you know whether it was his or was it your understanding that you were to take an inventory of only such goods as they should get away?—A. Yes, sir.

Q. That was all; as you understood, you were not taking an inventory of the whole stock in the warehouse?—A. No, sir.

Q. No account was kept of that at all?—A. I don't know of any.

Mr. ANDRADE. Then the extent of your testimony is this, a true inventory of goods in Shimamoto's warehouse, less the amount which might have been destroyed by fire totally or that was so badly burned that you could not ascertain what it was—is that the idea?—A. Yes sir; that is right.

Q. And the goods that were in a fairly good shape were contained in this inventory? Could you say from your observation about what amount or what percentage of those goods that were in that warehouse were totally destroyed by fire, or in such a condition they could not have been saved?—A. About one-fourth were destroyed.

Q. Then that is a true inventory?—A. I haven't the rough estimate.

Q. Then that is a true inventory of about three-quarters of the total amount of the goods in the warehouse?—A. Yes, sir.

Q. Before the fire?—A. Yes, sir.

Q. Did I understand you to say that all the goods in this inventory made by you were removed to the Beretania street warehouse?—A. Except two or three kegs or cases of crockery that was left behind.

Q. As to those, they might have remained; were they supposed to be there when you went back?—A. They were still being carried away when I left.

Q. After all the goods were taken, you say; I understand you to say you visited this warehouse.—A. I went there twice while they were playing water on it.

Q. Did you go there at all after all the goods were out?—A. Not all the things.

Q. Well, you took this inventory of the things that you saw taken to the warehouse, that you know of your own knowledge personally were taken from the warehouse near Chaplin lane to the Beretania street warehouse?—A. All I saw was of the canned goods.

Q. Just take this and point them out.—A. That was taken; all of it was taken.

Q. That you saw; that that was taken and loaded, that you saw?—A. I didn't take any notice of that at all. It was all piled up and carted away—some flour and some shoyu, and all of them mixed up except the shoyu.

Q. Can you pick out some of the miscellaneous goods that was taken there? Any bags of beans or anything of that sort?—A. I don't know about that. There were a number of bags of beans destroyed.

Q. Are those the bags of beans destroyed in this list?—A. No, sir.

Q. These beans that were in a sack; were any of them taken to the Beretania street warehouse?—A. Yes, sir.

Q. Do you know anything about the condition of the dried fish that was there in cases?—A. That is the same fish. Some of it was destroyed, dumped, and some of it went over to the warehouse.

Q. Can you say that you are familiar with this class of merchandise because you have been in Japan? Can you tell me what is the life of dried fish; that is, how long would dried fish last in this country before it would become unsalable? How long would you have kept it?—A. Two or three years; keep it in a good, dry place without any dampness.

Q. Over there in the warehouse?—A. Yes sir.

Q. Would you have to put it in a tin-lined case to keep it over in that warehouse?—A. I don't think in that warehouse it would be any bother to keep it; they keep the place well ventilated, dry, and in good shape; I don't think it would be any bother at all.

Q. Do you recollect of seeing many cases of dried fish; do you recollect seeing any cases?—A. Yes, sir; a good many cases. It was piled right up on the inside.

Q. Do you know who was in charge of the Beretania street warehouse, and who delivered the goods; who they were put in there by?—A. No, sir.

Q. Who was in charge when you went up there with the drays; anyone?—A. Yes, sir; there was some one, but I don't remember who. I know that there was somebody in charge. He was a stranger to me. I just happened to look at him coming and going back and forth; that is all. It may have been a Japanese; I don't know. I think it was a Japanese.

Q. How did you know the Japanese that was about there at different times was employed by Shimamoto?—A. He gave himself out as an employee of Shimamoto.

Q. Or was interested in the firm; something of that kind?—A. Yes, sir.

Q. You don't know of your own knowledge?—A. That he was connected with the firm? He was attached to Shimamoto.

Q. You don't know that?—A. No, sir.

Q. Did you see any particular reason to doubt his statement that he was interested in Shimamoto?—A. Well, he might have been; he came along there; I think the gentleman went in Hackfield's.

Q. Mr. Humbert?—A. I think so.

Q. Well, did that make you doubt that he was in the Shimamoto firm?—A. No, sir.

Q. That is what you thought that he was?—A. Yes, sir.

Q. Was there anybody there taking an inventory of these goods besides yourself and Mr. Weedon? Was there any Japanese?—A. No.

Q. What date did you make this inventory?—A. I don't remember the date, but it was in the morning. From morning until evening.

Q. Were the goods, at the time you were taking this inventory—were the goods all up in the warehouse stacked?—A. No, sir; they were carting the goods then to the warehouse to be looked into to see if they were damaged or not.

Q. Was there a man by the name of Anno making an inventory?—A. I didn't see him; I know that there were several Japanese that came several times and made a little memorandum; I never saw any of them take an inventory.

Q. Who was supposed to be in charge of the goods after this?—A. I think the board of health had charge of the goods at the time.

Q. You were representing the board of health?—A. Yes, sir.

Q. Were you supposed to have charge of the goods—to take charge of them?—A. Mr. Towse was there, too.

Q. King, was he there also?—A. Yes, sir.

Q. Did you see Mr. King?—A. I don't remember.

Q. Carting the goods out?—A. I might have seen him and not know him.

Q. Don't you know Mr. King?—A. No, sir; I think there was a man there. I don't remember very well.

Q. Wears his hat on one side?—A. I don't know.

Q. These men went there to make an inventory for Shimamoto for this claim?

Mr. ANDRADE. He was in company with Mr. Weedon.

The CHAIRMAN. I am going to put him on the stand and ask Mr. Bergino if he can recognize him. (To the witness.) Was that man there?

A. Yes, sir; he was there at the time.

Q. (Mr. King, please stand up.) Do you recognize this gentleman?—

A. Yes, sir.

Q. Did you see him taking an inventory of the goods?—A. Yes, sir.

Q. And that is the gentleman?—A. Yes, sir.

Q. Was he making it; did you see him making it on a piece of paper like this yellow?—A. I don't remember, sir.

Q. Would you say that he was making a memorandum or inventory?—A. I saw him taking an inventory.

Q. And you knew that he was doing it for the information of—

A. I understood that he was working for the board of health.

Q. Did you make any inventory yourself?—A. No, sir.

S. ANNO recalled.

Mr. ANDRADE. Mr. Anno, did you go to make this inventory for Shimamoto before Mr. Bergino, or was he there when you first went here?—A. Well, the first thing I went there in the morning—I guess it was about 8 o'clock—and this gentleman was there, and I understood that he represented the board of health. I took my inventory and this gentleman took his inventory.

Q. And you were doing independent of each other; you were making an inventory and so was he?—A. Yes, sir.

Q. You would get the amount of goods and he would get it?—A. A young man that worked for Shimamoto helped. He counted the number of packages. The other man worked for Hackfield. They represented Hackfield & Co., and one young boy worked for Shimamoto counted the number and I counted the numbers again, and we put it down on a piece of paper.

Q. The only inventory that you made was the inventory of the goods after they had been taken out of the warehouse and put on the street?—A. I took my inventory of everything in the house.

Q. Did you go into the warehouse to take it?—A. Yes, sir; I went into the warehouse.

Q. Before it was burnt?—A. After it was burnt.

Q. Well, how could you tell they were goods that were burnt; how could you tell; a half a dozen cases; could you tell whether one good of the 40 cases?—A. I didn't find many cases that were burnt up there.

Q. You didn't find any goods burnt?—A. Not many.

Q. And you made your inventory in the house?—A. Yes, sir.

Q. How about on the outside; you made a part of your inventory from the goods in the warehouse?—A. Yes, sir.

Q. And then you went out and inventoried the goods on the street, too?—A. Not on the street.

Q. But you inventoried everything in the warehouse?—A. Yes, sir; and some outside, but not on the street.

Q. Well, it was taken out of the warehouse by the board of health, was it?—A. After we took the inventory the board of health took it away when I was going out of the warehouse; most of the goods in the warehouse, and I saw something outside what I remember.

Q. When you went there to take the inventory the first time, had anything been moved out of that warehouse on to the street?—A. Not on to the street, but outside in the yard.

Q. Outside of the warehouse. It was taken out of the warehouse when you went to make your inventory of those goods inside of the

warehouse. Had any of the goods been taken out before you got there; put outside of the warehouse?—A. No, sir; we did not put anything outside of the warehouse.

Q. Then you mean everything that you took down in your inventory you took down on the inside of the warehouse?—A. Yes, sir, inside of the warehouse.

Q. Could you see all the burned goods and everything inside of the warehouse?—A. Yes, sir,

Q. And you think that you were able to count all of those goods in the damaged condition and confusion in the warehouse?—A. Yes, sir,

Q. If you will look at this list that was filed with the claim?—A. Yes, sir; that is a copy.

Mr. TESTA. He testified to it being a correct list.

Q. How soon after the fire did you go there and take that list, the inventory? How soon after that building was on fire did you go over and take the inventory?—A. I remember two or three days after; remember after the fire, I took the inventory two or three days after the fire.

Q. And still on your first arrival on the grounds this man was then taking the inventory, was he not, this Mr. Bergino?—A. I took the inventory the same with these gentlemen.

Q. Did he take the inventory in the same way that you took it?—A. I believe so; one of the young fellows counted the packages, I think, and I put it down on my book, and I believe that this gentleman put it down on his book.

Q. How long did it take you to take your inventory?—A. Two or three days after the fire.

Q. How long did you take after the first item of the inventory; did you finish that?—A. Took the whole day.

Q. One day?—A. Yes, sir; the whole day to take the inventory.

Q. Were you there when the first cart load was being sent away from the Beretania Street warehouse?—A. I don't know.

Q. You were not there when the goods were taken to the warehouse?—A. I don't know; the only thing that I did was to take the inventory, and that is all I know.

Q. Have you got the book that you wrote it down on?—A. Yes, sir, I just looked all over my small handbook; I couldn't find my small handbook; I made out a copy and gave this copy to Shimamoto; I thought I made two copies of this.

Q. I understood that somebody told you, or counted the packages said so many packages?—A. Yes, sir.

Q. Was the same man that was giving you the inventory to write down—was he the same man that gave it to Mr. Bergino?—A. No, sir; this was only one gentleman called off the number of the goods—the number of the packages, counted the number of packages, and when he called out 15 cases, or 17 cases, or so many, then we would go over and count it again.

Q. So that the same person that told you the amount was the same person that was telling this Mr. Bergino?—A. Yes, sir; only one man counted. Shimamotos and we would go over and count it again; those number of packages were counted, and it was down on my notebook.

Q. Who was this accountant; what was his name?—A. A young boy that worked for Shimamoto.

- Q. What was his name?—A. I don't remember his name.
- Q. Was he just working for Shimamoto by the day?—A. Yes, sir; he man that came back from Kauai.
- Q. Otaka?—A. Yes, sir.
- Q. Were you there as soon as that was begun?—A. I don't remember—I know that I was there.
- Q. You don't know what day you went down there?—A. No, sir.
- Q. Is there any way that you could find out?—A. May be I can tell you by to-morrow morning.
- Q. Were you there a day or two after the fire?—A. I think it was the day directly after the fire that I was there.
- Q. That was New Year's Day?—A. Yes, sir.
- Q. Upon your arrival at the scene of the warehouse, were the goods still in the warehouse?—A. No, sir; they were being carted outside; they were some of them in the yard.
- Q. By whose orders, if you know?—A. I don't know. They were all outside there; I just ran from one place to another.
- Q. How long did it take you to make your inventory?—A. I think about three days.
- Q. Working all day?—A. Yes, sir; working all day.
- Q. Did you see Mr. Anno making an inventory of the goods in the warehouse?—A. No.
- Q. Did you see him making an inventory in the yard?—A. I can't say that he was making an inventory there. I know that he was taking a memorandum.
- Q. On the outside?—A. He was disturbed, he would come out again and be disturbed, and then we would talk several times.
- Q. When was the first cart load of goods that left those premises; did the carting begin as you were taking the list or until after the list had been completed that the first load was taken?—A. I don't remember, but I think it was after the list was completed.
- Q. And it had been lying there three days then?—A. Yes, sir.
- Q. Where were you; you say that you thought you were there the next day, possibly this will help to call it up in your mind; were you there the next day; were you working on New Year's Day?—A. I remember we worked on New Year's Day.
- Q. You think that you were working?—A. I don't know if I was working there or somewhere else.
- Q. The man that was assisting you; did he have anything to do with assisting Mr. Anno to make this inventory?—A. No.
- Q. Two distinct parties?—A. Yes, sir; I made the inventory with this other gentleman, Mr. Weeden.
- Q. Did Mr. Weeden assist you and Mr. Anno?—A. We talked over different matters together; we started together.
- Q. Did Mr. Weeden assist you in preparing your inventory?—A. No, sir.
- Q. I think you said that you didn't know if the representative of Shimamoto was making an inventory or memorandum at all?—A. Yes, sir; I said I saw the man, but I didn't know if he belonged to Shimamoto or not, make a memorandum; came there and gave orders for the distribution of the things and then came there again.
- Q. But you did see him take a memorandum?—A. Yes; I don't deny that.

Q. And you say that you were at work on New Year's Day, as near as you can recollect?—A. Yes, sir.

Q. Well, as there was no other fires at that time, it is fair to presume that you were working on that business and you were working there?—A. Maybe I was.

Q. (To Mr. Anno.) Were you working there on New Year's Day?—A. I don't remember; I don't think I was working on New Year's Day.

Q. When you first went to this warehouse of Shimamoto to take an inventory of his goods, at the request of Shimamoto, did you see this gentleman there?—A. Yes, sir; I saw this gentleman there.

Q. He was there when you first went there, was he?—A. Yes, sir.

Q. And the morning that you went there you found him there?—A. Yes, sir.

Q. That was your first time of going around there to make an inventory?—A. Yes, sir.

Mr. PRATT. And you stayed there all that day?

A. I hadn't anything to do for Macfarlane & Company; I couldn't stay the whole day there; I came back to the store a little while and then came up there again.

Q. But you were there most of the day taking inventory?—A. Most of the day; I came back to the store several times.

Q. Were you most of your time down here or up there?—A. Most of the time I spent in the warehouse; I came back several times to the store.

Q. (To Mr. Bergino.) I would like to ask you one question: Did you go into this warehouse while he was making an inventory in there on that day or the first day that you were there? Did you go into the warehouse at all?—A. Yes, sir; I went into the warehouse, and there were three different rooms in there; upstairs two rooms and downstairs a kind of cellar.

Q. When you went in there was everything in a condition where a complete inventory could be taken; that a man could go in there and take an inventory?—A. No, sir; it was impossible. Because for one thing you couldn't tell what was what; you couldn't tell what was in there.

Q. Damaged, burnt, and everything?—A. Wet through, and pieces of the wall of the warehouse was falling in; was covering up the goods; it was very dangerous to get around.

Q. In your judgment you think if anybody had asked you you couldn't have?—A. It would have been impossible.

Q. To make a complete inventory?—A. Yes, sir.

Q. As I understand it, the work that you did in making your inventory occupied three days' successive labor without a break?—A. Except for noon time; we didn't get there before 7 o'clock.

Q. But when you did commence work your work was continuous with the exception of the meal hours for three days?—A. Yes, sir.

Q. On the other hand, such work as these gentlemen did who were sitting alongside of you was done in piecemeal, off and on?—A. Yes, sir.

Q. His work was not continuous?—A. No, sir.

Q. You say from the condition of things there, being some of them damaged and some of them burned, some of the goods being all burned, and all of that kind of a thing, it would be practically and physically impossible to make such an inventory as he made in one day?—A. Yes, sir.

Q. Impossible?—A. Yes, sir.

The CHAIRMAN. I would like to see that memorandum which you have signed, and I ask Mr. Ballou if it is to be used in evidence by the commission? It wasn't signed and it wasn't identified as being anybody's writing, since that time, Mr. Ballou, we have reason to believe. We want the inspectors here and to appear before the commission with the records; that this gentleman, Mr. Bergino, identifies that piece of paper as being in his own handwriting, purporting to be an inventory of the goods that was in good condition that came from the fire and went to the Beretania street warehouse, except three or four cases of crockery. Now, then, it turns out that it is not his handwriting that has been put on the other side, and the goods themselves, with the exception of a few tubs of shoyu, or whatever it was, all the goods, they were all sent in sound condition, they were sent to the Beretania street warehouse.

Mr. ANDRADE. There were three or four that were not sent away, as far as he knows.

The CHAIRMAN. Made the inventory there and he has reason to believe that they went to the Beretania street warehouse. It is claimed from the messenger boy that they took goods from the Beretania street warehouse. It is fair to assume——

Mr. BALLOU. Mr. Bergino doesn't know in whose handwriting it is. [To the witness] Mr. Bergino, do you know whose handwriting that is, "To Beretania street warehouse?"

A. No, sir.

Q. Whom did you see taking these goods to the Beretania street warehouse?—A. Well, they were put on the dray and carried there to the Beretania street warehouse.

Q. Who was in charge of the work?—A. I don't remember.

Q. Wasn't it Mr. Ed. Towse?—A. I think so.

Q. Did you see any goods at that time taken on drays to be thrown away?—A. Not at that time; the first cartload went into the Beretania street warehouse, and afterwards all of the goods that were destroyed or damaged, they were carted away.

Q. Do you remember what day it was that they started to the Beretania street warehouse?—A. No, sir.

Q. Do you remember what time?—A. No, sir. I think it was early in the morning.

Q. Early in the morning?—A. Yes, sir. It came there under the direction of the board of health.

Q. Didn't the board of health start to take these goods to the Beretania street warehouse?—A. Yes, sir.

Q. And you were there at the time?—A. I was there at the time.

Q. And how long did it take them to cart them over there to the Beretania street warehouse?—A. You mean one load?

Q. I mean how long were they taking goods out of that warehouse to take them to the Beretania street warehouse; any damaged goods; how many hours and how many days did it take to do that work?—A. I think it took them a couple of days, though I am not quite sure.

Q. Took a couple of days to get the undamaged goods out of the warehouse?—A. Yes, sir.

Q. And how many drays did they have working?—A. I don't know; I think two drays—I think either one day or a couple of days, I am not quite sure.

- Q. Two drays going back and forth?—A. Yes, sir.
- Q. Were you there all the time while they were that couple of days they were carting?—A. Yes, sir.
- Q. What were you doing during that couple of days?—A. I was cleaning up the damage and taking charge of the men.
- Q. Were you there when they changed the direction and began to load the drays down for the dump for destruction?—A. Yes, sir.
- Q. You were there?—A. Yes, sir.
- Q. Did the drays start off in a different direction from the Beretania street warehouse?—A. Yes, sir.
- Q. Those went which way?—A. The other drays turned Ewa way, went down a small alleyway, and then turned round in Nuuanu street.
- Q. Started out the warehouse toward Waikiki, didn't they?—A. No, sir; going to the warehouse through this small alley, turned up Fort street, and went down to Beretania.
- Q. They didn't go on to Nuuanu street at all?—A. No, sir.
- Q. Those that were for the dump went out Nuuanu street?—A. Yes, sir.
- Q. And down Nuuanu street?—A. Yes, sir.
- Q. That is Nuuanu street inside of the quarantine?—A. Yes, sir.
- Mr. BALLOU. About how long did it take to cart off the goods that were being destroyed?—A. I can't tell you.
- Q. Were you there until the warehouse was cleaned out?—A. No, sir.
- Q. You left?—A. Yes, sir; I left and went somewhere else.
- Q. How much of the damaged stuff was left at the time you went somewhere else?—A. It was pretty hard to tell, because everything was thrown in one heap in a pile, and it was very hard to tell how much there was.
- Q. At the time you left they had been moving?—A. At the time that I saw the loads first in the warehouse?
- Q. You testified, I think, that there was about a fourth of the goods damaged?—A. About three-fourths spoiled.
- Q. Were the same drays used first to take it to the warehouse, and then take the bad goods?—A. I didn't take note of the amount.
- Q. Did they stop or did they take the undamaged goods up to the Beretania street warehouse before they began to cart the damaged goods down to the dump for destruction?—A. I think so; yes, sir.
- Q. You think they got through with the storing the undamaged goods first?—A. Yes, sir.
- Q. Now, do you say that you stayed around the warehouse all the time that they were carting the goods—the undamaged goods—up to the warehouse?—A. Yes, sir.
- Q. And during the time they were carting the damaged goods down for destruction to the harbor?—A. Yes, sir.
- Q. So that you don't remember how many days they had been carting down to the harbor before they left?—A. No, sir; they were doing very little work while I was there; I think they could not get any drays—something of that kind.

The CHAIRMAN. Two or three items are marked to the warehouse on the list: 700 tubs of shoyu, marked; 1 case of crockery to warehouse; 9 barrels of crockery to Beretania street warehouse; 9 cases of crockery to warehouse; 4 drums of boiled oil, Beretania street warehouse;

22 boxes crockery, 2 boxes Japanese bonnels, 365 tubs of shoyu, and 170 tubs of shoyu, and 782 tubs of shoyu—

(To the witness Bergino.) What examination did you make of this to see whether it was good or damaged, this Japanese kanten; did you open it?—A. We opened the sample box; we didn't open them all—not all of them; you know the tin of canned goods as soon as they get heated they kind of blow up, swell; those we threw to one side.

Q. Those you threw to one side?—A. Yes, sir.

Q. Anything in a can that was soldered you let it go as good?—A. Yes, sir.

Q. Were the mushrooms in cans?—A. No, sir; I don't think they were; I think they were in boxes.

Q. Did you put this valuation on?—A. Yes, sir.

Q. What was that for—by whose direction?—A. I think by my own.

Q. Were you looking for amusement those days?—A. Yes, sir.

Q. You notice, don't you, that nearly everything is, and that this valuation wasn't done by anybody's orders—the valuation?—A. No, sir.

Q. Just done of your own free will?—A. Yes, sir.

Q. What was your idea in putting the valuation on goods that were left as undamaged in the warehouse?—A. Well, I understood—it was thought of my own—I was just calculating how much was spoiled.

Q. You wanted the value of the stuff that was spoiled?—A. How much of the goods was spoiled.

Q. Then these that are marked to the warehouse, why didn't you value those, too?—A. I must have got tired.

The CHAIRMAN. Are not those extended out—those that are marked warehouse—are they not extended out?—A. About three-fourths.

Q. The shoyu is marked?—A. The shoyu is the only thing that is marked to the warehouse that has been extended.

Mr. PRATT. That is the principal item?—A. That is the principal item.

Q. These two cases of mushrooms—they were damaged?—A. They were not damaged.

Q. Injured by the fire or water?—A. No, sir.

Q. You had this memorandum of goods and you are not satisfied whether they were damaged or undamaged at the time?—A. I don't think I wrote it.

Q. Did you write that—Shimamoto Shoten?—A. Yes, sir.

Q. How about the memorandum of goods?—A. I didn't write that.

Q. You wrote everything in the columns with the exception of "warehouse?"—A. Yes, sir.

Q. In this Exhibit D?—A. Yes, sir.

Q. And on the second page you wrote what was in the warehouse to be Beretania street warehouse?—A. Yes, sir.

Q. (To the witness Anno.) Did you state in the testimony given here that you went to this warehouse to make your inventory the morning after the fire?—A. I remember about two days after the fire.

Q. Two days after the fire you went there?—A. I remember that I worked on the 1st of January.

Q. Weren't you working at Macfarlanes & Co.'s on the 1st of January, on New Year's Day, in the morning?—A. No, sir.

Q. Then you recall whether you were working on New Year's Day at that place?—A. I don't remember where but I don't think so.

Q. But, then, you do think you were there two days after the fire?—
A. I think it is the second or third—something like that.

Q. Then, when you arrived there at the warehouse had the board of health taken any goods, started to take any goods outside to put them outside of the warehouse?—A. I remember that the most of the goods was inside of the warehouse.

Q. I asked you if when you went there that morning had the board of health, or anybody else, started to move the goods outside of the warehouse in the yard, or in the street, or anywhere?—A. I never saw anybody else working there other than those gentlemen there.

Q. I didn't ask you if you saw anybody working there; I asked you if when you got there that morning did you see any goods move from the warehouse on the outside of the warehouse?—A. No, sir.

Mr. PRATT. You assisted in making up this inventory with Mr. Bergino, under the direction of the board of health, did you?—A. Well, I took the inventory that the young boy in Shimamoto—he counted the number.

Q. And you assisted in making up this inventory, and this inventory represents an inventory of the goods that were taken out, that were in the warehouse at the time of the fire—this is a copy of the inventory as near as you can remember, of the goods that were in the warehouse at the time you went there?—A. This is a copy of my inventory in my book.

Q. And you took your inventory in a small book?—A. Yes, sir.

Q. And subsequently you lost the book. Did you have the book at the time you made this inventory?—A. I couldn't find it in my small books; I put them in a small book, and took a copy from my small book.

Q. Is that a copy of the small book?—A. Yes, sir.

Q. That is a true copy of the small book that contained your inventory, is it?—A. I made two copies from my small book and gave it to Shimamoto.

Q. And that is the same as that; did you ever compare the two to see if they were the same?—A. I know that is my writing.

Q. That is your writing?—A. Yes, sir.

Q. And is this taken from the little memorandum book that you had at the time?—A. Yes, sir.

Q. And it is a true copy in your handwriting—the inventory which you made on the 2d or 3d day of January of the goods that were in the warehouse?—A. The goods in the warehouse.

G. BERGINO recalled:

Mr. DUNNE. Do you know whose handwriting the words “to warehouse” is?

A. No, sir.

Q. “To the Beretania street warehouse?”—A. No, sir.

Q. Or the other side?—A. No, sir.

S. ANNO recalled:

Mr. DUNNE. Of these goods in the list made by you and Mr. Bergino were the goods in good condition—all the goods that were listed? You inventoried the goods as far as you can; you and Mr. Bergino made an inventory of all the goods; you and Mr. Bergino made an inventory

of that portion of the goods that was in good condition—is that your understanding of it? In other words, were the goods that Mr. Bergino listed part of the goods that you inventoried; were they all the same or were they only a part?

A. Well, that is the whole business. We took an inventory; I can't explain how.

[To the interpreter.] Ask him if the list made by Mr. Bergino represents the goods that were in good condition out of this that he had a full inventory of.—A. I don't know anything about it.

Q. Mr. Bergino testified that he was taking an inventory of those goods that were in good condition, and this list, this inventory made by him, represents the list in good condition, nine-tenths, or somewhere near, in the Beretania street warehouse.—A. As I understand it, this statement of claimants represents an inventory of all of the goods.

Q. Did you find any broken tubs of shoyu there?—A. Yes, sir; about three tubs broken.

Q. How many did you allow in the inventory?—A. There isn't an account of broken ones, only——

Q. Do you find it there?

Mr. BROOKS. Broken, 50 tubs of shoyu. Were those tubs loose staves?

A. The contents was out; he counted it as one empty tub, not full of shoyu. I didn't take the damaged goods altogether, damaged and good condition——

Q. And when he found the empty tubs of shoyu he counted them as full tubs, did he?—A. Yes, sir; as full tubs.

Q. Do you know whether they came broken there, or by some act of the fire, or whether by some other means?—A. I believe so; they had thrown them on the ground.

Q. How could it leak—a shoyu tub?—A. The floor of the warehouse, it was smashed down on the ground.

Q. [To the commission.] Has Mr. Bergino testified as to these words written on this paper?

The CHAIRMAN. Ask him.

G. BERGINO recalled:

Mr. DUNNE. I will ask you, Mr. Bergino, if you have any knowledge who wrote these words, "to the warehouse," that is in your inventory, and when they were written in your inventory?

A. I had this list in my possession for a good many days after the fire, and I handed this list, I don't remember to whom—Mr. Testa or Mr. Pratt—and those words on that list must have been written when I handed it over.

Q. They were on there when this paper left your possession?—A. Yes, sir.

Q. And they were put there during the process of taking this inventory by you?—A. No, sir.

Q. But do you know who did write them there?—A. No, sir; I don't know the writing at all.

The CHAIRMAN. Mr. Ballou, I think it is proper that Mr. Brooks should be notified, unless you are representing the claimant. This claim is filed by F. M. Brooks; now, who is representing this claim?

Mr. BALLOU. Mr. Brooks represented the claim, and I took a part in it at the last moment because it was a Japanese claim.

The CHAIRMAN. Would it be necessary to notify Mr. Brooks simply that the commission has started, that is all?

Mr. BALLOU. I will notify him to let the matter go on until to-morrow morning at 10 o'clock, and I will notify Mr. Brooks.

The CHAIRMAN. If you don't, we would do it out of courtesy to Mr. Brooks, and if you will see to it. Do you wish a subpoena issued for Mr. Hobs? We have sent to try to find him. There is one thing I would like to hear, and we expect during the afternoon to find him.

The further hearing of this matter is continued until the 9th day of July, 1901, at 10 o'clock a. m.

K. EMY AMTA recalled:

Mr. BALLOU. Do you think that you can give the valuation at whole sale—the price at wholesale—the price of the various Japanese articles imported from Japan?

A. Yes, sir; some of them I can tell.

Mr. ANDRADE. Were you in Honolulu about December, last year the whole month of December, 1899?

A. Yes, sir.

Q. What was the price at that time of goma a bag?—A. About 7 cents a pound.

Q. How many pounds would the bag contain?—A. Some 100 pounds.

Q. And it was about 7 cents a pound the last year—1899?—A. Yes, sir; that is the market price.

Q. The market price or the cost?—A. The market price.

Q. What is the cost price of that article?—A. About 6½ in Japan Japanese gold or Japanese money.

Q. Did you pay for your goods—in the habit of paying for your goods—in American money or Japanese money?—A. American money.

Q. So that the cost in Japan—that would cost in Japan about 3 cents in Japan?—A. Yes, sir; about that. I told you the price is 7 that is, American gold.

Q. And that is here?—A. Yes, sir.

Q. What is the price of shoyu; what was the price in December 1899?—A. That depends on the quality; some \$1.35 and \$1.40 and \$1.70 and \$1.80.

Q. It depends on the quality?—A. Yes, sir.

Q. Is that the cost landed here in Honolulu?—A. Bought and paid for; yes, sir.

Q. All the cost?—A. Yes, sir.

Q. Now, what is the cost of shoyu; what is the cost price of that article?—A. I think \$1.25.

Q. Here?—A. Yes, sir.

Q. Including freight?—A. Yes, sir; including freight per ton.

Q. What is No. 1 shoyu worth, the very best article; what was the market value in December, 1899?—A. I can't say exactly; about \$2 pretty near \$2; now it is \$2.50.

Q. What is the price per keg of kobu?—A. \$3.50, 100 pounds.

Q. Shiraga kobu, what is that worth?—A. I think that is 7 or a pound.

Q. How many pounds are in a case?—A. Sometimes 50 pounds and sometimes more than that.

Q. Did you ever have a case with more than 100 pounds in it?—A. No, sir; not more than 100 pounds.

Q. Do you know of your own knowledge that a case ever contains more than 100 pounds?—A. Yes, sir; it contains more than 100 pounds.

Q. You have seen it?—A. No, sir; I never have seen it, but it is pretty heavy stuff.

Q. How much does the case weigh?—A. I don't know for sure.

Q. What is the price of warira?—A. From \$4 to \$5.50 per 100 pounds; sometimes more, though it depends on the quality.

Q. Have you ever seen it cost \$6 a bale?—A. Yes, sir; sometimes is higher. When it is high in Japan it is high here.

Q. Have you any idea what the market price of that article was here in this market in December, 1899?—A. I think \$4 or \$5; sometimes \$6. It depends on the quality. About \$6, I think.

Q. Take the item 472 cases of somen; what was that worth at that time?—A. \$2.25.

Q. Landed here?—A. Yes, sir.

Q. That is, in American money?—A. Yes, sir.

Q. I understand you \$10.25, landed here?—A. Yes, sir.

Q. And there are different grades of that?—A. Yes, sir; some 10 and 15 cents; some higher and some lower.

Q. But what is the average?—A. \$2.25.

Q. And all cases just the same?—A. Yes, sir; they weigh about 40 pounds, I think; two boxes in one case.

Q. So that somen—what do you estimate that to be worth, the two cases inside, just as you say, what do you estimate those are worth?—

A. Always import two boxes in one case.

Q. That is, when there are two boxes in one case the boxes are \$2.25 and the case \$4.50?—A. Sometimes they put four boxes in a case.

Q. I asked you to take the 472 cases of somen, and how much is it case?—A. Some put in two small boxes and some put in four small boxes.

Q. You have got 472 cases; now, how much is that worth a case; what is known as a case?—A. \$2.25 one box; one small one.

Q. How many boxes in a case?—A. Sometimes two and sometimes four.

Q. Well, then, state what would you interpret this to mean: 472 cases of somen; what do you interpret that to mean?—A. I think that is the same; the small boxes.

Q. How much is the price of the small boxes?—A. \$2.25.

Q. What would beans be worth a bag at that time; how much a bag?—A. \$2.60 or \$2.70.

Q. Kawayanaga tea, what was that worth; how much a case?—

A. About 10 cents a pound.

Q. How many pounds in a case; how much in a case? A. I don't know; some put it 50 pounds, and some 100 pounds; no regular case.

Q. Eighteen cases of tea, how much would that be; how many pounds?—A. No regularity to the case; I can tell by the pound.

Q. When you are speaking about the cases of goma for 3½ cents American, did that mean landed here or in Japan?—A. In Japan.

Q. Do you include in that the custom-house and freight?—A. No, sir.

sure that the taxes were paid on those goods or not, all of those goods were handled by Mr. Segi, manager, the cash going out and coming in.

Q. The idea of asking that question was to give some idea of the amount of stock that he was carrying. Was the question leading up to the amount of stock that he was carrying in his possession in his business the year before?—A. Yes, sir.

Q. I would like to ask this man, can you tell us whether these were Japanese groceries, or whether they were American groceries, or English groceries, or whether they were a mixture of everything, these 256 cases of groceries?—All Japanese provisions.

Q. Japanese?—A. Yes, sir; canned goods.

Q. Were any of the goods in the warehouse at the time of the fire ever returned to you?—A. Nothing returned.

Q. Not returned?—A. Nothing returned.

Q. What was done with them?—A. Carried away by the board of health.

Q. You never heard of them again?—A. No, sir.

Q. What is that book?—A. The shipping book.

Q. Where are the firm books, the books covering the business?—A. At the store.

Q. We want all of those books before the commission. Bring all the accounts you have got in the store—who comprises the firm of Shimamoto & Co. When you order these goods from Yokohama do you send the money for them or do they carry the account for you?—A. I pay cash and on account.

Q. Do you deal with more than one firm in Yokohama? Do you send the money to them or do they carry the account for you?—A. I pay cash and on account too.

Q. Do you deal with more than one firm in Yokohama?—A. At Yokohama, one firm; but there is some more in Hilo Shinya.

K. S. IMANISHI recalled.

Mr. BALLOU. What is your business?

A. Well, I am manager of the Yokohama Bank of Savings.

Q. What is your position? What was your position in regard to any committee at the beginning of the plague here in Honolulu?—A. I don't remember the exact date, but it was from the fire. I don't remember the date exactly—that is, the date of the formation of the society; this society was formed before the fire of Shimamoto or after the fire of Shimamoto.

Q. Was that before or after the big fire?—A. Oh, yes.

Q. Which, before or after?—A. It was before the big fire.

Q. Now, this committee was formed by whom?—A. Formed from the prominent Japanese in this city.

Q. And what was it—and you were president of that committee?—A. Yes, sir.

Q. What was the object of that committee?—A. First, the object in this city was to investigate the condition of things in Chinatown and for food, but I didn't supply it.

Q. A relief society?—A. Yes, sir; but after the big fire in Chinatown our business was to begin to work among the sufferers and give a statement of their loss.

Q. Before that what warning had been given to you, the sufferers before the big fire?—A. It was about the first part of January, by

It posted by the Japanese consul, and subsequently the society formed the sufferers in Chinatown to make their statements on the banks, and also the merchants to make it out.

Q. At that time were there any negotiations pending between the merchants and the government?—A. There was, as you all know, three merchants' committees appointed, Mr. Keiser, Mr. Humbert, and Mr. Wakefield; these gentlemen came around to me and asked me if I could ask the Japanese merchants to surrender the goods in their possession at 66½ of the cost price; I think it was January 15; on that day I called a meeting of the society; I sent word to the Japanese merchants in Chinatown to make an inventory, and to decide whether they would surrender for 66½ per cent or not; they had a meeting in Chinatown and we had a meeting outside.

Now, finally, it was decided by the society on the outside to ask the board of health to pay and we would accept the 66½ per cent of the full cost price of their goods, and it was decided on the 19th of January. The next morning the committee called upon Mr. Paul Neumann to file a petition before the board of health to appoint five appraisers, one from the Japanese and Chinese and three from the board of health, and this committee of five to appraise all the merchandise in Chinatown and shall have full authority to accept 66½ per cent of the cost.

Now, it was about 9 o'clock in the morning of January 20 we left his office and we returned to our office; the fire was on top of the steeple of the Kanaka Church; the wind was blowing hard, and after two or three hours Chinatown was struck by the big fire; consequently, the business of the committee was done, evidently; but, then, after the fire was passed it took up the matter of making the inventory of the property lost, and we moved slowly on that.

Q. It was your committee that sent into the detention camps?—A. Yes, sir. Well, about eight committees appeared in the society and three were especially appointed, elected to investigate the loss, and five society committees were sent to the camps to get a statement. Now, I want to make a statement as to how these statements were made, as I told you gentlemen the Japanese consulate posted a bill to each one to make out an inventory or statement. Subsequently we met and also advised to make them very particular, all of their possessions; that would avoid confusion. On the other side the merchants' committee asked us to sell at 66½ per cent of all the Japanese merchandise, and we acted specially for the Japanese merchants, and we advised them to be particular in making out the bill, the inventory of their goods.

Q. Most of the sufferers of January 20, the fire, they took the inventory and memorandum to the camp, and from the memorandum the inventory was made of the items lost, and that list was brought to the society and these copies were made.

Q. Are these samples of the list that was made?—A. Yes, sir; the original receipts.

Q. At the time they were made in the detention camp?—A. They were made in Japanese.

Q. Were they signed by the claimant?—A. Yes, sir.

Q. At the time they were made in the detention camp?—A. Yes, sir.

Q. Each one signed it?—A. Yes, sir.

Q. Signed like that?—A. That is a copy from the original receipt—the original receipt.

sure that the taxes were paid on those goods or not, all of those goods were handled by Mr. Segi, manager, the cash going out and coming in.

Q. The idea of asking that question was to give some idea of the amount of stock that he was carrying. Was the question leading to the amount of stock that he was carrying in his possession in his business the year before?—A. Yes, sir.

Q. I would like to ask this man, can you tell us whether these were Japanese groceries, or whether they were American groceries, or English groceries, or whether they were a mixture of everything, these 256 cases of groceries?—All Japanese provisions.

Q. Japanese?—A. Yes, sir; canned goods.

Q. Were any of the goods in the warehouse at the time of the fire ever returned to you?—A. Nothing returned.

Q. Not returned?—A. Nothing returned.

Q. What was done with them?—A. Carried away by the board of health.

Q. You never heard of them again?—A. No, sir.

Q. What is that book?—A. The shipping book.

Q. Where are the firm books, the books covering the business?—A. At the store.

Q. We want all of those books before the commission. Bring all the accounts you have got in the store—who comprises the firm of Shimamoto & Co. When you order these goods from Yokohama do you send the money for them or do they carry the account for you?—A. I pay cash and on account.

Q. Do you deal with more than one firm in Yokohama? Do you send the money to them or do they carry the account for you?—A. I pay cash and on account too.

Q. Do you deal with more than one firm in Yokohama?—A. A Yokohama, one firm; but there is some more in Hilo Shinya.

K. S. IMANISHI recalled.

Mr. BALLOU. What is your business?

A. Well, I am manager of the Yokohama Bank of Savings.

Q. What is your position? What was your position in regard to any committee at the beginning of the plague here in Honolulu?—A. I don't remember the exact date, but it was from the fire. I don't remember the date exactly—that is, the date of the formation of the society; this society was formed before the fire of Shimamoto or after the fire of Shimamoto.

Q. Was that before or after the big fire?—A. Oh, yes.

Q. Which, before or after?—A. It was before the big fire.

Q. Now, this committee was formed by whom?—A. Formed from the prominent Japanese in this city.

Q. And what was it—and you were president of that committee?—A. Yes, sir.

Q. What was the object of that committee?—A. First, the object in this city was to investigate the condition of things in Chinatown and for food, but I didn't supply it.

Q. A relief society?—A. Yes, sir; but after the big fire in Chinatown our business was to begin to work among the sufferers and get a statement of their loss.

Q. Before that what warning had been given to you, the sufferers before the big fire?—A. It was about the first part of January, by a

bill posted by the Japanese consul, and subsequently the society informed the sufferers in Chinatown to make their statements on the blanks, and also the merchants to make it out.

Q. At that time were there any negotiations pending between the merchants and the government?—A. There was, as you all know, three merchants' committees appointed, Mr. Keiser, Mr. Humbert, and Mr. Wakefield; these gentlemen came around to me and asked me if I would ask the Japanese merchants to surrender the goods in their possession at 66½ of the cost price; I think it was January 15; on that day I called a meeting of the society; I sent word to the Japanese merchants in Chinatown to make an inventory, and to decide whether they would surrender for 66½ per cent or not; they had a meeting in Chinatown and we had a meeting outside.

Now, finally, it was decided by the society on the outside to ask the board of health to pay and we would accept the 66½ per cent of the full cost price of their goods, and it was decided on the 19th of January. The next morning the committee called upon Mr. Paul Neumann to file a petition before the board of health to appoint five appraisers, one from the Japanese and Chinese and three from the board of health, and this committee of five to appraise all the merchandise in Chinatown and shall have full authority to accept 66½ per cent of the cost.

Now, it was about 9 o'clock in the morning of January 20 we left his office and we returned to our office; the fire was on top of the steeple of the Kanaka Church; the wind was blowing hard, and after two or three hours Chinatown was struck by the big fire; consequently, the business of the committee was done, evidently; but, then, after the fire was passed it took up the matter of making the inventory of the property lost, and we moved slowly on that.

Q. It was your committee that sent into the detention camps?—A. Yes, sir. Well, about eight committees appeared in the society and three were especially appointed, elected to investigate the loss, and five society committees were sent to the camps to get a statement. Now, I want to make a statement as to how these statements were made, as I told you gentlemen the Japanese consulate posted a bill to each one to make out an inventory or statement. Subsequently we met and also advised to make them very particular, all of their possessions; that would avoid confusion. On the other side the merchants' committee asked us to sell at 66½ per cent of all the Japanese merchandise, and we acted specially for the Japanese merchants, and we advised them to be particular in making out the bill, the inventory of their goods.

Q. Most of the sufferers of January 20, the fire, they took the inventory and memorandum to the camp, and from the memorandum the inventory was made of the items lost, and that list was brought to the society and these copies were made.

Q. Are these samples of the list that was made?—A. Yes, sir; the original receipts.

Q. At the time they were made in the detention camp?—A. They were made in Japanese.

Q. Were they signed by the claimant?—A. Yes, sir.

Q. At the time they were made in the detention camp?—A. Yes, sir.

Q. Each one signed it?—A. Yes, sir.

Q. Signed like that?—A. That is a copy from the original receipt—the original receipt.

Q. Do I understand that is not the original?—A. No, sir.

Q. When your agents went into the detention camps did they take the blanks with them?—A. Sometimes to some camps. Other camps they got the original papers in Japanese.

Q. You mean by that that the paper that was made out in the detention camp was made out by the sufferers before the fire and taken to the detention camp?—A. Yes, sir; before the fire.

Q. And taken to the detention camp?—A. Yes, sir.

Q. And from some of the camps you collected these slips?—A. Yes, sir.

Q. And were those copied by the committee?—A. The committees mostly done by the committees; the committee was elected especially for that purpose.

Q. Who was on the committee that received any of those original slips in Japanese and put them on these blanks?—A. Well, Mr. Kobayashi, Mr. Y. Takaka, and Mr. Tanaka. He was the head of the committee, and two to assist besides.

Q. Do you know whether, as a matter of fact—what camp was it made by the committee and retained in the camp?—A. Well, the drill shed.

Q. That was the camp where these were made up and signed by the sufferers?—A. Yes, sir; and Kakaako and Kalihi.

Q. You simply took out the original slips to the claimant?—A. Yes, sir.

Q. And actually wrote those out and took them back again?—A. Yes, sir.

Q. Do you know whether the reductions were made at that time on the original slips, and were they filed by the claimant?—A. Well, I was informed by this committee that they made the reduction.

Q. Before ever these first Japanese claims were made out?—A. Yes, sir.

Q. Now, after these claims were made out in this shape, what was done with them by the committee?—A. Oh, yes; the terms were made out on that basis clear through the case in the Japanese consulate, that is, on March 7.

Q. What further did your committee have to do with the merchandise claim?—A. Well, about the merchandise; we took from each merchant an inventory which they made, and when the committee, the merchants' committee, proposed to buy their goods, from that day we made original receipts, original receipts copies of their loss, it wasn't transferred; the personal effects were transferred on March 7, that transfer of the merchandise.

Q. Personal and merchandise claims were not turned over to the consulate on March 7 along with the personal property?—A. No, sir; the last claims were sent in on March 7, and the personal property numbered 2,300.

Q. What was done with the merchandise claims?—A. We took from the inventory of the claimants; that was after the big fire.

Q. Did you have anything to do with appraising the value of the merchandise, the effects of several of those merchants?—A. The value was; mostly the committee—the investigating committee.

Q. Which committee?—A. The balance of the committee.

Q. Of the Japanese society?—A. Yes, sir.

Q. They investigated the values of the merchants' claims?—A. Yes, sir.

Q. Who comprised the committee, who were the men that had anything to do with it—with the examination of the prices on the merchandise; the value put on the merchandise?—A. Mostly done by the gentlemen whose names I just gave you.

Mr. PRATT. Who valued the personal effects?

Mr. BALLOU. Who first put the valuation on the personal effects?—A. Well, that was done by the committee of eight.

Q. At the time the claims were made out this way in the drill-shed camp, and the original lists came in from the other camps, had the claimants put in the valuation on them?—A. Yes, sir.

Q. They had?—A. Yes, sir.

Q. They had put their valuation on them?—A. Yes, sir.

Q. So that anything the committee did was in the way of revision?—A. Yes, sir.

Q. And what committee was intrusted with the revision of the personal effects—claims?—A. I was informed by the committee when I went to ask these three gentlemen about the particulars of the valuation and the inventories. This Japanese society handled any one of these things and other things. There were a great many things attended to.

Q. So that you did not have any personal knowledge; you were simply general manager of the society?—A. Yes, sir.

Q. When was the present committee of thirty organized?—A. I was out of it; out of town at that time. I left here on January 29 of this year and went to Hawaii, and I remained in Hawaii about one month.

Q. Then it was this year that the committee of thirty was organized?—A. Yes, sir.

Q. Now, why was it necessary to form that new committee of thirty?—A. Well, that first committee was elected mostly of those that lived outside of the quarantine. The direct sufferers couldn't come out and attend to the meeting.

Q. And your society was formed of people outside?—A. Yes, sir.

Q. The present committee of thirty was composed of the sufferers themselves?—A. Yes, sir; the sufferers themselves.

Cross-examination:

Mr. ANDRADE. Are you a Japanese official in this country in any way; do you represent the Japanese Government in any particular?

A. No, sir.

Q. What is the distinction between the Japanese society and the committee of thirty; are they distinct bodies, or is one a part of the other?—A. Well, just as I told you; the difference is, the first society was formed solely of those outside of the quarantine, and the present committee is formed from the sufferers themselves.

Q. That is the late committee of thirty?—A. Yes, sir.

Q. Now, you have testified that some of these claims were drawn up right in the camp where the sufferers were—that is, the detention camps—and others were copied from slips of paper which were drawn by the claimants themselves in their respective camps?—A. Not in the camp; they made the memorandums and then we made the inventories; they made such memorandums when they were in Chinatown, and particularly each one; consequently, they were made—the memorandums—before they left Chinatown.

Q. And those memorandums are what you made the inventories from, is that the idea?—A. Yes, sir.

Q. Some of those claimants—they lost all of their belongings, did they not?—A. Well, about that, particularly, I will have to refer to the committee of three.

Q. Have you any knowledge of the ascertainment of the price for the different articles that they claim to have lost in the fire?—A. I was informed by the committee that investigated that they had investigated as far as possible the individual interest and where they got it. Where the claimants put down \$5, the committee asked them whether they bought it at the time of the big fire or whether they got it before or how long they had had it, and in that way made an estimate.

Q. These committees, were they entirely uninterested parties?—A. Yes, sir; outside parties.

Q. Then they made a reasonable allowance for wear and tear; is that the idea?—A. Yes, sir.

Q. Did they take into consideration the deterioration of the goods that were in the store any length of time?—A. You mean personal property or merchandise?

Q. Merchandise.—A. Well, about the merchandise, they made inventories while they were in Chinatown because of the three committees' proposition to pay 66½ per cent.

Q. Do you know by what authority such a proposition was made?—A. Well, that I can't tell; it was from the other side; simply that is what I was informed by the three merchants' committee they arranged to make that pay, 66½ per cent.

Q. Do you know whether or not all of the claimants appeared personally before any of the committees selected for the adjustment?—

A. They were investigated by the committees and if the committee thought that the claim was not right or original the committee claimed to investigate for the regular society; it was partly discussed with the committee whether or not this amount, that the amount could be based on these articles which they claimed to have lost. Yes, sir; they had nothing to do with the sufferers; no connection whatever.

Mr. BALLOU. Every one brought before the consulate and signed this and got a receipt, they didn't appear before this committee?

The CHAIRMAN. The question is—never mind whether or not the consulate was satisfied, all of these people were living here at the time and they appeared before the consul as individuals.

Mr. ANDRADE. Not to fix the value of their goods?

The CHAIRMAN. Whether they presented themselves in person before the consulate; otherwise they may have been in doubt.

Mr. ANDRADE. Do you know whether or not any of the goods contained in those inventories were afterwards returned to their respective owners?

A. I don't think the inventories were returned to them.

Q. In the case of the merchants, or otherwise?—A. Well, some of them got something from the Aala warehouse and some from the government warehouse on Beretania street—I don't know where.

Q. Do those inventories show that?—A. Yes, sir; oh, yes.

Q. During this investigation do you know whether or not a great many of these inventories were interlined to such an extent that they were entirely thrown out?—A. I believe so; that some of them were entirely thrown out because they were not reasonable at all.

Q. Were they for merchandise or personal effects?—A. Both, per-

sonal effects and for merchandise; they made inventories at the time, and they made particular new inventories at the time, and all merchandise was certified over to the merchant committee, and then they will have to see the inventory, and they can put down anything they didn't put down; they can put down what they had.

Q. Now had any of these committees any other evidence by which they could have drawn up these inventories other than the simple evidence given them by the claimants?—A. Yes, sir; well, the committee had, for instance, the evidence—if the claimant said he was in a Japanese lodging house, then the owner of the lodging house was asked whether he had such things or not.

Q. And in so doing did they get very much information?—A. I suppose so. I can not answer that.

Q. And that was the only evidence that the committee had to assist them in ascertaining the number of the articles which was contained in those inventories and the statement of the claimants?—A. Yes, sir.

Q. When ascertaining the amount of merchandise belonging to these various claimants, was invoice or bills or anything of that sort produced to verify in any way the statement that they made?—A. Well, mostly all of those things were burned up in the big fire, and the most of the inventories were taken with them out to the camp, which were made just before the big fire.

Mr. BALLOU. And they made those inventories for the purpose and with the idea that they would sell the goods to the Government at the time and when the Government would have an opportunity to investigate, and therefore they could not be fraudulent?—A. The fire destroyed all the evidence at the time they made these inventories. It was expected that the Government would come.

Mr. ANDRADE. They made them upon the information they got from the merchants' committee?—A. Yes, sir. The inventories which were made at that time the merchants' committee had proposed to buy at 66½ per cent. They compared, then, the invoice. It was just before the big fire, and they had all gone over their goods and made an inventory of their goods and an account of their goods.

Q. And they made—these inventories were made by them?—A. Yes, sir.

Q. Where are those inventories?—A. They have them.

Q. Have they ever been before any of these various Japanese committees?—A. I think they have passed the investigation; they are original inventories.

Q. Why are those not with the committee, while the copies are?—A. They kept them and on the 1st of November they gave them—

Q. Then these original inventories as made by them would be valuable to compare with these, that is, if they are called for?—A. Yes, sir.

Q. In some of these statements it says, canceled the personal effects—it doesn't show for what reason. For what reason were those canceled—for instance, the silk kimona, why was that canceled?—A. Because the consul didn't think he had it; that I can't tell.

Q. It was done by the consulate?—A. I can't exactly say when, or give you the dates when the inventories were made.

Q. As a rule, all of these claimants or the majority of these claimants—have you made them any allowance at the bank?—A. No, sir.

Q. It is not a class of people, the claimants are not a class of people

that the Yokohama Bank would loan money to?—A. No, sir; we don't loan money on claims; the money is sent out to Yokohama; we use the money to buy exchange on China and London and New York.

Q. Now, in preparing the claims of merchants in regard to merchandise, did the committee take into consideration whether or not some of those items were cash?—A. Well, about that I will have to refer to Mr. Kobayashi—I wasn't informed whether they investigated or not.

Q. You don't know?—A. No, sir.

T. KOBAYASHI called:

Mr. BALLOU. Mr. Kobayashi, Mr. Imamashi has informed us that you were on the special committee?

A. Yes, sir.

Q. And that is the committee for the collection of these claims?—A. Yes, sir.

Q. Who were the men that went into the detention camp afterwards?—A. It was appointed as a committee, and that committee appointed a subcommittee. Sometimes I have been at the detention camps, but most of the times the subcommittee went down there and took those memorandums.

Q. Who were on those committees?—A. Dr. Kamaski, Mr. Ono, Mr. Sago, and Mr. Segi.

Q. What district did you go into yourself?—A. To Kakaako.

Q. And did you take those blanks in with you?—A. No, sir.

Q. What did you do in Kakaako detention camp?—A. I had down there one slip of paper I have given to other persons—there was not any paper in there to make a memorandum on.

Q. And did you find in there any who were already prepared with the memorandum?—A. Yes; some already has the paper.

Q. And some of them had not?—A. And some has not.

Q. Those that did have the paper ready, what did they do?—A. Well, of course, when I had been there some time, some wanted to make a list of his personal effects, and some had no paper—if they had any paper I advised them to make a list of their goods.

Q. And what was done with those merchandise—those memorandums?—A. After I gave them the paper I left I have been there the next day or two days after to collect the memorandum.

Q. To collect them?—A. Yes, sir.

Q. And at that time you collected some memorandums that the men had brought in from Chinatown with them?—A. Yes, sir; and some that had already been made out on paper.

Q. Which was furnished them two days before?—A. Yes, sir.

Q. And what did you do with those memorandums?—A. I brought them back to my office.

Q. Where was the committee's office at that time?—A. I had an office in the Orpheum building. We had removed our office to the parsonage of the Baptist Church on Fort street.

Q. And then how were these slips in Japanese made up?—A. Each one?

Q. One like that.—A. That is the size.

Q. From those slips that you collected?—A. Yes, sir; we took a copy from them.

Q. How was it with reference to the drill-shed camp?—A. They were different. We sent those form of blanks by a person living inside, and they selected other parties to write the Japanese.

Q. And they wrote the Japanese words to make up their blanks?—A. Yes, sir.

Q. Now, from those slips that you brought out from Kakaako onto these Japanese blanks, were there any claims rejected or reductions made?—A. Yes, sir; when we wrote out these slips of paper—the memorandum—and when we took the copy there we put it into the form of a statement; in some cases we find that it is not correct.

Q. Why did you know it was not correct; how did you know it?—A. I know things. There was a few of those cases—probably only one case. I thought her husband's occupation—I knew her husband's occupation—

Q. Was what?—A. One woman whose husband died. When her husband died I heard her condition wasn't so good, and still when his widow made the claim I just took notice. I seen backed as her memorandum that I was handed to investigate whether it was true, and I direct told her, of my own knowledge, "I believe you have not got so much money and goods as what you describe."

Q. Was that claim cut down?—A. Yes, sir.

Q. How many were there of those?—A. Only a few when we got through and made up the statement. I wrote down very carefully. They were drawn up very carefully. I tried to avoid dishonest statements, if possible.

Q. At that time these claims were not signed by the claimants at all?—A. No, sir.

Q. They were made up at that time?—A. Yes, sir.

Q. And the claimants were in the detention camp?—A. Yes, sir.

Q. Do you know when they were sent?—A. After that we transferred them to the Japanese consulate.

Q. Now, did the claimant fix the value of the personal effects?—A. Yes, sir; and the Japanese United Society; Mr. Imamishi was the president of the society; every person in the quarantined district. I remember one house, after two or three hours' notice the fire department went there and burned it. I believe they had no time to take an inventory of their goods; but, as I said, I desired telling everyone to make an inventory, a memorandum, or bill of what they had, and when we sent out orders the committees went down to the detention camps and told them that they must put down everything—for instance, they made up one shoe \$3, but after one year or two years the valuation must be down.

Q. Now, did you look over the valuations so as to put them in the blanks?—A. Yes, sir.

Q. Make any reductions?—A. Well, in a very few places.

Q. Then what was done with those blanks finally?—A. They were transferred to the Japanese consulate.

Q. On the 7th of March?—A. Yes, sir.

Q. Now, what did your committee have to do with the merchandise—the merchants' accounts?—A. Well, the merchants they made their own memorandum or list of goods; we looked over them, and those blanks were turned over to the Japanese consulate's hands; we didn't send the statement of personal effects, because the merchants' statement is very long, and the merchants every week would say, "We will

make up a statement, a proper statement, right in English, if it is necessary to do it, in typewriting," and they will hand it into the Japanese consulate, showing the nature and amount of their accounts, showing that they just simply made up the statement of the total amount of their merchandise.

Q. At the time you transferred the personal-property schedules to the consulate, did you know how many were transferred?—A. I know that 2,300.

Q. And were those all that you had in your hands?—A. Yes, sir.

Q. Did you afterwards make up any more?—A. Yes, sir; one or two from further parts.

Q. Did you have anything to do with the final valuation of the merchandise?—A. No, sir; I did not make up the valuations myself.

Q. Who did make it up?—A. The merchants themselves.

Q. Did you look it over?—A. Yes, sir; I looked it over.

Q. Did you revise it at all?—A. No, sir; I didn't make any difference.

Q. No revisions?—A. No, sir.

Q. When you speak of the merchants, you mean the claimants themselves?—A. Yes, sir.

Q. How many of the Japanese claims are there?—A. I don't know. I don't remember.

Q. How many of these are assigned over to Ozaki?—A. I don't know.

Q. When, with reference to their being transferred over to the Japanese consulate?—A. At that time Ozaki was not interested in the claims in the committee.

Cross-examination:

Mr. ANDRADE. You have testified that you took those blanks, pieces of paper, to the detention camps and then had made a list of the property lost by the claimants?—A. Yes, sir.

Q. That is the idea?—A. Yes, sir.

Q. Did you have anything else to go by but the bare word of those claimants?—A. Exactly.

Q. And you do not know whether or not they are interlined?—A. What is that?

Q. You don't know whether they claimed more than they really had or not?—A. No, sir; we did not know beforehand. We advised them to make up a list of things claimed.

Q. Do you know whether or not they made up this memorandum?—A. Of course I do not.

Q. Did you not have a great many Japanese just simply tell you what they had, and they had no memorandum; isn't that so?—A. Yes, sir; some has no paper. That is why they didn't make up their memorandum—sometimes the man's memory is defective.

Q. Now, you simply had their word for what they had lost?—A. Yes, sir.

Q. And while you were on the committee did you frequently—— A. At this point I might say his memory is very fresh—fresh before the big fire of the 20th; I don't remember how long before. But, anyway, as I said just a few moments ago, our society advised them, every person in the quarantine station, to make up an inventory of the goods, because

any time that the Government gives notice, then the parties can prove up their case.

Q. But as a matter of fact you got a great many inventories just from what the Japanese claimants would tell you, is that not so?—A. Yes, sir.

Q. Now, did you serve personally on any of these committees that passed upon these inventories?—A. We looked them up.

Q. Now, if a man came in with a claim that looked reasonable, you passed upon it?—A. Yes, sir.

Q. Were any of them enlarged?—A. When we saw anything we looked it up carefully, and if it was reasonable we passed it.

Q. What did you look up?—A. His own papers, memoranda which we wrote down on this slip of paper. After we got it we wrote down ours. In a very few cases they didn't have it; they had lost their memorandum. There was a very few persons that came and told us how many or what the goods were.

Q. They came to you?—A. Yes, sir; a very few.

Q. Well, on the other hand, you did have a great many at the detention camp?—A. Yes, sir. In the detention camp they didn't have any paper and we supplied them with paper.

Q. You had nothing else to go by but their say so?—A. Yes, sir.

Q. Now, as to these inventories, as to merchandise, could you testify that these were correct inventories?—A. I think so.

Q. How?—A. Because I have looked them over very carefully. Some of the prices are different and some of the amounts are different, and at that time we thought there are many merchants. There are some merchants that import goods direct from Japan, and some of the merchants never import the goods from Japan, but get them wholesale from Ozaki, so we could put down the real price that must be different; and also many of the importers are large importers. Then he would buy his goods in large quantities at one time, and some one else, a very few in comparison, a few goods in Japan; so the price must be different.

Q. Now, we take, for instance, the man that imports a large quantity of goods from Japan?—A. Yes, sir.

Q. And he presented you with an inventory?—A. Yes, sir.

Q. Now, how do you know that was a true statement of the goods contained in his store or warehouse at that time?—A. Well, of course, that I can't say.

Q. You don't know?—A. No, sir; I trust him.

Q. You simply have to trust him?—A. Yes, sir.

Q. And you do not know whether his inventory is true or not? You have to take his word for it?—A. That is very difficult to say.

Q. Now, as a matter of fact, did you not take their statement as true?—A. Yes, sir.

Q. Did you make any examination of the books of any concern?—A. No, sir.

Q. Did you examine the invoices?—A. No, sir.

Q. Did you examine the stock books?—A. No, sir.

Q. As a matter of fact, you took the bare and simple statement as he presented it to you as a true inventory, and that is what you had to go by?—A. Yes, sir; but the bills I looked over.

Q. Now, did you fix the values?—A. As I said before, of course some one has; I don't know the values myself.

Q. Who did that?—A. It is drawn out themselves, and he presents it to us.

Q. Take, for instance, a large importer of goods, how do you get at his valuation, the market price here or the market price in Japan?—A. Well, I acknowledge that he made up the values.

Q. That is the case?—A. Yes, sir.

Q. In Japan or here?—A. Landed here.

Q. But their shoes, etc.?—A. That is an expense, and, of course, very expensive, too.

Q. Did your committee make any deduction for goods that had been in the warehouse and stores for any length of time?—A. No, sir.

Q. Why not?—A. Well, they presented these inventories and we knew, and we agreed that these is just the goods that they lost by the fire. Of course, if I found in some cases they were not there, they were deducted from the statement, and he didn't make any claim for them.

Q. As a matter of fact, you didn't know whether the things or goods were kept in the store or the warehouse for three or four or five years, or any length of time?—A. No, sir.

Q. You got the impression that the goods were all good, fresh goods?—A. I didn't think some of the goods, the groceries; they are not all fresh; there might be some of them old.

Q. But the majority of these claims are for other merchandise than groceries, clothing, and dry goods?—A. There are other things; I think the dry goods is not always new, because some merchants import a great number of silks from Japan and they keep some of them a year and a half.

Q. But some merchants import a great many different articles which are perishable, do they not?—A. Yes, sir; like provisions.

Q. So you did not go into it deep enough to ascertain how long any of the perishable stuff might have been in the warehouse or the store did you?—A. No, sir.

Q. Now, I want to ask you a few questions. We will just take up the claim No. 180; it belongs to T. Kanashi; your inventory shows that he is a contractor. Is it ordinary for the Japanese to have one piece of silk crepe, 4 yards, valued at \$20?—A. Yes, sir; some.

Q. A Japanese in ordinary circumstances?—A. Yes, sir; that is no ordinary.

Q. He is above the ordinary Japanese that has silk crepe, 4 yards, valued at \$20?—A. Yes, sir.

Q. Is it ordinary for Japanese in ordinary circumstances to have a kimono?—A. Japanese from Japan have kimonos of silk.

Q. Here is an inventory that claims 3, 4, 5, 6, 7, 8; one at \$18. Is it ordinary for a Japanese to have a kimono worth \$18? Is that so in ordinary circumstances?—A. Eighteen dollars for a kimono?

Q. Yes, sir.—A. Eighteen dollars is not such a big amount for a silk kimono.

Q. Would you tell the court what obayashischi is?—A. That is very valuable silk.

Q. What is it used for?—A. For wear.

Q. For man and women?—A. Yes, sir.

Q. That is also \$20?—A. That is cheap for that quality.

Q. Now, here is a man only a contractor?—A. Yes, sir.

Q. Do you know what committee had charge of this one claim?—A. I don't, now. I don't remember who drew up this statement.

Q. What is your occupation?—A. I was interested in the immigration company.

Q. And now?—A. In the same business.

Q. Are you interested in any of the Japanese business?—A. I was manager of Ozaki's dry goods store about six or seven years ago. I severed my connection with Mr. Ozaki last year, in December.

Mr. ANDRADE. In examining these inventories, did you look up the question of insurance, to see whether these stores or warehouses were insured?—A. You mean by that personally?

Q. Merchandise and personal effects?—A. Yes, sir; some in regard to the personal effects, and the merchandise; some of them were asked whether or not they were insured, but not all.

Q. Then you do not know, as a matter of fact, whether or not any of the merchants was insured, do you?—A. No, sir.

Q. Then you simply took the statements that were presented to you—the inventories that were presented to you—and that was about all, wasn't it?—A. Yes, sir.

Q. The question of insurance you didn't go into at all?—A. No, sir.

Q. And you did not know whether there were any insurance paid at all or not?—A. No, sir.

Mr. PRATT. You are asking more particularly in regard to the personal goods and not in regard to the merchandise; you left that to the storekeepers?—A. Yes, sir.

The CHAIRMAN. You did not appraise the merchandise yourself?—A. No, sir.

Q. In these claims your committee did not appraise any of them. You didn't appraise the value there at all; you simply accepted the statement of those goods that they had on hand, and those goods were worth so much?—A. Yes, sir; that is the statement as it is presented.

Q. Did you overlook them?—A. Yes, sir; of course we looked over the valuations, and if we thought that the valuation wasn't so much we would call the person and ask him whether it was all right or a mistake.

Q. And you made this statement. Did you get that from the statement of the claimant himself? There was no other proof of his having the amount of goods as represented in the case?—A. No, sir.

Q. There was no way of checking it at all?—A. No, sir.

Q. But from the statement of the claimant himself?—A. Yes, sir.

T. TANAKA recalled.

Mr. BALLOU. What official position do you hold in the Japanese consulate?

A. I am vice-consul.

Q. When did the consulate first take up the investigation of the Japanese claims?—A. All the claims?

Q. Yes, sir.—A. It was on the 7th of March last year we received those documents from the Japanese society.

Q. What documents do you refer to as having received on the 7th of March?—A. It was only the Japanese originals.

Q. Of which this is a sample?—A. Yes, sir.

Q. These are the Japanese originals?—A. Yes, sir.

Q. They were received on the 7th of March from the committee?—
A. Yes, sir.

Q. From the society?—A. Yes, sir.

Q. At that time were most of the claimants still in quarantine?—A. I think some of them were discharged.

Q. At the time those claims were turned over to the consulate were they signed by the claimants, or not?—A. I saw them at that time; I don't think—I don't say they were signed at that time by the claimants.

Q. What steps did the consulate take on receiving those original Japanese claims?—A. I was instructed by my consulate to look them over and receive the statements.

Q. And what was the result of looking them over?—A. I found out many things at that time; one thing quite important was that their statements, almost every statement, by looking at the signature of every claimant, in certain cases there were missing items in regard to their occupation and the destruction and such things. In some statements there were statements that they could not explain; there were, of course, items I couldn't explain, because the claimants came from some place in Japan, and they used only the local dialect, and those statements, and such things you have to follow up.

Q. At the time these documents were turned over to you was there any list made of them?—A. Yes, sir; the list that I have received at the time.

Q. Summarizing those original claims as they were turned over, what are those dates at the top—first line, household packages in the first column, and in the next column cash, and the next column household furniture and utensils, and the next column— A. Clothing.

Q. And the next column?—A. Jewelry of all kinds.

Q. And the last column?—A. Miscellaneous.

Q. They correspond, do they not, to the heads of the English blanks?—
A. Yes, sir.

Q. They are the same heading here?—A. Yes, sir; all kinds of furniture, cash, clothing, and so forth.

Q. Are these copies of each other?—A. No, sir—yes.

Q. Consecutive, that is, Nos. 1 to 888, and this begins 889 to 1,776, and 1,777 to the end?—A. Yes, sir; which is 2,300.

Q. They were turned over to you then?—A. Yes, sir.

Q. What is this?—A. That is the total receipts.

Q. And that is the list?—A. Yes, sir.

Q. And as detailed by you to the committee?—A. By the committee. I didn't calculate it at all at the time.

Q. This covers 63 pages, and these pages are a detail of this list?—A. Yes, sir.

Mr. PRATT. From the valuation indicated and the aggregate valuation extended?

A. I don't think these 2 pages have been added up.

Q. What is the total of the first 36 pages?—A. Those are added in pencil; that has been added, but not the total.

Mr. PRATT. What is the aggregate?

Mr. BALLOU. Of those 2,300 claims of personal property?

A. \$491,610.97.

Q. After those 2,300 claims came in, were there a few claims that came in from the committee?—A. I understood at the time of that

transfer that the Japanese society told us that there were some remaining claims in their hands; but I think that 2,300 is the round number to make it—after the 2,300, that left a few claims to be transferred, which we did from time.

Q. As they got them in shape they turned them over?—A. Yes, sir.

Q. What, then, was the first action that you took after looking over those blanks and finding that some of them lacked the signature and certain data, such as the occupation, and so forth?—A. It was the 7th of March that these documents were transferred. At that time I think the consulate informed several of the claimants to appear before him and make and verify it by their signature.

Q. Was that done?—A. It was commenced actually there, I think, on the 21st of March.

Q. On that day the claimants began to appear?—A. Yes, sir; and in the office—our office is small, but we had another office down town there; I myself went, and one of my colleagues went to supervise the work and make the investigation.

Q. Were the contents and the signatures of the various claimants as they now appear on those documents?—A. Yes, sir; the signature of the claimants, and here is the date that those signatures were made; that is, written on the 6th of April; and besides there is written the location—the present location—of the claimant, so as to make it easy in the future to address him.

Q. Now, as far as the personal property was concerned, have all the claims that have been prepared for filing—have they been signed by the respective claimant?—A. Yes, sir.

Q. Are there any claims that you have received from the Japanese Society which the claimants did not come in afterwards and sign?—A. Yes, sir; we have a few still in the office; I can't know the exact number of those unsigned claims, but I believe it is more than 100.

Q. Are those to be filed here with the commissioners?—A. Unless they are signed in the immediate future, I think it is not proper to file them with the commission.

Q. And they never have been included in the tabulated statement that you have made up?—A. No, sir; we did not tabulate them.

Q. You didn't translate them into English?—A. No, sir.

Q. At the time when the claimant came in and signed these claims were the claimants given any paper?—A. I have a receipt for their claim.

Q. How many books of that size did it fill?—A. Well, there is 27 in all.

Q. And which you have brought into court, what numbers are those—what number of the book?—A. It is 1 to 27; that is, the first one, the last one.

Q. And this represents the receipts that was given to the other claimants?—A. Yes, sir; filling up the blanks, of course.

Q. There is the form of the receipt book and here is the stub?—A. No. 1 and the entire 27 books.

Q. And the receipt for each one of those stubs was given to the claimant?—A. Yes, sir.

MR. BALLOU. We will have the receipts and the stubs and introduce them in a few minutes. We have a few of the receipts and stubs.

Q. At the time that the claimants came in to sign these claims was any investigation made of the genuineness of the claim?—A. Yes,

sir. So far as it was not apparently unreasonable, then I issued a receipt for them.

Q. What was done in such cases?—A. In such cases I ordered the claimant to file it over again—a genuine and faithful claim.

Q. To what extent were the reductions made up to this time?—A. I can't tell exactly the amount of it; as I told you just now, we didn't give the receipt for the claims which we didn't admit.

Q. So that the original claim was returned to the claimants?—A. Yes, sir.

Q. And they kept it?—A. We were in possession of the original claim, and they just filed a new claim, and after looking over, if it was reasonable then we issued a receipt; if it was not reasonable we returned it and issued no receipt to them.

Q. Then the sum total of those receipts in those books represent the reduction of the claims as turned over to you by the society?—A. That is my recollection.

Q. Can you tell us the total of the receipts as shown by your books and stubs?—A. So far as the personal claims are concerned it is over 600. I don't know the exact number of the total receipts.

Q. And they show a reduction made by the return, but not by the society?

Mr. BALLOU. Yes; a still further reduction is shown by the receipt.

Q. At the time the receipts were issued to the claimants what was done with the claim then?—A. I won't state. It was translated into English on the other side. We have subjected each claim to our inspection and examination.

Q. And are those English blanks samples of the claims as they were translated into English?—A. Yes, sir.

Q. After the receipts were issued?—A. Yes, sir; after the receipts were issued.

Mr. PRATT. Are those the originals for which the receipts were issued?—A. Yes, sir; these are an exact copy of them.

Q. What was then done with those claims? What months were most of the receipts issued in?—A. Of course they continued from the 21st of March until a very recent date, because, as I just told you there are still unsigned claims, and I have those claims in the order they came, that the claimant came up to me, and when they are signed we issue a receipt just exactly as we did at first, but this work was done mostly from the 21st of March until, I believe, about the 20th of April; that is one month.

Q. Then the great majority of those were issued the first month?—A. Yes, sir; in April and March.

Q. What proportion of the claimants who have come up to sign there were interrogated by you at that time and examined by you?—A. Almost every claimant was interrogated more or less.

Q. What was the next work that was done that was undertaken by the consulate in respect to these claims?—A. As I said now, we have examined every claim whether there is any unfaithful or unreasonable claim or not.

Q. Examined every claim?—A. Yes, sir.

Q. When was that work begun?—A. I think it was about June after the first court of claims was established.

Q. That is, at the time of the first court of claims the claims were

all in as represented by these receipts that were issued?—A. No, sir; there were some receipts which were issued after the court of claims was established.

Q. It was after the court had fallen through that you began your investigation, the second investigation?—A. Yes, sir.

Q. How was that investigation conducted?—A. Mr. Saito, my consul, asked me to inspect every claim, and in case I found any ambiguous or any item that was in doubt, and then I wrote it down in a memorandum and I also assisted in his work, and those ambiguous and suspicious claims we had someone appear for them and cross-examine them in the investigation, and then we investigated in that way.

Q. What was done with the claims as a result of that?—A. Well, a great many claims were reduced both in amount and in items.

Q. What was the reason for the reduction?—A. Well, after a minute examination of the claim, we have found out in many cases there were statements which perhaps from the representations and misconstructions were not right and ought to be reduced, and other cases—after the first time and the second issue of the receipt, there were claims that were quite extraordinary; anyway, I think it was necessary to examine those claims, so the claims were ordered back.

Q. What was the treatment accorded by you to the cash claims?—A. When we examined them at first I asked to examine them as to how they were, and the result of the examination is written down on the original issue, and some were also in the memorandum book until last year; we didn't decide to open rather to deal with the cash claims; finally it was referred to this committee of which Kobayashi was president, and we have decided to disregard the cash claims; notwithstanding the apparent faithfulness.

Q. What has been the final result of your dealings with the cash claims? How many big cash claims have you allowed?—A. Only one big cash claim, and there is no cash claim except that one, which amounts to \$50 or more.

Q. What were the circumstances connected with the allowing of that one claim?—A. That is the only claim, that the claimant is a hotel keeper on Nuuanu street at the time of the fire; she put the cash in a safe and at the time of the fire she couldn't carry it away, and after the burning there were many witnesses, both Japanese and foreigners, who witnessed that the safe it only had cash and money; the paper money was all in the same shape it was before it was burned; it was ashes, and when it was touched it was all gone.

Q. But it retained its shape?—A. Yes, sir; its original shape.

Q. What was the amount of the claim, do you remember?—A. I think it was \$344; I don't know the amount exactly.

Q. And with the exception of that one claim there has been no cash claim allowed for over \$50?—A. No, sir.

Q. Does that involve many reductions?—A. Yes, sir; some.

Q. Will you look over this paper and show to the Commission the style? Take a sample and show to the Commission the style of reduction that was made.—A. I will say that before this translation was made, the final translation, there were many reductions of the original contents, to make out the most of this issue the English translation, that would make it very thorough, and I made again a translation, so just looking at this issue it can't be exact to show the reduction of the claims. The same thing happened that has already been testified to at

the time of signing of the original documents they were like this, only this paper isn't so strong. To cancel it or to strike it out, it would make the paper dirty, so we just got another new sheet.

Q. Will you take out a few of these and state to the commission what was done? Eight hundred and thirteen, what was that reduction?—A. That is taken back from the Aala warehouse; there wasn't in the original translation—

Q. Eight hundred and twenty is a reduced claim?—A. Yes, sir; a reduced claim.

Q. That was the proprietor of a shooting gallery?—A. Yes, sir.

Q. Did he file a very big claim?—A. Yes, sir; he filed over a three-thousand dollar claim.

Q. Reduced to how much?—A. \$1,590.15.

Q. What is that?—A. That is a cash payment and a reduction made by us.

Q. From what amount to what amount?—A. From \$80 to \$20.

Q. In each reduction of the claim, did the claimant assent to the reduction?—A. Some of them that we have traced we have examined them, but there is some we can not find.

Q. Do they know of these reductions?—A. If the claimant could not be found we have asked the assistance of the committee of thirty, who is in existence now, to make the reduction, and if they on their decision made the reduction from their items—

Q. Here are certain reductions made from the original claims it was made apparently; now has the claimant assented to that reduction?—A. Yes, sir; so far as we can trace it.

Q. Have you traced them so that they have knowledge of the reduction?—A. Yes, sir; but there are some that we could not trace. Those we have asked for the assistance of the committee of thirty.

Q. And their claim is here?—A. Yes, sir.

Q. Some of them have been brought before the consulate?—A. Yes, sir.

Q. Since the receipts were issued?—A. Yes, sir.

Q. Are they correct, the receipts used by the consul, and the claim would show the sum they are entitled to?—A. Yes, sir.

Q. Now, then, your proposition here is to introduce each claim as far as you can?

Mr. BALLOU. Yes, sir, and we will compare the receipt which will identify the claim that has been presented and has been approved by the commission which is a duplicate of this. Now, at the time of the reduction they didn't know whether this reduction was made or not some of the claimants, but now some of the claimants who assigned over, made an assignment, knows their claim has been reduced by us and the committee.

Q. So they all assent to the reduction?—A. Yes, sir; we have made the reduction.

Q. Would you act arbitrarily in the matter, or advise them to do that?—A. Yes, sir.

Q. Claim 1833, what reduction was made on that?—A. A cash claim amounting to \$61.70 entirely canceled.

Q. Why did you cancel that entirely?—This I think was through the consent of the claimant himself.

Q. Then admitted that he didn't have that, did he?—A. Perhaps he

had it, but cash claims are very bad to prove, and from these statements he decided to disregard it entirely—all of these cash claims.

Q. And canceled in some cases. Why did you reduce from \$80 to \$20; here are two cases I see, and here is a case of \$80 disallowed entirely; why did you throw these two out?—A. That depends upon the evidence of the statement. I think it seems to be the practice to leave small amounts, such as \$15 and \$20; small amount of cash.

Q. Eighteen hundred and fifty-three, \$80 disallowed?—A. Yes, sir.

Q. Eighteen hundred and fifty-two, what were the items in that?—A. Taken back from the warehouse.

Q. Here is one, 1851, where there is no change in the inventory, but a money change in the valuation?—A. I think this was reduced by the consent of the claimant.

Q. But it is not reduced because of the return to him from the warehouse?—A. No, sir.

Q. Is there any distinguishing mark on it?—A. No, sir.

Q. The stamp canceled—does that always indicate the goods returned?—A. No, sir.

Q. It doesn't necessarily mean that those goods were returned?—A. No, sir.

Q. It may mean that?—A. Yes, sir.

Q. Well, as a rule, what does that mean?—A. Those are taken back from the warehouse.

Q. Well, there is nothing to distinguish whether it was taken back from the warehouse or whether it was the opinion of the committee that he didn't have it?—A. No, sir; we have a memorandum for these claimants which were reduced, and by referring to that memorandum we can ascertain whether it was reduced by us or on account as to their being taken back from the warehouse.

Q. Have you a memorandum showing where the goods were returned from the warehouse?—A. Yes, sir; but I didn't bring it because it was quite heavy.

Q. Claim 1860. I see here clothing, so many canceled; do you know whether or not those were returned or otherwise?—A. Yes, sir; those were returned from the warehouse.

Q. And a kit of carpenter's tools, from \$11.50 to \$3.75?—A. Yes, sir; because some of the tools were returned.

Q. No. 1864. What are those?—A. That is a reduction; that is under the original translation; the original translation was made bigger, and to make it clear we have translated it again, and after the new translation we have made a reduction also.

Q. Is it possible to find that in the original?—A. I think so.

Q. Please do so. What was the size of the claim as it went in?—A. At first when we issued the receipt, passed it, the total amount of the claim, \$946.70.

Q. And it was reduced on the first translation to what amount?—A. I can't tell you; that is the final reduction.

Q. From what to what?—A. From \$946.70 to \$713.

Q. When it was first reduced wasn't it reduced to \$305.95?—A. Yes, sir.

Q. And what is this memorandum on it?—A. That is the amount of the reduction.

Q. By the claimant or the committee?—A. I think that the committee and the claimant—the claimant has consented to it.

Q. What is this red ink on the back of that—the pencil?—A. This is the reduction that was made by the assistance of the committee. One member of the committee went into an examination, and after that examination this reduction was made; so he has stated the whole proceeding.

Q. Stated on the back of it?—A. Yes, sir.

Q. In any of these cases have the claimants any pick or choice?—A. Yes, sir. In some cases they have such evidence.

Q. Very few are there?—A. The matter is this: At first when the goods were taken from Chinatown and stored at the warehouse, then it was made from a certain block to a certain block in the orders; but that big fire on the 20th of January it stopped that work, and then there were many districts in which there were none stored in the warehouse.

Q. The fires—where they were condemned at first they were given time?—A. Yes, sir; to remove their goods in some cases, and in other places where the storing of goods was not done, the place --

Q. Take this—1865 is reduced how much?—A. Cash payment is entirely canceled, and the item—a great many of the items—almost every item is reduced more or less.

Q. What was the total reduction?—A. It was first \$785.25; it is now \$375.70.

Q. Did the original claimant object to the reduction in this case?

A. In some cases they objected; at first they objected.

Q. Have you got the original of 1865?—A. Yes, sir.

Q. What is the memorandum?—A. That this claimant wasn't found at Waialuka on the island of Maui and had gone away from there, and on the advice of the committee this claim was reduced \$375.70 and signed by the chairman of the committee.

Q. In every case where a reduction was made in the absence of the claimant it was done by a formal resolution and noted on the back?—A. Yes, sir.

Q. And signed by the chairman of the committee?—A. Yes, sir.

Q. Were there many of those cases?—A. Yes, sir.

Q. Do you mean by a resolution of the committee?—A. Yes, sir.

Q. Does the consulate make any charge against these claimants doing this work?—A. A monetary charge?

Q. Yes, sir.—A. No, sir. When we made an assignment, an expense that may be incurred will be borne, and at the time of the payment of the claim will be deducted.

Q. For this work?—A. Yes, sir.

Q. So far as the work done by the consulate?—A. Yes, sir.

Q. Is there any charge made?—A. No, sir; we have not made any charge. There are 48 claims reduced by the resolution of the committee.

Q. Those were only done in the case where the claimant couldn't be found by the committee at that time?—A. Yes, sir.

Q. Claim 1865, there is here, there is a list of kimonos \$119.50—fisherman's wife. Is it customary for a fisherman's wife to have such an elaborate wardrobe as that?

Mr. BALLOU. It is changed to \$39.

Q. They put it in at \$119.50. How did they come to put it in at \$119.50?

Q. It was kimonos. There are smaller items and just covered it in this way, and after translating it they cut it in this way.

Q. Now the question is this—the one that I asked. Is it customary

for a fisherman's wife to have a wardrobe such as is represented by this inventory?—A. The wife of a man in that business, it is uncommon; but it is not uncommon to other women—for instance the singing girl. They have more garments than any other woman.

Q. What is that?—A. The singing girl.

Q. But the committee cut that claim down from \$119 to thirty-nine dollars and some cents?—A. Yes, sir.

Q. Was there any reduction before that? Was there any reduction made in the original?—A. Yes, sir.

Q. Before it was translated?—A. After it was translated and the amount reduced.

Q. That amount was put in at first \$796.60, wasn't it?—A. \$758.55.

Q. And it was reduced to one-half, or over one-half?—A. Yes, sir.

JULY 9, 1901.

MORNING SESSION.

ED. TOWSE, recalled.

MR. BALLOU. I hand you this Exhibit "D," Government's exhibit being a yellow memorandum, identified by Mr. Bergino as being in his handwriting, and ask you if you know anything about seeing it before?—A. I recognize the memorandum as being in my handwriting.

Q. What memorandums are yours?—A. On page 1 "cases of crockery to warehouse."

Q. How much of that is in your handwriting?—A. Words to warehouse.

Q. And what is in your handwriting on the second page?—A. On the second page, "9 bundles crockery."

Q. That is not in your handwriting?—A. Nine cases of crockery, 4 drums to Beretania street warehouses is in my handwriting. Beginning 24 boxes crockery to Beretania street warehouse is in my handwriting, and finally 365 tubs of Shoyu; 317 tubs of Shoyu is my memorandum; sent to warehouse, Beretania street.

Q. Do you remember from whom you received that paper?—A. No, sir; I think Mr. Bergino.

Q. Now, how much of the goods listed on that sheet. Let me ask you first, you were in charge of the carting to the Beretania street warehouse from the Shimamoto warehouse, were you not?—A. Yes, sir.

Q. How many of these goods listed on this sheet were taken to the Beretania street warehouse?—A. I think only those in my handwriting was taken to the Beretania street warehouse.

Q. Do you remember anything—can you of your own knowledge, your own recollection—as to whether you took the salt fish and Japanese kanten or tea or coffee?—A. No; my recollection is only shoyu and crockery.

Q. That is all that was taken?—A. Yes, sir.

Q. Do you know what was done with the rest of this list?—A. I think nearly all, if not all of it was taken to sea and dumped overboard.

Cross-examination:

MR. ANDRADE. Mr. Towse, were you there during all the time that the goods were taken from the warehouse and disposed of in the various ways?—A. No, sir; not at all times.

Q. Now, take that one that is marked here "to the warehouse, to the Beretania street warehouse," was the ordinary material taken from the ordinary goods?—A. Well, it had been decided that the shoyu and the crockery, with the exception of a few tubs of shoyu, had every appearance of being absolutely uninjured and that they should be taken to the Beretania street warehouse and await the order of the owner.

Q. How long were you on the grounds adjoining the warehouse in that neighborhood?—A. Well, I would be there probably eight or ten times a day and from five minutes to a half an hour.

Q. Where were you when you marked "to the warehouse" on the first page, "to the Beretania street warehouse;" were you there on the premises or did you do it in your office?—A. I don't know.

Q. Now, were you there, Mr. Towse, directing the destination of these goods, that is, to be dumped into the sea, and these to the Beretania street warehouse?—A. I have no particular knowledge but in a general way.

Q. If Mr. Bergino, who was constantly in charge of these goods, testified in this court that the greater portion of these goods did go to the Beretania street warehouse, do you consider that is erroneous?—A. I would.

Q. And you are absolutely sure that only this which is marked "to warehouse, Beretania street warehouse" is the only portion of the goods so disposed of?—A. I should say so.

Q. You were not there on the ground constantly when the goods were going back and forth?—A. No, sir, not constantly; but I have a wheel.

Q. But you were not positive about that, were you, Mr. Towse?—A. Let me understand; you asked me if I am positive that this shoyu and crockery went to the Beretania street warehouse?

Q. That is, simply what you have marked "to warehouse and to Beretania street warehouse;" are you positive that those are the only goods that went to the Beretania street warehouse?—A. I will answer those are the only ones that went, to my knowledge.

Q. Now, isn't it possible that more goods got to the Beretania street warehouse and you not know it?—A. It is possible, but to my mind not probable.

Q. Will you say that the testimony of one who was constantly in attendance was incorrect as far as that is concerned?—A. I should say so.

Q. What proportion of the goods would you say, Mr. Towse, were thrown into the ocean from this Shimamoto warehouse?—A. Well, I should say probably all that which is marked as having gone to the Beretania street warehouse.

Q. You don't remember where you did mark this "to the Beretania street warehouse"—you don't know where you were at the time?—A. No, sir; I do not.

Q. Then, Mr. Towse, you must have got the knowledge somewhere or carried it in your mind what you wrote on this inventory. Is that the way you did?—A. No; I don't think so. I think Mr. Bergino presented me with this inventory to make clear my instructions to him, and I made those.

Q. Did you get the information from Mr. Bergino?—A. What information?

Q. That led you to write "to Beretania street warehouse?"—A. Yes, sir.

Q. You got that information from Mr. Bergino?—A. Yes, sir, if you mean the statement there or the figures there; that is, the shoyu and the crockery, if that is what you mean, I got at the time from Mr. Bergino.

Q. Did you get the information from Mr. Bergino that certain articles had been taken to the Beretania street warehouse, or did you know that of your own knowledge?—A. I know of my own knowledge that large quantities of crockery were taken to the Beretania street warehouse. I saw them there myself; I saw them in transit, and saw them unloaded there.

Q. Mr. Bergino testified here yesterday that nearly all the goods contained in this inventory did go to the Beretania street warehouse, and you would say that was wrong?—A. Yes, sir; I would say so.

Q. You claim that they were dumped out at sea?—A. Yes, sir.

Mr. BALLOU. Whose orders were you under?—A. George—— was superintendent of Chinatown and I was his assistant.

Q. Whose orders were the drays under?—A. Under mine.

Mr. TESTA. Here, at first, when you were examined on the 2d of June or the 1st of June, didn't you say before this commission that you didn't know who took that inventory there?—who made that inventory?—A. I didn't see that inventory at the time.

Q. How soon after this inventory was taken that it was passed into your hands and the memorandum made as to these goods that were taken to the warehouse?—A. I think it must have been immediately.

Q. Do you know how long Mr. Bergino was taking that inventory of that stock of goods, how long it took him to take this inventory?—A. Why, I should think that he was several days taking it. Of course at the time that the inventory was taken, with an order something to that effect was given to Mr. Bergino, the understanding was that he was to take an inventory of the goods, only those that were to be saved, not those that were to be destroyed, and they were to be left there separate, and if Mr. Bergino has made the statement to this commission that he was there to take an inventory of only those that were to be saved, of which he and the other people were taking, and take it for granted that I could only see the things that he inventoried—my recollection is that at that time it was proposed to turn over to the owners or their representatives things which were apparently undamaged—to the owners or their representatives—considering that nearly all of them were damaged; I think at one time the plan was to make an inventory of what was thrown away, and they were to take the rest; my recollection is that they estimated that nearly all was injured—a total loss except the shoyu and crockery.

The CHAIRMAN. Was it customary, Mr. Towse, for the owner of the goods to say whether they were damaged or not? What was the idea of the board of health if the owners were going to decide whether the goods were damaged?

A. I think that the board was being made to settle the account of damage on the subject——

Mr. DUNNE. When you first saw this yellow-paper inventory before you wrote anything at all on it whom did you see it with? In whose hands was it?

A. I think it was in the hand of Nergino.

Q. At the time when you saw it in his hands where were you, in the office of the board of health or elsewhere?—A. I think I was then at the Chinatown quarantine station or at this place of Shimamoto's.

Q. I am speaking now with reference to the time when you wrote these words on that sheet of paper.—A. Yes, sir.

Q. You say that you saw it in the hands of Mr. Bergino?—A. Yes sir; I think so.

Q. Is your recollection clear about it?—A. No.

Q. You might have seen it in the hands of some attaché of the board of health?—A. Possibly.

Q. If Mr. Bergino says that after he made that paper he carried it in his pocket for about two weeks and then handed it over to the president of the board of health, is your recollection in that condition that it will permit you to deny that statement?—A. No, sir.

MR. BALLOU. I object to the question; there was no such statement made by Mr. Bergino.

MR. DUNNE. I will ask you if you saw Mr. Bergino while he was in the act of making this yellow inventory.—A. I saw him while he was in the act of making the inventory.

Q. Is your recollection such that it will permit you to identify the yellow inventory as the one that you saw him making?—A. No.

Q. The inventory that you did see him in the act of making—how long was he in making that?—A. Well, I think several days—four or five days.

Q. If he said he was three days in making that inventory, would that statement strike your recollection as being an improper statement of the fact?—A. No, sir.

Q. For anything that you know to the contrary, Mr. Bergino might have carried this paper in his pocket for two weeks before you saw it?—A. Yes, sir.

Q. Let me ask you what was the condition of the warehouse in which the goods were when Bergino was making this inventory that you saw him making?—A. Well, some portions had been burned and others were torn away.

Q. Looking at the building as a whole, what would you say—the building was in a bad condition or dangerous condition?—A. Dangerous. On the upper floor, where the roof was nearly falling, it was composed of very strong walls; the first floor above the basement was almost intact; the platform, or a portion of the basement, was comparatively free.

Q. Were there very many goods stored in that warehouse?—A. Yes, sir; not an enormous lot stored.

Q. Was this enormous lot of stuff stored, so stored in this warehouse that each and every package and box was easily open to view?—A. No, sir.

Q. It would be a matter of some difficulty wouldn't it to go through that enormous quantity of goods and make an inventory list of each article wouldn't it?—A. Yes, sir.

Q. Could it be done in a day?—A. I doubt it.

THE CHAIRMAN. When Mr. Bergino was there making this inventory, did you know what he was there for?—A. Yes, sir.

Q. Did you know that he was there to make an inventory of the goods that in his judgment he believed to be sound and worth saving?—A. My recollection is that he was there to make an inventory of all the goods.

Q. Not all?—A. That is, I believe, as I said before, it was originally intended to separate the undamaged goods from those that were considered a loss; I think that was the intention, and Mr. Bergino, on account of his knowledge of Japan merchandise, to assist with Mr. Weeden of placing a valuation on the goods that were a total loss.

Q. Now, Mr. Towse, when you saw Mr. Bergino taking this inventory did you see him take an inventory of the damaged goods? And did you see him stacking the goods in different positions and taking an inventory of those goods?—A. Well, I think at the time that I was working elsewhere that some were substituted, good goods had been separated from the ones that were presumably of total loss.

Q. Can you recollect and say positively that you saw him at any time taking an inventory of what was considered damaged goods?—A. I think so.

Q. Do you know that in this list—this list that he made—was supposed to be an inventory of the sound goods when you took it?—A. I believe that I took it believing it to be an inventory of all the goods.

Q. You took his inventory for all the goods?—A. Of all the goods in the warehouse.

Q. Including the damaged goods?—A. Yes, sir; I would like to say I believe that Mr. Bergino made his inventory in a book and afterwards copied it on this sheet. I don't know when, but as I said to one of the commissioners that I thought I marked it a little after the inventory was made, I would like to change that.

The CHAIRMAN. You think that you marked that on some other paper or in a book?—A. That I did?

Q. Yes, sir.—A. No, sir.

Q. Do I understand you this inventory that Mr. Bergino has given here is a copy of something that he took down in a book?—A. That is my recollection; I think that is the case.

Q. Mr. Bergino testified here that he made this inventory on several sheets of paper and he put it down in a book and then took it off. Have you any reason to dispute Mr. Bergino's statement in that respect—is your knowledge of having the book sufficient to dispute Mr. Bergino's statement?—A. No; I wouldn't dispute his statement.

Mr. DUNNE. In that connection let me ask you have you any absolute recollection from your business—let me ask you if your recollection in this instance is clear, very clear?—A. No, sir.

RICHARD WEEDEN, recalled:

The CHAIRMAN. Did you make a statement to Collector Stackable that this commission had had you up here seven or eight times?—A. I did not.

Q. What statement did you make?—A. I said I had been up here four or five times.

Q. Do you know how many times?—A. I have been subpoenaed this time and three times besides, I think, sir. I have come without subpoena.

Q. Well, did you come here whether subpoenaed or otherwise?—A. I may say on trifling business, and I haven't got the time to myself.

Q. Then confine yourself to facts.—A. I did confine myself to facts and always try to.

Mr. BALLOU. Mr. Weeden, you recollect taking an inventory in the Shimamoto warehouse?

A. Yes, sir; I remember of the inventory.

Q. Did you make a full inventory?—A. No, sir.

Q. Did any one finish your work?—A. I believe so. I can't say positively, as I said before.

Q. While you were making that partial inventory was Mr. Bergino present?—A. Yes, sir.

Q. What was he doing?—A. He was making an inventory, too.

Q. How did you act about making that inventory—were you doing it independently?—A. To some extent we were doing it independently. It wasn't right that we should do it together.

Q. How did you work together?—A. We worked with a man that was there.

Q. What was the man doing?—A. He was sitting them up.

Q. Then what would he do?—A. He would tell us what it was.

Q. That was all?—A. And we would put down the price.

Q. When he called off the goods what did you do?—A. Put on the valuation.

Q. Would you also write down the goods?—A. Yes, sir; and the condition they were in.

Q. What I want to know was Mr. Bergino doing that alongside of you at the same time?—A. I believe he was.

Q. And there at the same calling off of the man?—A. At times he was.

Q. What sort of a man was it that was doing the calling off; what nationality?—A. I can't say, but I think he was a Japanese.

Q. He was calling it off and you two were writing it down?—A. Yes, sir.

Q. Part of the time at least?—A. Yes, sir.

Q. Do you remember what Mr. Bergino was making his memorandum in or on?—A. As far as my recollection goes, it was a memorandum book.

Q. About how large?—A. I should say about 9 inches long and wide, something like that; what you would call a memorandum book.

Q. Of what colored paper?—A. Yellow paper.

Q. Well, now, you and he were making an inventory of what?—A. Supposed to be of the goods there.

Q. Of all of the goods?—A. Yes, sir.

Q. Whether damaged or undamaged?—A. Yes, sir.

Q. How many men were there working at the work of calling off to you?—A. I think there was one or two men besides Mr. Bergino—there were several people around there; I think there was another man from Hackfield's.

Q. My question is how many men did the work of calling off—that is, calling to the people that were writing down the numbers?—A. As far as I remember, there was only one.

Q. That was a Japanese?—A. He was a Japanese, I believe.

Q. Do you remember who was there representing Shimamoto?—A. I think that Shimamoto himself or his man—I don't know whether it was Shimamoto, but it was a little short man.

Q. One with spectacles?—A. Yes, sir; with spectacles.

Q. Was he a man that stutters?—A. I can't—you know they all do more or less.

Q. What was he doing?—A. Well, he was walking all around there.

Q. Was he making an inventory?—A. I can't say so positively.

whether he was or not. I don't think I saw a paper in his hand. He may possibly have had some but I don't think so, though I don't know.

Cross-examination:

Mr. ANDRADE. You say, Mr. Weeden, that you made the inventory?—A. Yes, sir; I made a part of one.

Q. What became of that inventory?—A. I think that was handed over to Mr. Towse. I think so, if I remember rightly. When I was called away I found nothing more to do. I didn't take any more interest in the matter.

Q. How long were you in making this part of the inventory?—A. I think a day and a half.

Q. About how much more time would have been necessary to complete the entire inventory?—A. I should think another day and a half—I should think so; from what was to be done, there was considerable tuff.

Q. You say that Mr. Bergino was working on a memorandum book. Are you positive of that?—A. As far as my memory goes, that is so.

Q. Did you make other inventories at other places?—A. No, sir.

Q. Could it have been possible for Mr. Bergino to have several sheets of paper?—A. I admit that he had some paper in his hand. I saw some paper. I think that he made the inventory in a book.

Q. You wouldn't attempt to say what color of book or the size of the book?—A. As far as my memory goes, it was about the size—it might have been as long as that [indicating].

Q. But you are positive that he did make it in a book?—A. I saw a book there; that is all I can say.

Q. Did you see him handle the book in doing any writing?—A. Yes, sir.

Q. You are positive of that?—A. I am not positive that he wrote in the book, but I saw the book in his hands.

Q. It might have been for some other purpose?—A. I can't say.

Q. Is it possible that he did make it on several pieces of paper like that [indicating]?—A. I can't call to mind any white paper at all, sir.

Q. Still you won't say positively that it was on a book of yellow paper?—A. No, sir.

Q. Did the inventory that you partially completed have anything to do with the inventory of Mr. Bergino?—A. Supposed to be a similar copy.

Q. Still you were working independent of each other?—A. Yes, sir, to a certain extent.

Q. Who did you represent?—A. The board of health.

Q. Do you know who Mr. Bergino represented?—A. I believe that he represented Hackfield & Co.

Q. What caused you to believe that?—A. Because he was working for Hackfield.

Q. Have you seen the inventory that you made since you ended here under the authority of board of health?—A. No, sir; I haven't seen it.

Q. The man that was calling out the different articles, all the number of the articles, was the man that assisted you. Was he the same person that assisted Mr. Bergino?—A. Yes, sir.

Q. The one person assisted you both?—A. Yes, sir.

Q. Did you start in at the same time that Mr. Bergino did?—A. I think we did, if I remember rightly, on the same day.

Q. You quit and he went on?—A. Yes, sir; when I left I left Mr. Bergino there, I think. It wasn't finished.

Q. What did you do with the inventory that you made, did you say?—A. I believe I handed it over to Mr. Towse; either Mr. Towse or Mr. King. I think there was two of them. I didn't do anything else with it. I had no use for it.

Q. How long did you work on it?—A. A day and a half.

Q. And did Mr. Bergino see your inventory? Did he ever see your inventory?—A. I can't say that he did.

Q. While you were working separate and apart from each other, you were working on the same job and he was working on the same job?—A. He didn't see my inventory or I didn't see his, or I would have known it.

Q. When you made your inventory did you take in the good goods as well as the bad?—A. Both were taken in, so many good and so many bad.

Q. Did your inventory show which was good and which was bad?—A. Yes, sir.

Q. Did you do your work inside of the warehouse or outside?—A. Partly inside; most outside.

Q. Partly inside?—A. Yes, sir.

Q. Did Mr. Bergino do his partly inside and partly outside?—A. I believe so.

Q. Did you compare; did you ever compare your inventory as far as it went with Mr. Bergino?—A. No, sir.

Q. Did you see any drays hauling away any goods from the Shimamoto warehouse?—A. I don't think there was anything hauled away the day that I left; everything was there the day I left; two days after I left I saw them, but I wasn't working on the case then.

Q. You don't know by what means they were moved?—A. No, sir; when I was called away I found that I had nothing more to do with it and I dropped it; I didn't take any more interest in the matter.

Q. Did you ever see this piece of paper before?—A. Yes, sir;—no, sir; I can't say that I did. No, sir; I never saw that before.

Q. Didn't you testify before this commission that you put some of those numbers down there that you helped to value?—A. No, sir; didn't testify that I saw this paper or put any of the numbers; they are not my figures.

Q. Did you ever see that paper before?—A. No, sir; not to my recollection.

Q. Were you not shown that paper while you were here?—A. No, sir; this one; a larger writing.

Q. Did you ever see that before?—A. Yes, sir.

Q. Did you put any of those valuations on it?—A. I did not sir.

Q. Didn't you make a statement that you helped to put in some of these valuations?—A. No, sir; never made a statement of that kind.

Q. Did you ever see that inventory before you saw it in this commission?—A. No, sir.

Q. Who did you say helped to make up your inventory?—A. Japanese.

Q. Was he working for Macfarlane & Co?—A. No, I don't think so.

Q. Wears glasses?—A. I don't know who he was working for; didn't inquire.

Q. Did he wear glasses?—A. Yes, sir.

Q. Didn't you testify that you had affixed some valuations on some goods in Shimamoto's warehouse?—A. I affixed the value according to my own idea; I didn't tell other people I put down the value on my own inventory, what was supposed to be the values as they should have been; taking the damaged for instance, they were put down so much goods, and damaged that was written on my inventory and so much in a fair condition and so much bad and so much in a good condition.

Q. Wasn't this white paper shown to you before, before this commission?—A. No, sir.

Q. And your recollection is that you never saw it before?—A. No, sir.

Q. Didn't you testify before this commission that you didn't know who wrote that paper?—A. Not that paper; it was a yellow paper, not that inventory.

Q. That was the only yellow paper before this commission?—A. I don't remember it.

Q. Didn't you assist Mr. Bergino in making this paper?—A. No, sir; I did not assist.

Q. You did not assist Mr. Bergino in making any at all?—A. No, sir.

Q. Didn't you assist Mr. Bergino in making, in setting the price?—A. We assisted each other in making the price.

Q. And Mr. Bergino's inventory?—A. Mr. Bergino's inventory?

Q. That you assisted him?—A. No, sir; I don't think I assisted him in giving the price.

Q. Did you tell him as to the amount, as to what is the cost?—A. On the cost; no, sir, I don't think I did.

Mr. DUNNE (to the witness). I would like to ask you, as I understand it, while Mr. Bergino was making his inventory you were there for a day and a half?—A. Yes, sir.

Q. Was there any other person assisting there about the premises making an inventory?—A. I didn't see anyone else making an inventory.

Q. Was there—what other persons were in or about the premises at that time irrespective of what their business was there?—A. There was quite a number of people coming in and going out about the place; there was crowds there; several people in and out all of the time.

Q. Was there any other man that was employed around the custom-house at or about that time?—A. Yes, sir.

Q. Who was he?—A. John Hare.

Q. What was he doing?—A. He was there as well to assist me.

Q. And when you left, when you finished your end, did you leave Hare behind you?—A. No, sir; I think we were ordered to come away.

Q. At the same time that you were?—A. Yes, sir.

Q. In a general way you said it took you a day and a half to do the work you did, and to complete your work would take another day and a half, in your judgment; that was at least three days on the job?—A. Yes, sir.

Q. Was it a physical impossibility to do that work in a day?—A. Yes, sir.

Q. Why?—A. Because there was too much of it altogether.

GEORGE A. KING recalled:

Mr. BALLOU. Mr. King, in order to get at it properly, will you state what your work was about the Shimamoto warehouse after it was damaged by fire?—A. I was requested by Mr. Cooper, who was then, I believe, president of the board of health, to go and take charge of a gang of men to clean out that coral warehouse next to Aljo's.

Q. What do you mean by cleaning out?—A. Taking the goods out of the store there.

Q. Put them where?—A. Near the back; between the back of the building and Frank Damon's place there, and then we piled it up, we put them all over out in Chaplin lane.

Q. At the time you started this work did you see anybody taking an inventory?—A. I saw nobody taking an inventory. Jim Hare came up there. I knew that he was up there with Mr. Weeden, because from my arrangements at the board of health Mr. Weeden was there at the time, and he was to come and take the inventory. Jim Hare came around there, I think, the first day Monday afternoon, the 1st of January, and said when they got them all out that he and Weeden would be there and take the inventory.

Q. Then did you afterwards see Weeden?—A. I didn't see anybody take it. The next morning, or the 2d, I went around there and started the men to work. I left in charge of the men Mr. Towse, who, I think, was with me on Monday afternoon. I had to go back to my work in the auditor's office.

Q. In cleaning that warehouse out did you make any distinction between the damaged and the undamaged goods, or did you clear them all out?—A. Well, the different lots, as far as possible, we kept them together, but some we couldn't keep them together. There was only the tea goods, as we call them, was damaged, and the shoyu, the tubs and the canned goods and the tinware and the porcelain and things like that.

Q. [Here the witness is shown a paper.] Have you ever seen that before?—A. I saw it about an hour ago.

Q. Can you look over that list? You had pretty definite knowledge of what was damaged and what was not, didn't you?—A. Only in this way: Mr. Cooper asked me about Tuesday afternoon or Wednesday what condition the goods were in, and I told him with the exception of the shoyu and the canned goods and things like that, everything else was wet.

Q. Now look at that list, and can you tell us whether or not that represents only undamaged goods or whether it represents all of the goods or whether it represents the damaged and the undamaged goods?—A. As I said when I was here before, I have no real memory of those goods, simply an impression. And the statement that I made at that time as to the number of packages of this and that, so far as the impression was left on my mind, is so far below what this calls for here that it would be almost positive of the impression that this was all the goods that was in the warehouse.

Q. Now, can you say whether or not any of those specific items listed there were in fact damaged, from your own recollection?—A. The Japanese goods, of course, I don't know. I know the tea was wet, the candy was wet, and the dried vegetables were wet; the rice flour, beans, and coffee; and the salt fish, that was smelling very loud indeed that I think was the first we put into Chaplin lane because it did smell

so bad. I remember there were quite a large number of tubs of these Japanese things; of course I don't know what they are.

Q. But you are certain about the salt fish and the other things that you have mentioned?—A. Yes, sir. In fact, I mean the fish very particularly. I mentioned it particularly to Mr. Cooper as to its smelling very badly.

Q. Was the fish in tubs or in cases?—A. Both of them I think; there were some in cases and I think some tubs; most all I think was in cases that we put out into Chaplin lane because they smelt so badly.

Cross-examination:

Mr. ANDRADE. How long were you there at Shimamoto's warehouse?—A. About half past 8 Monday morning until nearly 6; I was there Tuesday morning and Tuesday afternoon, probably an hour at each time; I was there again on Wednesday morning.

Q. Well, during your different stays there what was the nature of your duty?—A. Just cleaning out the warehouse.

Q. Just cleaning out the warehouse; that was the idea?—A. Cleaning out the warehouse of everything that he had there and piling things up outside.

Q. Did you clear the warehouse out entirely?—A. I did not personally, I had charge of a gang of men.

Q. You didn't complete the job?—A. No, sir; it wasn't completed on the first day.

Q. What was the date?—A. January 1, 1900.

Q. Did you see Mr. Bergino at any time?—A. I think, I aint very sure, that this gentleman that Mr. Towse gave me in the afternoon of the first day and was also there on the second.

Q. What was the nature of his duties there under Mr. Towse's directions; do you know?—A. I had told Mr. Towse that I couldn't remain there all the time, and he said that he had a man there, a good man, inside there, inside of the quarantine line, who had been there, and he would send him over and put him in charge, which he did.

Q. Did you see Mr. Bergino make an inventory or start in to make an inventory or in the way of making one?—A. I can't say that I did. I didn't know that Mr. Bergino was there for that purpose.

Q. What did you see Mr. Bergino do, if anything?—A. Simply was outside there; was simply outside of the warehouse and directed the men. I had some notices there and he directed the men where to pile the goods.

Q. You don't know that he made an inventory at all?—A. I don't know.

Q. Did you see any of the goods hauled away from there from the Shimamoto warehouse?—A. I did not; I didn't go back in there after Wednesday; I think I still had my business, and I didn't go back in there for some time, for probably a week or more.

Q. Did you see Mr. Weeden there?—A. Mr. Weeden came around there on Monday soon after Jim Hare was there; went away, and said he would come back again after everything was out; I don't remember that I did see him there after that.

Q. You didn't see Mr. Weeden attempt to make an inventory of the goods in or about the warehouse?—A. I did not.

Q. Did he at any time ever give you an inventory of the goods?—A. Give me?

Q. Yes, sir.—A. No, sir

Q. Now, your testimony, Mr. King, is just this: You are not positive, are you, of Mr. Bergino's duties there; you don't know whether you saw him make an inventory?—A. No, sir; Mr. Bergino came there in the first place to work under me, to take charge of the removal of these goods for Mr. Towse; if Mr. Towse or anybody else gave him instructions on the next day to take an inventory I knew nothing of it.

Q. And all of your duties was to clear out the house?—A. Yes, sir; to handle the men—a sort of Luna—that is what it amounted to.

Mr. DUNNE. And as a result of your testimony you do not propose to say that these inventories were not made?—A. Not by any means.

Q. Of the goods in the warehouse?—A. I do not.

Q. Your position is a negative one?—A. I understand that there was one made, but I don't know that there was one.

Q. If Mr. Weeden says that he was there a day and a half making an inventory, are you in a position to dispute that statement?—A. I saw nobody making an inventory.

Q. The Japanese representative of Shimamoto swears that he was there for a day making an inventory, and completed within the day. Are you in a position to dispute that statement?—A. I never saw him if he was there.

Q. Mr. Bergino says he was there; that he made an inventory. Are you in a position to dispute that statement?—A. I don't know.

Q. Mr. Towse nowhere pretends to deny that the inventories were made, and says that he saw this yellow inventory—saw it in Bergino's possession. Are you in a position to dispute that statement?—A. Mr. Towse may have given him direct orders to; I don't know.

Q. So far as the making of this inventory is concerned your testimony is purely negative?

Mr. BALLOU. I did not examine him on the inventory.

Mr. DUNNE. How were those mushrooms packed?

A. Packed in wooden cases.

Q. Do you know what was inside of the wooden cases?—A. That I couldn't see. I knew—some of them were opened, and we could see what they were—I thought that is what they called them—a Chinese fungus.

Q. You wouldn't say whether they were packed in tins or not?—A. I wouldn't; I don't remember. They might have been packed in tins; they might have been; I didn't see it. How could I see unless the cases were partially opened.

Q. When you say that certain goods were wet, you mean that the outer envelope—what I understand you to mean is that the outer envelope of those goods was wet?

Mr. BALLOU. Is this your testimony of the witness? I object; it is not a question, but an argument. Mr. King says one thing and Mr. Dunne understands another. There is no question addressed to Mr. King.

The CHAIRMAN. Mr. King has a right to answer it, if he will.

Mr. BALLOU. There is no question to answer.

Mr. DUNNE. I want to know if that is your understanding, Mr. King, when you say the outer envelope was wet?—A. No, sir; I didn't mean to say anything of the sort.

Q. Were there cases there that you saw there that the outer envelope was wet?—A. Yes, sir; I saw, for instance—

Q. And were there also cases there that the outer envelope of which

was broken and wet and had discharged the interior contents?—A. In the case of case goods, yes, sir.

Q. So that as to some of these goods the only evidence that you perceived of wetting was the wet which you saw upon the outer envelope or case, and you say in certain of these instances that the wet got inside?—A. Yes, sir.

Q. Now, what proportion of the goods did you see as to where the wet and moisture had actually got inside, in to the interior part of the case, so that the goods were actually reached by the wet?—A. As everything was wet that is a very hard question to answer.

Q. Your position here—may I state your position—did I state your position correctly that there was a general condition of sopping wet there?—A. Yes, sir.

Q. And from that condition you drew the inference that many of these goods had been wet; is that correct?—A. Not altogether.

Q. Did you open all of these packages to see whether or not the wet had actually penetrated and ruined the goods?—A. No, sir.

Mr. BALLOU. Did you see what particular goods—will you specify which one of the outer covering or outer envelope was wet?—A. I think I meant to convey the impression that it was possible when the outer covering was wet. I couldn't say that I specified any other, there was such a mass of water coming in there—right through the ceiling.

Q. Each class means those that includes those that you mean specifically?—A. That is it—the beans, the mushrooms, candy, the flour.

Q. Each class were those in which the outer envelope was wet?—A. They were, especially what were in the boxes. They were sopping wet, the great, immense cases, and quite a number of them, and this gelatinous stuff with a purple color, and a great many of them probably opened, and the water there was a change in the color; it was all over the floor.

Dr. J. L. B. PRATT called and sworn.

Mr. BALLOU. Dr. Pratt, what is your present position?

A. Executive officer of the board of health.

Q. And what did you do during the Chinatown fire and during the plague times of 1899 and 1900?—A. I was stationed in what they call quarantine district in Chinatown.

Q. What were your duties there?—A. There were several duties.

Q. You had general charge of the quarantine district, did you?—A. A portion of the time; the first part of the time I didn't.

Q. How about the latter portion?—A. The latter portion I did have full charge.

Q. Well, do you remember the fire which damaged Shimamoto warehouse?—A. I do.

Q. Did you see the warehouse after it was damaged?—A. I was there on Tuesday, but I didn't go inside.

Q. Did you see any of the goods which had been inside of that warehouse?—A. I saw them on the street.

Q. After they had been removed?—A. Yes, sir.

Q. In what condition were they?—A. I did not make any close examination of them at all—they were wet, some of them.

Q. Did you order their disposition?—A. No, sir.

Q. Who did?—A. The only instruction that I gave was to Mr. Towse to look after the matter, as I had other duties—that I could not

attend to it. The evening of the fire, on Sunday afternoon late—the fire was 6 o'clock—President Cooper asked me to get an appraiser for the goods and also to attend to their removal from the warehouse. I told him that I could get the appraiser; but, as to the removal of the goods I could not—I had too much else to do—I could not attend to that—that he would have to send some one, and he sent Mr. King.

Q. What appraiser did you get?—A. Mr. Weeden—I got him a day or two later, a day or two afterwards. When the goods were all out Mr. Towse told me that he had put Bergino also on making an inventory of the values, as he had had experience in Japanese goods.

Q. Now, what kind of an inventory—what were you requested to make an inventory and appraisement of?—A. All the goods that was in there damaged and undamaged.

Q. And that was the order that you transmitted to Mr. Towse?—A. Yes, sir; also to Mr. Weeden.

Q. And afterwards Mr. Towse informed you that he had put Mr. Bergino on the business?—A. He had also put him on professionally to help in the removal of the goods.

Q. Did you see any of those inventories and appraisements?—A. No, sir.

Q. Will you look at this one, identified by Mr. Bergino as being in his handwriting, and tell us whether you are familiar enough with the goods in that warehouse that you saw after they came out—are you able to tell us whether that is a list or anybody's goods, damaged or undamaged goods?—A. I can't say positively; I didn't examine the boxes to see what they contained at all; it was just simply to gather the things up, and I saw them as I was passing back and forth through Chinatown doing my duty.

Q. Have you any recollection whether the specific items were damaged or undamaged?—A. Not from personal knowledge or observation.

Q. Well, from any source—reports of your subordinates, for example?—A. There is only one writing that Mr. Towse spoke about.

Q. What was that?—A. Candy.

Q. What was his report on the candy?—A. Damaged.

Q. Do you know what was done with the damaged goods?—A. The damaged goods were scowed out to sea—taken out to sea, and dumped overboard.

Q. That was through your orders?—A. To Mr. Towse to have it dumped on to the scows.

Q. And did you see Mr. Towse?—A. He was in charge. He was in charge of the general cleaning up after that fire; he not only cleaned that warehouse but the whole block where the fire had been; he was put in charge of that.

Q. Did you instruct Mr. Towse what to do with the undamaged goods?—A. As near as I can recollect, he was told to put them in the Beretania street warehouse.

Q. Now, can you tell us of what proportion of the goods were considered damaged and thrown out to sea, and what proportion was put in the Beretania street warehouse?—A. No, sir.

Q. Have you no general idea?—A. I can't say positively.

Q. Can you state generally?—A. I saw a number of the drays come down to the scows—

Q. Can you state generally?—A. It would be simply from my memory.

Q. From your recollection?—A. I saw a number of the drays come down to the scows at the wharf. If I recollect, Mr. Johnson was in charge of the scows at the time, towing them out to sea.

Q. From your recollection can you say what proportion of those goods were damaged that were in the warehouse?—A. No, sir; because they hauled stuff from there and every block—lumber and such stuff—stuff that was underneath their houses—took it on the dray at one time.

Q. Did you ever see that candy at all, yourself?—A. No, sir.

Cross-examination:

Mr. ANDRADE. Mr. Pratt, if I understand you correctly, you simply saw an immense mass of goods outside of that warehouse, in the rear of the warehouse.

Q. You made no personal examination of any of those goods?—A. No, sir.

Q. You don't know what proportion might have gone to the Beretania street warehouse and what proportion might have been taken to sea; is that right?—A. Yes, sir.

Q. As a matter of fact you of your own personal knowledge—you don't know that any goods were taken out to sea?—A. Simply I saw the drays; I didn't see them fall; I actually saw them put the things on the scows.

Q. All you know about that proposition is that you gave Mr. Towse orders to dispose of these goods by taking them out to sea and dumping them off somewhere?—A. He had his general orders to clean that whole block.

Q. And those goods that could not be saved were dumped upon the scows?—A. Anything that was damaged and all refuse was to be taken out to sea.

Q. Of your own knowledge, you don't know that was done?—A. No, sir, not of my personal knowledge; I knew that he carried out the orders I gave him.

Q. As to that proportion that might have been taken out to sea or any that went to the warehouse, you don't know anything about that?—A. No, sir.

Q. And you don't know how much goods was in that warehouse?—A. No, sir.

Q. And you don't know how much was damaged?—A. No, sir.

Mr. PRATT. Are you quite sure that you gave instructions that some of the goods should go to the Beretania street warehouse?

A. That is my recollection.

Q. From whose particular place?—A. I told Mr. Towse if any goods were found in that warehouse that were not damaged to take them to the Beretania street warehouse.

Q. Then previously you had arranged with the warehouse to use it for such purposes?—A. I had made no such arrangements; it was made through the office.

Q. You knew of its being done?—A. Yes, sir.

Q. Previous to that time?—A. They had a number of warehouses in different portions of the city, and generally when we had goods to remove we told which place to take them to.

Q. This was the only place where you had a fire that you had to deal with the merchandise?—A. Yes, sir.

Q. And why I ask you that you should be positive on that point, it

is stated, if my recollection serves me, that the merchandise committee took over the merchandise of the subsequent fires, didn't they?—With these particular goods, if at that time there was any arrangement made for the warehouse, or subsequently they made the arrangements for these warehouses.—A. My recollection is that there was two or three days before we got through that inventory; I think it must have been Wednesday or Thursday before they began moving, but it was after that that the merchandise committee took charge.

The CHAIRMAN. You know nothing about the arrangements that they had for that warehouse; they delivered goods there and they were taken in?

A. No, sir; my duties there were written; really this was just simply the part of a messenger for President Cooper, to find a man to make this appraisalment and to clean up the block, the whole block.

Mr. DUNNE. What were Mr. Towse's precise duties in this matter?

A. His duties was to clean the whole block where that fire occurred from opposite Pauahi up to Chaplin and the Waikiki side of Nuuanu.

Q. Did his jurisdiction extend over that block?—A. He was in charge; he was my assistant. I put him on other duties; he had to destroy the clothes and blankets and distribute them and clean up the rubbish in every portion of the town and put it in a good sanitary condition.

Q. Towse was then the man that might be secured as the very best man with numerous duties?—A. Yes, sir; he was pretty near the best man.

Q. And he had many things to look after, did he not?—A. Yes, sir.

Q. And his attention wasn't specifically limited to this particular warehouse of Shimamoto & Co., was it?—A. He had other duties.

Q. But in the matter of making a report, Mr. Towse was supposed to make a report to you?—A. And when he put laborers on work he would then come around and see that the work was being done, and then if I had something else for him to do I would put him on it.

Q. In the matter of ascertaining the extent of the damage to the damaged property, Mr. Towse, in the course of his duties, did make report to you as to what things were damaged, did he not?—A. No, as to the amount, he did not.

Q. But he didn't as to the things that were damaged—the articles?—A. The only thing that I have any recollection of is that candy, there were so many damaged goods.

Q. Now, out of Mr. Towse's entire report to you on the subject matter of Shimamoto's warehouse—the damage, the only article that remains in your memory is that one article of candy?—A. That is all to the damaged part.

Q. Is that correct?—A. Yes, sir.

Q. Mr. Towse made no report to you of any other specific property except the candy was damaged?—A. That I remember of.

Q. So far as your memory serves you, the report of Mr. Towse as to the damage, as to the Shimamoto property, it is limited to the article of candy?—A. Yes, sir; as I remember it, he reported that several articles had been saved.

Q. What articles did he say wasn't salable, as distinguished from the candy that was damaged?—A. He made no specific report; didn't pay any particular attention to it.

Q. Now, doctor, you saw that Shimamoto warehouse right after the fire, didn't you?—A. I saw it; yes, sir.

Q. And did you notice whether the place was wet or dry?—A. I didn't go inside; I was just around in the neighborhood.

Q. Then the only knowledge you have on the subject of damage to the interior of the warehouse is derived from the report of Mr. Towse?—A. And what I saw lying in Chaplin lane, coming from Fort street; I just saw the boxes hauled out.

Q. Did you notice whether they were wet or dry?—A. I saw a number of wet ones.

Q. Wet cases?—A. Yes, sir.

Q. Were the wet cases that you saw open?—A. I can't say as to that; they were opening boxes when I was around there—opening them to see what was in them.

Q. And I understand you to say that it was as late as Thursday before they commenced shipping the goods from the Shimamoto warehouse to the Beretania street warehouse?—A. I think it was Wednesday or Thursday before they began moving the goods.

Q. In the interim between the time of the fire and the Wednesday and Thursday when they commenced to move the goods, were there any persons there making inventories?—A. I saw Mr. Weeden there.

Q. Did you see the man there that was recommended to you by Mr. Towse, Mr. Bergino?—A. Yes, sir; I saw him around there.

Q. Did you notice what he was doing?—A. No, sir; not particularly.

Q. Did you receive at any time an inventory from Mr. Towse, or anybody else, of the goods?—A. No, sir.

Q. None at all?—A. No, sir.

G. BERGINO, recalled.

The CHAIRMAN. You have heard the statement made by the various witnesses; is there any voluntary statement that you would like to make to the commission to clear up?—A. I would like to say one thing, that Mr. Weeden, he was the gentleman that I saw making this appraisalment, this price of the goods; that there was another gentleman, I think.

Q. There was another man; that man here?—A. Yes, sir; I think that is the gentleman; I don't know his name; I wasn't the man brought to take it; I was working with Mr. Weeden.

Q. You have heard Mr. Towse's statement as to the number of goods that were taken to the Beretania street warehouse and the amount taken to sea; how do you reconcile his statement with your own to the effect that nine-tenths of the goods were taken to the Beretania street warehouse, and only these that were indicated on this memorandum that you have?—A. These goods that were not damaged, and when they were hauled away from Shimamoto's place with the intention of going to the Beretania street warehouse, they might have changed their opinion on the way; but I don't think so; I don't know anything of it.

Q. But you would receive your instructions from Mr. Towse as to the disposition of the goods, didn't you?—A. I didn't have charge of that; I say that I didn't have charge of the hauling away of the goods, but these goods that were not damaged were supposed to go to the Beretania street warehouse.

Q. You were representing Hackfield & Co.?—A. I didn't have anything to do with Hackfield.

Q. Do you know of anybody who was assisting, representing Hack-

field & Co. at the time of the taking of the inventory; did you see anybody; did you see Mr. Humbert?—A. I saw Mr. Humbert around inside of the quarantine lines several times; I never seen him at Shimamoto's place.

Q. When you made this inventory, I understand you to say in your examination yesterday that this only comprised goods in a sound condition?—A. In a sound condition.

Q. From whom did you get your instructions to make this inventory of goods in a sound condition?—A. I think it was from Mr. Towse. Because he took me to the place, and while they were carting these goods out I told them to put the damaged goods on one side and the good goods on a different side to separate them.

Q. Did you hear the statement made by Mr. Weeden that you were taking this inventory down on white paper?—A. Yes, sir; I might have—

Q. In a book with white paper?—A. Yes, sir; I might have had a book on the very first day of white paper, but I don't think so, because that is a true inventory from the very beginning—from the very first day I was there.

Q. Did you copy this inventory from any other that you had made originally?—A. No, sir; that was the original inventory that I made.

Q. Then you have reason to doubt the statement made by Mr. Weeden that you were making your original inventory in a book containing white paper?—A. Yes, sir; I think that he must have made a mistake.

Mr. DUNNE. I would like to ask you in a general way how these goods were packed with reference to this idea, that if they should have been wet on the outside whether they were so packed that the wet could penetrate them to the interior of the package and ruin the goods, everything the same in a general way?

A. I think it was a mass of salt fish that was damaged.

Q. Now, we have called that fish in Japanese erico?—A. That fish is packed in solid wooden boxes; inside of the wooden box is a tin box, and it is impossible for the water to penetrate through that box.

Q. How about the mushrooms?—A. Some of the mushrooms that were packed in a tin can; but I think there were a couple of boxes of mushrooms that were only packed loosely in the box, but I don't think they were all full at all.

Q. How about the other goods?—A. The kanten—they were packed in solid wooden boxes or cases, and inside some of them were packed in tin, and some of them cardboard boxes. With all the stores that were packed away in the warehouse it would be impossible for the water to penetrate, as Mr. Towse said the roof was solid, and the ceiling between the upper floor was solid, and then it wouldn't have been possible for the water to penetrate into these boxes. I know there were some boxes damaged.

Q. When you say fish do you mean what he calls dried fish?—A. Yes, sir; dried fish.

Q. He has got here on the list 130 cases of dried fish; is that what you have reference to?—A. Yes, sir; I think so. I am quite sure. I don't think there was any other fish but dried salt fish.

Q. Salt fish comes in kegs?—A. In big tubs.

Q. Then I understand you to state to Mr. Dunne that the bulk of this fish—dried fish—was in cases that was tin lined?—A. Tin lined. There might have been one or two boxes that were not tin lined. The

Japanese, they usually ship this fish around, and sometimes it is too dry. There may have been one or two. I know there were a great many cases tin lined. The boxes were tin lined.

Q. I notice here two cases of fish, and in brackets the word "Japanese" after the dried fish. Was that to distinguish it from any other fish?—A. I think they mean these small, little fish.

Q. In the first instance 130 dried fish?—A. Small fish, caught in the net.

Mr. DUNNE. What we call small fish?

A. Small fish—little fish, two or three inches long.

The CHAIRMAN. Mr. Bergino, could these fish, if it was in the tin-lined case goods—could it have been either damaged by heat or water in consequence of this fire?

A. I know it could not have been damaged by heat. I don't think so—no; it could only have been damaged by water, except it would have been placed in the flame and burnt, but little heat wouldn't have damaged it.

Q. How could it have been damaged by water if it was tin lined?—

A. I say it could not have been damaged by water.

Q. Your recollection of this fish that you saw with your own eyes was that the most of it was in tin-lined cases?—A. Yes, sir; the most of it.

Q. Then, all this fish smelling has reference to the tinned?—A. It smells terribly.

Q. Would you say from the smell of the fish, would you say that it was in a marketable condition from the smell?—A. No, sir; all of the Japanese goods smells.

Q. That is its normal condition of good?—A. Yes, sir; the same thing with Japanese pickles.

Mr. PLATT. The fish that you speak of in your inventory as "93 erico" fish, \$14 a case represents as near as you can recollect the fish that was taken out, and from being in the tinned case and received in a merchantable condition, is that correct?—A. Yes, sir.

Q. Just one more brief statement from you of the goods damaged and undamaged, could you have seen them all and what proportion would you say was bad and what proportion went to the Beretania street warehouse or any other place or might have gone—I want you to be as clear as possible on that point?—A. Well, I think that about three-fourths of the warehouse goods that were taken out of the warehouse at the Shimamoto warehouse were in good condition.

Q. In good marketable condition?—A. Yes, sir.

Q. In other words—A. At the time they left the place.

Q. On drays?—A. Yes, sir.

Q. Then the other quantity went to the dump?—A. I think so; it was supposed to go there.

Q. I understand that you can not smell these fish from the lined cases?—A. No, sir; but some of it was open.

Q. That was the only kind that you smelled?—A. Yes, sir.

Q. But that was open, wasn't it damaged?—A. Some of it wasn't damaged and some of it was.

Q. At the time that Mr. Towse gave you the order to inventory these goods did he give you the order to price them also?—A. No, sir; I don't think he did.

Q. Did it strike you when Mr. Towse gave you that order, did it

strike you at all as peculiar that the Government should be interested only in finding out the undamaged goods and wasn't at all interested in listing the goods that was damaged and thrown away, did that strike you as peculiar at all?—A. No, sir; I think the orders given to me was to take an inventory of the goods that could be used at all, or was of any value at all, that wasn't destroyed or damaged by fire or anything else.

Q. But it didn't strike you that the goods that were going to be saved and put in the warehouse could be seen at any time and carefully listed and the goods that was out and damaged and removed and could not be seen and that no list was being taken, that did not strike you at all?—A. No, sir; I don't think so.

Mr. PRATT. You went with Mr. King, as a representative of the board of health, to investigate the Shimamoto fire warehouse to ascertain as far as you could the value of the goods that were saved?—A. Yes, sir.

Q. You ascertained the goods and you voluntarily put upon them on your own information the value?—A. Yes, sir.

Q. That was as far as your duty and your instructions went?—A. Yes, sir.

Q. As to the disposition of the goods after they were inventoried you had nothing to do with?—A. No, sir.

Q. That rested with your superior officer, Mr. Towse?—A. Yes, sir.

Q. The goods were inventoried as your inventory shows?—A. Yes, sir.

Q. And subsequent to this you made several visits to the Beretan street warehouse?—A. Yes, sir.

Q. Taken in connection with this?—A. Yes, sir.

Q. Do you recollect whether you went with the goods on the lot that had no other goods than shoyu?—A. I went with a load of goods that wasn't shoyu or crockery.

Q. But they were goods contained in this inventory?—A. Yes, sir.

EXHIBIT A.—S. SHIMAMOTO.

924 tubs shoyu, at \$1.40.....	\$1,293.
210 tubs miso, at \$1.10.....	231.
130 dry fish, at \$12.50.....	1,625.

20 pounds kanpio	5.05
3 dozen cakes in boxes	5.00
2 dozen bamboo baskets	12.50
1 dry fish, "iriko"86
12 pounds kazunoko	1.65
11 pounds kainohimo	18.00
20 pieces cotton crape	7.50

Total 10,923.84

No. 1.—FIRE CLAIMS COMMISSION.

STATEMENT OF CLAIM.

S. Shimamoto, the undersigned claimant, respectfully represents that he is a resident of Honolulu, H. I.; that on the date of the loss hereinafter specified he was the sole owner of the effects and property set forth in the schedule hereto attached, marked "Exhibit A, B, and C;" that the value of said property at its cost price is set forth upon said schedule opposite the items thereof; that said property and effects were lost by total destruction by the fire on the 31st of December, 1899.

and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in that certain warehouse building on 326 Nuuanu street, in said Honolulu, Territory of Hawaii; that said loss consisted in part of the destruction of the building more particularly described in Exhibit C; that the name of the owner of the land whereon said building stood is _____ and the nature of the interest of this claimant in said building is _____; that said property was insured for (no insurance) dollars, in the name _____; _____ dollars of said insurance has been paid by _____ company, the insurer thereof; that the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, nor any loss, except the destruction of or direct damage to said property by fire, or removal under the order or direction of the board of health, as aforesaid.

S. SHIMAMOTO,

By his attorney in fact, R. SEGI.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

R. Segi, attorney in fact for S. Shimamoto, being first duly sworn, says that he is the attorney in fact for S. Shimamoto, the above-named claimant; that he knows the content of the foregoing statement of claim, and of the schedules thereto attached, and that the same are true of his own knowledge, except as to such matters stated on information and belief, and as to those matters he believes them to be true.

R. SEGI,

Attorney in fact for S. Shimamoto.

Subscribed and sworn to before me this 27th day of May, A. D. 1901.

[SEAL.]

F. M. BROOKS,

Notary Public.

RULE XIV.—In order to facilitate business claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of buildings' fixtures upon a schedule marked "Exhibit C."

Claim indorsed as follows: No. 1. Fire claims commission. Claim of S. Shimamoto. Amount, \$10,923.84. Filed May 27, 1901, at 9.15 o'clock a. m. J. M. Riggs, clerk. Presented by F. M. Brooks. Kinney Ballou & McClanahan, attorneys.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above, before the fire claims commission.

C. F. REYNOLDS,

Official Reporter.

Subscribed and sworn to before me this 11th day of October, A. D. 1902.

[SEAL.]

H. C. CARTER,

Notary Public, First Judicial Circuit.

EXHIBIT No. —.

CLAIM OF JAPANESE METHODIST EPISCOPAL CHURCH, NO. 7.

Fire claims commission, Territory of Hawaii, claim of Japanese Methodist Episcopal Church, No. 7.

The hearing of this matter having been set for trial on the 19th day of June, A. D. 1901, the following proceedings were had.

The following counsel appearing:

H. M. Bigelow, esq., for the claimant.

Messrs. Andrews, Peters & Andrade, and J. J. Dunne, esq., for the government.

Full commission presiding.

C. F. Reynolds, official reporter.

H. KIHARA, called for claimant, sworn.

Mr. BIGELOW. You are the pastor of the Methodist Episcopal Church (Japanese) in Honolulu?

A. Yes, sir.

Q. You are the one that presented this claim on behalf of the church before this commission?—A. Yes, sir; I am secretary to the trustees—to the board of trustees.

Q. You are the secretary to the board of trustees?—A. Yes, sir.

Q. When was the Japanese Episcopal Church destroyed by fire? What is the date?—A. January 20.

Q. 1900?—A. Yes, sir.

Q. Where was the building erected?—A. On River street, between Beretania and Kakoi.

Q. Of what was the building constructed, wood or stone?—A. Wooden building.

Q. Besides the church, was there any other building that was destroyed by fire?—A. Yes, sir; the parsonage.

Q. Was that a wooden building, or stone?—A. Wooden building plastered; and also the water-closet, separate from the parsonage; three buildings on our lot.

Q. Was there anything else; any other structure?—A. Fence.

Q. Besides these three buildings, was there anything else destroyed by the fire?—A. That is all. Of course some articles; household articles.

Q. Were those the things that were presented in Schedule B?—A. Yes, sir.

Q. (To the commission.) I would like to ask is it the custom to go down the list, take off each item, or is it done by proving it in general way?

The CHAIRMAN. Refer to the schedule in a general way.

Mr. BIGELOW. Not take each item in the schedule?

The CHAIRMAN. I don't think it is necessary.

Mr. PRATT. Generally brought out on cross-examination.

Mr. BIGELOW (to the witness). Did you make up this Schedule B the charge for the household utensils?

A. Yes, sir.

Q. Did you make that up from your own personal knowledge of what was in the church, personally?—A. Yes, sir.

Q. And the amounts here are a fair estimate of the property destroyed?—A. Yes, sir; it is only cost at the time.

Q. I will state to the commissioners, Mr. Kihara has enumerated in his list an item in Schedule B, one violin, and he desires to withdraw that; as he is the real owner he put it in the claim; it was destroyed by the fire; it was unintentional, his putting it in, and he asks now to withdraw it. I turn now to Schedule C, the real estate mentioned here. (To the witness): You have a charge here of church and fixtures estimated at \$2,194?—A. Yes, sir.

Q. Will you tell the court how you arrived at those figures?—A. Lumber, paid Lewers & Cooke \$844; carpenters, \$308; electric light, \$68.50.

The CHAIRMAN. That electric light, was that wiring?

A. Everything.

Q. Putting the wire in?—A. Yes, sir; and also the lamps. Carpenters, \$375; injury to fence and water-closet, \$118; \$12 fence one side. To E. O. Hall, \$70.75, iron railings, weights, etc.; blacksmith, \$4, and weights, \$57; flooring, \$18.40; and the total for Hall & Son, \$70.75; plumber, \$93.85; cushions, \$59; architect, \$75; labor, \$174.80; range furnished to the building, \$11, and wall paper, \$6.20; wire, \$2.35; sundries—that is, building the roof and such things as that. The total is \$2,312.

Mr. BIGELOW (to the commission). He includes in the church and fixtures the fence, the water-closet, and two items at the bottom of Schedule C.

The WITNESS. On a personal contract that I had with the Japanese carpenters, \$370, that makes the total \$2,682. Also, we claim \$415 for furniture and utensils.

Q. That is included in the first schedule, Schedule B?—A. Yes, sir.

Q. When was the church erected?—A. 1898; in July and August.

Q. When was the parsonage erected?—A. November, 1898.

Q. Who is the owner on which the church is situated?—A. Our church.

Q. Was the property insured?—A. Yes, sir.

Q. For how much?—A. Fifteen hundred for the church and two hundred and fifty for the parsonage.

Q. In what company?—A. The Union Society of London.

Q. Have you recovered anything on that policy?—A. Yes, sir.

Q. Have you got any money from that policy; has the insurance company paid you anything?—A. No, sir; nothing. I tried to get something, but they refused.

Cross-examination:

Mr. DUNNE. What was the cost of the fence, standing alone?

A. I don't know much about that, but I have valued the fence, the interior work, and also the water-closet altogether at \$118.

Q. How much of that \$118 went toward the fence and how much went for the water-closet?—A. Forty-five dollars for the interior work of the church.

Q. That is \$60, then?—A. The water-closet \$20.50, and the picket fence \$7.50, and the other \$18.50.

Q. Are there any other fence items there?—A. And also \$12 put on the other side; that is, the fence put there before.

Q. So, if I have the figures correctly — —A. Eleven dollars and a half for painting.

Q. Painting the fence?—A. Yes, sir.

Q. So that would make the total?—A. Building the fence, the water-closet, and the interior of the church—

Q. And the total value of the fence and the water-closet would be \$70, wouldn't it?—A. I think so.

Q. The water-closet, that is \$20.50; that is correct?—A. Yes, sir.

Q. One item for the fence, \$7.50?—A. Yes, sir.

Q. Another item, \$18.50?—A. Yes, sir.

Q. Another item, \$12?—A. Yes, sir.

Q. And another item, \$11.50; is that correct?—A. Yes, sir.

Q. And that foots up and makes the total \$70?—A. Yes, sir; this bill for the interior decoration of the church.

Q. Have you charged the bill in the value that you have given for the church?—A. Separate.

Q. How long after the church was built was it that you got all of these articles of household furniture?—A. Got them right away when the place was ready for occupation; got them right after the church was finished.

Q. All of these small articles of personal effects?—A. After the fire—

Q. Did you buy them and put them into use as soon as the church was ready for occupation and use?—A. Some of them were new and some were not so new; I can't tell from this, exactly.

Q. At the time of the fire were any of these articles new articles that belonged to the parsonage?—A. Yes, sir; the articles that belonged to the parsonage.

Q. What was their condition at the time of the fire? I direct your attention to Schedule B in the claim, and ask you to relate the condition of the articles named therein at the time when the fire took place; just state their condition.—A. Some of them were new and some were old—second hand. I can't tell you exactly, but they were mostly new. I only bought about half about a year ago or so; all the people gave us something for the parsonage.

Q. When you got these articles were they new?—A. Some one gave our ladies—

Q. When these ladies gave these articles were they new?—A. Some were new and some were old, so I put down the price at auction-sale price.

Q. In your schedule here?—A. Yes, sir.

Q. You describe it there as the cost price?—A. It is very cheap.

Q. One question, is there any litigation over the policy of insurance? Did you go to court and try to get your insurance?—A. No, sir.

Q. Have you done anything at all about that?—A. I went to see the agent, and then the agent wrote to me back by some paper that he refused to pay in this case.

Q. And has the matter rested there?—A. Yes, sir.

The CHAIRMAN. I think the attorneys for the claimants have inquired into a good many of the insurance policies; there has been a claim always, several instances that I have been connected with, speaking of the insurance company of which I am agent. I have had several claims filed upon me and have made a disposition of them in some way or other, and the attorneys have taken it up; I think Kinney, Ballou & McClanahan.

Mr. BIGELOW. Mr. Thurston has a large number of them.

The CHAIRMAN. I would suggest that it might be well for the attorney for the claimant to see what kind of a policy this claimant has in this matter. If he has the New York standard form of policy he will have no claim under it. There were a great many policies issued so in Honolulu. They were not the ordinary standard New York form. I think perhaps it will be well for the Government to request the attorney for the party to see what his policy is.

Mr. DUNNE (to the witness). Have you the policy?

A. Yes, sir [here the witness produces the policy].

Q. The company shall not be liable for loss caused directly or indirectly, etc.?

The CHAIRMAN. That is the form that excludes the company from liability.

Mr. DUNNE. I believe the Government—I beg to say we have got past the item in the claim fixing the sum of \$2,194 for the church and fixtures, and the sum of \$370 for the parsonage and fixtures, and the sum of \$118 for the water-closet and the fence, but we submit that in determining the value of the parsonage your honors should make some allowance for the year's use and the wear and tear of the year. That is the only criticism that we have to offer on this claim.

Mr. PRATT. I would like to call the attention to the \$75 architect; are the plans still in his possession?

Mr. DUNNE (to the witness). Where are the plans that this church was built from?

Q. Mr. Ripley, I think he is here, and he has got them; he is here.

Mr. PRATT. In estimating the question of cost I ask if there wouldn't be a saving—aren't the plans of some value to the organization; if they were saved wouldn't that probably be deducted; might it not be deducted; they could be used again? (To the witness.) The bill of the architect—the cost of the service of the architect—did this \$75 cover the cost of the architect and the plans of the architect?

Mr. DUNNE. Were those plans turned over; where are those plans now?

A. They were burned.

The COMMISSIONER. Couldn't there be a duplicate in the hands of the architect?

Mr. DUNNE. The architect is here.

The CHAIRMAN. I would say in connection with that matter, we have more or less to do with architects, that the regular architect charges us 5 per cent upon the cost of the building, and that includes superintending; now of the plans, if you go to the architect and he draws you a plan and you don't give him the superintendency over the cost of the plans they usually make at the time, they usually put it his way, 3½ for making the plans, and superintending 1½; so if that included the charge of the superintendent, the architect, there would be 3½ per cent that would represent 3½ per cent of the cost of the building, and 1½ for the drawing of the plans. That would be a claim, because that is gone.

Q. The plans of the church were in the possession of the church, and were destroyed at the time of the fire?—A. Yes, sir.

C. B. RIPLEY, called for claimant, sworn:

Mr. BIGELOW. You are an architect?—A. Yes, sir.

Q. Were you engaged in the business of an architect in the year 1895?—A. Yes, sir.

Q. Did you design the plans of the Japanese Methodist Episcopal Church?—A. I did.

Q. What was the value of your services in drawing up those plans?—A. Well, I gave full superintendency to it, to the construction of the building, and the regular charge would have been 5 per cent upon the cost of seeing the building erected; I only made a charge of \$75 for the full services which I rendered.

Q. Then, as a matter of fact, the \$75 would represent the compensation for what you gave to it?—A. No, sir.

Q. Yet you say that you took full charge; that you drew up the plans and supervised the erection of the building?—A. Yes, sir.

Q. Have you any plans or draft in your possession from which duplicates could be made upon which this church was built?—A. I don't know that they are in existence; I have sold out my business to the man who was then my partner, Mr. Dickey; it is possible that there may be drafts in the office, but I think there were no duplicates made. I think that I turned the originals over to the Japanese parson; I don't think there was any preserved; possibly it might be found among Mr. Dickey's plans.

Q. If they were found, would it take very much time to make out plans again on which to build the church?—A. If there was a tracing found, there could be blue prints made; it is really in the profession that the plans are the property of the architect. They are simple instruments of service, and after the service for which they are made they are not supposed to be of any use. That is recognized in the profession.

Q. In this specific case, even if the plans were found in your office you would have a right to follow the lines for the church?—A. Yes, sir.

Cross-examination:

Mr. DUNNE. Included in the value of the plans is the tracing and also your services as superintendent?

A. That is all I asked.

Q. Now, what would there be for a full allowance of commission? Now, what would be the value of the plans themselves; what portion of the \$75; what represents the value of the plans?—A. The plans and specifications represent $3\frac{1}{2}$ per cent.

Q. If \$75 represents the 5 per cent, that is not in full?—A. No, sir, not for such service; that is the proportion that is given to the plan that is $3\frac{1}{2}$, while full services is 5 per cent.

Q. What is the cost price of the construction of this building?—A. Well, about \$2,300, if I remember right. I was a member of the board of trustees, and I remember at the completion of the building and dedication I made a statement of the cost of the building, and I remember that was about the figure, or a little more than \$2,300.

Q. And $3\frac{1}{2}$ per cent of \$2,300 would represent the value of the plans?—A. Yes, sir, if they had been sold out.

Q. Independent of any services as superintendent?—A. My services as superintendent represent so much labor on the building; that was part of the cost of the building. I would like to state to the commission that at the time these buildings were appraised by the Government appraiser I was a member of the board and I was interested in the building, and I requested that the other two members of the appraisers should make this appraisement in my absence. I had

nothing to do with the case; it wouldn't be right for me to say anything about it, so that the appraisalment that was made by the Government was made by Mr. Welhelmi and Mr. Odekirk. I was present at the time.

The CHAIRMAN. Mr. Ripley, when you speak of the plans—that means the specifications also?—A. Yes, sir. Three and a half per cent means the plans, specifications, and detail tracings.

Q. While the tracings—the tracings don't represent $3\frac{1}{2}$ per cent—there are the specifications?—A. Yes, sir; that means the specifications as part of the drawings.

Q. So, if you had the drawings and didn't have the specifications, it would be very little use—the plans?—A. It would depend upon the nature of the building. If it was erected by day work, the specifications wouldn't be so important. They generally represent the value of one-half per cent.

Mr. BIGELOW. One point in connection with the statement that was made in this case I would like to call the attention to is in the fourth line of the second paragraph of the statement of the claim “that the value of said property at its cost price is set forth upon said schedules opposite the items thereof.” When these claims, or the consideration of these claims, were first taken up by the consulate who was acting on the claims, it was then for us to fix and ascertain the cost price and embody it in Schedule C. That was the case of merchandise, and an inventory was to ascertain as near as might be the actual value of the property at the time of its destruction, and the court will notice as it comes to subsequent claims by our firm that we have scratched this statement out and made it conform with that, and it reads as follows: “That the value of said property as set forth in the said schedule,” scratching out the three words “its cost price.” We do that for the reason that the entry upon which the claims in which we are concerned—the items of Schedule B—are not furnished upon that basis or the actual value of the claim and not its cost price.

The CHAIRMAN. The commissioners in preparing these forms—we made a form out in that way—but they had in view to reserve the right to ask for a depreciation, so we thought that would cover just the point that you are raising, and we put it in at the cash value of the building—the building represented at the time of the fire; but the court in taking out this form in that way would take the cost price and deduct what they thought was fair in the building, in the case that you claim, that such was the depreciation and that would amount to nothing. Because the building was practically new for all intents and purposes,

H. KIHARA, recalled.

Mr. BIGELOW. In setting forth these items in Schedule B and putting down these amounts opposite each item, did the figures that you have put down here represent the cost price of the various articles, or do they represent the value that you asked for the articles, or estimate of what the articles are worth at the time they were burnt?

A. It is not the cost price at all; I put the valuation on for the price to be auctioned; if it was auctioned we could realize so much—that is the way I put it in—and, furthermore, I said there are more than is on the list. There are several more goods which we found out afterwards also burnt, but we never put that in, so that it is only a very cheap price.

Mr. BIGELOW. If I understand right, that if he put it all on it would be still more?

Mr. DUNNE. Was there any very great change in the condition of these articles between the point of time when you got them and the time when they were burnt?

A. No, sir; there was no change whatever; not any big change; only used about a year.

Q. Were they taken care of carefully, used or otherwise?—A. Very carefully handled; I was very careful in handling those things; they belonged to the pastorage, and we were very careful in handling those things; not very much wear and tear.

Mr. PRATT. I would like to inquire to ascertain what allowance was made. What was the original cost of some of these articles—for instance, the church organ?

A. I don't know; Mr. Kanns was superintendent, who was in San Francisco; bought that organ and sent it to us, and in his letter he said about \$150 new, but he bought it as an old one; it was second-hand.

Q. What did he pay for it?—A. A little over \$60.

Q. And it had been in use a little over a year when it was destroyed?—

A. Yes, sir.

Q. You haven't got a bill of sale of that organ?—A. No, sir.

Q. Has the treasurer got a memorandum of that?—A. No, sir; there has been a reduction of \$5 for the use of the organ.

Mr. PRATT. For the year; is that correct?

A. Yes, sir; we had just had it to Bergstrom & Co. for cleaning.

Q. Twenty-four chairs; what was the original cost of those chairs?—

A. Those were presented by Mr. Waterhouse; 24 very strong wood and heavy chairs; I guess about \$1.40 or \$1.50.

Q. The original cost was \$1.40 or \$1.50, and you put them down to \$1.25?—A. Yes, sir.

Q. And as to the other chairs?—A. Those that we bought they were burned; they were just like new at that time.

Q. What did they cost originally? Who did you buy them from? Where were they gotten?—A. I don't know; Mr. Peck bought those.

Q. Thirty-four yards of straw matting, \$10.20. What is the value of that matting new?—A. That Mr. Kawaski presented to us for Christmas.

Q. Do you know what is the value of a piece of matting 34 yards what is it per yard?—A. Thirty cents a yard.

Q. That would be pretty near the full value?—A. It was just new he presented it to us on Christmas.

Q. There was no allowance made for the use of it?—A. It was presented to us just before Christmas.

Q. Here is a magic-lantern, \$30; 126 pictures. Where was the gotten?—A. That belongs to us, Mr. Smalli; we had it about six months; it always stood in our parsonage; he brought it from Japan about 150 pictures for 25 yen. It might have been a little more expense to bring it here; maybe 80 yen.

Q. When was the church destroyed—by what fire?—A. January 2

Q. Didn't manage to save any of the goods that day?—A. Person effects, we saved some.

Q. None of the furniture in the church?—A. No, sir; nothing, was all burnt up.

Q. And the church was right close to River street?—A. Yes, sir; we had ample time and we had people that tried to save things, some of the property of that church.

Q. You had ample time to save some of the things, but the church went and the personal property?—A. Yes, sir.

Q. You had plenty time to save some of the property?—A. Yes, sir, some; there was a crowd around there; the people were scared.

Q. Wasn't that part of the place on that day the fire of the 20th of January, that certain parties went around and tried to burn it up by pouring kerosene oil on it?—A. Yes, sir.

Q. Was there kerosene oil poured on this property?—A. Yes, sir; inside.

Q. Who did that?—A. I don't know; some citizen came there and broke our door to make the fire, I don't know who they were—white people.

Q. This was an independent fire?—A. We were trying to stop the fire in that church, the church and another building between their building, and they tried to put the fire in the church; may be they wanted to stop the fire at that place at that time, there was no water on that side.

Q. Can you recollect the name of any one of those people that were doing that sort of work, any individual? Do you remember the name of any individual that was there?—A. Waterhouse and Mr. Whitney, and I saw some big man with eyeglasses on.

I. ROKUJIBU, called, sworn, for claimant.

Mr. BIGELOW. What position did you occupy?—A. At present?

Q. What position did you occupy, if any, at the time of this fire?—A. I was assistant preacher.

Q. In what church?—A. In the Japanese Methodist Episcopal Church.

Q. The one that is putting in this claim, the same church?—A. Yes, sir.

Q. Where were you employed in your position as assistant to the pastor?—A. At the parsonage.

Q. Do you know about the value of these articles here in the Schedule B?—A. Yes, sir.

Q. Now, I will ask you about this first item—one cot bed and bedding—what have you got to say about that?—A. This cot was occupied by me. I don't know how much was paid for it in the store, but in the store \$4 or \$5 new. Cot and bed, and besides there was a quilt on top of the bed, so that it was worth more than \$5. Anyway, we put that down for \$2.50.

Q. What sort of a cot was it?—A. It was a canvas-made bed.

Q. One of these cross-legged cots?—A. It has a spring mattress.

Q. A spring?—A. Yes, sir, and a mattress on top and two blankets.

Q. Well, now, take the items accidentally throughout. Well, you have got here four tables—\$4, what about those?—A. Those four tables were used by four different persons. I was one of them. And new they were \$2.50 and \$3, and one used by the clerk was about \$1.50. We just took the average and then put it down.

Q. Did you buy them second handed?—A. I don't know whether they were new or second handed.

Q. Now, take this item, 24 chairs at \$1.25, what do you say about that?—A. The 24 chairs were made out of some strong wood; it was quite new, and new I think they would cost \$1.50 apiece.

Q. What sort of chairs were they, like these chairs?—A. Where you sit down, hollow here.

Q. What did you say they were worth, \$1.50?—A. Apiece when new. I had occasion to buy myself, to buy that same furniture in the furniture store, and I know how much these things are worth now.

Q. Where and when have you bought, and for what purpose have you bought chairs?—A. Some time, for instance, some last year I bought several chairs for the Makiki church and I paid \$1 for each of them, and there were several stronger ones and they asked \$1.50.

Q. Now, how about these 48 chairs at 70 cents apiece?—A. These 48 chairs are cheaper than the 24 chairs; this was refurnished just before the fire and they undoubtedly cost more than \$1.50 when bought new.

Q. How much did the refurnishing cost?—A. I can't tell you; I can find out what I paid.

Q. How long had these chairs been in use at the time of the fire?—A. I can't tell; it was before my time. I didn't buy them; my time there was about five months before the fire.

Q. Were they there at the time when you came in?—A. Yes, sir.

Q. How about these 34 yards of straw matting at \$10.20?—A. Well, that was donated by Mr. Towaski; it was spread down at Christmas time, in 1899, and right after it was spread down the fire burned it up; it was brand new.

Q. Do you know how many days it was there?—A. It was the longest about a month, only a month; it was burned on the 20th.

Q. Do you know what that matting cost, the price new?—A. I can't tell you.

Q. You say that was given by Mr. Towaski?—A. Yes, sir.

Q. Do you know anything about this church organ set down here at \$55?—A. Well, the organ looks in a very good condition.

Q. Do you know what it cost?—A. I can't tell you, it was before my time.

MR. PRATT. I would like to ask as to this valuation, the valuation which has been put upon this property that is in this claim, if they arranged this claim and passed upon it in the church, that is all of this property, more especially the church property, or if they put in the valuation regardless of the church's desire?—A. Each one of the claimants knew of it and assisted.

MR. BIGELOW. Is this the valuation fixed upon—that is, has this been submitted to the consulate and the valuation fixed upon by the church or, in other words, has it been gone over and thoroughly passed upon by the Japanese consulate?

A. I am not positive about that. I don't know.

Cross-examination:

MR. DUNNE. As a general proposition you know nothing about the original cost price of these articles, do you?

A. No, sir.

Q. And when these amounts were put down you were simply putting down your best judgment as to the value of the articles at the time of their destruction, was it?—A. I didn't put any valuation. I think it is not my work.

Mr. PRATT. Who did fix the price, the valuation?

A. First in the church and then referred to Kihara to see, and he showed it to the members of the church.

Q. When Mr. Kihara made up the valuation did he call in the assistance of the consulate?—A. I think he went; I can't say, I don't know.

H. KIHARA, recalled:

Mr. BIGELOW. Who made up this valuation, Mr. Kihara; who figured that up?

A. Our treasurer and the board of trustees, and also I got it up and we presented it to our board of trustees and the trustees approved of it.

Q. Who are the trustees?—A. Nine of them, the board of trustees.

Q. Who are they?—A. At that time I don't remember who they were, five or six together.

Q. Well, name those that you do remember?—A. Mr. Pearson, Mr. Ripley, Mr. Kawaski, Mr. Ressmalt, Mr. Paty, Mr. Kebayashi, and Mr. Takashi.

Q. Do you know whether Mr. Pearson and Mr. Ripley were present when this schedule was presented?—A. Yes, sir; I think Mr. Pearson was present, I don't remember about Mr. Ripley.

Q. You don't remember one way or the other as regards to Mr. Ripley?—A. No, sir.

Q. But Mr. Pearson, you say he was there?—A. He was chairman.

Q. In figuring these amounts will you tell the commissioners how you figured out these amounts?—A. Mr. Kawaski, he is a merchant, he knows the price, and the lawyer consulted with him about the price.

Q. But it was really Mr. Kawaski who made the accounts and did the figuring?—A. Yes, sir; I talked with him about the price and the things and then the claim was submitted to the trustees for their approval of this claim.

Q. Was the claim submitted to the Japanese consulate?—A. No, sir; the Japanese consulate never touched on our claim.

Q. That is, the claim has never been submitted to the Japanese consulate?—A. No, sir.

The INTERPRETER. He says, got approved by the consul.

Q. Was it approved by the Japanese consulate?—A. Yes, sir; that was presented to the Japanese consulate.

Q. Was or was not this claim submitted to the Japanese consulate and approved by them?—A. Yes, sir.

Q. When?—A. Last year, in July some time.

Q. They made it up and submitted it to the trustees?—A. Yes, sir; at the time they approved it they made this claim.

Q. How soon—you submitted it to the trustees after it was submitted and approved by them, then it was submitted and approved by him; is that correct?—A. First we presented it to the board of trustees, and then we took the claim to the consulate.

Q. Did they approve of it?—A. Yes, sir; they said it was a very close claim.

Q. The consul thought this was a very nice claim?

The INTERPRETER. I can't express it very well; he says, "That is good."

Q. Are you the person that did the actual figuring on this?—A. Yes, sir.

G. L. PEARSON, called for the claimant, sworn:

Mr. BIGELOW. Are you a member of the board of trustees of the Japanese Methodist Episcopal Church in this city?—A. I am.

Q. You were such when the schedule was made up of the fire claim?—A. Yes, sir.

Q. Will you state to the commission what part you took preparing and considering these schedules?—A. We had Mr. Kihara, the secretary of the board of trustees, to furnish the items, give us an itemized list, and the board of trustees were called together, and Mr. Ripley was present and myself. We then went over each item carefully, investigating it item by item as to the probable value of the property, getting at the cost as near as we could and reducing every article below what was the cost, endeavoring to make a fair valuation at the time of the burning. After going over every item carefully, I think six or seven times carefully, maybe eight, we made this as final: I asked Mr. Kihara whether the consul went over these and put the valuation on this or not. Not speaking English, he didn't just understand, when he said that the consul had nothing to do with this about the putting of the valuation on this property; it was and then filed with the fire commissions; it went in that way and it is approved, and that is the way that this valuation has been put in on these articles: that is the way I understand it. That was our investigation; we considered that was the probable value of the property at the time they were destroyed by the fire.

Q. Could you say—do you or not say these figures as set down here represent the cut?—A. They represent the price, the valuation—the valuation of the goods at the time—and it was explained to the most of the Japanese that were present at the time, as the value of the things. It was an honest valuation. As to what was said at the time, the most of that is down on the record; it was written down at the time the statements were made and are upon the written record.

Cross-examination:

Mr. DUNNE. Have you seen these articles yourself?

A. I have seen a great many of them. The chairs—those for \$1.25—those were chairs that Mr. Waterhouse bought and donated to them; they were ordinary chairs, wooden, with backs; and they purchased other chairs which they paid 75 cents for, and some since that purchased for \$1. They were only used two or three times, so that they were not hurt at all, and put in at \$1.25, so we consider it to be very reasonable and fair, although we didn't have the actual figure before us.

Q. Are you familiar with the care of these premises?—A. Quite fairly so; I visited the church quite frequently, so that I know the furnishing and the furniture on the inside of the church, and I know it has had careful use and so did the parsonage.

The most of the time there was just the room; they were used by gentlemen; they did part of the time; they had cooking utensils there and such things, but they were not used; I think everything was in good shape; they made the purchase of those articles themselves.

Q. In the Schedule B, did you purchase those articles?—A. No, sir. I didn't have anything to do with that.

Q. Who was the person that did that purchasing?—A. I guess they were purchased—I can't say—I think the parson himself; I suppose

Mr. Kihara purchased a great many of the furnishings for the rooms—the officers of the church, the treasurer, and Mr. Kihara.

Q. Perhaps the larger portion of these articles were donated, were they not; or do you know?—A. I should think likely that they were; I don't know; I know that some of them were donated.

Q. I call your attention to the item "hymn book." Can you remember anything about that?—A. Put in at \$21. Some of the hymn books, as I remember, were big, such as are printed in the Japanese language, with a mixture with the English; and I saw English books, and some of the books with no translation; I don't know how many of them there were; the books were of a different character; I don't know what they cost; they were practically new books; they were purchased in Japan and brought over here.

Q. Were those books bound books?—A. A large portion were bound books; I don't know how many.

Q. Did you say anything about whether you could recollect about the purchase of those?—A. No, sir; I don't think that I purchased any of them.

Q. Do you see anything on that list that you can recollect that you purchased?—A. No, sir; I don't think there is anything. I furnished some of the money to purchase some of these things. I turned it over and they did the purchasing; and they used money of their own also.

Q. As a matter of fact, Mr. Pearson, this schedule of articles and the values is the best that you could make on those values?—A. Yes, sir; from the carefulness with which we fixed those articles at that time, that is their actual cost.

Q. Still it is your best guess?—A. Not all the items; some of the items would be guesswork and some of them were figured pretty close.

Q. That matting?—A. That was new matting and there was pretty near \$2 dropped off of that, I think.

Q. The next item, the church organ, \$10?—A. That cost something to get it down here.

Q. Fifty-five dollars. Was there service being held there at the time of the fire, and was the organ in use?—A. That is my recollection of it.

Redirect examination:

Mr. BIGELOW. You are a business man here in town?

A. I am pastor of the English Church, Methodist. I have charge of the work among the Japanese, so I have got the supervision of this work.

Q. And have had more or less experience in this kind of furniture?—A. Yes, sir; I turned these items over when they purchased them and I have estimated, and believe it to be a very conservative estimation, at the time of the fire.

The CHAIRMAN. One double bed, iron frame, and bedding; do you recollect seeing that?

A. Yes, sir.

Q. What kind of a double bed was that?—A. Why, an ordinary double bedstead—double width, for two persons.

Q. An iron bedstead?—A. Yes, sir; and had brass knobs on it.

Q. It was a good iron bedstead?—A. Yes, sir.

Q. And had mattress on there?—A. Yes, sir.

Q. Spring mattress on it?—A. Yes, sir.

Q. And a hair mattress?—A. I don't think it was a hair mattress;

I wouldn't say; but it was a good mattress—I don't know whether it was a hair mattress or not.

Q. Then the fourth item, "One double bed frame," \$20. What kind of a bed was that; similar; \$20? What kind of a bedstead was that?—A. Well, I suppose that to be a wooden bedstead, an ordinary wood frame instead of iron; instead of iron, a wooden frame.

Q. What kind of a bed? Do you recollect what kind of wood it was?—A. I think it was an ordinary wooden bedstead.

Q. Was there any spring mattress?—A. That spring mattress was separate.

Q. There was no spring mattress?—A. Not as I remember.

Q. You couldn't get it with the bedstead for \$20?—A. I hardly think so, with the bedding.

Q. Was the mattress, the blankets, and quilts attached to it?—A. Yes, sir.

Q. That belongs with the bedding?—A. Yes, sir.

Q. Now, then, here is an item of furniture and all the articles in the kitchen and bathroom, \$50. What was in there; have you any idea?—A. I don't know what the items were; I can't swear to the bathroom and the bath tub.

Q. Was that a porcelain bath tub?—A. I don't know; I never was in it.

Q. Those chairs, 24 chairs and the 48 chairs; those were donated by Mr. Waterhouse?—A. Yes, sir; those chairs were wooden chairs.

Q. And the value is an estimated value?—A. That is all.

MR. PRATT. As a matter of personal knowledge you don't know whether these goods, any of them, were saved or not?

A. No, sir; not of my own personal knowledge. I was not there.

Q. Any of them ever come into your hands again?—A. No, sir; just a few little things were saved, two or three little things.

Q. None of these things has ever come back into the possession of the people?—A. No, sir; I should say none of—if it had I would have heard of it.

K. KAWASAKI, recalled:

MR. BIGELOW. You are the treasurer of the Japanese Church, the Methodist Episcopal Church?

A. Yes, sir.

Q. Did you have anything to do with the making out of this itemized Schedule B in the fire claim?—A. Yes, sir.

Q. Where were the various articles bought from, donated, purchased, or how did they get them?—A. Some were bought and some were donated.

Q. Can you tell which of these articles were purchased by the church, or by you, or given to the church? Can you tell us some?—A. I can't tell you all of them.

Q. How about this 34 yards of matting?—A. It was a donation from my store.

Q. How much did it cost as new matting?—A. Thirty-five cents a yard.

Q. Can you give us any explanation as to any—as to this first item as to this item, the kitchen and the bathroom and the furniture and all the articles therein?—A. I can't tell exactly every one; some of them in the kitchen and bathroom—some I could tell, not all.

Q. Do you remember about the tub?—A. Well, I remember the bath tub and all of those things.

Q. What kind of a tub was it?—A. It is a galvanized tub, large tub.

Q. Is it porcelain lined or not?—A. No, sir.

Q. Now, what else was there?—A. Wash basin.

Q. What do you remember that was in the kitchen?—A. Table, chairs, plates, cups, and stove—a small kerosene-oil stove.

Q. What books?—A. I don't remember.

Q. Were there pots, pans, kettles, and dishes, and all that sort of thing?—A. Yes, sir; all of these kitchen utensils.

Q. The parsonage— A. Mr. Kihara can testify about the contents of the kitchen and the bathroom.

Q. How about these chairs, the 24 chairs; do you know anything about those?—A. Well, the chairs were there; they were large chairs; I don't remember very well which chair you mean. In the parsonage we had chairs.

Q. Twenty-four chairs at \$1.25 apiece?—A. I know the large chair—I know there was large chairs, and I believe it was \$1.25 apiece.

Q. Do you set this value on them?—A. That is all that I know, I'm a member of the board of trustees.

Q. What business are you in?—A. A store.

Q. What sort of a store do you keep?—A. General merchandise and provisions, and the value of the chairs I am very well acquainted with, because I handle so many. I am an importer and I buy things for people on the other island, and I know I am acquainted with them.

Q. Do you know anything about these 60 hymn books at \$21?—A. I remember about the size.

Q. Can you give any light on the subject as to their value?—A. Thirty cents.

Q. That would be \$18, and you have got it here \$21.—A. I remember that it was over 30 cents.

Q. How big were the books; how many pages?—A. About that thickness [indicating].

Q. Were they bound or not?—A. Yes, sir; with stiff covers.

The CHAIRMAN. This wash basin in the bathroom; was that a marble washstand or basin or only a porcelain washstand or basin; what was it?

A. It isn't a marble washstand; they enameled iron basins; there were several.

Q. They were to put on the table to wash from?—A. Yes, sir.

Mr. PRATT. Did you testify that you could fix the valuation at all, or had anything to do with the fixing of the value on this property in making up this schedule, carrying out the values of each of these articles?

A. Yes, sir.

Q. Does this schedule represent the price that you fixed at the time; was the price in this schedule the price that was fixed at the time?—

A. Yes, sir; the same; no change.

Q. It is the same as when you first figured?—A. Yes, sir.

Q. Were they changed at all by the board of trustees?—A. Some of the items; one thing was; for instance, when I would state that the item is worth a dollar, and sometimes when the board of trustees approved of the same proposition, they would go down cheaper, for such a reason; that was the way with several of them, and my appraisements were cut down; there is no article much in excess of 1 per cent.

Mr. BIGELOW. Do you remember as to the chairs?

Mr. PRATT. As to the making of this schedule in its entirety.

A. It has not been changed since.

Mr. PRATT. I am trying to get at the man that fixed the values.

Mr. BIGELOW. Evidently done by two or three men working together.

Cross-examination:

Mr. DUNNE. Did you see the fire burn down this church?

A. I saw it from the quarantine.

Q. How far away from the church were you at the time of the fire?—A. I was out at the detention camp at Kalihi; I could see the fire at that place.

Q. And you saw the fire burn down this particular church?—A. Not the regular church; it burnt the church; the fire done it.

E. YASUMORI, called and sworn.

Mr. BIGELOW. Are you the person that gave the magic lantern and the 126 pictures?

A. Yes, sir; I believe I am, sir.

Q. How much did you pay for the magic lantern?—A. I bought that originally in Japan; I bought them and paid 50 yen.

Q. That is \$25?—A. Yes, sir.

Q. Well, now, how much did you pay for the pictures?—A. Twenty-five yen for the pictures (\$12.50).

Q. Is there anything else?—A. There is a curtain, two and a half.

Q. Two and a half yen or dollars?—A. Two dollars and a half, two yen and a half, a dollar and a quarter.

Q. How much did you have to pay for bringing it over here; back?—A. Five dollars to the custom-house for it.

Q. Was there anything else about it; any other items about the lantern?—A. Nothing, only I paid \$5 at the custom-house; that is all. The things were \$30.

Q. Did you submit it to the trustees, so that the information went before the board of trustees?—A. Yes, sir.

Q. Do you remember that you told them, just as you have told us what the thing cost, just as you have told us?—A. Before the trustees at the meeting of the trustees, I told them what it cost me, and, judge, after two years and a half, it would be worth \$30.

Cross-examination:

Mr. DUNNE. What condition was it in at the time when it was burnt?

A. Nothing broke; in good condition.

Q. Are you one of the trustees of the church?—A. Yes, sir.

I. ROKOJUBU, recalled.

Mr. BIGELOW. Do you know anything about the contents of the kitchen and the bathroom up at the parsonage, as to what articles were in there; what is that list?

A. That is a memorandum that I made.

Q. When did you make it up?—A. It is only a copy; it is a copy from my full list which I made up for the trustees.

Q. When did you make it up?—A. About June of last year. I can say very well, but about June of last year.

Q. Well, go ahead and tell us what was in the bathroom and kitchen.—A. Some shelving, \$5.

Q. What sort of shelving was this?—A. One shelf, \$5.

Q. What sort of a shelf was it?—A. That is \$5 that it cost; the lumber in the shelving, and it cost \$5.

Q. That includes the cost of putting it up?—A. The cost of the lumber; just simply the material.

Q. What was the condition of these shelves at the time of the fire?—A. Right before the fire all new.

Q. Just new?—A. Yes, sir; and about 20 bowls.

Q. How much were those?—A. About \$5; some of them were good ones and some of the cheaper; the 30 bowls, \$3.

Q. What sort of bowls; china or wooden, lacquer or what?—A. The ordinary ware, china ware.

Q. Who bought them and where did you get them?—A. From several parties; we bought them of several parties.

Q. What was the condition?—A. Some were new and some second-hand.

Q. Some were new, you say?—A. Yes, sir.

Q. What were the secondhand, cracked or nicked—the old ones; in what condition were they?—A. There might have been some of them cracked, forty large plates, assorted size, some old and some new, \$4; stove, oil stove, four oil stoves, one dozen cups, and dozen knives and forks, \$1.50; four cups, pitcher and cups, a Japanese pitcher and cups.

Q. Well, how big are those cups; did you buy them?—A. I can't tell.

Q. Were they new or secondhand?—A. Secondhand; they were used up there.

Q. Do you know what those cups cost new?—A. There was one big pitcher, it would be worth a dollar, new.

Q. Then, there are three others?—A. Yes, sir, three; there is four altogether.

Q. All right.—A. One dozen cups and saucers.

Q. How many?—A. One dozen cups and saucers, \$4; one whole set, one teapot, and one sugar bowl.

Q. Is that new or secondhand?—A. They are used every day.

Q. Did they buy it or was it donated to them?—A. I can't tell you, I don't know. A half a dozen bowls, \$1; although I know there was more than a half a dozen; they may have only had a half a dozen.

Q. You know that there was more than a half a dozen?—A. Yes, sir.

Q. Two chairs, \$1.50, and one table, \$1.50; two large pots, \$2?—A. Yes, sir.

Q. What were they used for, cooking vegetables?—A. Boiling water and cooking rice.

Q. Show how large they were.—A. Large, like that [showing].

Q. How high?—A. So high [showing]—iron pots. Two small pans, used for cooking, \$1.50, and table stands—a half a dozen, and a half a dollar tea stand; silver-plated nickel, twenty-odd spoons, \$1; three large pitchers, \$1; ten thin tumblers, \$1; ten cups, \$1.50; china cups, \$1; one kettle, 50 cents; two pans, \$1; one alarm clock, 50 cents; four water buckets, two large galvanized-iron tubs.

Q. What were they used for?—A. For washing clothes; two buckets for washing in, \$1; one large box of rice, \$1. These were utensils used by these people.

Q. Now, where were these, in the kitchen or in the kitchen and bathroom?—A. In both places.

Q. Was there a bath tub in the bathroom?—A. Yes, sir; and in the bath tub there was those two galvanized tubs—no regular bath tub.

Q. Now, then, this list that you have given us included everything in the two rooms that you have estimated at \$50?—A. Yes, sir; that is all.

Q. Was this list that you have given us—was that the itemized list that you submitted to the board of trustees?—A. Yes, sir.

Q. Did they go over it, item by item?—A. Yes, sir.

Q. Did they take your figures or cut them out?—A. The trustees never changed it—that is, my original figures.

Mr. PRATT. How long after the fire was this list made up?

A. About four or five months after the fire.

Q. Made up entirely from memory?—A. Yes, sir; there are stacks of things which were not put in there which I remember now, but it is too late.

Q. What were those things?—A. One thing, I remember one pillow which we made no claim for; that was also burned, and there was a door mat which was left out; all of those things were left out of the list.

Q. How many clocks did you have in there altogether?—A. Two in the parsonage, and a large one, and the one in the kitchen; that is all.

Cross-examination: *

Mr. DUNNE. Were you there when the church burned down?—A. Yes, sir.

Q. Did you see the church burn down?—A. Yes, sir.

Q. How far were you away from the church when the church burned down?—A. Just outside of the church.

Q. Did you see how the church took fire?—A. I don't know. I didn't see how it started.

Q. How far away from the church was the main fire when the church took fire?—A. The church was burnt down by the main fire, not by separate fire; somebody tried to set the church afire for the purpose of preventing the fire going over, but they failed, for it was in the big fire and finally the big fire consumed it.

Q. Well, was any kerosene poured on it—poured on the church?—A. I heard so; I didn't notice it myself.

Q. Was any effort made by any of these people to save anything that was in the church or part of the building?—A. Yes, sir; we tried we just got a few things moved; that is all.

Mr. DUNNE. Didn't you see the main fire long enough before reached the church to permit you to make an attempt to stop it from burning down the church?

A. Well, this fire, I never thought, for my part—I never expected that this fire would come here so near to the church; and another thing, there was several Japanese out of the church who belonged to the church, the inspector of this quarantine business, and a few other persons was around the church.

Q. But when you saw this fire approach this church, why didn't you run in there and at least save the most valuable of these articles—for instance, this magic lantern and the clock and such things—why couldn't you run in and save them?—A. Well, we tried to save, and we did save some; we saved some books and also our trunks.

Q. But what I am getting at is this—this was a progressive fire

wasn't it? It commenced some distance and kept working up toward the church and finally burned the church. What I want to know is, why didn't you protect yourself and the church against loss and damage by going into the church and removing these articles; when you could see this main fire gradually and surely working its way up to your church, why didn't you utilize that time to protect yourself and the government from loss?—A. This fire—as soon as I saw the fire take the Italian church, I then saw that the church was bound to go. I then commenced to pack. We had only one person to assist us in the packing, Pakashi. There was a large assembly in the church; the inspectors were there. They were not supposed to assist in packing; they were for saving the people that were there. They never expected that the church would be burnt; they never expected that the fire would reach them. They were in the way and they couldn't assist, and the people in the church started to pack things out and sending out the trunks. So; you see, in that confusion we were doubtful in saving the goods, what we did not save. All the rest of them were burnt. We saved some.

Q. When you saw that fire coming there, couldn't you, an active man, have saved every one of the articles in Schedule B in fifteen minutes—couldn't you have got them out of the premises?—A. Some of them were carried out to the sidewalk and there burned and some of the goods were saved.

Q. Well, have you made any claim for personal effects of yours that were burned at that church?—A. No, sir.

Q. You spoke of your personal effects, didn't you?—A. I saved some books and two cases and the rest was burned. I didn't put in any claim against the government.

Q. Has anybody put in any personal claim against the government for the destruction of goods at the time that this church was burnt?—A. Nobody in the church put in his personal claim for his belongings.

Q. So the only claim is for this handful of articles which were on these premises when you could see this fire approach from the distance?—A. Well, the time was very short when we arrived at the church. When we started it was too late; we couldn't save anything.

Q. Why was it that you didn't try before it got to be too late, as a prudent man?—A. We didn't know that the fire would come to the church; when we realized that it would, it was too late.

Q. What time of day was it when the church actually took fire?—A. There was so much excitement I can't remember.

Q. But you can remember the hour and the day when you saw the tower of the adjoining church fall down?—A. It might have been 2 or 3 o'clock in the same afternoon.

Q. When the church burned down; is that right?—A. Yes, sir; about 2 or 3 o'clock.

Q. Now let us have no misunderstanding. Am I to understand that you testified that it was about 2 or 3 o'clock in the afternoon when your church burned down?—A. Yes, sir.

Q. And at least two hours before that you saw the other church, the same of which escapes me, and the fire was there, and this tower fell down at least two hours before that?—A. Yes, sir.

Q. Now, during those two hours you saw, then, that the fire was approaching, why didn't you, as a prudent person, protect these few things—with an active man you could have taken them out—you had

fifteen minutes?—A. Well, there was only two persons, as I told you before—only two persons besides me that knew where the books were; we started to take the things out as soon as we were sure the fire was approaching; we then sent out for boxes to pack the books in, and we packed them out; in the meantime the fire came.

Q. Was this church of yours within the quarantine district at the time it was burnt?—A. Yes, sir.

The further hearing of this matter is continued until 2 o'clock this day.

AFTERNOON SESSION.

Mr. BIGELOW. To prove the statement that I made to the court, that I intended to urge and I expect to introduce evidence on that point, and I have come here now fully prepared if the court desires to go into the question very generally or as regards this particular case as to the validity of the claimant on the 20th day of January, the day of the big fire, to remove their goods from the quarantine district; and as I say, I am perfectly willing to go into any part and show who was here at that time that the fire was bearing down toward the church, that ours is not a position of blame on that day. We claim we have a perfect right to go into all of that question; if it is the desire to go into it I am ready to go on and put the evidence in on that point, otherwise I submit it, as it is a waste of time.

The CHAIRMAN. I think the contention of counsel for the government, as I understand with the witness, is correct and proper. I think it should be the object and the duty of the government counsel in every case to show whether or not any number of persons whose property was destroyed to get it out, but in this particular instance I think the fire was raging. I wasn't here; I was in California at the time. I am not any more able to speak upon the facts than Mr. Dunne is. I only know from discussing it with the commissioners since adjournment. There was a confusion of all kinds, and goods were lost. It may have been the lack of good judgment, and, sir, I think it might have been the case in this particular case. But I think it is right and proper for the government wherever they think there was willful negligence on their part to save the goods. I think it is a point that the government could well dwell on, and bring it out in the various cases where such is the case. In this particular instance I have consulted with some of my colleagues, and speaking in this particular case I don't think there was any negligence, and I think in all of these cases when the government refers to negligence, why it will certainly be taken up but in this case it is different.

The statement or what has been substantially stated, it is not evidence only I think to preserve it on the record; I think that the record should show that this property was not in the quarantine district.

I think we ought to make it appear what the quarantine limits were at the time; if it can be shown, it can be shown later on.

Mr. PRATT. This property is within the quarantine limits and on account of the plague the property might be lost; it should show as matter of record.

H. KIHARA, recalled.

Mr. BIGELOW. Where was your church situated?

A. On River street.

Q. Between what two streets?—A. Between Beretania street and Kokuiki street and Queen street, and from Nuuanu and River street.

Q. When was the quarantine established?—A. It was —

Q. Do you know the dates?—A. The first quarantine started about the first of December.

Q. Of what year?—A. 1899; the first of December, 99, about the 20th or 21st of the same month. The 11th or 12th of December the second quarantine started—from December 28th to some time in February to the month of February of the next year.

Q. At the time this fire took place was the quarantine on?—A. Yes, sir.

Q. And your church was in the quarantine district?—A. Yes, sir.

Q. Do you know of any particular instance where parties were refusing to move goods from the quarantine district?—A. I can't tell.

Q. You can't tell of any particular case, is that what you mean?—A. Yes, sir; I don't know; I can't tell particularly.

Q. You know as a matter of fact they were not allowed to, but you can't tell any particular case; is that it?—A. Yes, sir.

Q. That is correct?—A. That is correct.

Q. By what order—on whose order was that quarantine established?

Mr. BIGELOW. Do you know by whose order that quarantine was established?

A. I believe it was the board of health; by order of the board of health.

Q. Do you know for what purpose it was established?—A. I believe to prevent the plague from spreading.

Here the testimony is closed.

SCHEDULE B.

Fire claims of the Japanese Methodist Episcopal Church of Honolulu against the Territory of Hawaii.

Name, board of trustees, Japanese Methodist Episcopal Church of Honolulu; president, G. L. Pearson; secretary, H. Kihara.]

Church and household furniture and utensils:

1 cot bed and bedding	\$2. 50
1 one-third bedstead with bedding	18. 00
1 double bed, iron frame, and bedding	25. 00
1 double bed, iron frame	20. 00
4 oak chairs	6. 00
1 armchair	4. 00
1 rocking-chair	2. 00
4 tables	4. 00
1 folding screen	4. 00
The furniture and all articles in kitchen and bathroom	50. 00
1 church organ	55. 00
24 chairs, \$1.25	30. 00
48 chairs, 75 cents	36. 00
1 table	3. 00
5 desks and tables	7. 50

Jewelry of all kinds:

Parlor clock	6. 00
1 large clock	8. 00

Property not included in this schedule:

34 yards of straw matting	10. 20

1 flower vase, medium	1.50
1 flower vase, small	2.00
The articles to be used for baptism and Lord's Supper	5.00
3 blackboards	4.00
1 garden hose	6.00
1 violin	10.00
Cost	415.00
Claim	415.00

SCHEDULE O.

Fire claim of Japanese Methodist Episcopal Church of Honolulu against the Territory of Hawaii.

[Name, board of trustees, Japanese Methodist Episcopal Church of Honolulu; president, G. L. Pearson; secretary, H. Kihara.]

Date of destruction by fire, January 20, 1900.

Location of buildings, river at Waikiki side, between Beretania and Kukui street.

Description of buildings, one church, wooden, one story, 30 by 55 feet, partitioned into three rooms by folding doors. One dwelling house (parsonage), one story, by 48 feet; bathroom attached; veranda one side, wood, 5 feet wide. Small frame outbuilding, water-closet. Fence, 50 pickets; about 150 feet common board fence.

Cost of these buildings:

Church and fixtures	\$2.10
Parsonage and fixtures	5.00
Fence and water-closet	1.00

Claim	2.60
	2.60

SCHEDULE O.

Date of construction of buildings: Church, July-August, 1898; parsonage, November and December, 1898; owner of lot, Japanese Methodist Episcopal Church; owners, claimants are the owners; insurance, Union Insurance Society of London; amount of policy, \$1,500, church building; \$250, parsonage; total, \$1,750.

STATEMENT OF CLAIM.

The Japanese Methodist Episcopal Church, a corporation organized and existing under and by virtue of the laws of the Territory of Hawaii, respectfully presents this statement of claim and alleges: That its principal place of business is at Honolulu, island of Oahu, Territory of Hawaii; that it was the sole owner on the date herein after specified of the effects and property set forth in the schedules hereto attached marked exhibits A, B, and C*; that the value of said property at its cost price is set fourth upon said schedules opposite the items thereof; that the said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in wooden church and parsonage building on River street, in said Honolulu.

That said loss consisted in part of the destruction of the building more particularly described in Schedule C; that the name of the owner of the land whereon said building stood is Japanese Methodist Episcopal Church, and the nature and interest of this claimant in said building, owner of ground and buildings.

That said property was insured, for church \$1,500, parsonage \$250, in the name of claimant, and none of said insurance has been paid by Union Insurance Society of London, the insurer thereof.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

H. KIAHARA, *Secretary.*

TERRITORY OF HAWAII,
Island of Oahu, ss.

H. Kihara, being first duly sworn, says that he is an officer of the Japanese Methodist Episcopal Church, the above-named corporation, to wit, secretary thereof; that he knows the contents of the foregoing statement of claim and of the schedules thereto attached, and that the same are true of his own knowledge and belief, and as to the statements of others he believes them to be true.

H. KIHARA, *Secretary.*

Subscribed and sworn to before me this 27th day of May, A. D. 1901.

J. M. RIGGS, *Clerk.*

*RULE XIV. In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked Exhibit A, and all claims for losses for personal belongings, jewelry, household furnishings, and other chattels upon a schedule to be marked B, and for all losses appertaining to buildings or building fixtures upon a schedule to be marked Exhibit C.

[Endorsed.]

No. 7. Fire Claim Commission. Claim of Japanese Methodist Episcopal Church, a corporation. Amount, \$3,097.70. Filed May 27, 1901 at 11.25 a. m. J. M. Riggs, clerk. Presented by Kinney Ballou & McClanahan, attorneys.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above, before the fire claims commission.

C. F. REYNOLDS,
Official Reporter.

Subscribed and sworn to before me this 11th day of October, A. D. 1902.

H. C. CARTER,
Notary Public, First Judicial Circuit.

[SEAL.]

EXHIBIT No. —.

Before the Fire Claims Commission, claim of Choy Chin, No. 10.

HONOLULU, HAWAII,
Friday, July 26, 1901, 10 a. m.

Commission all present with the exception of Mr. Testa.

Appearances: Mr. F. M. Brooks for claimant, Mr. Ed. Douthitt for the Government.

CHOY CHIN, claimant, being first duly sworn, testified as follows:

Mr. BROOKS. What is your name?

A. My name is Choy Chin.

Q. How long have you been in this country?—A. About twelve

Q. What is your occupation?—A. My occupation at the time of the fire January 20, 1900, was storekeeper.

Q. Where did you live at that time?—A. I lived on Maunakea in the rear of Chong Gan Chee.

Q. You lived then in the store of Charles Ah Foo?—A. Yes.

Q. You have presented a claim here for personal effects that were lost; were they lost in the big fire of January 20, 1900?—A. Yes.

Q. This claim that you presented is for \$103.06; is that correct?—A. Yes.

Q. I notice that you have a dictionary at the bottom of the first page \$3, and one dictionary \$5. What did that three-dollar-dictionary cost?—A. Five dollars; I have asked \$3; and the one I asked \$5 for cost me \$7 for it.

Q. Did you lose all these personal effects in your claim in the fire?—A. Yes.

Q. Was there any insurance on this stuff?—A. No.

Q. Were any of these goods recovered that you ask for?—A. Nothing.

Q. As to the different articles besides the dictionaries, what prices have you placed—first cost price or less than cost price?—A. All cost price.

Q. You put it in at the price it was bought?—A. Yes.

Q. What was the condition of these goods as to being worn or otherwise as compared with them when you bought them?—A. All good condition.

Cross-examination:

Mr. DOUTHITT. Have you allowed any reduction for the use, wear and tear of these different articles?

A. Besides the dictionaries every article was marked cost price.

Q. How long did he have these articles?—A. Several of these items are new.

Q. But how long had he had most of these articles?—A. The longest I have is about a year.

Q. Is he a married man?—A. No.

Q. Was this claim submitted to the Chinese consul?—A. I filed with the United Chinese Society, but I withdrew it and filed it myself. Proceedings here closed.

EXHIBIT B.—Choy Chin, of Charles Ah Foo & Co.

1 single iron bed	\$6.00
1 mattress	1.25
2 sheets	1.00
1 wool pillow	2.00
1 red blanket	9.00
1 mosquito net	2.75
2 pairs colored woolen pants	11.00
1 Chinese style woolen coat	5.00
1 woolen coat	8.00
4 dozen undershirts	2.40
4 pairs drawers	1.60
8 shirts	6.00
4 dozen neckties	1.20
1 pair brown shoes	4.50
1 pair black shoes	4.00
1 pair congress shoes	2.25
1 pair storm slippers	1.00
1 dozen black socks	1.25
1 umbrella	2.00
1 straw hat	1.75
1 leather trunk	2.50
2 Chinese style silk coats	6.00
2 pairs Chinese style silk trousers	4.40
1 Chinese accordion	5.00
1 pair Chinese satin shoes	1.25
1 Mr. Chuck's English and Chinese dictionary	3.00
1 Mr. Kong's English and Chinese dictionary	5.00
1 common school dictionary	1.25
1 high school dictionary	1.25
Total	103.60

STATEMENT OF CLAIM.

Choy Chin, the undersigned, claimant, respectfully represents that he is a resident of Honolulu, H. I.; that on the date of the loss hereinafter specified he was the sole owner of the effects and property set forth in the schedules hereto attached, marked Exhibits A, B, and C.; that the value of said property at its cost price is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in that stone building on Maunakea street, block 13, in said Honolulu, Territory of Hawaii. * * *

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, or for any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

CHOY CHIN.

TERRITORY OF HAWAII,
Island of Oahu, ss:

Choy Chin, being first duly sworn, says that he is the claimant above named; that he knows the contents of the foregoing statement of claim

and of the schedules thereto attached, and that the same are true of his own knowledge, except as to such matters stated on information and belief, and as to those matters he believes them to be true.

CHOY CHIN.

Subscribed and sworn to before me this 27th day of May, A. D. 1901.

[SEAL.]

F. M. BROOKS,
Notary Public.

* RULE XIV.—In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

[Indorsement.]

No. 10. Fire Claims Commission. Claim of Choy Chin. Amount. \$103.60. Filed, May 27, 1901, at 1.55 o'clock p. m. J. M. Riggs, Clerk. Presented by F. M. Brooks, Attorney.

HONOLULU, HAWAII, *October 11, 1902.*

I hereby certify that the foregoing typewritten matter is a full and true copy of my shorthand notes of the testimony given and proceedings had, before the Fire Claims Commission, in the matter of Choy Chin, Claim No. 10, at the place and on the dates therein mentioned, and transcribed by me.

And that the exhibits hereto attached are true copies of the originals on file with Fire Claims Commission.

P. MAURICE McMAHON,
Ex-Official Stenographer, Fire Claims Commission.

Subscribed and sworn to before me this 14th day of October, A. D., 1902.

[SEAL.]

H. C. CARTER,
Notary Public, First Judicial Circuit.

EXHIBIT No. —.

Fire Claims Commission, claim of S. Ozaki, assignee of Murashige Yoshisuke, No. 20.

Witness sworn.

Mr. BIGELOW. Your name is Murashige?

A. Yes, sir.

Q. You are the claimant in this case against the government for stock destroyed by fire?—A. Yes, sir.

Q. What is your business, what was your business at the time of this claim?—A. Driver.

Q. Then the statement down here that you were a merchant is a mistake—is that correct?—A. No; originally my trade in Japan was a

merchant, and when I was asked by the consul what was my trade, I said merchant.

Q. Where were you living at the time of the fire?—A. Near the Kamakaupili Church in the lodging house—No. 9 lodging house.

Q. What day was your property destroyed, do you know? Big fire, was it?—A. I was sent out to the Kalihi detention camp on the 18th of January, and after that the big fire of the 20th destroyed my property.

Q. Where was it, in the lodging house—his property?—A. I packed everything and carried it to the sidewalk—packed up everything and carried it out to the sidewalk.

Q. Fix the values here and we will take the different heads. First, household furniture and utensils — Were they valued at the time of the fire at the cost price?—A. It was not the cost price; I made a deduction for wear and tear.

Q. And as to the articles in the first column?—A. Yes, sir; everything.

Q. Now about this lot that you have under the head of clothing, did you fix the cost price there, or the value at the time of the fire?—A. All those things which I wear I made allowance so much, but the new things I just put down cost price.

Q. The goods that you wore you say you made an allowance? Is that what you said?—A. Yes; that is what I said.

Q. Are you a married man?—A. I have family—wife and children.

Q. Has your wife put in a separate claim for property destroyed?—A. No, sir; one claim.

Q. Then these different holukus belonged to your wife?—A. Yes, sir.

Q. Now these last things here, property not included in this schedule, what was your figure there, the value of the property at the time of the fire or its cost to you?—A. The value at the time of the fire.

Q. Did you purchase any of these goods in Japan before you came here?—A. Yes, sir.

Q. Well, in regard to those, have you put down their value in yens or their value in dollars? (To the interpreter: Explain it to him and see if he put down 6 yens or \$6.)—A. When it says \$6, I paid 6 yens in Japan.

Now just insert that.

Q. You have down here 6 kimonos, \$9.25. How much did you pay for them in Japan, if you bought them in Japan?—A. Those kimonos—different prices, but total 20 yen.

Q. Now, how about this last item here of property not included in the schedule, did you fix that at the cost price or value at the time of the fire?—A. Value at the time of the fire.

Q. Have you submitted your claim to the Japanese consul?—A. Yes, sir.

Q. Did you submit it promptly?—A. I presented this claim when I was in the detention camp.

Q. Sent it up to the consul?—A. Yes, sir.

Q. Have you sworn to it before him? Do you know that you are likely to be punished if you swore falsely to that claim?—A. I do; yes, sir.

Mr. DUNNE. What were the articles that you bought over in Japan enumerated in this claim? Say, take for example, 8 kimonos, and

then I see 6 kimonos, carried out in full, \$13.50. How much did you pay for them in Japan?—A. About 27 yen.

JUDGE. Do you remember how many kimonos you had at the time of the fire?

A. It is pretty hard to answer; I hardly know; it is a long time ago.

Q. Did he have about 30 kimonos?—A. No; not so many.

Mr. DUNNE. Did you count the kimonos when you took them out by order of the board of health and dumped them on the sidewalk?

A. Yes; I made such a list before I depart from the house, before I was taken to the detention camp, such a list, but it was taken by the board of health officers.

Mr. DUNNE. Did he put down the values on that list?—A. No, sir.

Q. He just put down the articles and the value was a matter of after consideration?—A. Yes, sir.

JUDGE. I want to get at these kimonos; how many do you think you had?—A. Eighteen or 20; but I am not sure.

Q. How much of a family had you prior to this fire?—A. Three—wife and one child.

Q. The child has no kimonos?—A. No.

Q. In looking over your list we note that you have made a claim for 32 kimonos, is not that a mistake? You may have 18, but you are sure in your own mind that you did not have as many as that—two dozen?

(To the interpreter: Ask him that.)

A. I can not tell; about 18 or 20, something like that.

Q. It was not more than two dozen?—A. When I made out this list the consul and my wife helped me, but just how many I can not tell.

Q. Now those kimonos, can you tell how many were on the sidewalk?—A. I think about 6.

Mr. DUNNE. Have you got that memorandum you made at the time—the memorandum of these different articles at the time they were taken from the house and put on the sidewalk?—A. No; it was taken away.

Q. I know the articles were taken away, but the memorandum?—

A. The memorandum was taken away by the board of health.

Mr. L—. In counting the kimonos, does he understand it is for the family or for him?

A. The whole family.

JUDGE. About how many kimonos had you?

A. Me and my wife had 7 or 8 apiece, but I can not tell about the child how many.

Mr. DUNNE. There was only one child at the time of the fire; how many kimonos did the child have?

The INTERPRETER. He says he can not tell.

Mr. BIGELOW. At the time you made out this consular list, you had your list of wearing apparel, etc., apparently fresh in your mind, did you not?

A. I had, as I said before, no memorandum; it was taken away by the board of health, so the consul and my wife and I together made the list.

Q. Well, at the time you made out this list, did you consider you set down the kimonos correctly?—A. It was all correct.

Q. In stating that you had about 20 or 24, you are depending on your memory, are you not?—A. It is only my memory.

Q. Have you thought about this matter particularly since you filed your claim with the consul?—A. No, never thought of it; overlooked it; just filed the claim and let it go.

Mr. PRATT. Was it changed by the consul?

A. No, sir.

Q. In no way was it changed as to values on the goods?—A. No, sir.

Q. How long had you been in this country at the time of the fire?—A. I arrived here January 1, 1899.

Q. Came to this country on January 1, 1899?—A. Just a year before the fire.

Q. How long has your wife been here?—A. Same time.

Q. How much money had you when you came here?—A. I had \$50; a trifle over \$50.

Q. And were you working all the time you have been here?—A. Yes, sir; working all the time.

Q. How much were you getting a month?—A. I used to make \$25 to \$26 a month.

Q. What did it cost you to live?—A. \$12 or \$13.

Q. Well, you saved about \$12 a month?—A. Yes; about that.

Q. And did your wife work and earn money?—A. Yes, sir.

Q. What did she earn?—A. She used to make \$5 or \$6 a month.

Q. How old was the child?—A. A little over 2 years at the time of the fire.

Mr. BIGELOW. Did you bring most of your clothing from Japan with you, or buy it here?—A. Almost all the kimonos I brought from Japan.

Mr. PRATT. Well, here is a suit of clothes, \$15; where did you buy that?—A. I bought it in this country.

Q. And where did you buy the mosquito nets?—A. One I bought in this country and the other in Japan.

Mr. BIGELOW. And how about the obi (sash)?

Mr. DUNNE. And you have a black suit of clothes; where did you get them?—A. In this country.

Mr. PRATT. And blankets, best quality; where did you get them?—A. One I bought in this country.

Q. And the other two?—A. I bought them in Japan.

Q. The mattresses?—A. From Japan, sir.

Mr. DUNNE. How long did you have the blankets before the fire—the blankets, "best quality," \$6.50?—A. Three or four months before the fire.

Q. How much did you pay for them?—A. I believe it was \$8.50.

Q. \$8.50; well, then, you allowed \$2 for wear and tear?—A. Yes, sir; \$2, because I used them.

Mr. PRATT. Did you have any money in your possession when you went to the detention camp? How much money did you have in your possession?—A. Very little; just a trifle over \$1—\$1.40 or \$1.50.

JUDGE. Do you know where these goods were taken to?—A. I do not know, sir; I was taken to the detention camp and I left all these things under the care of the board of health. I do not know where they went.

Q. Were any of these articles returned to you?—A. Nothing was returned.

Mr. DUNNE. Did you ever seek to remove them from the board of health, or find out what had been done with them?—A. I went to the warehouse to find out about my things, but there was none for me.

Mr. PRATT. Where is your wife now?—A. At home.

Q. Living now in Kalihi?—A. Yes, sir.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes taken by me at the hearing as above before the fire claims commission.

STATEMENT OF CLAIM.

S. Ozaki, the undersigned assignee of Murashige Yoshisuke, claimant, respectfully represents that he is a resident of Honolulu, Hawaii; that on the date of the loss hereinafter specified claimant was the sole owner of the effects and property set forth in the schedules hereto attached, marked Exhibits A, B, and C;* that the value of said property at its cost price is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that the said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated, at the time of said loss, in wooden building on Beretania street, in said Honolulu, Territory of Hawaii; that said loss consisted in part of the destruction of the building more particularly described in Exhibit C; that the name of the owner of the land whereon said building stood is _____, and the nature of the interest of this claimant in said building is _____; that said property was insured for _____ dollars in the name of _____, and _____ dollars of said insurance has been paid by _____ company, the insurer thereof.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

S. OZAKI, *Assignee.*

TERRITORY OF HAWAII,
Island of Oahu, ss:

S. Ozaki, being first duly sworn, says that he is assignee of the above-named claimant thereof; that he knows the contents of the foregoing statement of claim and of the schedules thereto attached, and that the same are true of his own knowledge, except as to such matters stated on information and belief, and as to those matters he believes them to be true.

S. OZAKI, *Assignee.*

Subscribed and sworn to before me this 27th day of May, A. D. 1901.

EDMUND H. HART,
Notary Public, First Judicial Circuit.

* **RULE XIV.** In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A;" and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B;" and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

[Indorsement.]

No. 20. Fire claims commission. Claim of S. Ozaki, assignee of Murashige Yoshisuke. Amount, \$211.45. Filed May 27, 1901, at 2.35 o'clock p. m. J. M. Riggs, clerk. Presented by Kinney, Ballou & McClanahan, attorneys.

EXHIBIT No. —.

CLAIM OF C. SHIGEMI, No. 30.

Fire claims commission, Territory of Hawaii. Claim of C. Shigemi, No. 30.

The hearing of this claim having been set for this the 12th day of July, A. D. 1901, before the commission, the following proceedings were had:

The following counsel appearing: H. A. Bigelow, esq., for claimant; J. J. Dunne, esq., for the government.

The full commission, presiding.

C. SHIGEMI, called and sworn for claimant.

Mr. BIGELOW. You are the claimant in this case?

A. Yes, sir.

Q. You have presented a claim against the Government for property destroyed by the fire?—A. Yes, sir.

Q. What is your business?—A. Domestic servant.

Q. You have filed down here as a laborer?—A. Yes, sir.

Q. Why did you put it down that way?—A. At the time I filed this claim I had no occupation whatever. You asked what my business was and I said whatever work I could get to do, and probably you put me down as a laborer. Since then I am working as a household servant.

Q. Where were you living at the time of the fire?—A. On Beretania street, just the other side of the Kaumapili church. There is a lodging house that I was occupying—one of those rooms.

Q. On the mauka or makai side of the street?—A. On the makai side of the street.

Q. Just opposite the church—is that it?—A. Yes, sir; on the opposite side of the street.

Q. Do you know what block you were in—what was the number of the block?—A. I don't know, sir.

Q. Who owned the lodging house that you lodged at?—A. It was the lodging house of Yaumara, kept by a Japanese.

Q. What is the date of the destruction of your property?—A. I was sent to the detention camp on the 13th of January.

Q. So this thing happened during your absence?—A. Yes, sir; it happened during my absence; but I am informed by the newspaper that this thing happened, that this place was burned, on the 17th of January.

Q. What did you do with your things before you went away?—A. I took everything before I left there; I put my things inside of one of the boxes that I got from a Chinese store and two Chinese trunks.

Q. So you had four bundles?—A. Four pieces together; in fact, I was compelled to leave them there.

Q. Where did you leave them?—A. I was told to carry them out onto the sidewalk, right in front of the lodging house; the understanding was that it would be put in the Kaumapili church.

Q. And you carried them under the orders of the board of health by whom you were told?—A. By the order of the board of health.

Q. Now, after you got out of the camp, did you get back any of your things—any of your boxes?—A. I received back out of the four, three pieces.

Q. Now, what is this list here?—A. That was the things contained in one box which was missing, and also the things which were missing from the original boxes—all three boxes; that is, I put something in each, and that is what was missing when I examined.

Q. In other words, you have not charged up here anything which you got back from the warehouse; is that correct?—A. When I sent in the claim to the consul—the original claim—everything was entered up; after I came out from the detention camp, after I received those things back, the consulate canceled all of those claims what is there, and they are still missing at the present time.

Q. Is that the claim that you presented to the consulate?—A. That has my signature. This handwriting is not mine; I had somebody copy it for me.

Q. That is your signature and seal?—A. Yes, sir.

Q. Did you swear to that before the consulate?—A. Yes, sir.

Q. Did you know at the time you swore to it, when you made the statement, and if it was false, that you were committing perjury before the Japanese Government?—A. Yes, sir.

Q. In stating generally the values that you have set opposite these articles in this list, did you set down the value at the time of the fire—that is, I am asking as to the cost price?—A. That is all cost price, that is all cost price; I am just from Japan, and those things were mostly got in Japan. I just made the exchange, whatever it cost. If the thing cost me 2 yen I put it down \$1 to make it American gold.

Q. When did you come from Japan?—A. The cost price what I paid in Japan and what the things cost.

Q. A thing that cost 2 yen, you made it \$1 when you arrived here?—A. That is the exchange for American gold.

Q. When did you come from Japan?—A. I arrived here on the 29th of November, 1899.

Q. Shortly before the fire?—A. Yes, sir.

Q. How long had you these goods that you brought from Japan?—A. When I left my country I prepared for the voyage, so I bought all of these things, and I stopped in Kobe about forty days on account of the steamer—waiting for the steamer—and it was during those forty days; some of those things I had used, but the most of them were new.

Q. They were all practically new except for the forty days you were in the bay of Kobe?—A. Yes, sir.

Cross-examination:

Mr. DUNNE. Where did you buy these medicines?

A. In my country.

Q. Were you well or ill when you left Japan?—A. I have a certain chronic disease; I used to be in the care of a physician, and in Japan I bought those goods.

Q. Well, I don't mean to ask an impertinent question, but I find here an item, the last item of the account; now, this cash here, was that in coin or paper?—A. That was cash—\$8, American money, one \$5 gold piece and three \$1 pieces and one Japanese coin, 1 yen.

Q. So that really ought to be \$8.50. I see an entry here of six books, \$3.50; what kind of books were they?—A. That must be a

mistake; my original claim was \$3.50, and I got one book back, \$1.50, and so in the consulate they put it at \$2.

Q. Did you get this one book back at the same time you got the other?—A. Yes, sir; I found out many things which I got back from the warehouse.

Q. I notice an item, one valise, \$4.50. How much did you pay for that as a fact?—A. I bought that in Japan, 9 yen.

Q. Is this the same valise that you used all the way across?—A. Yes, sir; that was the container for the goods that I brought from Japan.

Q. How long had you been using that valise altogether before the time that you lost it?—A. I spent forty days in Kobe, and the trip cost me about \$25, so that I had about \$65 or \$70 after I bought that.

Q. Don't you think a couple of months' use of this valise would reduce its value somewhat?—A. Yes, sir; I understand when I want to sell it there will be so much cut down for using it. When I put down those goods I put down the same thing I paid—the same price—and I naturally thought—

Q. There is an item of 11 pounds of tobacco; did you buy that in Japan?—A. Yes, sir.

Q. What did you pay for it?—A. I can't tell exactly what.

Q. Well, did you pay any duty on it when you came here?—A. No sir; nobody asked me for it.

Q. What kind of tobacco was that?—A. It was No. 1 tobacco in Japan.

Q. How do you know that you had 11 pounds of tobacco when you made this inventory?—A. Before I left Japan I had bought 15 pounds—15 packages, and each package contained 1 pound—and at the time of the fire there was 11 packages left, making 11 pounds.

Q. Did you make that memorandum down at the detention camp?—A. Yes, sir; inside of the detention camp.

Q. What did these medicines consist of?—A. There was some medicines, bottled medicine that was furnished by my physician in Japan; mostly those medicines were patented medicines that I bought in Japan.

Q. Why did you buy so much medicine as \$12.50?—A. I have a chronic disease, and I always had a doctor attending me before I left my home, and the doctor furnished me with this seven weeks' medicine; for each week I had to pay \$1.50, and I used one week's medicine and there was six weeks' left, which I brought here, which is the most of the items there.

Q. Then you did not use any of the medicines after you left Kobe, hey?—A. During my stay at Kobe I found out that I was improving after getting on the steamer, although I was sick I wasn't sea sick, and I wasn't where I would use the medicine.

Q. Didn't you use any here in Honolulu?—A. Afterwards I have been improving; one day after I got here I have good health and never use it.

MR. PRATT. You had no need for the medicine at the time of the fire?

A. No, sir.

Q. You found the best effects; you imported that medicine directly from Japan; it is Japanese medicine?—A. Yes, sir.

Q. Japanese patented medicine?—A. Yes, sir.

Q. You were out of the quarantine district at the time of the fire? You packed up your goods and left the house?—A. Yes, sir.

Q. Did you make a memorandum of the goods at the time they were packed?—A. No, sir.

The CHAIRMAN. Did the consul ask you anything about these items of medicine?—A. No, sir.

Q. Did he interrogate you as to any item in the schedule?—A. I was asked on several items, and the consul told me that there was nothing that was not true, and he said that the whole thing would be canceled if I swore to anything in it that was not true.

Q. When did you come out of the detention camp?—A. The 7th of April, 1900.

Q. Do you know as a matter of fact whether those goods were in the big fire—were destroyed in the big fire of January 17?—A. As I told you, I saw in the newspaper that the place was burned on the 17th by order of the board of health. There was friends that were burned out on the 20th of January that came to the detention camp, and they told me that the fire was burned on the 17th.

Mr. LOVEKIN. I know that there was a sanitary fire on that block—that is, on the Ewa side of Smith street. There was premises up there some time before the big fire, but there was one, the sanitary fire.

Q. (To the witness.) Are you positive it was on the 13th that you went to the detention camp?—A. Yes, sir; certain, sure; there was quite a number of people burned out the same day that came out that can testify to it.

Q. Where was his place?—A. Just opposite to the Kaumapili church maiki, on the corner of Smith street and Beretania street, in this block; belonged to this block.

Q. What was it on the Ewa side, the mouka side, below and above the church?—A. It is away—farther away this way. From the corner of Smith and Beretania, fourth house Ewa.

Q. Right in front of the Kaumapili church?—A. Yes, sir; and the fourth house from the corner of Smith street.

Q. Two-story house?—A. Yes, sir.

Q. Alongside of you was a little, small lane; alongside of the house that you lived in there was a little lane?—A. Yes, sir; just alongside of it.

Q. What paper did you see it in that that fire took place on the 7th?—A. In the Advertiser paper.

Q. That place wasn't destroyed by any sanitary fire up to the 10th?—A. Then that must be a mistake in the paper. From that paper I read it that it was on the 17th; that was in the newspaper.

Q. Is that all that you have been basing your statement on, on the newspaper?—A. And a friend from the quarantine district told me.

Q. Well, then you mean to have your statement go in as January 10 instead of the 17th?—A. That may be. Word was carried to the detention camp. All that I testified to was hearsay; I can't tell you.

Q. Then, with the permission of the commissioners, I will change from the 17th to the 20th.

The CHAIRMAN. That is immaterial. We know that it was destroyed.

SCHEDULE B.

No. 51; name, Shigemi Chutaro; age, 29; occupation, laborer; district, block 9; date of destruction by fire, January 17, 1900; house and fixtures.

Fire-Claims Commission—Statement of claim.

S. Ozaki, the undersigned, assignee of Shigemi Chutaro, claimant, respectfully represents that he is a resident of Honolulu, H. I.

That on the date of the loss hereinafter specified he was the sole owner of the effects and property set forth in the schedules hereto attached, marked Exhibits B and —; that the value of said property at its cost price is set forth upon said schedule opposite the items thereof; that said property and effects were lost by total destruction by fire on the 17th day of January, 1900, and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedule; that said property was situated at the time of said loss in a wooden building, on sanitary district No. 9, in said Honolulu, Territory of Hawaii.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for the loss of profits through the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

S. OZAKI.

TERRITORY OF HAWAII, *Island of Oahu*, ss:

S. Ozaki, being first duly sworn, says that he is the assignee of Shigemi Chutaro, the above-named claimant there; that he knows the contents of the claim and of the schedules thereto attached, and that the same are true of his own knowledge, except as to the matters stated on information and belief, and as to those matters he believes them to be true.

S. OZAKI.

Subscribed and sworn to before me this 27th day of May, A. D. 1901.

EDMOND H. HART,
Notary Public, First Judicial Circuit.

RULE XIV.—In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

(Indorsed:) No. 30. Fire-claims commission. Claim of S. Ozaki (assignee of Shigemi Chutaro). Amount, \$47.10. Filed May 27, 1901, at 2.35 o'clock p. m. J. M. Riggs, clerk. Presented by Kinney, Ballou & McClanahan, attorneys.

I do hereby certify that the foregoing is a full, true, and correct copy of my short handnotes, taken by me at the hearing, as above, before the fire-claims commission.

[SEAL.]

H. C. CARTER.
Notary Public, First Judicial Circuit.

EXHIBIT No. —.

Before the Fire Claims Commission, Honolulu, H. T. Claim No. 70.

FRIDAY, July 26, 1901—2 p. m.

Commission all present.

Appearances: Mr. Philip Weaver for claimant; Mr. Ed. Douthitt for the Government.

W. H. Hoogs, being first duly sworn on behalf of claimant, testified as follows:

Mr. WEAVER. Mr. Hoogs, are you one of the partners of Hoogs & Weaver?

A. Unfortunately I am; it is a partnership with yourself.

Q. Did that partnership own a building on the corner of South and Chamberlain, destroyed February 15, 1900?—**A.** It did.

Q. What happened to that building on or about February 15, 1900?—**A.** It was burned down by order of the board of health.

Q. In the suppression of the bubonic plague?—**A.** Yes; so Dr. Hoffman informed me.

Q. Did you have in your claim a description of this building? Is that a correct description [showing witness paper]?—**A.** Yes.

Q. Did you take this description from the specifications used in constructing the building?—**A.** Yes.

Q. While the building was being constructed did you examine the premises?—**A.** I did.

Q. Was this building constructed according to the specifications?—**A.** It was.

Q. Did you go there frequently?—A. Four times every day.

Q. And these specifications represent the structure of the building?—A. Yes.

Q. You have stated this building is located on a certain fire map.—A. [No answer.]

Q. You have attached to this complaint a diagram of this building. Is that correct?—A. Yes.

Q. You have a side elevation. Was the building constructed according to that elevation?—A. It was.

Q. What was that building worth when it was destroyed?—A. I should say it was worth what it cost, \$6,000, if not more. The building was about a year old; it had been occupied, I think, about nine months; it was in splendid condition; the paint and everything was in first-class shape.

Q. Had you the privies and everything in good sanitary condition?—A. Yes; everything.

Q. Was it a fact you got all the privies renewed when the health board was calling attention to the condition of things in Honolulu?—A. Yes.

Q. And that thereafter the privies were cleaned out?—A. We compelled the lessee to do all that in his lease.

Q. Will you mark in the diagram—this marked “closet” is the privy you refer to?—A. Yes.

Q. And this square marked “bath,” is that in good condition?—A. Yes.

Q. And the cook house; wasn't that a newer addition to the building itself?—A. Yes; it was put up afterwards.

Q. And in your claim you estimate this, the cook house, you estimate about \$95?—A. Something less than \$100.

Q. And the plumbing extras, stoves, windows, etc., \$75?—A. Yes.

Q. This building was insured in the Lion Fire Insurance Company?—A. Yes; for \$2,500, and two companies of Gear-Lansing. I don't remember the names now.

Q. You have stated Norwich Union Fire and the Greenwich Fire?—A. Yes; I guess it is. It is Gear-Lansing.

Q. Did you make claim for insurance in these three companies?—A. No, sir.

Q. Did I make a claim for you?—A. No, sir.

Q. Was there any money paid that you know of on account of this insurance?—A. Not that I know of.

Mr. DOUTHITT. The Lion Fire Insurance Company is for \$2,500?

A. Yes; \$1,250 in each of those others.

(Mr. Weaver here exhibits to the board Lion Fire Insurance policy.)

Mr. WEAVER. To whom did you leave the legal matters regarding this insurance?

A. To yourself.

Mr. MACFARLAND (chairman of board). Who is this land leased from?

A. From W. R. Castle, I believe, as trustee for a native.

Mr. WEAVER. You say in your claim that this land is situated—this building situated—that royal patent No. 2691. Is that correct?

A. Yes; that is correct.

Q. And this land was leased from W. R. Castle, trustee for Leialoha Ai?—A. Yes; that is right.

Q. This deed was dated the 16th of November, 1896, according to your schedule?—A. Yes; that is right.

Q. It was leased to Hoogs & Weaver March 15, 1898?—A. Yes.

Q. Recorded in book 175, at page 374?—A. Yes.

Q. When you made up this schedule you compared this?—A. Yes, and is correct.

Q. At a ground rental of \$12.50 a month?—A. Yes; that is right.

Mr. F. J. WILHELM, being first duly sworn, on behalf of claimant, testified as follows:

Mr. WEAVER. Mr. Wilhelm, I show you photograph in the possession of the commission of that building known as the Weaver Building, described in Claim No. 70 and Claim No. 69. Is that a reasonable valuation on that building?—A. Very.

Q. The building was in good condition at that time?—A. Yes. As far as I could see, it was a comparatively new building; I did not see any signs of wear and tear about it.

Mr. PRATT. How long before the fire did you examine the building?

A. Not more than ten hours before the fire, perhaps. I was one of the appraisers.

Mr. WEAVER. Showing you appraisalment, page 10: Is that your appraisalment on the building?

A. Yes; that is our appraisalment.

Q. Then, from your appraisalment you consider this claim as well the worth of the building at that time?—A. Yes; I consider that building worth as much.

The Norwich Union Fire Insurance Company Society; policy No. 3200738, \$1,250.

Mr. A. V. GEAR, sworn, testified as follows:

Mr. MACFARLAND.

A. That is New York standard-form policy, and the policy has been returned and the premium returned pro rata. The policy of the Greenwich Insurance Company is No. 854647.

Q. Was that New York standard form?—A. It was.

Q. And the policy has been surrendered and the return premium paid and forwarded to the company?—A. Yes.

Proceedings here closed.

Fire claim No. 70.

This indenture witnesseth that I, William R. Castle, as trustee for Leialoha Kaula Ai, under a deed of trust dated the 16th November, 1896, recorded in Book 158, at page 273, hereby waive all claim as lessor, if any, in and to the building erected on the north corner of South and Chamberlain streets (Kawaiahao lane), Honolulu (L. C. award 685 to Pehu), by Hoogs & Weaver, under a lease from me dated March 15, 1898, and recorded in Book 175, at page 374.

In witness whereof I have hereunto set my hand and seal this 27th day of July, 1901.

W. R. CASTLE, *Trustee.*

SCHEDULE B.

A certain two-story, iron-roof, frame structure, located on the north-west corner of South and Chamberlain streets, in Kawaiahao, Honolulu, island of Oahu, situated on land described in royal patent No. 2691, and a strip on South street acquired from the government,

owned by W. R. Castle, as trustee for Leialoha Ai, by deed dated 16th November, 1896.

Recorded in book —, page —; leased to W. H. Hoogs and P. L. Weaver, by lease dated March 15, 1898, recorded in book 175, page 374, for fifteen years from April 1, 1898, at a monthly rental of \$12.50 ground rent.

Structure extended 120 feet on Chamberlain street, 114 feet on South street; 22 feet high, exclusive of roof; 30 feet deep, including a 6-foot lanai in rear; 6-foot lanai in front. Sills, 4 by 6; joists, 2 by 6 and 2 by 4; studding, 2 by 6; corner posts, 4 by 4; plates, 2 by 8; rafters, 2 by 4; sides rustic; roof, corrugated iron; all interior tongue and groove dressed, all lumber dressed. Painted inside and outside with two coats of best lead. More specifically described as follows:

Foundation stone must not be less than 16 by 16 inches and 6 inches deep.

Carpentering: All lumber to be N. W., and the best of its kind: sizes as shown and figured on plans. Foundation studs to be 4 by 4 inches, set as shown. All main sills for joists to rest on to be 4 by 6 inches, set as shown on ground plan. Floor joist to be 2 by 6 inches, sized and set 2 feet on centers; studs for main wall to be 2 by 4 inches, surfaced on four sides and set 2 feet on centers.

Second-floor joists to be 2 by 8, 2 feet on centers, surfaced on four sides, and must extend out for veranda on both sides of the building. They will be beveled 1 inch to let water fall or run off. Rail to be put on as shown on elevation, sizes as marked. All veranda posts will be 4 by 4 inches, s. 4 s.

Stairs to be built as directed, risers of seven-eighth redwood, hand treads of 1½ by 12 N. W. All parts of the stairs to be dressed two sides and put up as shown on plans. Put posts under said stairs where required.

The perlines and rafters of veranda roof will be 2 by 4 inches, a rafter set over each post, and one perline set up in the center and up against the building to nail the iron to. The plates will be 2 by 8. There will be a 6-foot veranda along all the rear of main building, one step lower than the lower floor.

Flooring: All floors of main building to be of 1 by 6 inches, tongue and groove. The floors of the second story and the veranda floors of the second story will be dressed on the underside, as it forms the ceiling. The upstairs ceiling to be 1 by 6 inches, tongue and groove. All outside walls to be covered with 1 by 10 rustic surface on back side. There will be 79 windows, 10 by 12, 12 lights.

All inside partitions will be 1 by 6, tongue and groove; 2 by 3 will be placed 6 feet from floor to nail all partitions to. There will be 120 2 by 6, 6 by 6, O. G. doors, 1½ inches thick, with rabbeted frames hung with 3 by 3 pin butts.

There will be 2 shop doors 4 by 8, with a 20-inch transom. Two doors 2 by 8 feet to each opening. Use cheapest rim locks for all doors.

Windows to have a brass spring bolt, one in the upper sash and one in the lower sash, with a plain 1 by 5 inch casing. The upper ceiling joist to be 2 by 4 inches, set 4 feet apart. Rafters, 2 by 4 inches, set and spiked to each ceiling joist, and to be braced with 2 by 4 inch, as shown on plan. There will be a 2 by 3 spiked on rafters not more than 2 feet 6 inches apart to nail the iron to.

The entire roof will be covered with the lightest corrugated iron. The cornice around the top will be composed of a 1 by 16 inch frieze, 1½ by 12-inch cap, redwood, and a 6-inch crown molding. Put a 10-inch flashing on inside and a 2 by 6 valley where the roof intersects. Cover joists on cap with a 4-inch strip of tin, well nailed on.

Bath house: Build a bath house 15 by 24 feet, shed roof, 8 feet high in front, 6 feet 6 inches in rear, 1 by 6 tongue and groove partitions, making four bathrooms of it. Put in a 2 by 6, 6 by 6 door to each one.

Water-closets: Build a 5 by 18 foot water-closet, same as bathroom; divide it into six rooms, as shown on ground plan. Use 1 by 12 for all outside walls, 1 by 6 tongue and groove for cross partitions and for floors.

Nail on rustic with 8 wire, three nails in each stud.

Dig one cesspool, 6 by 18, 3 feet below black sand.

Make arrangements to carry water from bathroom to cesspool.

Painting: Paint all exterior and interior walls, partition, ceilings, studs, and joists that are exposed with two good coats of pure lead and oil, to be finished in colors to suit owners. All nail heads and open joints to be puttied.

All of the work to be done in a most thorough and workmanlike manner, and to the entire satisfaction of the owner.

Cook house, 48 by 8 feet, 7 feet rear, 9 feet front, rough N. W	\$95.00

Claim of Hoogs & Weaver, a copartnership.

STATEMENT OF CLAIM.

W. H. Hoogs, a member of the above-named firm, respectfully represents in their behalf that said firm of Hoogs & Weaver is a copartnership, and that W. H. Hoogs and P. L. Weaver, jr., are the members thereof.

That the principal place of business of said copartnership is at Honolulu, Territory of Hawaii; that said persons as copartners were joint owners on the 15th day of February of the effects and property set forth in the schedules hereto attached marked "Exhibit C*" and that the value of said property at its cost price is set forth upon said schedule opposite the items thereof; that said property and effects were lost by total destruction by fire on the 15th day of February, —, and that no part thereof was saved; that said fire occurred, as claimants are informed and believe, by order of the board of health in the suppression of bubonic plague; that said property was situated at the time of said loss in Kawaiahao building, on South and Chamberlain streets, in said Honolulu.

That said loss consisted in the destruction of the building more particularly described in Schedule C; that the name of the owner of the land whereon said building stood is W. R. Castle, trustee for L. Ai, and the nature of the interest of these claimants in said build-

EXHIBIT No. —.

No. 75. Fire claims commission. Claim of Yee Wo Chan Company, a copartnership. Amount, \$77,703.78. Filed May 28, 1901, at 10.14 o'clock a.m. J. M. Riggs, clerk. Presented by Paul Neumann, attorney.

STATEMENT OF CLAIM.

Wong Chow, a member of the above-named firm, respectfully represents in their behalf that said firm of Yee Wo Chan Company is a copartnership, and that Wong Chow, Wong Chew You, Lam Kai Chow, and Lam Ying Chin are the members thereof.

That the principal place of business of said copartnership is at Honolulu, Territory of Hawaii; that said persons, as copartners, were joint owners on the 20th day of January, 1900, of the effects and property set forth in the schedules hereto attached, marked Exhibits A, B, and C; that the value of said property at its cost price is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, A. D. 1900, and that no part thereof was saved; that said fire occurred, as claimants are informed and believe, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in the building described in Exhibit C, on Maunakea street, in said Honolulu.

That said loss consisted in part of the destruction of the building more particularly described in Schedule C; that the name of the owner of the land whereon said buildings stood is Bishop and Queen Emma Estates, and the nature of the interest of these claimants in said building is ownership.

That said property was insured for \$31,000 in the name of Yee Wo Chan Company, and \$12,000 of said insurance has been paid by companies, as set forth in Exhibit C, the insurer thereof.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

YEE WO CHAN COMPANY,
By WONG CHOW.

TERRITORY OF HAWAII,
Island of Oahu, ss.:

Wong Chow, being first duly sworn, says that he is a member of the firm of Yee Wo Chan Company; that he knows the contents of the foregoing statement of claim and of the schedules thereto attached, and that the same are true of his own knowledge, except as to such matters stated on information and belief, and as to those matters he believes them to be true.

WONG CHOW.

Subscribed and sworn to before me this 28th day of May, A. D. 1901.

[SEAL.]

N. FERNANDEZ,
Notary Public, First Judicial Circuit.

RULE XIV.—In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

ASSIGNMENT.

Know all men by these presents that I, Bruce Cartwright, trustee of Emma Kaleleonalani, deceased, being the owner on and prior to the 20th day of January, 1900, of the real estate situated on the Waikiki side of Maunakea street, between King and Hotel streets, in block 6, Honolulu, which said real estate, together with the building and improvements thereon, was leased to Yee Wo Chan Company, and was occupied and used by said Yee Wo Chan Company as such lessee on and prior to said 20th day of January, 1900, when the said buildings and improvements so situated on said real estate and so occupied and used by said Yee Wo Chan Company as such lessee were destroyed by fire, originated and started under and by order and authority of the board of health, do hereby sell, assign, transfer, and set over unto said Yee Wo Chan Company all of my right, title, and interest of, in, and to any and all such buildings and improvements located, situated, and being upon said real estate on said 20th day of January, 1900, together with any and all claim or demand which I may have or claim to have against the Territory of Hawaii for any and all damages sustained by me, for or by reason of the loss or destruction of said buildings and improvements, or any part thereof, by reason of said fire.

BRUCE CARTWRIGHT,

Trustee, Estate Emma Kaleleonalani, Deceased.

Dated Honolulu, T. H., July 22, A. D. 1901.

Witness:

W. J. ROBINSON.

Wong Chow, being sworn, on his oath deposes and says:

That he is now and during more than twenty years last past has been a resident of Honolulu, Island of Oahu, and carried on business at said place as an importer and merchant under the firm name of Yee Wo Chan Company.

That on the 20th day of January, A. D. 1900, the said firm of Yee Wo Chan Company, whereof affiant was and is the managing partner, possessed, owned, and occupied the following-described buildings situate in Honolulu aforesaid, and owned and possessed the merchandise, furniture, and fixtures contained in said buildings:

1. The two-story, iron-roofed, brick building with iron doors and shutters, situate on the east side of Maunakea street between King and Hotel streets, the value of said building being then and there \$5,865.

That said building was on said day insured in the Hamburg-Bremen Fire Insurance Company by policy No. 9744 for the sum of \$3,000, which sum has been paid said Yee Wo Chan Company by said insurance company.

That the ground on which said brick building was erected was leased from the Bishop estate July 1, 1886, for a period of thirty years, and the said building was erected in July, 1886, by the said Yee Wo Chan Company.

The two-story, frame, iron-roofed buildings on the east side of Maunakea street, between Hotel and King streets, in block 6, buildings Nos. 28 and 29, occupied as stores, the value of said buildings being then and there \$1,000. That said buildings were on said day insured in the Insurance Company of North America by policy No. 50458 in the sum of \$500, no part of which has been paid.

The two-story frame, iron-roofed building, situate on the east side of Maunakea street between King and Hotel streets, in Block 6, building No. 43, the value of said building being then and there \$1,150. That said building was, on said day, insured in the Insurance Company of North America, by policy No. 50458, in the sum of \$500, no part of which has been paid.

That the ground on which said frame buildings described under 2 and 3 were erected was leased from Bruce Cartwright, agent for Queen Emma estate, July 1, 1886, and said buildings were erected in July, 1886, by the said Yee Wo Chan Company.

That on the said 20th day of January, 1900, the said firm of Yee Wo Chan Company owned and possessed certain furniture and fixtures in the aforesaid buildings.

That the value of said furniture and fixtures was then and there the sum of \$2,218.50, as is more fully set forth in the schedule attached hereto, marked "Exhibit C," and made a part hereof.

That there was no insurance on said furniture and fixtures.

That on said 20th day of January, 1900, the said firm of Yee Wo Chan Company owned and possessed a stock of merchandise in the aforesaid buildings.

That the cost of said stock of merchandise was the full sum of \$2,208.55. In evidence of cost of stock carried by said firm of Yee Wo Chan Company a schedule of imports, purchases, and sales is hereto attached, marked "Exhibit A," pages 1, 2, and 3, and made a part hereof. Said schedule may be verified by the custom-house records and the accounts of said firm of Yee Wo Chan Company.

That said merchandise was, on said 20th day of January, 1900, insured as follows:

Company.	Policy number.	Date, 1899.	Amount insured.
German Alliance Association	509919	Nov. 3	\$3,000
Hamburg-Bremen	9758a	Nov. 10	2,000
Do.....	9727	June 28	2,000
Leipzig	2357	Oct. 25	5,000
Lance	2394104	Nov. 25	2,500
Do.....	2394108	Dec. 3	3,000
General Insurance Company	D13678	Dec. 6	2,500
Insurance Company of North America	50434	June 28	2,000
North Atlantic	2883	Oct. 25	5,000
Total insurance on merchandise			27,000

That of said insurance the following amounts have been paid said firm of Yee Wo Chan Company:

Company.	Policy number.	Amount insured.
Hamburg-Bremen	9758a	\$2,000
Do.....	9727	2,000
North Atlantic	2883	5,000
Total		9,000

RULE XIV.—In order to facilitate business, claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

ASSIGNMENT.

Know all men by these presents that I, Bruce Cartwright, trustee, estate of Emma Kaleleonalani, deceased, being the owner on and prior to the 20th day of January, 1900, of the real estate situated on the Waikiki side of Maunakea street, between King and Hotel streets, in block 6, Honolulu, which said real estate, together with the buildings and improvements thereon, was leased to Yee Wo Chan Company, and was occupied and used by said Yee Wo Chan Company as such lessee on and prior to said 20th day of January, 1900, when the said buildings and improvements so situated on said real estate and so occupied and used by said Yee Wo Chan Company as such lessee were destroyed by fire, originated and started under and by order and authority of the board of health, do hereby sell, assign, transfer, and set over unto said Yee Wo Chan Company all of my right, title, and interest of, in, and to any and all such buildings and improvements located, situated, and being upon said real estate on said 20th day of January, 1900, together with any and all claim or demand which I may have or claim to have against the Territory of Hawaii for any and all damages sustained by me, for or by reason of the loss or destruction of said buildings and improvements, or any part thereof, by reason of said fire.

BRUCE CARTWRIGHT,

Trustee, Estate Emma Kaleleonalani, Deceased.

Wong Chow, being sworn, on his oath deposes and says:

That he is now and during more than twenty years last past has been a resident of Honolulu, Island of Oahu, and carried on business at said place as an importer and merchant under the firm name of Yee Wo Chan Company.

That on the 20th day of January, A. D. 1900, the said firm of Yee Wo Chan Company, whereof affiant was and is the managing partner, possessed, owned, and occupied the following-described buildings, situate in Honolulu aforesaid, and owned and possessed the merchandise, furniture, and fixtures contained in said buildings:

1. The two-story, iron-roofed, brick building with iron doors and shutters, situate on the east side of Maunakea street between King and Hotel streets, the value of said building being then and there \$5,865.

That said building was on said day insured in the Hamburg-Bremen Fire Insurance Company by policy No. 9744 for the sum of \$3,000, which sum has been paid said Yee Wo Chan Company by said insurance company.

That the ground on which said brick building was erected was leased from the Bishop estate July 1, 1886, for a period of thirty years, and the said building was erected in July, 1886, by the said Yee Wo Chan Company.

2. The two-story, frame, iron-roofed buildings on the east side of Maunakea street, between Hotel and King streets, in block 6, buildings Nos. 28 and 29, occupied as stores, the value of said buildings being then and there \$1,000. That said buildings were on said day insured in the Insurance Company of North America by policy No. 50499 in the sum of \$500, no part of which has been paid.

3. The two-story frame, iron-roofed building, situate on the east side of Maunakea street between King and Hotel streets, in Block 6, building No. 43, the value of said building being then and there \$1,150.

That said building was, on said day, insured in the Insurance Company of North America, by policy No. 50458, in the sum of \$500, no part of which has been paid.

That the ground on which said frame buildings described under 2 and 3 were erected was leased from Bruce Cartwright, agent for Queen Emma estate, July 1, 1886, and said buildings were erected in July, 1886, by the said Yee Wo Chan Company.

4. That on the said 20th day of January, 1900, the said firm of Yee Wo Chan Company owned and possessed certain furniture and fixtures in aforesaid buildings.

That the value of said furniture and fixtures was then and there the sum of \$2,218.50, as is more fully set forth in the schedule attached hereto, marked "Exhibit C," and made a part hereof.

That there was no insurance on said furniture and fixtures.

That on said 20th day of January, 1900, the said firm of Yee Wo Chan Company owned and possessed a stock of merchandise in aforesaid buildings.

That the cost of said stock of merchandise was the full sum of \$2,208.55. In evidence of cost of stock carried by said firm of Yee Wo Chan Company a schedule of imports, purchases, and sales is hereto attached, marked "Exhibit A," pages 1, 2, and 3, and made a part hereof. Said schedule may be verified by the custom-house records and the accounts of said firm of Yee Wo Chan Company.

That said merchandise was, on said 20th day of January, 1900, insured as follows:

Company.	Policy number.	Date, 1899.	Amount insured.
German Alliance Association	509919	Nov. 8	\$3,000
Hamburg-Bremen	9758a	Nov. 10	2,000
Do	9727	June 28	2,000
Hamburg	2257	Oct. 25	5,000
Shanghai	2394104	Nov. 25	2,500
Do	2394108	Dec. 3	3,000
General Insurance Company	D13578	Dec. 6	2,500
Insurance Company of North America	50434	June 28	2,000
Transatlantic	2883	Oct. 25	5,000
Total insurance on merchandise			27,000

That of said insurance the following amounts have been paid said firm of Yee Wo Chan Company:

Company.	Policy number.	Amount insured.
Hamburg-Bremen	9758a	\$2,000
Do	9727	2,000
Transatlantic	2883	5,000
Total		9,000

That on the said 20th day of January, 1900, the said buildings together with the said contents, were totally destroyed by the spreading of the fire started by order and under the direction of the board of health in connection with the suppression of the bubonic plague in Honolulu.

6. That on the 26th day of December, 1899, per steamship *Algon*, and on the 2d day of January, 1900, per steamship *Hongkong Maru*, certain lots of merchandise consigned to said firm of Yee Wo Chan Company arrived in Honolulu, and that the freight and duty on said merchandise was paid, all of which is more fully set forth in the schedule attached hereto, marked "Exhibit D," and made a part hereof.

That said merchandise was fumigated under the direction of the board of health and stored in the fish market by order of said board; that requisite permission was obtained and said merchandise was removed from the fish market to warehouse No. 15, corner of King and Nuuanu streets, in Honolulu; that said warehouse was a new building, as yet unfinished and unoccupied, and was the property of Go Chong.

That on the 22d day of January, 1900, said merchandise was condemned by the board of health, and R. D. Silliman and A. G. Robertson, official appraisers of the board of health, were appointed by said board to take an inventory of said merchandise.

That on the afternoon of said 22d day of January, 1900, said building, together with said merchandise, was totally destroyed by fire in the order and under the direction of said board of health.

That the actual direct loss suffered by said firm of Yee Wo Chan Company by the destruction of said merchandise was then and there the full amount of \$5,005.74, as is set forth in detail in the schedule attached hereto, marked "Exhibit E," and made part hereof.

That there was no insurance on said merchandise.

That on the 23d day of January, A. D. 1900, by steamship *Nippon Maru*; on the 12th day of January, A. D. 1900, by steamship *Doric*; and on the 3d day of January, A. D. 1900, by steamship *Hongkong Maru*, certain lots of merchandise from Hongkong, consigned to said firm of Yee Wo Chan Company arrived in Honolulu.

That all of said merchandise was condemned by the board of health and destroyed at the Pacific Mail wharf by the order and under the direction of said board.

That the loss suffered by said firm of Yee Wo Chan Company by said destruction of said merchandise was then and there the full sum of \$255.99, as is shown in detail in the schedule attached hereto, marked "Exhibit F," and made part hereof.

That said firm of Yee Wo Chan Company has by processes of law endeavored to collect the insurance hereinbefore described, but has been awarded only the amounts herein stated, and that no proceeding whatever are pending before any court or authority for the recovery of the loss, or any part thereof, for which this claim is filed.

The affiant further says that the total direct loss suffered by said firm of Yee Wo Chan Company by the actual destruction of said buildings, merchandise, and belongings in connection with the suppression of the bubonic plague in Honolulu in the years 1899 and 1900 was the full sum of \$77,703.78, of which sum \$12,000 insurance has been paid to the affiant, as per the following summary:

SUMMARY.

HONOLULU, *November 20, 1901.*

First hearing July 22, 1901.

WONG CHOW recalled.

ATTORNEY. On page 3, Exhibit B of claim, imports from Japan give a total amount of \$1,135.07. The amount of invoice as shown by the customs records, which we have here and certified to by the customs notary, was that the value of this invoice was \$456.45. How do you account for that difference?—A. A statement will be filed to-day.

Q. Have you or have you not a bill from the merchants at Yokohama from whom you purchased these goods, and that bill has been paid to you in full, and has been receipted, showing the amount in yen of the value of the goods specified here in the customs invoice?—A. I have.

Q. Then you have valued the merchandise from Japan in your claim at \$1,372.62? Do I understand you are claiming for the amount?—A. Yes; that is correct, but according to the consular statement it appears that the whole value was only \$402. The last item on that bill, \$190.44, did not go into quarantine; that was received and the other items the dates are different. The dates in bills are dates of shipment and dates of consignment, but not receipt of shipment.

Q. The total value of the importations for Yee Wo Chan Company from Japan from the 22d day of April to the 23d day of December, 1899, as shown by customs invoice, appears to be \$502.04, and the total amount of importations as shown by the claim appears to be \$1,222.62; how do you account for the difference between the total as shown by the customs invoice and the total as specified in your claim? Explain that fully to the commission.—A. On goods imported from Japan the freight charges are prepaid in Japan, and when they come here we have merely to take the goods out and to simply pay for cartage.

Q. Duty also?—A. No; duty was paid here—duty and cartage here.

The CHAIRMAN. You say that the freight was prepaid in Japan. Now, is the freight added to each individual or separate item here?

A. No; the freight was not added; they simply added wharfage, fumigation, and cartage.

Q. You say that to account for the difference, it was that the goods in Yokohama were invoiced the original cost plus the freight prepaid. Is that what I understand?—A. No; freight was not added to the invoice which came from Yokohama.

Q. What made the difference between this statement here and the bill?

ATTORNEY. Is the value of the goods as placed upon the goods upon shipment by the Yokohama firm, is that the real value of the goods or is it less than the actual value of the goods?

A. It is a less value.

Q. Have you, or have you not, anything to do with the fixing valuation on those goods at the time of their shipment from Japan?—A. No; I have nothing to do with it.

Q. The firm in Yokohama does that?—A. They do it.

Q. And, as a matter of fact, you do not know the value of the goods which have been shipped to you until you receive your statement from the Japan firm? Is that so?—A. Yes.

Q. And that bill which you have is the amount which you have actually paid to the Japan firm for the goods which were imported, is

shown by the custom-house manifest, which had been certified to by Mr. Boyd?—A. Yes.

Q. And that is the actual value of those goods, is it not?—A. Yes; the actual value.

Q. And those goods were in your store at the time of its destruction, those goods for which you have paid those yen specified in that bill?

Q. Who paid the duty?—A. In Japan.

Q. Do they do that from instructions from you?—A. No.

Q. Do you pay the duty or the parties in Japan?—A. We paid it.

Q. To whose benefit would it be to have that amount of stock, less its real value, in the manifest? Would it be to your benefit or the man in Japan?—A. To our benefit.

Q. Was not this reducing the price of the goods for the purpose of reducing the duty on the goods?—A. Yes.

Q. Then the prepaying the freight does not figure in this at all?—A. No; it does not figure in here at all.

The CHAIRMAN. Do I understand that in this bill here, Yokohama bill, that the prices here include prepaid freight? In this Yokohama bill that came to you direct, does the price there include prepaid freight?

A. Yes.

Q. When you pay your freight is it not so much per ton, not so much on the invoice value of the goods?—A. So much per ton.

Q. Do I understand that this price here in this Yokohama bill includes freight prepaid on every item?—A. Yes.

Q. Why was this not filed, this certification of the Japanese goods, at the time the Chinese goods were filed?—A. Mr. Whitney thought it was.

Q. Does that bill cover any other goods?—A. No; it is just for this translation.

[List of purchases filed.]

Q. Since your case was heard in the Chamber of Commerce room has anything new developed in regard to insurance?—A. Nothing in regard to the insurance.

Q. No amount was paid?—A. No; I have surrendered all my policies to the insurance companies.

Q. Three thousand dollars which was paid on the building—is that apportioned among the four owners or is it your portion?—A. That is my portion.

Q. And was that your portion paid on the building?—A. Yes.

Q. When you were before the commission before were you interrogated by the commissioners in connection with the firm's liability at the time of the fire?—A. No; I was not.

Q. What was your total indebtedness at the time of the fire, approximately?—A. Including the Chinese merchants, was over \$10,000; in Honolulu alone, about \$2,500.

Q. Have you resumed business?—A. Yes; at the same place.

Q. Have you a new building?—A. Yes.

Q. Built a new building?—A. Yes; the same as before.

Q. Those were your total liabilities at the time of the fire?—A. Yes.

Q. That makes how much, \$12,000?—A. Fifteen thousand dollars; not over \$2,500 to Honolulu merchants; in China, \$10,000.

Q. What was it in Honolulu?—A. Two thousand five hundred dollars.

Q. In China?—A. Twelve thousand dollars; about \$15,000 altogether.

Q. How much paper at the time of the fire did you have discounted in Honolulu with your indorsement on? How much of your notes were in the different banks in Honolulu at the time of the fire?—A. Only one note, at Spreckels & Co.'s, for \$1,000.

Q. That is the only note you had at the time of the fire?—A. That is all.

Q. Didn't you have any at Bishop & Co.'s?—A. No.

Q. Bank of Hawaii?—A. No.

Q. What were you owing in the banks here at the time of the fire?—A. At the time of the fire the only paper that you had in the different banks of Honolulu was a note for \$1,000—that is, of your own paper?—A. Yes.

Q. Did you owe Hackfeld & Co. any money, or any of these white firms at the time of the fire?—A. Very little.

Q. Then this \$2,500 owing in Honolulu to merchants is principally Chinese?—A. No; a \$1,000 to white firms, the rest to Chinese firms.

Q. Do you include that \$1,000 note in the \$2,500?—A. No.

Q. That is money you borrowed straight from the bank?—A. Yes. At the time when the town was quarantined I was paying my debts which amounted to over \$1,000.

Q. When did you make your last remittance to Hongkong before the fire?—A. I forget. Every trip we would send money back.

Q. Shortly previous to the fire you made a remittance?—A. Yes.

Q. Did you save any books?—A. Yes; at the time of the fire, and after we had about \$8,000 money—silver coin and gold coin—in the safe, and somebody tried to break open the safe.

Q. What were you doing with so much money in the safe?—A. Could not take it out; in quarantine.

Q. How long had that money been in the safe; was it there before the quarantine?—A. That is the money sent to us from the other islands.

Q. Before the quarantine?—A. No; at the time of quarantine.

Q. Didn't you have any paper money amongst that?—A. Yes.

Q. What was the condition of it when the safe was opened?—A. No money destroyed.

Q. This money consisted principally of remittances from other islands during quarantine?—A. Yes.

Q. Then there could not have been any silver or gold coin come?—A. Drafts and checks.

Q. But no silver or gold?—A. Very little silver or gold.

Q. Was there any money belonging to other people deposited with you for safe-keeping?—A. Yes; some money was deposited with us but we have returned it all to the owners.

Q. In these remittances was any gold or silver received?—A. I was drafts.

Q. No gold or silver?—A. No.

Q. How long after the fire did you get a chance to get to your safe and get it open?—A. Nine days after.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above, before the fire-claims commission.

FRANCES McTIGUE,
Official Reporter.

Subscribed and sworn to before me this 10th day of October, A. D. 1902.

[SEAL.]

H. C. CARTER,
Notary Public, First Judicial Circuit.

EXHIBIT No. —.

Before the Fire Claims Commission, Honolulu, H. T. Testimony on claim No. 75. Amount, \$77,703.78.

MONDAY, July 22, 1902.

Commission all present except Mr. Testa.

Appearances: Attorney Robinson, for claimant; Attorneys Dunn and Ed. Douthitt, for the government.

Yee Wo Chan Company, claimant.

WONG CHOW (CH), being first duly sworn, testified as follows:

The Yee Wo Chan Company is the company of which I am the manager. I have filed before this commission a claim for the sum of \$77,703.78 on behalf of the Yee Wo Chan Company; their place of business was on Maunakea street, near King, on the Waikiki side of Maunakea, the second store from the corner; these premises were destroyed by fire with the contents on the 20th of January, 1900.

By Mr. ROBINSON:

Q. In addition to the two-story, iron-roof, brick building, etc., there were some buildings and structures besides constructed by you?—A. A kitchen, the furniture and fixtures of the store; there was furniture there.

Q. These additions to the brick building, the value is placed at \$865; of what are the items of that claim?—A. Twenty-five feet deep, 24 feet wide, and 20 feet high—this is the kitchen, made of corrugated iron and plastered; the floor was wood. That was built, the contract given to C. Hopp for \$750, in the year 1896, thirteen years ago; the contract for the cost of the building, \$750.

Q. What other items are in this claim for \$865?—A. Seventy-five dollars for the fixtures, place to dry clothes, etc.; making up the floorings cost \$40 (that is the cost price). That is a total of \$865. All these articles were purchased thirteen years before the fire.

(Witness here identifies the building on map submitted to him.)

By Mr. LOVEKIN:

Q. Schedule C. The first building claimed for is how much?—A. The first building claim is \$5,865, No. 23, Deacon fire map, sheet 4, block 6. The \$5,000 claimed for the brick building being one-quarter of the whole brick building corner of Maunakea and King street; \$865 for corrugated iron one-story addition in rear of No. 23. Buildings

28 and 29, Deacon's map, sheet 4, block 6, and No. 43, two-story frame dwelling in rear of Nos. 28 and 29; \$1,000 for Nos. 28 and 29, and \$1,150 for No. 43 in the rear.

Mr. ROBINSON. Item No. 1. The addition to your building, kitchen connected with the store situated on Maunakea street, between King and Hotel, of what was that constructed?

A. Corrugated iron, wooden floor, plastered inside. The cost price was \$750.

Q. The buildings situated on the same street, Maunakea street, Nos. 28 and 29 in block No. 6, of what—

(Interruption by Mr. Macfarlane, who states that the amount is \$860 before in his claim.)

Mr. ROBINSON. In addition to the \$750 that you paid for that building, what other expense did you incur?

A. I fixed up the place for drying clothes. The cost of that was \$75, and the Chinese furnace \$40, including labor.

Q. That place used for drying clothes was not formed of the roof of the building below, was it?—A. Yes; built a platform near the kitchen.

Q. Of what were the buildings indicated by Nos. 28 and 29 as per Deacon's map?—A. I testified some days ago I built this place, with the six stores inclusive, and it cost \$3,300. Claim No. 36, Sing Chong's case.

Q. What was the value of the furniture and the fixtures owned by the Yee Wo Chan Company?—A. \$2,218.50, labor and everything, and the safe included; it was built over ten years ago; that was the cost price of the fixtures.

Q. There were no fixtures in any of the other stores?—A. I rented them.

Q. What was the value of the merchandise situated in the store of Yee Wo Chan Company?—A. Over \$62,000.

Q. Under your claim it is \$62,208.55?—A. That is correct.

Q. I will show you Exhibit C, attached to your claim, presented to this commission. It shows the total amount of the store fixtures, etc., to be \$22,018.50. I will ask you if the items set forth contain all the items in the store?—A. Yes.

Q. With reference to the values, does that indicate cost price?—A. Yes; these fixtures we placed in the store over ten years prior to the fire.

Q. In that new store building, on the premises of the late store, you have placed in there some fixtures?—A. After the building was erected the fixtures were put in in 1886; some of the new fixtures were put in lately.

Mr. MACFARLANE. Does that include furniture and fixtures in it since 1886?

Mr. DUNNE. Yes, in the brick building.

WITNESS. There is a safe included in that.

Mr. ROBINSON. In fitting up the store occupied in that by the Yee Wo Chan Company, what was the cost of these fixtures?

A. Nine hundred and fifty dollars.

Q. I will show you Exhibit A, attached to your claim showing the merchandise received from China during the year 1889; will you state whether or not that merchandise was received by you or not during that year?—A. Yes.

Q. And that the prices it shows are the actual prices?—A. Yes.

Q. And the amounts set opposite each item shows freight and duty paid by you?—A. Yes.

Mr. ROBINSON. We will introduce a certified copy of this invoice as soon as we get it from Mr. Boyd.

Q. This statement shows the amount of merchandise received from China from February 14, 1899, until the first of the year 1900, does it not—until December 5, 1899?—A. Yes; on the 12th of December the town was quarantined; no goods let come in and go out.

Q. On Exhibit A is shown statement of the merchandise received from the States by the *Australia*?—A. Yes.

Q. That shows the aggregate amount of the cost price to be \$4,323.04; that is the cost price of the goods?—A. Yes.

Q. To which is added freight \$307.92?—A. Yes.

Q. And duty \$19.30, is that correct?—A. Yes.

Q. On page 3, Exhibit A, appears a statement of the imports from Japan, April 24 to December 23, 1899, showing the amount of the invoice to be \$1,135.07?—A. Yes.

Q. I will ask you whether or not that was the cost price of the goods?—A. Yes.

Q. To which is to be added \$87.55, the expenditures on duty?—A. Yes.

Q. I will ask you whether or not these shipments were made direct to you?—A. Some sent to other firms for me, to save expense.

Mr. H. LOSE, representing the North American Insurance Company, being first duly sworn, testified as follows:

A. North American Insurance Company policy No. 50434, \$2,000, this policy is surrendered; it shows cancellation here [referring to book]; it was not paid.

By Mr. ROBINSON:

Q. You say that you had other policies with Yee Wo Chan Company?—A. I had two more; I paid Yee Wo Chan Company the return payment; the different amounts are here stated.

Q. Mr. Lose, did you have a policy No. 50449, \$500?—A. Yes, sir.

Q. That is amongst the ones that were returned?—A. Cancellation on the return to the company.

Q. Did you have a policy for \$500, policy No. 50485, in the same company?—A. That is correct; I think it was canceled at the same time and returned.

Q. That is all, is it?—A. Yes.

Q. There are three policies, Mr. Lose?—A. Yes, sir.

Mr. F. S. PEACHY, being first duly sworn, testified as follows:

By Mr. ROBINSON:

Q. Mr. Peachy, you are agent for the German-American Insurance Company?—A. German Alliance Insurance Association, New York.

Q. Did you have policy No. 509919 for the sum of \$3,000, in favor of Yee Wo Chan Company?—A. Yes.

Q. State whether or not that policy was canceled.—A. It was.

Q. And the rebate premium was paid?—A. Yes, sir.

Q. That is the only policy you have of Yee Wo Chan Company?—That is all I know of.

Mr. MACFARLANE. You have your register there?

A. I have.

(Mr. Macfarlane examines the register.)

Mr. W. LANZ, being first duly sworn, testified as follows:

By Mr. ROBINSON:

Q. Mr. Lanz, you are the Honolulu agent for the Hamburg-Bremen Insurance Company?—A. Yes, sir.

Q. State whether or not the Hamburg-Bremen Insurance Company issued any policies of insurance to Yee Wo Chan Company in the year 1900?—A. Yes, it did.

Q. What are the numbers of the policies and the amounts? State whether or not they are in full force or canceled and surrendered.—

A. Yee Wo Chan Company, Nos. 9727, 9744, and 9758a. No. 9727, \$2,000, that was paid; No. 9758a, \$2,000, that was paid.

Mr. MACFARLANE. There are two policies 9758a?

A. No. 9744 is the next. Wait a minute; yes, No. 9744, \$3,000—that was on their store in Maunakea street; I don't know whether or not it is on the goods or on the building; I have not the books here; that was paid; this is on the building, Mr. Macfarlane.

Q. Any other policy?—A. Yee Wo Chan Company? No.

Q. Any other company?—A. Magdeburg, No. 357; the amount of that is \$5,000.

Q. Why wasn't that paid?—A. New York Standard.

Q. Was the policy returned to Schaffer & Co.?—A. Yes.

Q. Any other insurance, Mr. Lanz, on any of their property?—A. Yee Wo Chan & Co.? No; we have some others.

Mr. J. S. WALKER, being first duly sworn, testified as follows:

By Mr. ROBINSON:

Q. You are agent in Honolulu of the Alliance Assurance Association, also the Royal Assurance Company?—A. Irwin & Co.

Q. You represent them in the insurance company department?—A. Yes.

Q. State whether or not these companies issued policies of insurance to Yee Wo Chan Company.—A. Yes.

Q. Take the Alliance first.—A. No. 2394104; amount, \$2,500.

Q. Has it been paid?—A. No.

Q. Policy surrendered?—A. Yes, pro rata; premium returned \$46.09.

Q. Anything else in the Alliance?—A. Yes, we have another; No. 2394108, for \$3,000. That has been canceled and the policy returned return premium, \$55.01.

Q. In the Royal?—A. Policy D 13578, for \$2,500; return premium \$48.13. Policy canceled for the same reason.

Mr. A. CONSTABEL (of Hackfeld & Co.), being first duly sworn testified as follows:

By Mr. ROBINSON:

Q. Mr. Constabel, you represent Hackfeld & Co.—their insurance department?—A. Yes.

Q. They are agents for the Transatlantic Insurance Company?—A. Yes.

Q. State whether or not this insurance company issued policies to Yee Wo Chan & Co. for the year 1889.—A. Yes.

Mr. DUNN. State the number of the policy.

A. No. 2890; amount—I beg your pardon, that is a mistake—No. 2883; Transatlantic Fire Insurance Company; amount, \$5,000. It has been paid; there are no other policies in the same company.

Q. Have you filed a claim here as coclaimant?—A. Yes.

Mr. MACFARLANE. Have you your policy there?

A. Yes.

(Mr. Macfarlane examines policy.)

WONG CHOW, previously sworn:

Mr. ROBINSON. Mr. Wong Chow, on page 2, Exhibit A, is a memorandum of merchandise from China from February 15, 1899, to December 20, showing the amount of the invoice to be \$4,323.04, of freight, \$307.92; duty, \$19.30. I will ask you whether or not that is the cost price of the articles imported and the freight paid and the duty?

A. That is correct.

Q. Page 3, Exhibit A, imports from Japan, April 21 to December 23, 1899; and is that given with shipments to other merchants, aggregating the sum of \$1,372.62, being \$87.55 for duty, total amount of invoice—\$150 cartage? I will ask you whether that item is correct?—A. Yes; that is the actual cost price of the merchandise; some shipments sent to Wing Chong & Co., some to Tung Kee.

Q. American Maru, April 21. Through whom did he get that?—A. I forgot about that. I have that memorandum myself, but did not put down the names of the firms. I have only the goods received, amounting to so much.

Q. Next item—Carmantenshire (?). Through whom did you receive that?—A. I only put down what I got in the memorandum book—amount of goods sent and the money value of the goods.

Q. In the book did you put down the names of the firms through whom you received these goods?—A. I didn't put down the names.

Q. Have you any recollection independent of that book as to the names of the firms through whom you received these goods?—A. I only remember three firms—Wing Chong Lung, Tung Kee, and Yee Sung Kee.

Q. Which of these items, can you state, came through any one of these three firms?—A. I don't remember.

Q. What have you in your book there?—A. What I have here is the firm at Japan, what goods they sent, and the amount of the goods and money.

Q. Give us the name of the Japanese firm?—A. Yee Sang.

Q. The first item American Maru?—A. Yes; from Yee Sang, and the goods are from Yee Sang; the amount of that is \$276.30, \$23.30 duty.

Q. What is the next item?—A. It is for goods; class of goods not specified; it is for some Japanese eatables, and cloth goods and so.

Q. It does not appear in that book through whom you received any of these goods?—A. No.

Q. You took an account of stock, merchandise of Yee Wo Chan & Co., on the 15th of February, 1899?—A. Yes.

Q. And that amount was \$41,613.30?—A. Yes.

Q. What is that book he is reading from?—A. That is the account of stock taken on the 15th of February, 1899.

Q. That is the original account of stock, is it?—A. Yes.

Q. That was taken before the fire, and you saved that, did you?—A. Yes; that is an old book.

Q. That was in the safe at the time of the fire?—A. Yes.

Q. From that date until the time of the fire you purchased from the Honolulu firms \$12,521.50 worth of goods?—A. Yes.

Q. What means have you of knowing that amount?—A. I have it in my book; that is, to the 19th of January, 1900.

Q. That is the day before the fire?—A. Yes.

Q. Those are the books of the business, are they?—A. Yes.

Q. And you had in stock on that day 205 bags of coffee?—A. Yes.

Q. What was the value of the coffee on the 20th of January, 1900?—A. Thirteen cents a pound; 100 pounds to the bag; that would make a total of \$2,767.50.

Q. What means have you of recollecting that amount of coffee was on hand?—A. At the time of the quarantine I knew there was no business, so I ordered Fo Kee to pile up the coffee, and I counted it.

Q. Also at the same date ten bundles of Hawaiian tobacco. What is a bundle of Hawaiian tobacco worth?—A. Thirty dollars; that is \$300; I remember that in the same way.

Q. These amounts, together with the items, imports, as shown in the preceding accounts in Exhibit A, make an aggregate on hand on January 20, 1902, of \$85,459.05?—A. Yes.

Q. From the time you took stock in February, 1899, to the 1st of March you sold \$1,508.30 worth of goods?—A. Yes.

Q. Where did you purchase that coffee?—A. Some of my customers sent it to me in exchange for goods; sometimes coffee sent to me to sell for people as agent; before the fire some stores in town owe our firm some money, and they are afraid their place will be burned, and they ask me: "Will you take some coffee in payment of the amount I owe you." I agreed to take some of the coffee.

Mr. MACFARLANE. That is just before the fire?

A. Yes.

Q. Can he give us—has he the data to tell us those dates, and where the coffee came from?—A. I have everything in black and white, but my safe was so small I could not put everything in, and the bookkeeper tried to pack it, and the carts took it back in the fire.

Q. But he was the manager of the Yee Wo Chan Company?—A. Yes.

Q. If this thing happened just before the fire, would he tell this commission who it was he took the coffee from and about what quantity from each?—A. Thirty bags of coffee was given my firm from Hing Kee & Co., and some from my customers at Kona, Kong Fook, and some from a man up there sending in exchange for goods. Some of the coffee has been in the store about two years.

Q. How much did they pay Hong Kee for 30 bags of coffee?—A. I paid him 13 cents.

Mr. ROBINSON. And those 10 bundles of Hawaiian tobacco, where did he buy those?

A. From Kwong Fook, at Kona; he didn't send all at once; some this trip, some next, etc.

Q. Have you any book in your possession showing the amount or sales from February 15, 1899, to January 1, or during the month of January, 1900, prior to the 19th day of January?—A. Yes.

Q. What was the amount of your sales from the 15th day of February, at which time you took account of stock, until the day of the fire, 1899?—A. Twenty-three thousand two hundred and forty-one dollars and fifty cents.

Q. When was that book prepared?—A. I fixed that every month from February 15.

Q. These entries were made in the book during the month in which the sales were made?—A. Yes.

Q. This is one of the books saved from the fire?—A. Yes.

Mr. MACFARLANE. I would like to ask a question here. Do you turn the amount of your stock over every year?

A. Yes, sir.

Q. And he has a stock of \$85,000, and he only sells \$23,000. How does he account for that?—A. That is the cost price I have on that claim now; I have taken out all the profit; the amount sold would average \$27,000, but I took out the profit.

Q. Don't these sales here represent the profit in it?—A. No.

Q. When he sells any goods to the credit of sales account, his profit is always in the amount of his sales?—A. I sell over \$27,000 worth of goods, and I have taken out the profit; that is the actual cost price.

Mr. ROBINSON. What amount have you taken off the profit?

A. About 16 per cent is taken off.

Mr. MACFARLANE. How do you account for the difference?

A. Before June last year I find out that the duty will be heavy on the silk goods and the tobacco and the tea, so I imported a large quantity of silk goods, tea, and firecrackers. At present on the silk goods there is \$3 a pound duty; at the time I brought in such quantity it is 25 per cent.

Q. This shows a balance on hand on the 20th of January in reference to the merchandise of Yee Wo Chan Company, amounting to \$62,208.55. Is that correct?—A. Yes.

Q. That is the net actual cost price of the merchandise?—A. Yes.

Q. Exhibit D. I call your attention to this: That is a statement of merchandise received by the *Hongkong Maru* on the 2d of January, 1900, amounting to the sum of \$721.02?—A. \$721.02.

Q. That is the value of—the actual cost price of the merchandise received by the *Hongkong Maru* was \$587.67?—A. I have it \$545.91 in this book, and \$41.06 as per bill of lading; that is a total of \$587.67, plus \$133.35 on cigars on page 97, on sugar eight and a half, making a total of \$721.02; the duty on the 10 per cent and the cigars and sugar amounts to the total as above.

Q. On the *Algoa* you received, December 26, 1899, goods amounting in the aggregate to \$3,562.66?—A. By the *Algoa* \$2,841.75, and besides paying a fumigating expense of \$57, and expenses of the wharf \$14.25, and for cartage \$57; total, \$3,691.02.

Q. You received on the *Algoa* 437 packages of Chinese merchandise, \$278.25?—A. Four hundred and seventy Chinese merchandise, average, \$2,077.25.

Q. Freight bill of lading 1549?—A. \$315.30, 10 per cent duty—\$160.61, 25 per cent \$62.59; duties on other goods amounted to \$225; total, \$2,841.75. Then is the fumigating expense.

Q. How do you make that total?—A. That is including 437 packages.

Q. It is erroneous in the claim; it should be—A. \$2,841.75.

Q. What additional expense did you incur regarding that merchan-

dise?—A. That goods that came by the *Hongkong Maru* and the *Algoa* were fumigated at the wharf. There is 57 tons of goods came by the two steamers, fumigated at the wharf at \$57.

Q. In addition to the item \$57 for fumigation of these goods you paid wharfage \$14.25?—A. Yes; and for cartage \$57.

Q. Where were these goods?—A. The goods were taken from the wharf and placed in my warehouse at the corner of Kukui and Nuuanu streets, and was there five days when they were burned.

Q. When?—A. On the 22d day of January; that was on the mauka side of the street near Nuuanu.

Mr. TESTA. Is there a stable now close by?

A. No.

Mr. ROBINSON. This means the actual cost price of the goods and the actual price paid for duties, etc.?

A. Yes.

Q. None of this was included in the merchandise of Yee Wo Chan Company, in its store?—A. No.

Q. It was destroyed on the 18th of January; it was not included in this that was destroyed on the 20th of January?—A. No.

Q. This was destroyed on the 22d of January in the warehouse on Kukui street?—A. Yes; that was an unfinished building.

Q. I desire to call your attention to Exhibit E, containing a list of goods stored in the warehouse No. 15, corner of Kukui and Nuuanu streets; I will ask you what that is [showing witness paper].—A. That is goods I received on the *Hongkong Maru* and the *Algoa*.

Q. Is there an itemized account of these goods?—A. That is an itemized account for the goods received by the *Hongkong Maru* and the *Algoa*.

Q. Which was destroyed in the warehouse?—A. Yes; on the 22d day of January.

Q. Mr. Wong Chow, in Exhibit D you have set forth that the actual cost price, of the merchandise delivered to you on the Pacific Mail wharf at Honolulu by the steamers *Hongkong Maru* and *Algoa* was \$3,562.77?—A. \$3,691.02.

Q. Is that the actual cost price, including duty and the expense incident to the fumigation, dockage, wharfage, and drayage?—A. Yes.

Q. In Exhibit E you have an itemized statement of these same goods, and the value of these goods is placed at \$5,005. Is that the selling price of these goods?—A. The last time the President appointed Mr. Magoon as commissioner of the fire claims he made a rule that all the goods be made at the market price, so I made out the list intending to file it; finally the court is abolished; now I file it with this court. I did not know this court intended to have the actual cost price; then I went to the custom-house and found out the actual cost price. All the invoices [witness's] were destroyed by fire.

Mr. ROBINSON. I would like to have in evidence assignment from Bruce Cartwright, as trustee of the Queen Emma estate to Yee Wo Chan Company of all the right, title, and estate in and to the premises upon which were situated the dwelling house upon which we had some testimony this morning.

(Admitted. Marked "Exhibit A.")

Indorsed: Assignment, Bruce Cartwright, trustee, to Yee Wo Chan Company.

Judge WHITING. I would like to put these books in proper form. What book is this [showing witness book]?

A. That is the amount of stock taken on February 15, 1899.

Q. That is all that it contains?—A. Yes, sir.

(Admitted in evidence, marked "Exhibit B.")

Q. What book is this [showing witness book]?—A. This book is amount of goods purchased from different firms in Honolulu.

(Admitted in evidence, marked "Exhibit C.")

Q. What is this book [showing witness book]?—A. This is the book for the amount of goods by the *Hongkong Maru* and the *Algoa*, and that is an itemized account that came by the two steamers; they were in the Kukui street warehouse.

(Admitted in evidence, marked "Exhibit D.")

Q. What book is this [showing witness book]?—A. This book contains the buildings and the fixtures in the store and cost of buildings.

(Admitted in evidence, marked "Exhibit E.")

I employed two men to watch the warehouse, and their personal effects were in the warehouse; there were no other goods of Yee Wo Chan Company there.

Q. What book is this [showing witness book]?—A. This is the amount of sales from February 15, 1899, to January, 1900.

(Admitted in evidence, marked "Exhibit F.")

Q. What book is this [showing witness book]?—A. This is goods that came from Hongkong, Japan, and San Francisco, and others during the year 1899.

(Admitted in evidence, marked "Exhibit G.")

Mr. DUNNE. I move that the examination of this gentleman be deferred until this case comes up again.

Mr. MACFARLANE. As this claim requires further consideration, we will defer further consideration of this claim until you are notified.

Proceedings here closed.

HONOLULU, HAWAII, *October 11, 1902.*

I hereby certify that the foregoing typewritten matter is a full and true copy of my shorthand notes of the testimony given and proceedings had before the fire claims commission in the matter of Yee Wo Chan Company, claim No. 75, at the place and on the dates therein mentioned, and transcribed by me.

P. MAURICE McMAHON,

Ex-Official Stenographer, Fire Claims Commission.

Subscribed and sworn to before me this 14th day of October, A. D. 1902.

H. C. CARTER,

Notary Public, First Judicial Circuit.

(Indorsed:) Fire claims commission, Honolulu, Hawaii. Claim No. 75. Yee Wo Chan Company. Copy of testimony.

EXHIBIT No. —.

No. 403. Fire Claims Commission. Claim of Jos. P. Mendonca. Amount, \$21,920.75. Filed May 31, 1901, at 10.45 o'clock a. m. J. M. Riggs, clerk. Presented by C. Bolte.

STATEMENT OF CLAIM.

The undersigned, claimant, respectfully represents that he is a resident of Honolulu, Hawaii.

That on the date of the loss, hereinafter specified, he was the sole owner of the effects and property set forth in the schedules hereto attached, marked "Exhibit C;" that the value of said property, at its value in January, 1900, is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in buildings on Hotel, Smith, Maunakea, and Kings streets, in said Honolulu, Territory of Hawaii.

That said loss consisted in part of the destruction of the building more particularly described in Exhibit C; that the name of the owner of the land whereon said building stood is Jos. P. Mendonca, and the nature of the interest of this claimant in said buildings is fee simple.

That some of said property was insured and some not insured in the name of Jos. P. Mendonca, and \$3,300 of said insurance has been paid, \$1,000 by the Prussian National Insurance Company, the insurer thereof, and \$2,300 by the National Fire Insurance Company of Hartford.

That the foregoing statement of claims and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profit through the interruption of business, nor any loss except the destruction of, or direct damage to, said property by fire or removal under the order or direction of the board of health, as aforesaid.

JOS. P. MENDONCA.

TERRITORY OF HAWAII, *Island of Oahu*, ss:

Jos. P. Mendonca, being first duly sworn, says that he is claimant above named; that he knows the contents of the foregoing statement of claims and of the schedules hereto attached, and that the same are true of his own knowledge, except such matters as are stated upon information and belief, and as to those he believes them to be true.

JOS. P. MENDONCA.

Subscribed and sworn to before me this 31st day of May, A. D. 1901.

ASSIGNMENT OF CLAIM.

In consideration of the sum of \$1, to me paid by Joseph P. Mendonca, of Honolulu, island of Oahu, the receipt of which is hereby acknowledged, I hereby assign and set over to the said Joseph P. Mendonca all my claim against the government of the Territory of Hawaii for damage done to my property by the spreading of the fire of January 20, 1900, on the mauka side of King street, near Nuuanu bridge, at the corner of a little lane, the value of the claim of said buildings being \$665.

M. B. SILVEIRA,

By his attorney in fact, C. BOLTE.

HONOLULU, October 10, 1901.

HONOLULU, HAWAII, November 4, 1901.

Mr. C. BOLTE sworn.

The CHAIRMAN. What is it you wanted to bring out in this?

A. I don't know except that everything is examined. On Schedule C, dated May 30, 1901, Nos. 1 and 7 to be struck out,

	Feet
No. 1	44
No. 2	71
No. 3	2, 10
No. 5	1, 68
No. 6	2
No. 7	2
No. 22	4
No. 23	6
No. 24	4

On Schedule No. 3 strike out—No. 1, 650 feet.

Q. You mean to take off from the total amount of \$21,920.75?—A. 6,630 square feet at \$1, and 850 square feet at 75 cents, making amount of claim \$14,564.

Q. Why do you withdraw this amount?—A. Because Mendonca bought that land, but I find that some people have already made claim for it; he bought the land, including the fire claims.

Q. Who are the claimants?—A. Magoon for Pulaa for Nos. 22, 23, and 24. No. 5 claim has been made by Chan Kim for some Chinese society. Nos. 1, 2, 3, and 4 have been claimed by some native people.

Q. Then this property was bought since the fire?—A. Since the fire.

Q. Every one of these?—A. Three pieces of land, with seven buildings, Exhibit No. 1, in section No. 33, which is a shop on land that Mendonca had before.

Q. Were the seven buildings all on three pieces of land which were bought since the fire?—A. Two of these pieces were already bargained for before the fire; then came the quarantine, and the thing was postponed, and the deeds were not made until May or June after the fire.

Q. How about Nos. 22, 23, and 24?—A. That is the same thing. The bargain was made before the fire and the deeds were signed after the fire, because Pulaa had been quarantined.

Q. No. 1 in Diagram No. 3 is the same way?—A. No, it is simply that Mendonca had promised the Chinaman who built the barn, by the name of Wo Sing, that he should have that money. He had made claim for it himself.

Q. Has he made a waiver?—A. Yes. Mr. Bolte filed an assignment.

Q. No. 26 has no price?—A. Sixty-five square feet.

Q. Do you wish to deduct this amount that you quote now or let them stand?—A. I think I had better let them stand, because Mendonca made the bargain before the fire to purchase them.

Regarding the insurance, I would like to say I wish it to read—

That some of the said property was insured in the sum of \$3,300, and some was not insured, in the name of Jos. P. Mendonca. Of said insurance has been paid \$1,000 by the Prussian National Insurance Company, the insurance thereof, at \$2,300 has been advanced to me by C. Bolte, insurance agent of the National Fire Insurance Company of Hartford.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above before the fire claims commission.

FRANCIS MCTIGUE,
Official Reporter.

H. C. CARTER,
Notary Public, First Judicial Circuit.

EXHIBIT No. —.

No. 434. Fire claims commission. Claim of Lahapa Mauiawa. Amount, \$31,007.50. Filed May 31, 1901, at 3.20 o'clock p. m. J. M. Riggs, clerk. Presented by J. K. Nakookoo, attorney at law.

STATEMENT OF CLAIM.

The undersigned claimant respectfully represents that she is a resident of Honolulu, Hawaii.

That on the date of the loss hereinafter specified she was the sole owner of the effects and property set forth in the schedules hereto attached, marked Exhibits B and C; that the value of said property at its cost price is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1901, and that no part thereof was saved; that said fire occurred, as claimant is informed and believes, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in the claimant's building, near Queen street, in said Honolulu, Hawaii.

That said loss consisted in part of the destruction of the building more particularly described in Exhibit C; that the name of the owner of the land whereon said building stood is the claimant.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent or for use of property, or for loss of profits through the interruption of business, nor any loss except the destruction or direct damage to said property by fire or removal under the order or direction of the board of health, as aforesaid.

LAHAPA MAULIAWA.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

Lahapa Mauiawa, being first duly sworn, says that she is the claimant above named; that she knows the contents of the foregoing statement of claim and of the schedules hereto attached, and that the same are true of her own knowledge except such matters as are stated upon information and belief, and as to those she believes them to be true.

LAHAPA MAULIAWA.

HONOLULU, HAWAII, *August 16, 1902.*

Fire Claims Commission, claim No. 434, for \$29,802.50. (Corrected by clerk to \$31,007.50.)

The CHAIRMAN. What is your name?

A. Lahapa Mauiawa.

Q. Do you remember the day your things were burned?—A. Yes.

Q. What day was it?—A. January 20.

Q. What year?—A. Last year.

Q. What is the amount of your claim?—A. \$29,802.50.

Q. Is that the correct amount?—A. Yes.

Q. Your claim has been corrected by the clerk to \$31,007.50, which is the correct footing. Where were the goods burned?—A. Kapuolu.

Q. In whose house?—A. We own the house.

Q. Is there any other claimant besides yourself in this?—A. This claim consists of my claim, my husband's, and my children's.

Q. How many children?—A. Three. My son-in-law's was not included.

Q. How old are your children?—A. The man working for me is in this claim. Grandchildren, one 15 years and one 10 years old.

Q. How old is your daughter?—A. She is an adopted child of mine.

Q. In this claim of yours are the amounts quoted costs or values at the time of the fire?—A. They are quoted at cost.

Q. Are not some of the articles in that old, and you should have reduced the price of them?—A. Some of them are old, but I have kept them in good condition until destroyed by fire.

Q. On the first page of your claim you have four Hawaiian mats, \$60; is that correct?—A. Yes.

Q. Explain to the commissioners how you know it is correct.—A. The price of the mat when made was over \$15, so I claim \$60 for the four.

Q. On the same page, 50 silk holokus, \$2,500. Is that correct?—A. Yes.

Mr. NAKOOKOO. I would like to ask your honor to allow me to ask my claimant a few questions in regard to her personal effects destroyed by fire. I do not mean to go to work to ask her about all these items, but just a few questions.

The CHAIRMAN. You can go and do it, but not in detail, as the commission will have to go all over it again.

Mr. NAKOOKOO. Did you explain to the commissioners how you came to possess 50 holokus at the price of \$2,500?

Q. On page 5 of your claim "20 yards silk velvet, \$20." How did you have so much silk velvet?—A. The reason I had so much silk velvet is to prepare to fix dresses.

Q. How long had you kept it?—A. I don't remember. If I was to know that trouble was to come, I would have remembered the year and date.

Q. On the same page you have "100 bundles lauhaula leaves, \$1,000." How did you possess so much?—A. That is correct. I am a merchant and used to make fans and fancy things to sell, and that is the reason I had so much lauhaulu. The price of it is \$10 a bundle.

Q. On the last page of your claim is a "building, \$5,000." Is that a new house?—A. No.

The CHAIRMAN. Is that building on leased land or on your own land?—A. The building is on land owned by my husband.

Q. Is that the cost of the building of that house?—A. Yes, \$5,000. My husband is stupid; he did not know how to figure; I did all the figuring, paying of the carpenter and painter, so figured it at \$5,000.

Q. How old is that building?—A. For over two years after the building was erected it was not painted; and at the overthrow of the monarchy it was not painted until the board of health came. I protested to the board of health that they could not burn my building, as the interior and outside was sanitary, but they have burned it.

Q. Do you know the dimensions of the building?—A. I am not a carpenter; I am not supposed to know all; all I know, it was a two-story building, and there is a kitchen and dining room.

Q. Any other buildings outside of this you claim?—A. Yes.

Q. Has your building been appraised?—A. By order of the board of health my property was burned, and that is the reason the value on my building was so low.

Q. Did your husband die before the fire?—A. He died before the fire.

Q. What was his occupation?—A. He did nothing.

Witness locates buildings in block No. 5.

Government appraisement.

No. 31. Large two-story building facing lane, fair condition.....	\$425
No. 32. Storeroom	20
No. 33. Water-closet	10
No. 34. Washhouse, old	10
No. 35. In rear of (cottage) No. 30	100
No. 29. In rear of (cottage) No. 28	95

Q. How long had your husband been dead prior to the fire?—A. Five years previous to the fire of 1900.

Q. What was his occupation?—A. He was a fisherman when we were married.

Q. How long was he a fisherman?—A. And for some time after.

Q. How long ago were you married?—A. I did not count the years.

Q. How many years?—A. Do you want correct number of years?

Q. How many years?—A. Over thirty years.

Q. How long did he continue in the fishing business after you were married?—A. For many years.

Q. Did he then go into another business?—A. After he retired from the fishing business he did not do any work at all.

Q. Who made up this claim?—A. I did myself.

Q. When did you make it up?—A. I made it up after the fire at the detention house or the relief camp.

Q. Did you put it in writing at the time at the relief camp?—A. Yes, I did; and presented it to Mr. Kaulia and he passed it over to Mr. Nakookoo.

Q. Did you consult Mr. Nakookoo when you made out the claim?—A. I did not consult with anybody; they did not know my property.

Q. Did anybody make any suggestions as to the making up of this claim?—A. No.

Q. Have you that memoranda which you made up in the relief camp?—A. If you want it I will bring it, as I have it.

Q. You have it?—A. Yes.

Q. Did you make up this claim from the memoranda which you made at the relief camp?—A. Yes.

Q. At the time of making up the claim, did anybody make any suggestions as to prices which you have put opposite the respective articles in that claim?—A. Nobody suggested to me to put down the prices. I asked my adopted daughter to assist me, and she told me that I knew all the prices. The only thing she does is to wear the clothes when she gets them.

Q. When you made out the claim, did not you and your attorney discuss the different items before the claim was prepared?—A. The only thing my attorney said was, "Perhaps this claim is too much," and I said, "No."

Q. Were any changes made from the original memoranda which was made in the relief camp and the claim which was presented to the commission here?—A. It is exactly the same.

Q. Copied literally?—A. Yes.

Q. Are you in business yourself?—A. Yes.

Q. What business are you in?—A. I was a washwoman and earned money and started in business.

Q. How long ago was that when you were a washwoman?—A. For some years, and when I earned a little money started in business.

Q. How long ago did you start in business?—A. Over twenty years.

Q. What kind of business?—A. Selling fish.

Q. Do you remember the time you built that building?—A. Yes.

Q. Was Mr. Testa a boy or not?—A. Yes; I used to nurse Mr. Testa. It was a two-story house; it was a one-story cottage and was raised.

Q. How much did you put in that building?—A. I do not understand your question.

Q. That item you put at \$5,000. Is that the cost price of the building at the time it was destroyed?—A. Yes.

Q. Why didn't you put your claim down over \$5,000?—A. It was one of your business; \$5,000 I put down is for the general expense of the house.

Q. Why didn't you put down \$10,000?—A. Why should I, as it cost only \$5,000?

Q. When the board of appraisers went there were you there? Did they notify you that your building was to be burned?—A. Yes; afterwards. I was notified to pack my belongings and trunks.

Q. How many bedrooms did you have in your house?—A. One large bedroom and two beds in it; another bedroom; there was a bedroom downstairs.

Q. Explain to the commissioners how many beds you had in your room.—A. Only two at the time of the fire.

Q. How many beds have you?—A. Six beds in all.

Q. What kinds of beds?—A. We didn't have all koa beds; some were koa and some other wood. We had two pairs of laces for each bed.

Q. How much do you consider each bed is worth, including laces, pillowcases, etc.?—A. One hundred and fifty dollars each; perhaps more.

Q. How much do you think the beds are worth?—A. Thirty dollars or more.

Q. Thirty dollars for the bed; explain how you make it \$150.—A. It is mentioned in my claim.

Q. Have you any other pillows outside of the pillows mentioned in the bedroom sets?—A. Yes; hundreds of them.

Q. How old are those pillowcases, etc.?—A. Bought at different times.

Q. At the time you were married you were poor, so you could not consider these belongings bought at the time you were poor. When you built the house did you have those bedroom sets?—A. No.

Q. Can you guess how long you have had these things?—A. The beds were bought five years before the fire. The beds were bought at different times.

Cross-examination:

Q. Holokus, are they all yours?—A. They are not all mine. They belong to myself and to the other lady, my foster daughter.

Q. Have you another claim?—A. No. My daughter can not take them. They belong to me. All her belongings with mine I paid for and she can not take them away. She is my adopted daughter. She is staying with me now.

Q. Fifty silk holokus; who did they belong to?—A. Some to me and some to my daughter.

Q. How old is the first holoku; how many years?—A. I don't know. I did not count the years.

Q. In your claim it says fifty holokus—\$2,500. How long did you have the first holoku? Did you have that holoku at the time you were playing sweet with your husband?—A. No; when I had no husband I used to wear good clothes. After I was married to my husband these silk clothes were purchased.

Q. Mr. Testa is 40 years old now. Is that the oldest you have?

Q. Is it twenty-five years?—A. I did not count the number of years of the holokus I purchased. They were purchased by me during the time we were married.

Q. Do you remember when Kalakaua was appointed King, in 1874?—A. We were married before that.

Q. As a matter of fact, the purchase of these holokus commenced from the time of your marriage, anywhere from the time of your marriage up to the time of the destruction by fire at different times?—A. Yes; times when we were rich.

Q. There is an item of one black bead dress?—A. That cost—is more expensive than silk; costs anywhere from 10 cents to \$2.50 a yard.

Q. And these blankets?—A. They are new.

Q. And woolen shawls?—A. All new.

Q. Those Hawaiian mats. Were they ready-made or did you make them yourself?—A. They are made by me, and I place my labor, work and cost at \$20 each. That mat I made is thick, four layers, worth \$15 each. These are made very strong.

Q. One velvet mat?—A. Yes.

Q. Where did you purchase this?—A. Purchased by my husband but I gave him the money; \$50 it cost when new.

Q. How long ago?—A. It was bought after the big fire of 1886.

Q. These Bibles; were they a present?—A. No; I bought them; they were all new; bought at the bookstore.

Q. Why didn't you reduce them?—A. Why should I? That's the amount of money I spent on that book.

Q. Three dozen white shirts?—A. I purchased them at \$30 a dozen; three dozen white shirts at \$30 a dozen. My husband was rich and he did not buy cheap shirts. He wanted to put on style.

Q. How many clocks? You have four?—A. Yes; on my claim. If one gets out of order I buy another.

Q. How about eight bundles of white cloth, eight bales. Why did you get so much at a time and put so much money in it?—A. Because it was selling cheap, so I bought plenty of it.

Q. How long ago did you buy it; where?—A. Some was purchased at Paka's store and some at a white man's.

Q. What about this chiffonier?—A. It was a wardrobe.

Q. Built in the house?—A. No; it was movable. It was worth \$100. It was very old.

Q. You have down here men's hats. Why do you put them in here when your husband is dead?—A. Because I keep his things.

Q. Four pairs gold?—A. Those are earrings.

Q. Four pairs bracelets; gold?—A. Yes.

Q. One thousand dollars, 100 boxes for plants. What sort of plants?—A. Ferns, mountain ferns—in Japanese soy tubs. They were soy and saki tubs, etc.

Q. One kukui tree; grown in the land, \$100?—A. Yes; it was large and bearing fruit.

Q. One orange tree, \$100?—A. Yes.

Q. Three pear trees?—A. Yes.

Q. Four monkey pod trees, \$200?—A. Yes.

Q. One guava tree, \$100?—A. Yes.

Q. Flag pole; how high was it?—A. I don't know.

Q. How old?—A. After the revolution.

Q. One large pot?—A. The price is there, \$8.

Q. One gold-head cane?—A. Yes.

Q. Small calabashes?—A. Yes; ko calabashes.

Q. Twenty ko calabashes?—A. Yes; that is correct; \$500. Those calabashes are made by myself. Do not interrogate me so much at that point. I value them at that.

Q. You value them at \$500; how much apiece?—A. You are a rich man, why don't you find out?

Q. Six dozen small mats?—A. Those mats I made to sell; I made them myself.

Q. Sewing machines?—A. I had four sewing machines. I had four dozen waists which belonged to my grandchild.

Q. Fence around yard, \$100?—A. Yes; it was burned by fire. I have answered all the questions, do not ask me again, I will not answer any more.

Q. If Mr. Testa was 10 years old when your husband built the ouse, then it is fair to presume the house was 30 years old?—A. (No answer.)

Q. Are you your husband's heir?—A. (No answer.)

Q. Property insured?—A. No.

Q. How much taxes do you pay?—A. I don't remember. I will answer that question when I get what taxes I paid to the government.

Q. Did you pay any taxes on all these personal effects?—A. Yes; but don't know how much.

Q. How can you put a value of \$50 on those holokus; some were old, and some worn?—A. I have testified before that some were very expensive, but have averaged it down to \$50 each.

Q. What about these hats, one dozen? Is it \$200?—A. Yes; they are correct.

Q. Are they foreign or Hawaiian?—A. Foreign made.

Q. Did you have them for sale?—A. I bought them for my own use and for my adopted daughter.

Q. You have 48 hats?—A. Yes.

Q. Twelve gold rings?—A. Yes.

Q. Forty-eight pair sleeve buttons, gold?—A. It is not within your authority to stop me from purchasing as much as I like; it is not your business.

Q. Where were these sleeve buttons bought at \$25 a pair?—A. I forget—a store.

Q. Did you buy them all at one time?—A. No.

Q. Buy them all at one store?—A. No.

Q. Can you give the name and address of any single store at which you bought any of these things?—A. I do not see the persons who owned the stores in town; they have all gone now.

Q. Were these all your own personal effects?—A. The mats and fans were for sale; the rest are my personal effects.

Q. Are the gold rings and bracelets and earrings for sale?—A. No; for my own use.

Q. Those hats, two dozen; where were those purchased?—A. From foreign store; some on Fort street at Sach's.

Q. Four quilts?—A. Yes.

Q. Where did you keep all these things?—A. My house is a large house.

Q. How long did you have these kapas?—A. Those are very new quilts; never been washed; I consider a quilt when it is washed is old. (Case continued to be recalled.)

August 16, 1901.

Claim No. 435, \$513.75.

Mrs. KAHALE WAI, sworn.

Q. What is your name?—A. Kahale Wai.

Q. What is the amount of your claim?—A. \$513.75.

Q. Have you any other claims besides this?—A. This is mine and my husband's.

Q. Is that claim correct?—A. Yes.

Q. Where were these goods?—A. At Kapuukola.

Q. What house?—A. My mother's; the house belongs to her.

Q. Do you remember the day it was burned?—A. Yes; January 2 this year; last year.

Q. What is your occupation?—A. Selling fish with my mother.

Q. On what street were these goods at the time of the fire?—A. C Queen street near Kekaulike.

Q. Have you put these goods in at what they cost you?—A. Yes.

Q. How old are these goods?—A. Some were very old; I do not know how long.

Q. Got anything new?—A. Some were new.

Q. Which were in the greater proportion, old or new things?—A. About the same.

Q. Half and half?—A. Yes.

Q. What do you earn a month selling fish?—A. Over \$100 some times. This time it is dull; there is no business.

Q. Was that \$100 your mother's or your share?—A. I am working under her, and we together earn over \$100.

Q. What interest have you in this fish-selling business?—A. What ever she gives me.

Q. You have no fixed interest, fixed by contract, in this booth?—A. No.

Q. Is that what you take in, \$100 per month; does that mean gross or net?—A. No; it is gross receipts.

Q. How much of this \$100 is profit?—A. We pay \$20 for rent booth and the balance is profit.

Q. This fish costs something?—A. \$100 net.

Q. Didn't you say it was \$80?—A. The \$20 is to be deducted out of the \$100.

Q. How much do you deduct from the \$100 for the purchase price cost price, of the fish you deal in?—A. It is \$100 net after deducting expense of buying fish. We clear \$100 a month; \$20 is for the booth and we clear \$80 net.

Q. Did you make up this list of things from memory?—A. Yes, after the fire.

Q. Did you ever get any of your property back from the warehouse?—A. No.

Q. Does this claim include property belonging to your husband?—A. Yes.

Q. Has your husband another claim against this commission, or other except this one?—A. No; that is all we have.

Q. Are you familiar with the cost of boat oars?—A. I do not know. I had better ask my husband.

Q. You have sworn here that this pair of oars cost \$18?—A. You will please excuse me.

Q. Now you say you wish to be excused from answering a question of that kind and that I had better ask your husband. Am I to understand that you signed your name and swore to claims before the commission involving matters you knew nothing about?—A. In regard to the household goods I swore, because I know them, but in regard to other matters my husband will testify.

Q. Why did you sign this claim?—A. No answer.

Q. Why did you swear to the value of things you knew nothing about?—A. No answer.

Q. Why didn't you tell the Government attorney that your husband put the value on the goods? Did he?—A. Yes.

Q. You have here six woolen suits, \$108.—A. No answer.

Q. Where are all your clothes?—A. They are in my mother's claim.

KALA SWORN.

Q. You are the husband of Kahale Wai?—A. Yes.

Q. You have here in this claim six woolen suits, \$108. How old are those suits?—A. Four years.

Q. Did you buy them all at one time?—A. No.

Q. What years did you buy them in? You said they were all four years old; you must have bought them all in one year.—A. Two suits of clothes were made in California.

Q. When was that; what year?—A. Nineteen hundred.

Q. The fire was in January, 1900?—A. I arrived here in June, 1899. It was in 1899.

Q. When did you have those suits made in California?—A. In the same year I returned.

Q. What did you pay for them?—A. Eighteen dollars a suit. They were not ready-made suits, they were tailor-made suits.

Q. Where did you buy the other two suits and when?—A. They were made here on Nuuanu street; those are the four suits made here four years ago; the other two suits were not a year. Four years prior to the fire the other suits were made.

Q. What did you pay for those?—A. Eighteen dollars a suit.

Q. Where did you buy them on Nuuanu street?—A. Sing Tai's.

Q. What about one oar, \$18?—A. Six pairs oars.

Q. You have here one oar, \$18?—A. Six pairs oars at \$18—12 oars at \$18.

Q. What were you doing with those oars up there?—A. That is my trade—a boat boy.

Q. These six boat cushions, have they velvet or silk covers?—A. Cushion covers.

Q. How old were they?—A. About six or seven months.

Q. You have here six white shirts, \$12. Do you pay \$2 apiece for shirts you wear?—A. Yes.

Q. Where did you buy them?—Iwakami's on Hotel street, and some in the store opposite.

Q. What kind of a shirt was that "stiff bosom;" like what you have on now?—A. No; it was new style.

Q. They have it now?—A. At the time I purchased they charged me \$2 apiece.

Q. How much did you pay for the shirt you have on now?—A. Two dollars.

Q. Where did you buy it?—A. Next door to Kash, Ozaki's.

Q. Hadn't you worn all those clothes more or less?—A. Some were worn by me, some were not; of the suits I had made in California on I had worn and the other I had not.

Q. You have here six men's hats, at \$5 each. Are you a man of such financial condition you can carry six hats, at \$5 apiece?—A. Two hats were bought in California and four hats were purchased here at \$5 each.

Q. Where did you buy those hats?—A. In Honolulu. I bought the bunch of Ewa, and my wife had some on to weave.

Q. Where did you buy the two hats you bought in California?—A. On Market street, San Francisco, at a furnishing store by the name of "Wood." One is a black hat and one a French color. I think the man in the store thought I was a stranger and he would soak me.

Q. This gold watch, where did you buy that—\$70?—A. I had the watch about eight years; it was bought at the jeweler shop next to the Empire saloon on Hotel street. A Haole store.

Q. Which side?—A. Opposite to the Empire saloon, mauka side of Hotel street. At present there is a restaurant there.

Q. What did you pay for it?—A. Seventy dollars.

Q. What make was it?—A. Waltham movement.

Q. What is your occupation?—A. Boat boy.

Q. What do you get a month?—A. Sometimes \$10 a day; sometimes more, sometimes less. I can not average. Sometimes \$20 a day; when the transports came here and stay outside the harbor, we make \$30 a day.

Q. Do you own your own boat?—A. Yes.

Q. How many boats have you?—A. Six boats.

Q. What do you do with six mosquito nets?—A. The reason I have plenty is because when one gets dirty I put on another.

Q. How many beds in your house?—A. Two.

Q. Use three mosquito nets to a bed?—A. Yes.

Q. Don't you think the prices you have put here on these articles this claim are very exorbitant, in consideration of their dating back some years past, being so old?—A. No.

Q. How do you know you had a cord of wood there; did you measure it?—A. No; I didn't measure it; but I know the wood I had picked up adrift in the sea. I value it at \$5.

Q. You have here a cord of wood, one pile of wood?—A. Yes.

AUGUST 16, 1901.

Examination of Mrs. KAHALE WAI:

Q. Were you familiar with all these things that are in your mother's claim (claim 434) and contained in this house destroyed by fire?—A. Some I know, some I don't. There was a large amount of property in the building.

Q. Do you know that your mother had 50 silk holokus in the house?—A. Yes.

Q. You know she had those 50 silk holokus?—A. They did not belong to my mother; some of them belonged to me.

Q. How many did you own?—A. Four.

Q. Then your mother owns 46?—A. Yes.

Q. Are the oldest of them thirty years old?—A. She has those silk dresses since I was young.

Q. Did you ever see any of this jewelry that your mother has made a claim for?—A. Yes; I know something about it. I know she had some jewelry; that is, a bracelet, chain bracelet, with lock.

Q. Do you know where your mother bought those things?—A. No, I don't; only she brought them home.

Q. Do you know that there were four dozen bracelets?—A. Four pairs is all I know.

Q. She had gold rings. How many gold rings do you recollect your mother had?—A. I do not know how many rings my mother had.

Q. Do you think your mother had twelve or ten gold rings. Did you ever see your mother have twelve gold rings?—A. I saw she had rings on, but I didn't count whether it was twelve or not; I can not say.

Q. Do you think she had twelve gold rings there in a box?—A. We have lost some rings, and I think she had twelve; I think plain gold rings like this [showing wedding ring]. Some have stones in.

Q. Were there any diamonds in them?—A. I don't know.

Q. Fifty dollars a ring?—A. I think that is correct.

Q. Did you ever see a dozen gold rings in your mother's possession at one time?—A. I saw the gold rings, but can not say whether there is a dozen or not.

Q. What were these 100 plants; were they glass tubs?—A. Japanese saki tubs; some were wine barrels; some opu barrels; those are wine kegs.

Q. How many of those did you see around the place?—A. It is specified in the claim.

Q. Do you know if there was 100 there?—A. My mother must know, as she has put it down in the claim.

Q. Did she count them before the fire?—A. I don't know?

Q. Did your mother run a botanical garden there?—A. She had ferns there.

Q. Have you seen your mother's claim? Have you read it over?—A. I have seen the claim, but did not read it item by item.

Q. Did you assist your mother in making this claim up, as far as you are concerned in your own personal effects?—A. No.

Q. You were told by your mother that your claim was put in with hers?—A. When my mother fixed the claim she told me at the time that my claim was included in hers, and I didn't bother or ask her to let me see the original claim, as to whether she got it down correctly or not. She is smarter than me.

The CHAIRMAN. Mr. Nakoko [attorney for claimant], did you make up this claim? Did you have the original of Lahapa Mauiawa's claim before you in typewriting this claim? Did you typewrite this?

A. No; I did not do it. I hired some boys to do the typewriting.

Q. Did you have the original that you compared with this claim of Lahapa Mauiawa's? Was her original claim filed with you?—A. The boy compared it.

Q. What has become of Lahapa's claim?—A. She gave it to me, and I gave it back to her.

Q. Did you check this up with the boy's work?—A. No.

Q. There is evidence, as far as one item is concerned, that there are four pair of bracelets instead of four dozen. It is in regard to this discrepancy that I would like to see the original claim filed with you.

Mr. Nakoko, you are to produce the original memoranda from which you made up this claim No. 434 before this commission at the earliest possible time.

(Claim No. 6114.)

HONOLULU, HAWAII, *September 13, 1902.*

Examination of ALEC SMITH, in re claim No. 434. (Testimony bearing on claim No. 434.)

The CHAIRMAN. Didn't you store those nails away?

A. No. There were several thousand dollars worth of property stored away I didn't charge the commission with.

Q. What were they?—A. Calabashes.

Q. What did you do with them?—A. Buried them in the ground.

Q. Why didn't you bury the nails?—A. I was sick at the time of the fire, and the nails were too heavy.

Q. Did you save those things you buried?—A. Some were saved, some stolen.

Q. But nothing was burned?—A. Nothing was burned, as I dug a very deep hole. I knew that the calabashes were very valuable, and I made claim for it would not get half of it back.

Q. How came you to dig this hole when you were sick at the time of the fire?—A. I have two brothers and Kahananui.

Q. Can you inform this commission of anybody else in your neighborhood that did the same as you did?—A. Yes.

Q. We would like to have a list of those names if you could tell us.—A. Kekipi (w), Lahapa Mauiawa. That's as far as I know.

Q. Have you heard of any more?—A. No.

Q. Were all Lahapa's calabashes buried?—A. That is what I think.

Q. Did you see the hole yourself and see the calabashes going in?—A. She came to me for advice and asked me what would I advise her to do in regard to the calabashes. I told her at the time that the calabashes were valuable, and the best thing to do was to dig a hole and bury them, so I asked one man who is living with me in my house to dig the hole for Lahapa.

Q. Did you dig the hole for Lahapa?—A. No; two men, at \$2 a day paid by Lahapa.

Q. Who was your man?—A. Kalama.

Q. How many days did he work?—A. Two days he was working digging the hole.

Q. Did you yourself see this man digging the hole?—A. Saw the hole and saw Kalama dig it.

Q. Did you see the calabashes being put in the hole?—A. I did not see the calabashes when they were put in the hole, but when Kalama came back I asked Kalama, "How is it, have you completed your work?" and Kalama said, "Yes; we have completed our work as everything has been placed in the hole and corrugated iron was placed on top, and lumber."

Q. Lumber?—A. Lumber and boxes were placed inside the hole, as lumber and corrugated iron covered it, then dirt on top.

Q. Did you see the hole after it was dug?—A. Yes. It was as long and as wide as the table that the commissioners are setting at. [Table used by the commissioners 4½ by 12 feet.]

Q. Where is Kalama?—A. Fishing.

Q. Did anybody besides Kalama see this hole being dug?—A. I saw him this morning at the fish market; he is living on the Kahana premises.

Q. Was there anybody else besides Kalama that dug this hole?—A. There is another man besides Kalama, named Kahauanu.

Q. Where does he live?—A. With Lahapa.

Q. Where is she living?—A. Living with Lahapa where she is now, residing in Kawaihao lane.

Q. Did Kalama tell you that anything else besides these calabashes were put in that hole?—A. I asked Kalama (Kalama didn't tell me anything at all) whether Lahapa has all her calabashes buried. Kalama told me that all the calabashes were buried; besides, some other pretty things in the house were also buried.

Q. Have you ever seen Lahapa's calabashes?—A. Yes, I saw them.

Q. How many did she have, about?—A. Over ten.

Q. Did she own more than ten?—A. Yes, over ten.

Q. Twenty?—A. I can not say how many, because we were very excited at the time we were looking at Lahapa's calabashes. I was trying to save my own.

Q. Have you seen them since the fire, the ones you saw before the fire?—A. I have not seen Lahapa's calabashes since the fire, but the man I sent to go and get my things that were buried told me that Lahapa's calabashes and things were all in good condition and saved from the fire.

Q. Who were these men?—A. Kahananui, Kekela, Kekela's wife, Mahale. There were several others—I don't know their names—but when they come to the place where I bury my things, my things were already dug up by somebody, and some were stolen.

Q. Are those people whose names you have given the commission—did any of them assist the digging up of Lahapa's things?—A. That I can not state; perhaps she has her own men there. At the time I was sick the men reported to me so many calabashes missing. I was very sorry, and asked how were Lahapa's things, and the man said Lahapa's things were all saved.

Q. Did this party that told of Lahapa's things being saved—what goods other than calabashes did you learn were put in the hole?—A. I can not say; I only know the things that Kalama told me; that some other valuable things were buried other than calabashes.

Q. Did Kalama know how many boxes or trunks were placed in this hole by Lahapa?—A. I think Kalama told me there were two boxes buried, besides other bundles; some packages, besides the two boxes.

Q. And the size of the hole was about the size of this table?—A. About the size of the commissioners' table.

Q. How deep was it?—A. About 5 or 6 feet deep.

Q. That is the size of the hole that Lahapa had dug to put in these effects for which she has claimed against the government—about 12 feet long, 4½ or 5 feet wide, and 5 or 6 feet deep?—A. Yes.

Q. After the goods were placed in, it was covered with boards, then corrugated iron, and then dirt?—A. Boards over the things, corrugated iron, and then covered with dirt.

Q. Did you see the hole after the fire?—A. Yes.

Q. Was there anything in the hole when you saw it?—A. No; the dirt was dug out and it was empty and everything had been removed.

Q. Do you know that Lahapa put a claim in to this commission for

these calabashes that were buried in that hole?—A. I have heard that Lahapa had a claim, but for what amount don't know.

Q. Did you hear that Lahapa had a claim for these calabashes that were buried?—A. I heard it.

Q. You heard that Lahapa had a claim against this commission for calabashes that were buried and afterwards recovered?—A. Yes, that's what I heard, I think.

Q. Do you know the name of the men or man who dug the hole for Lahapa's things?—A. Yes; I know it was Kalama. He was hired at a day.

Q. Give the names of the parties that you know were engaged in digging the hole before the fire for Lahapa?—A. Kalama and Kahauanu.

Q. Where is Kahauanu living?—A. I think he is with Lahapa.

Q. How long were they engaged in digging this hole which you describe?—A. Two days, I think.

Q. How much were they paid for it?—A. Two dollars a day.

Q. Are they the men that put the goods in the hole?—A. The first day I went there I saw them two digging the hole, and the following day I didn't go there, but when Kalama returned I asked him and he told me that they had buried Lahapa's valuables.

Q. And did Kalama assist in the burying of them?—A. Yes.

Q. Who else?—A. Kahauanu.

Q. Do you know who it was that dug up the goods and removed them?—A. No; I don't know.

Q. Do you know if these men put them in?—A. I can not say whether Kalama or Kahauanu, but thought that Kahauanu did, as he is working under Lahapa.

Q. What was the size of the hole you dug for yourself?—A. About three-fourths of the table, about 3 by 8 feet [table with maps on].

Q. How deep?—A. About 4 feet deep; there was coral.

Q. Did you cover the hole you had dug in the same way as Lahapa?—A. I had no corrugated iron. I had some kahilis, about \$15 each, buried them in; but at the time of the fire the water went and they rotted.

Q. There was nothing damaged by the fire?—A. Nothing destroyed by fire, but damaged by water.

Q. When you put your calabashes in the hole, did you put them in a box or put them right in the dirt?—A. In a box.

Q. And you have not put in your claim any of the goods that were put in the hole and saved?—A. No.

Q. And all of these goods that are in your claim were lost by fire?—A. Those are the things destroyed by fire and removed by the government.

Q. What is your occupation now?—A. Down at Waialua, building boats for the hotel.

Q. What was your occupation at the time of the fire?—A. Had nothing to do at the time of the fire; was sick.

Q. Where were you living at the time of the fire; and where you dug your hole, how far was it from Lahapa's place?—A. Her place was on the Waikiki side of Kekaulike and my place on the Ewa side, about 150 yards from her place.

Q. Yards or feet?—A. One hundred and fifty yards.

Q. Did you see Lahapa to talk with her any time after the fire?—A.

Q. Did she say anything about whether or not she had followed our advice?—A. I didn't ask her anything about that.

Q. Did she refer to it in any way at all?—A. She asked me how my rings were; I told her they were rotted, and some were stolen, and did not ask her about her's.

Q. That is a conversation you had since the fire?—A. That is some time ago, when I went down to the fish market to buy fish; since the fire.

Q. About how long after the fire?—A. I have seen her lots of times, but did not have any conversation with her; it was about March this year when we had the conversation.

Q. In one of your conversations you had with Lahapa since the fire she asked you the condition of the things you had buried?—A. Yes.

HONOLULU, HAWAII, *September 13, 1902.*

Examination of KAHAUANU, sworn.

The CHAIRMAN. What is your name?

A. Kahauanu.

Q. Were you employed by Lahapa Mauiawa to dig a hole in which to bury some of her things?—A. Yes, but she never spoke to me; she spoke to Kalama.

Q. You assisted Kalama in digging this hole?—A. Yes.

Q. What was the size of this hole? Was it as large as the commissioner's table?—A. Yes, about that table, more than that; it was over 10 feet.

Q. How deep was that?—A. About waist deep, 3 feet or more.

Q. How wide was it?—A. Two to 3 feet wide.

Q. Kalama assisted you in digging this hole, did he?—A. Yes.

Q. Who asked you to dig the hole?—A. Kalama came and asked me to dig the hole.

Q. Did you have any conversation with Lahapa at all regarding his hole?—A. No.

Q. Did you assist Kalama in putting these things of Lahapa's in his hole?—A. Yes.

Q. What did you and Kalama put in this hole? Describe the things you put in this hole.—A. Some wooden calabashes, some calabashes, some kahilis, and some other things in bundles which I can not describe, and pictures.

Q. These things in bundles that you can not describe, how large a bundle were these?—A. Three small koa trunks we buried inside the hole, and a long bundle that contained the kahilis, and one little bundle.

Q. How big were those koa trunks?—A. About the size of this table, but it is too high [pointing to stenographer's desk—regular medium-size camphor-wood trunk].

Q. Could you not tell more definitely if that trunk was long, how many feet wide and how many feet deep? Was the trunk as big as that [pointing to camphor-wood trunk in court]?—A. About the size of the iron chest in the court, with the exception of the height, which was about two-thirds of the height of this chest.

Q. How did you know they were Lahapa's things when you did not have a talk with her?—A. The things were brought from Lahapa's house.

Q. Was she there?—A. She was there standing and looking on.

Q. And saw the things put in the hole?—A. Yes.

Q. You said three trunks; three of these trunks; when they put them down in the hole, were they heavy?—A. No, not heavy.

Q. If the hole was this size [illustrating], was this hole all completely filled with things?—A. About half the hole was filled.

Q. Had you any idea of what was in those trunks?—A. No, I did not know.

Q. Were the kahilis destroyed? Did you dig those things up and bring them back to Lahapa's place?—A. No.

Q. Who dug those things up; not to take them down to her house but who dug them out of the hole?—A. Kahale Wai (w).

Q. Do you know that from hearsay, or did you see her do it?—A. Hearsay; I do not know who sent her.

Q. You didn't see her?—A. No.

Q. Who told you?—A. I was out, and on my return saw the things at Lahapa's place, the things that we buried, and I asked who we buried after them, and Kahale Wai said they did.

Q. After the fire you saw the things at Lahapa's house?—A. Yes.

Q. Were they valuable things?—A. The calabashes were valuable, the contents of the trunks I don't know. That is a thing I did not ask, as I had no right to ask what the contents of the trunk were.

Q. Did you help to dig the hole for Alec Smith?—A. No.

Q. Do you know of anybody else that assisted in getting these things out of the hole?—A. No.

Q. Could you say for a certainty that one of those bundles you put in the hole contained kahilis? Could you say that for a certainty?—A. In one bundle I actually saw the kahilis inside. All her calabashes were buried in the hole; she only had wooden calabashes.

Q. How many days before the fire?—A. One day digging and burning, and the next day the fire came.

Q. Who assisted you in digging the hole?—A. I assisted Kalama.

Q. Anyone else?—A. No.

Q. No one else came there while you were digging?—A. Nobody came there except myself.

Q. What time of the day was it when they put the goods in?—A. Two o'clock in the afternoon.

Cross-examination:

Mr. DUNNE. Who told you to dig this hole?

A. Kalama.

Q. At the time he told you, where were you?—A. I was in the yard of Lahapa.

Q. Was Lahapa there herself while the hole was being dug?—A. She was upstairs.

Q. Did she see you digging the hole?—A. Yes.

Q. Were you paid for your labor in digging that hole?—A. Kalama paid me, not myself, no.

Q. Who paid Kalama?—A. Lahapa.

Q. How do you know she paid him?—A. I am only guessing.

Q. Did Kalama say anything to you about being paid by Lahapa?—
Yes, that's what he said.

Q. When you had the hole dug what did you put into it?—A. Three all koa wood trunks.

Q. Anything else?—A. Some wooden calabashes in the trunk, three one and two in another.

Q. What was in the third trunk?—A. Empty trunk; nothing in it. I did not open it or look at it.

Q. Do you know of your own knowledge what was in the three trunks?

Tell him to be careful about his answers; and if he does not tell the truth, he is liable to run up against a very serious proposition.

If you know, and if you do, state what was the contents of those three trunks.—A. Those two trunks were very old; I think they were bought at the time Kalakaua, the king, was a child running around.

Q. We do not ask you about the King, but what was in those trunks?—A. One trunk I did not see the contents of.

Q. What was in the other two?—A. The contents of the three trunks I don't know anything at all about. What I am testifying now is all wrong; the calabashes were outside.

Q. Do you mean now to say that you did not know what the contents of those trunks were, or any of them?—A. I did not know the contents of the trunks.

Q. You lied when you testified that you did?—A. I am wrong when I stated I saw the calabashes in the trunks.

Q. Were there any calabashes in that hole?—A. I only saw five calabashes.

Q. Were they in the trunks, or outside?—A. Outside of the trunks.

Q. Then we come to this: That in the hole were three koa trunks and five calabashes?—A. Yes.

Q. Were these calabashes polished or unpolished?—A. They were wrapped up in cloth; don't know whether they were polished or not.

Q. In addition to the three trunks and the five calabashes, was there anything else in the hole?—A. Some kahilis—a bundle of kahilis wrapped up in a piece of cloth.

Q. Do you mean to say there was a package, a parcel, a bundle wrapped up with a cloth, the contents of which you felt to be those things, or did you see those things that were there wrapped up with a cloth? I want to know if you are testifying to a fact or an inference.—A. Kahilis; I actually saw them; I didn't count how many there were.

Q. We have the three trunks, five calabashes, and this parcel. Was there anything else in the hole?—A. Some rubbish of no value.

Q. What was this rubbish of no value?—A. A bundle; I did not know the contents.

Q. Was there any other rubbish in the shape of a bundle the contents of which you did not know?—A. That's all.

Q. Anything else in the hole?—A. That's all.

Q. Describe that hole fully. Tell how wide it was, how deep it was, and all that.—A. One fathom and 2 feet long—8 feet.

Q. How deep?—A. About 3 feet deep.

Q. How wide?—A. Three-fourths of the table (commissioners' table).

Q. It has been said here that when the hole was dug and finished

it was as deep as to a man's armpits. Is that so?—A. I should say I know more than anybody else, because I dug the ground.

Q. When these things were put in there, what was done with them?

A. Corrugated iron was placed on top, then dirt, and it was covered.

Q. Who put these things in the hole; who actually placed them there?—A. Kahale Wai passed them to me and Kalama put them in the hole.

Q. So that Kahale Wai handed you the various things that were put in that hole, didn't she?—A. Yes.

Q. And while all this was going on Lahapa was there on the premises and saw some, at least, if not all, of everything that was done?

A. That I can not say, because my eyes were not turned in that direction.

Q. When the corrugated iron was put over these things, what was put over the iron?—A. Dirt.

Q. After that was done, what became of you?—A. That is all I don't know.

Q. Did you have any talk with Lahapa there that day?—A. No.

Q. Did you have any talk with her daughter?—A. No; not after I finished my work.

Q. At any time that day, while you were on the premises, did you have any talk with either of them?—A. Yes.

Q. Which of them?—A. With Kahale Wai.

Q. What talk did you have with her?—A. She said, "You had better help Kalama."

Q. What was Kalama doing at the time he was needing help?—A. Preparing to dig.

Q. Did she say anything else?—A. That's all.

Q. Did she or her mother make any statement to you or to Kalama in your presence, about the purpose of this hole, or what was to be done with it or the things that went into it?—A. She was upstairs and did not say anything.

Q. Did the daughter say anything?—A. She didn't say anything except only that I had better help Kalama.

Q. After this was all over and after the fire took place, did you have any talk with Lahapa or her daughter about this hole?—A. No.

Q. Now, these three trunks that went into this hole—were they about the same size, or was there a difference?—A. The same size.

Q. Who put them into the hole, you and Kalama?—A. Yes.

Q. When you took hold of them to put them in the hole did they feel light or heavy?—A. The three trunks were brought to the edge of the hole. One I handled and supposed it to contain nothing. The other two trunks which she testified she handed to Kalama.

Q. The one that you touched—was that light or heavy?—A. Light.

Q. Who brought these trunks from the house to the hole?—A. Supposed to be brought by Kahale Wai, but I don't know.

Q. Didn't you swear this morning that you went into the house and brought these things from the house to the hole?—A. No I; did not

SEPTEMBER 13, 1901.

Cross-examination of Mrs. KAHALE WAI:

Q. Just before the fire, where did you live?—A. At Lahapa's place.

Mr. DUNN. I think it is the proper thing to tell you that you must tell the truth here, because if you do not tell the truth the law calls

t a crime, and whatever you say here will be written down in short-hand, and if the law should put its hand on you hereafter anything you here now may be used against you. I want to warn you fully ere you are asked any more questions, so that you can not say hereafter that this commission or anybody connected with it took any advantage of you.

Q. Where did your mother live?—A. Kapuukola.

Q. In Honolulu—on this island?—A. Yes.

Q. You and your mother both knew, did you not, that the bubonic plague was here in this city before the fire?—A. Yes.

Q. You also knew that the board of health was trying to stop this spread of that disease by burning down places, didn't you?—A. Yes.

Q. You knew this, didn't you, before the fire occurred that burned your place?—A. Yes.

Q. How long before the fire that burned down your place had you known that the board of health was burning down places here and ere throughout the city?—A. The same year.

Q. In the place that your mother lived—what kind of a place was it; was it a house and yard, including house and yard?—A. House and yard.

Q. Was the yard back of the house, in front of the house, or on the side of the house?—A. Surrounding; the house was in the middle of the yard.

Q. Were there any neighbors living close up to where you were living?—A. Yes.

Q. After you learned that the board of health was burning down places in order to prevent the spread of the plague, did you have any conversation with your mother about the chances that the board of health might burn down your place?—A. No.

Q. Was there never any talk at all in the house, either about this disease and about the burning down of places?—A. It was a known fact that wherever the disease was the place would be destroyed.

Q. When was it that your mother's place was burned down?—A. January 20.

Q. Before the 20th of January was there any talk? Did you ever hear your mother say "Well, they may burn down this place" or "They may burn down the neighbors'?"—A. No.

Q. Did you ever hear your mother talk about trying to save property in case there should be a fire?—A. No.

Q. Did you ever hear your mother talk about any of these fires at all?—A. No.

Q. On the day when your place was burned down, could you see the fire before it reached your place?—A. No; never saw the fire at all.

Q. Take a period two or three days before the fire occurred, were you at your mother's house during those two or three days?—A. Yes.

Q. And during that time did you see any digging done around the house anywhere?—A. Yes; Friday is the day that the hole was dug for the purpose of concealing valuable things.

Q. Where was this hole dug?—A. Near the corner of the house.

Q. That is to say, in this yard that was surrounding your mother's house?—A. Yes.

Q. Who dug that hole?—A. That man there [pointing to Kahauanu].

Q. This man present here in the court room dug that hole, did he?—

A. Yes; that man and another man; they were hired by my mother to dig that hole.

Q. What are the names?—A. Kalama and Kahauanu.

Q. How do you know your mother hired them?—A. Because one man—Alec Smith, the deaf man—came in our yard and talked that things were buried in the ground; so when my mother heard it she ordered this man and Kalama to dig the hole.

Q. Were you there at the time that your mother ordered these men to dig the hole?—A. Yes.

Q. And you heard your mother tell him to dig this hole, did you?—A. Yes.

Q. You were right there at the time?—A. Yes.

Q. Now, when your mother told him to dig the hole, did he go and dig it?—A. Yes.

Q. While he was digging it, was your mother there?—A. She was upstairs.

Q. At any time while the hole was being dug, did your mother see the hole being dug?—A. Yes; she was upstairs looking on.

Q. How long did it take them to dig this hole?—A. They started at 8 o'clock in the morning, and in a little while the hole was complete.

Q. How big a hole was this hole they dug? Was the hole as big as the top of the desk I am sitting at—the opening of the hole, I mean?

A. I could not tell the size of the hole.

Q. Could you tell how deep the hole was?—A. About the height of the desk.

Q. When these men were digging the hole, when they got the hole down, I suppose they stood in the hole and threw the earth out?—A. No; the man was not hid by the hole.

Q. Was the hole as deep as a man is high?—A. Up to their arms [illustrating].

Q. Now, when the hole was dug, what became of the men who dug it?—A. After the hole was dug the two men came out and asked, "What are you going to put in the hole?" and I said, "two flatirons and one tin."

Q. What was the next thing that happened?—A. Two koa-wood trunks, that size [illustrating].

Q. About 3 feet?—A. Yes; about 3 feet each.

Q. What was done with those two koa-wood trunks 3 feet each?—A. Buried.

Q. Anything else put into the hole?—A. Some unpolished calabashes.

Q. About how many?—A. Five.

Q. Anything else put into the hole?—A. That is all I saw.

Q. While these things were being put in the hole, who put them there?—A. I lifted it to the edge of the hole and that man put it in the hole.

Q. Where was your mother while these things were being put in the hole?—A. She was upstairs, fixing the things in the room upstairs. Put all our valuables in the trunk, intending to move—to leave the house.

Q. Do I understand that your mother put their valuables into those two trunks that were put into the hole?—A. Not in those two trunks that were buried, but in the big koa trunk.

Q. What became of the big koa trunk?—A. Destroyed by fire. We moved it to the street.

Q. What was in the two koa trunks that were put in the hole?—A. Those calabashes just described.

Q. Anything else?—A. That is all.

Q. So that all that went into that hole was two koa trunks, and in those trunks were some calabashes?—A. Yes.

Q. When these articles were put into the hole, what was done with the hole?—A. It was covered.

Q. Covered with what?—A. Corrugated iron was placed upon the trunk and then filled in with dirt.

Q. Who did that?—A. Those two men.

Q. And when that was done what became of the two men.—A. Pau, that's all.

Q. Did they stay there or go away?—A. After they completed their job they went away.

Q. Before they went away, after they finished their job, did your mother pay them anything for their work?—A. No; they were not paid there, but at the detention camp.

Q. How long after the hole was dug were they paid?—A. I can not say how long.

Q. Who paid them?—A. My mother.

Q. Did you see your mother pay them?—A. I heard that she paid them.

Q. How do you know your mother paid them? Did you hear that from your mother?—A. I asked Kalama if my mother had paid them or not.

Q. Did ever you have any talk with your mother about paying for this hole, or about the things that were put in there?—A. No.

Q. Neither the hole nor its contents never was mentioned between you and your mother from that day to this?—A. No.

Q. After the fire was over, did your mother go back there to where the hole was?—A. Yes.

Q. When she went there did you go with her?—A. No.

Q. How do you know she went there?—A. Somebody came for her while she was at the market.

Q. Who came for her?—A. Several small boys who were digging around came and told her.

Q. What did they tell her?—A. They said boxes were buried there; so my mother went away.

Q. When the boys told her this what did she say?—A. She didn't say anything at all.

Q. What did she do?—A. She went there.

Q. After that did your mother ever tell you what she found there; or what she did there?—A. My mother said that if she had known the things would not be destroyed she would have dug a bigger hole and put all her valuables in there.

Q. After your mother told you that, what was done with the things in the hole; do you know?—A. They were taken back to the house where we are living now.

Q. Who took them there?—A. They were placed in a hack and taken to her residence.

Q. Were you there at the time they were put in the hack?—A. No.

Q. Who was there when they were taken out of the hole and put in the hack?—A. I don't know.

Q. Where were you living at the time they were taken out of the hole?—A. At detention camp No. 2.

Q. Were these things that were in the hole brought down to the detention camp?—A. Yes.

Q. How far is the detention camp from the place where the hole was dug—about?—A. It is a long distance.

Q. So that after the fire, in this detention camp, a long distance from where you formerly lived, you then and there saw articles which had heretofore been buried in this hole?—A. Yes.

Q. After the things were brought from the hole to this place at the detention camp, did your mother have anything more to say about them?—A. She had nothing to say.

Q. Some time after that your mother learned, didn't she, that the government was going to appoint a commission to pay people for things they had lost by fire?—A. We were notified some time before each and every individual, to make up his claim.

Q. When did your mother first learn that?—A. That was when they were destroying some places on Nuuanu street, near Engine No. 4.

Q. Was that before your house was burned down?—A. We were notified by the inspector, "Why don't you get prepared—why don't you get your things ready—because you are going to be moved down there."

Q. Was this before the fire?—A. Yes.

Q. Before the fire, did your mother know that the government would pay for things that were burned by fire?—A. No.

Q. When was it that your mother first learned that payment would be made by the government for property destroyed by fire?—A. When we were in the detention camp.

Q. Was that before or after the things were taken out of the hole?—A. She already heard that the government would pay for the trunk that were unearched from Kapuukola.

Q. After that, did your mother make up a claim, knowing that the government would pay for these things? Did your mother make up claim to be presented to this commission?—A. Yes.

Q. Did you assist her in making up this claim?—A. No.

Q. Did your mother, in making up this claim, put into the claim the things that were in the hole?—A. I don't know.

Q. During the time that your mother heard—you knew of the various burnings by the board of health—did she send any property away from her house and store it anywhere?—A. No.

Q. I understood you to say that two koa trunks of about 3 feet long were put down into this hole; is that quite correct?—A. Yes, correct.

Q. It is a fact that there were two put in there and not three?—A. Only two; that is what I brought to the edge of the hole.

Q. You were present at the time that all the things were put into the hole, and you saw that only two trunks were put in there, didn't you?—A. I was there until the hole was covered.

Q. Was anything else put into that hole except those two trunks?—A. I was there until the hole was covered, and only two trunks were put in the hole; that is all.

Q. Was there a long package put into that hole, a long bundle put into that hole, in addition to the two trunks?—A. No.

Q. Was there a small bundle put into that hole in addition to the two trunks?—A. No.

Q. Now, you state that these two trunks that were put into that hole contained five calabashes, unpolished calabashes; is that correct?—A. Yes.

Q. Were those calabashes all in one of the two trunks, or were there some in each?—A. There were some in each. Three in one trunk and two in the other.

Q. You know there were three calabashes in one trunk and two in the other, because you looked into the trunks and saw what was there, three in one trunk and two in the other, didn't you?—A. I placed the calabashes in the trunks.

Q. Did you place them there yourself and with your own hands?—A. Yes; and moved the trunks to the edge of the hole.

Q. Now, you know, don't you, that there was nothing else in those trunks except three unpolished calabashes in one and two unpolished calabashes in the other?—A. That's all.

Q. At the time when these unpolished calabashes were put into these trunks, which subsequently were preserved in that hole, did your mother see you putting those things into these trunks?—A. She didn't see me.

Q. How did you come to put those calabashes into those trunks, then?—A. I am the only one downstairs.

Q. But your mother knew, as I understand you, not only that the hole was being dug, but afterwards actually paid the men that dug it; did not your mother know what was going into the hole?—A. My mother thought to put a trunk containing our wearing apparel in that hole, but the trunk that contained the wearing apparel was not put in the hole, because my two trunks were in the hole.

Q. When was it your mother said she would put the wearing apparel in the trunk that was going into this hole? Was it while the hole was being dug?—A. Yes.

Q. Did your mother wish to preserve your wearing apparel by putting it into a trunk that was going into a hole, because she thought the wearing apparel more valuable than the unpolished calabashes?—A. That is what I think, but I heard that after the place was to be burned it was going to be plowed, so she was afraid to put the wearing apparel into the hole.

Q. Did your mother say anything about putting her wearing apparel into the boxes or trunks that went into the hole?—A. At the time they were talking with her that the ground was going to be plowed, at first she made up her mind to bury the trunk containing her wearing apparel, but after she heard the ground was to be plowed—

Q. So that when your mother was making up her mind what things she would bury in that hole, the first thing she thought of was her wearing apparel, and she changed her mind about that when some one told her that the ground would be plowed?—A. Yes.

Q. Did your mother say in how many trunks she was going to put her wearing apparel?—A. No.

Q. At that time how many trunks did she have her wearing apparel in?—A. My mother has a wardrobe about as high as that, but that is too high [pointing to the throne draperies].

Q. Where was your mother's wearing apparel at the time when the

hole was being dug?—A. From the wardrobe it was taken and put in the trunk that contained kihei apanas.

Q. How big a trunk was that?—A. As big as the trunk over there [the iron trunk], but higher than that.

Q. About how high?—A. About the height of the desk.

Q. How long and how wide?—A. About five or six feet.

Q. How wide?—A. As wide as the desk.

Q. Was all of your mother's wearing apparel put into that trunk?—A. All her best dresses were stuffed in that trunk except chemises and petticoats.

Q. What was in that one trunk?—A. Contained kihei quilts that were taken out of the trunk and the best things put in.

Q. Did that trunk contain all the kapa apanas she had?—A. Yes.

Q. What was in that trunk after it was packed? There were kihei apanas and your mother's dresses?—A. No; the kihei apanas were taken out and all her best dresses were put in the trunk.

Q. What did her best dresses consist of?—A. Silk, wool, merino and others.

Q. Fifty silk holokus, were they in there?—A. I can not say whether all the fifty silk dresses were put in there, but I saw some put in there.

Q. Didn't you state just now that all your mother's best dresses were in that trunk?—A. Yes.

Q. Are not the silk dresses the best dresses she had?—A. All her dresses just alike.

Q. Is not silk better than calico?—A. She has no calico dresses.

Q. As a matter of fact, did you have fifty silk holokus, would not those be considered her best dresses?—A. Yes.

Q. Would not they naturally be in that trunk?—A. All I saw that we took the best dresses from the wardrobe, wrapped it up and put it into the trunk. I don't know how many silk dresses she had.

Q. All your mother's best dresses that she owned or possessed at that time went into that one trunk?—A. Yes.

Q. What became of the trunk?—A. Burned by fire.

Q. Would you call a holoku one of your mother's best dresses?—A. Yes.

Q. Would those be in that trunk?—A. They were not made, not finished.

Q. Ten holokus, linen, she has?—A. The linen holokus were in the old oval-top trunk, such as the commissioners have in the court room.

Q. Where were the 20 holokus?—A. There were lots of trunks in the house, various chiffoniers; those dressers were not removed from the place where they were.

Q. Didn't she say that this fire was coming and they had to get ready and get all those things into trunks?—A. That is what I state. All the things were in the trunks.

Q. When they were digging this hole was everything out of the drawers and wardrobes being put into trunks?—A. Yes.

Q. Were any of the 60 holokus—calico, linen—in a trunk?—A. I don't know; that was during the excitement; I don't remember all.

Q. When did Alec Smith and your mother and yourself advise about the digging of the hole and hiding their things?—A. A whole week before.

Q. How many times did Alec Smith talk?—A. Thursday, previous to the week before Alec Smith came and advised to dig a hole and put in their calabashes and kahilis.

Q. How many trunks were there in your mother's house at the time the hole was dug?—A. Too many; I can not remember.

Q. You have been living right along there with your mother, have you not?—A. Five, I think.

Q. As a matter of fact, there was one big trunk that your mother's wearing apparel went into, and two that went into the hole?—A. Those two are small trunks; were stolen or destroyed.

Q. In addition to those three trunks were there other trunks in your mother's house?—A. Five trunks altogether. Big trunk and two trunks, two koa trunks small, one big koa trunk, and one oval-top trunk.

Q. We have accounted for three of them; we have accounted for the big trunk and the two small trunks that went into the hole. What was put into the other trunks?—A. The other trunks contained some of his quilts, towels; another trunk contained the belongings of Ahapa's husband; some of his belongings that were not buried with his, and part of her dresses were in the bureau.

Q. There were some things there that they could not have room to put into these other trunks, I suppose, were there not?—A. That is the reason we put it in the bureau, because we have no room.

Q. Was it just one bureau that had the balance of the things?—A. Two bureaus.

Q. How big were they?—A. Ordinary bureaus.

Q. What was the character of the things in those two ordinary bureaus? Were they your mother's dresses, or what was it in there?—A. Chemises, dresses, holokus, etc.

Q. But the best of your mother's effects were crowded into that big trunk?—A. Yes.

Q. Of these five trunks two we know went into the hole and were not burned. What became of the other three trunks, the big one containing your mother's things and the other two trunks?—A. All destroyed by fire.

Q. As I understand the situation, they were for two whole weeks before the fire actually burned down the place her mother had been in consultation with Alec Smith and taking measures to protect her property, and the principal thing was the digging of this hole?—A. Yes.

Q. And when it came to the actual use of this precaution and the actual digging of the hole the only things that went into that hole were these two small koa trunks, one containing three unpolished calabashes and the other two?—A. Yes; that's all.

Q. And notwithstanding this week's conference, notwithstanding the alleged value of her mother's wardrobe, still none of that was removed to a place of safety, but ultimately got burned?—A. Yes. She said our place had no sickness, so it would not be burned.

Q. This fire was accidental fire, the same fire that destroyed Kaumakapili Church?—A. Yes.

Q. When you tell us here that you were present during the entire time while that hole was being dug, and that you were present until after the things were put into that hole, covered over, and when you tell us that the only things that went into that hole were the two small

trunks containing the unpolished calabashes, are you telling us the exact truth about this business?—A. That is true.

Q. And nothing else went into that hole except the things you have stated here to-day went into it?—A. I never saw anything else.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above before the fire claims commission.

EXHIBIT No. —.

No. 1238. Fire Claims Commission. Claim of Kaumakapili Church Amount \$50,250. Filed June 6, 1901, at 12.50 o'clock p. m. J. M. Riggs, clerk. Presented by Achi, Johnson & Kohalelio, attorney for claimants.

STATEMENT OF CLAIM.

Kaumakapili Church, a corporation, by S. M. Kauakauni, its president, the undersigned claimant, respectfully represents that he is resident of Honolulu, Hawaii.

That on the date of the loss hereinafter specified he was the sole owner of the effects and property set forth in the schedules hereto attached, marked "Exhibits A, B and C;" that the value of said property at its cost price is set forth upon said schedules opposite the item thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that said fire occurred, as claimant is informed and believed by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedule; that said property was situated at the time of said loss in Honolulu, Oahu, building on Beretania street, in said Honolulu, Territory of Hawaii.

That said loss consisted in part of the destruction of the building more particularly described in Exhibit C; that the name of the owner of the land whereon said building stood is Hawaiian Board, in trust for claimant, and the nature of the interest of this claimant in said building is fee simple.

That said property was insured for \$3,000 in the name of claimant and nothing dollars of said insurance has been paid by ——— company the insurer thereof.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through

the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or action of the board of health as aforesaid.

S. M. KAUKAUNI,
President Board of Trustees, Kaumakapili Church.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

S. M. Kaukauni, president, being first duly sworn, says that he is an officer of claimant, the above-named corporation, to wit, the president thereof; that he knows the contents of the foregoing statement of claim and of the schedules thereto attached, and that the same are true to his own knowledge, except as to such matters stated on information and belief, and as to those matters he believes them to be true.

S. M. KAUKAUNI, *President.*

Subscribed and sworn to before me this 5th day of June, A. D. 1901.

J. M. MONSARRAT,
Notary Public for First Judicial Circuit Territory of Hawaii.

RULE XIV.—In order to facilitate business claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings, and other chattels upon a schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked Exhibit C."

EXHIBIT C.

The Kaumakapili Church as it now stands, two stories. Damages as estimated made by H. L. Kerr & Co., \$50,250.

HONOLULU, HAWAII, *September 11, 1901.*

H. L. KERR, sworn.

Q. What is your occupation?—A. Contractor.

Q. A builder?—A. Was formerly.

Q. Do you know Kaumakapili Church?—A. Yes.

Q. Did you make an estimate of the church?—A. Yes.

Q. How much was your value for the church?—A. My estimate upon the church to build it over new was \$55,250, and I figured there was \$5,000 worth of old wall and brick, making \$50,250.

Q. Deducted from old walls?—A. What I consider could be saved out of the old wall in brick would be \$5,000.

Q. Did you allow anything for the age of the building?—A. One day.

Q. When was the building built?—A. I don't know.

Q. What were the dimensions of this building?—A. The main building is 150 by 100 feet, and the two towers are 16 feet square.

Q. How high was it?—A. I do not remember exactly the height; I figured it by counting the brick, and getting the height that way.

The towers were about 70 feet in height, but the main building forget just exactly what height it was.

Q. When you were making your estimate you knew the height of the building?—A. Yes.

S. H. ONI, sworn.

Q. When was Kamaukapili Church built or completed?—A. I think in 1883.

Q. Were any repairs made on this church from that time up to the time of the fire?—A. No.

Q. Was the church reshingled?—A. Yes.

Q. Why didn't you say so?—A. I misunderstood the question.

Q. The old shingles were wooden?—A. Yes.

Q. What were the new ones?—A. Corrugated iron.

Q. Was there corrugated iron on the roof?

Mr. KERR. I figured out shingles in my estimate. There is very little difference about one or the other. If there is any difference would be in favor of the corrugated iron. The corrugated iron might be a little cheaper.

Q. Mr. Kerr, that is governed by the price of iron largely?—A. Yes.

Q. Mr. Oni, when was this new roof put on, this corrugated iron?—A. I am not sure in what year; I think 1890.

Q. Do you know what that cost?—A. I don't know.

Q. Mr. Kerr, is that a short time for shingles to last, seven years?—A. Seven years is a very short time. They should at least give fifty years. Of course it depends upon what the pitch of the roof was. But the pitch of that roof was enough to carry shingles for fifty years.

Q. Do you identify that photograph on page 203 [showing book]?—A. Yes; I identify that as Kaumakapili.

Q. Mr. Kerr, is that the building you are testifying to?—A. Yes.

Q. And was the building practically in that condition when you gave your estimate?—A. That is as near as I could get to it.

Q. Mr. Oni, are you positive that roof was shingled in 1890?—A. I can not state the year that the church was reshingled; perhaps in 1890 perhaps before.

Q. Who ordered it shingled?—A. The committee appointed by the board.

Q. Who were the committee?—A. The shingles were put on by Charles Mahoe.

Q. That is the new shingles.—A. Yes, the iron shingles.

Q. Who was the chairman of the committee?—A. Waiama.

Q. Do you know why this roof was recovered; was it leaking?—A. They were afraid of fire, so a corrugated iron roof was put on.

Q. Was this iron put on top of the shingles?—A. Yes.

Q. Did you ever hear the committee say what that cost?—A. Yes, but I forgot.

Mr. KERR. Did you visit that building; were you familiar with its construction?—A. I was not familiar with its construction. I had to take that from other people.

Q. Who from?—A. Mr. Theodore Richards, D. L. Momi, and two others; I don't remember their names. I have been in the church twice myself, but didn't take any particular notice of its construction.

Q. Your estimate covers the approximate cost of the building at

furniture, aside from the organ, or simply the bare building?—A. I just takes in the building, without the organ or the bell of chimes. I could not find out anything about.

Q. Were you ever inside of the building?—A. Yes, sir.

Q. How long before its destruction did you make your estimate of the value?—A. After the fire I made my estimate.

Q. What would you say would be the depreciation in that building, on hearsay of its character, in seventeen years?—A. Not over 10 per cent on that kind of a building.

Q. That would not be over 10 per cent allowed; they made no repairs on it at all?—A. The depreciation is practically in the wood. The walls would stand for two or three hundred years, as far as that is concerned.

Q. Then your estimate of \$55,000 is what it would cost to replace a new building of the same character as the old when it was new?—A. Yes.

Mr. ONI. Do you know what the new building cost at the time it was built?—A. At the time when the church was turned over Mr. Henry Waterhouse notified us that the building cost \$50,000 and \$5,000 is still owing. The church has \$8,000 debt.

Q. If the church cost \$50,000 and they owed \$8,000—A. Eight thousand dollars is still unpaid; \$58,000 altogether. Eight thousand dollars for the furniture, improvements, etc.

Q. What did the church building cost?—A. Fifty-two thousand dollars.

Q. Mr. Kerr, as a matter of fact, if you had seen the building before it was destroyed you would have been in a much better position to determine its value than from the hearsay of others?—A. Certainly, yes, sir. I have to use my judgment as to what must have been in regards construction, etc.

Q. How did you figure the salvage? How did you arrive at the amount you allowed? In that new building would there be \$5,250 worth of brick?—A. It costs just as much to get those brick down, if you are going to save the wall, as they are worth, if not more, and if I was going to do it myself I would simply put a few blasts underneath and tumble it and start over new, and figuring that the brick that would be left would be worth about \$5,000. There is a question about the walls: you can not tell how much of the walls are good until you tear them down; the fire may have affected the mortar considerably further down than I inspected. Then again it might not. It is a question how the life of the mortar is taken out of the brickwork.

Q. The idea is, Mr. Kerr, those brick are worth \$5,000, if you had to buy the brick and take them there; that is, for the same amount of risk?—A. Yes; in the condition they are there I would allow for the risk if the walls could be saved, \$5,000. That is a question of judgment between different people, but it is my judgment.

Q. The church and walls, as they stand at present, can not be utilized?—A. Parts of them can.

Q. Allowing that the value of the building in the first instance was approximately \$52,000, according to your statement there is a depreciation of 10 per cent, of \$5,200, salvage about \$5,000, making a total of \$10,200, might properly be deducted from the original cost to determine the value of the building at the time of the fire?—A. Yes, sir.

Q. You have nothing else, Mr. Kerr, that would assist the commis-

sion in arriving at the value of the building? Could you give anything more in evidence that would throw more light?—A. I don't know as I can.

Q. You are acquainted with the values of brick; and, in fact, you are acquainted with the values of anything that is used in the construction of a building?—A. Yes.

Q. You are also acquainted with the price of skilled and unskilled labor that would be necessary to be used in constructing a building of this kind?—A. Yes.

Q. In fact, you could undertake to make an estimate to replace that building if you were called upon to do it?—A. Yes; I can do that. The only point is, if I only had some drawing or other from the old building.

Q. If they came to you and asked you to put up a building, and expressed to you what they wanted, in your position as an architect and builder you would be able to figure on anything?—A. Yes, sir.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above before the fire claims commission.

EXHIBIT No. —.

No. 4346. Fire claims commission. Claim of Sing Chan Company Filed July 5, 1901, at 3 o'clock p. m. J. M. Riggs, clerk. Presented by Hatch & Silliman, attorneys at law.

STATEMENT OF CLAIM.

Yim Jan Kong, a member of the above-named firm, respectfully represents in their behalf that said firm of Sing Chan Company is copartnership, and that Lee Chee, Loo Chit Sam, and Y. J. Kong are trustees; Lee, Yim Jan Kong, Wong Hing Chow, Ching Lum, C. W. Hong, and Chang Yee are the members thereof.

That the principal place of business of said copartnership is at Honolulu, Territory of Hawaii; that said persons as copartners were joint owners on the 20th day of January, 1900, of the effects and property set forth in the schedules hereto attached, marked "Exhibits A, B, and C;" that the value of said property, at its cost price, is set forth upon said schedules opposite the items thereof; that said property and effects were lost by total destruction by fire on the 20th day of January, 1900, and that no part thereof was saved; that said fire occurred as claimants are informed and believe, by order of the board of health in the suppression of bubonic plague; that the nature of the property lost is fully set forth in said schedules; that said property was situated at the time of said loss in frame building on makai side of King street in said Honolulu.

That said property was insured for \$7,000 in the name of Sing Chan Company, and \$3,250 of said insurance has been paid by Firemens' and Insurance Company, Royal Insurance Company, and Liverpool, London and Globe Insurance Company, some of the insurers thereof.

That the foregoing statement of claim and schedules hereto attached do not include any claims for speculative or consequential damages, or for loss of rent, or for use of property, or for loss of profits through the interruption of business, nor any loss except the destruction of or direct damage to said property by fire or removal under the order or direction of the board of health as aforesaid.

SING CHAN COMPANY.
By YIM JAN KONG.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

Yim Jan Kong, being first duly sworn, says that he is the person who made the foregoing statement of claim in behalf of the above-named copartnership; that he knows the contents of the foregoing statement of claim and of the schedules thereto attached, and that the same are true of his own knowledge, except such matters as are stated on information and belief, and as to those he believes them to be true.

YIM JAN KONG.

Claim of Sing Chan Company, No. 4346, for \$12,443.50.

HONOLULU, HAWAII, *September 22, 1901.*

Prof. A. B. INGALS, SWORN.

The CHAIRMAN. At the time of the bubonic plague in 1900 in what capacity did you act for the board of health?

A. Superintendent of fumigation and disinfecting.

Q. Did you have anything to do with appraising the value of goods?—A. I never had anything to do with appraising the value of any goods whatever.

Q. Are you familiar with the stock belonging to Sing Chan Company that was sent to the warehouse?—A. I am familiar with the stock that was ordered from the warehouse of Sing Chan Company on King street, that was moved over there on the 20th day of January, I believe, and the stock was removed to a structure which had been put up a short distance on the ewa side of King street, and I have here a list of the stock that was removed to that building.

Q. Removed where?—A. From a warehouse or store on the makai side of King street to the warehouse on the makai side of King street above Nuuanu street, and this is an inventory I have here signed by myself, which I went over very carefully, which states exactly the material that was moved from that store.

Q. Where was the warehouse, a short distance to the ewa side of Nuuanu street?—A. This stock was all moved to that warehouse.

Q. Opposite Mr. Testa's office?—A. I don't know where that is.

Q. It is just below the Chinese new theater?—A. It was only a short distance on the ewa side of Nuuanu street.

Q. Robinson's store?—A. No.

Q. A warehouse?—A. A short distance across Nuuanu street, King street on the makai side.

Q. In the brick building belonging to the foundry or in the Robinson block?—A. It was in no brick building; it was in a structure understood they built for the purpose, built by the Oahu Lumber Company.

Q. You went through and personally checked off these?—A. Yes. I went through and personally checked off as per my signature sign on the 8th day of March, 1900. The prices I do not pretend to know at all. I just checked off the inventory here.

Q. Is that inventory a record of the claim?—A. It is my signature as I signed it myself; I had that book in possession all the time; I do not intend putting the value of the goods.

Q. Have you any other data? You were acting for the board of health?—A. Yes; I was.

Q. Have you any other data of your own in regard to anything in connection with the goods taken to this warehouse?—A. I have none of my own now. The other I had, if I remember rightly, was regard to the New England Bakery. The only data I have direct in my hands was this one.

Q. And not anything else?—A. Of which I took an inventory? That's all I have.

YIN JAN KONG, sworn.

The CHAIRMAN. You are a member of Sing Chan Company?

A. Yes.

Q. What position do you hold?—A. Manager.

Q. Where was their store located in January, 1900?—A. On King street.

Q. Whereabouts?—A. Opposite Sing Loy.

Q. Between what streets?—A. On King street near the lane going down to Queen street, block No. 5. (No claim for building.)

Q. Did you prepare to move your stock just before the fire?—A. Yes.

Q. When did you get a permit to move?—A. On the afternoon of the 19th.

Q. Just the day before the fire?—A. Yes.

Q. What time did you start to move?—A. On the morning of the 20th, at 8 o'clock.

Q. And continued to move until what time?—A. 11.30.

Q. What stopped you?—A. Until the fire came down.

Q. Did you have any goods located on drays at the time the fire came?—A. Yes; the goods we intended to take away, but we were refused.

Q. When did you take stock?—A. December 30, 1899.

Q. And the list on this claim was made up from that stock list?—A. Yes.

Q. And the prices are taken from the original invoices?—A. Yes.

Q. Did you sell any of these goods between the time you took the inventory and the fire?—A. No; did not sell anything at all.

Q. How long did it take you to take this stock?—A. Six days.

Q. How many men did you have?—A. Three men; myself and two men.

Q. And you took stock of everything?—A. Yes.

Q. And from December 30, 1899, up to the time of the fire you never sold anything out of there at all, or nothing went out of there?—A. Nothing was sold from December 30 until the time of the fire. The town was quarantined.

Q. The price lists here, what are they?—A. Cost prices.

Q. How did you arrive at them?—A. From the invoices of our goods that came from San Francisco.

Q. Are there any partners in this firm with you?—A. Twenty partners; 20 shares.

Q. It is not a corporation, it is a company?—A. Partnership, yes; share company.

Q. Will you file a list of these different partners in the next day or two?—A. Yes.

Q. How much money did you put into this concern, and your partners?—A. \$8,000.

Q. From the 20 partners?—A. Yes; altogether.

Q. When did you start business?—A. In 1897.

Q. \$400 each?—A. Yes.

Q. Twenty shares; how many partners?—A. Oahu Lumber Yard has 10 shares; I myself have 2 shares; 2 shares Lew Chew.

- Q. What were your yearly sales in 1899?—A. \$27,000.
 Q. Have you any idea what they were in 1898?—A. \$22,000.
 Q. What were your liabilities at the time of the fire?—A. \$9,000.
 Q. What did your company owe at the time of the fire?—A. \$9,000.
 Q. Did you import these goods?—A. Yes.
 (Invoices are on file.)

LEE CHEW, sworn.

Q. Yin Jan Kong, who was that owing to, \$5,000 in San Francisco, local merchants? Did you have a San Francisco buyer or bought in different places in San Francisco?—A. From different firms in San Francisco.

Q. We would ask for a list of firms in San Francisco you are doing business with; also statement of liabilities at the time of the fire, what they are owing, how much, and purchases and importations. Do you know what your purchases were for 1899?—A. \$22,500 purchased in 1899, credit and cash.

Q. What taxes did you pay in 1900 on your stock?—A. \$70.

Q. Any insurance?—A. Yes.

Q. How much?—A. \$7,000.

Q. Was any of it paid?—A. Bishop & Co., Firemen's Fund, \$2,500 paid.

Q. Altogether, how much?—A. Irwin & Co., \$750.

Q. What was the full amount of insurance paid on these policies?—A. \$3,200.

Q. Why were not the other policies paid?—A. They were New York standard policies.

Q. You say these goods are all in at cost?—A. Cost price.

Q. On Exhibit C you have "Renewed ceiling 1897, flooring and repairing, \$530." Who owns this building?—A. Gow Cheong.

Q. Is he the landlord?—A. The landlord is Mr. Colburn.

Q. Mr. Lee Chew, do you lease from Mr. Colburn?—A. No; from Wah Kee.

Q. You rented from Wah Kee?—A. We sublease from him. Before we went into business we had a contract with the Oahu Lumber Company to fix the fixtures, counters, shelves, office fixtures, and everything belonging to the store, including the ceiling and flooring used, kind of a floor in the back; there was no floor in the back, so we had new floor put in, and it was \$530.

Q. \$530 covered the whole cost expended in the contract price for the improvements?—A. Yes.

Q. What proportion of that was in business fixtures?—A. The greater part of this is for shelving, as they were on both sides of the store, and a big table in front and office counters.

Q. The bulk of it was for the fixtures—one third?—A. I think about \$300.

Q. You have it here "renewed flooring, ceiling, etc." [reading from claim] at different times. The items are all of that \$500?—A. Yes.

Q. There are three claims for this building before this commission?—A. We are not claiming for the building.

Mr. PRATT. Appraisement for Sing Chan Company, \$375—fixture to "store on Waikiki side." Do you know where that is?—A. Yes.

Q. "Fixtures to Oahu Lumber and Building Company, \$375; 'Sing Chan'?"—A. Yes.

Q. Mr. Colburn claims \$813.13 as his interest.

The CHAIRMAN. You have here Exhibit B. Is this the actual cost of these articles?—A. Actual cost.

Q. And you have had them in use, some of them, since 1897?—A. Yes.

Q. Yin Jan Kong, did you, as manager, put on the prices in the books?—A. My bookkeeper did.

Q. Didn't you know the prices?—A. Yes; I know.

Q. Didn't Lee Chew help?—A. Sometimes.

Q. Mr. Lee Chew, did you assist in fixing the prices on this inventory for these goods?—A. No; I was not here at the time of the fire.

Q. This claim was made up of figures; the figures were put in long afterwards, were they not?—A. That would be left entirely to the manager and the bookkeeper. I don't know anything at all about it.

YIM CHAN, bookkeeper, sworn.

Q. Mr. Yim Chan, did you assist in making up and fixing the prices on this inventory of the cost of the goods?—A. Yes.

Q. You are familiar, then, with this whole claim, are you?—A. Yes; am familiar with the invoice prices.

Q. And you assisted in putting them in here?—A. Yes.

Q. Did you assist in making up this inventory originally?—A. Yes.

Q. And this was an accurate account of everything that was there?—A. Yes.

Q. How did you get the prices in this claim?—A. Referred to my invoices. [Witness identifies the invoice book.]

Q. When you got them, you put in here the cost of your goods?—A. Yes.

Q. How did you arrive at the cost of your goods?—A. I refer to my invoice, and plus freight and duty; write it down. If freight is not added, it is just the invoice price.

Q. This is duty also?—A. Yes. In the case of goods from the East, averages about 30 or 40 per cent; but from San Francisco, 6 to 7 per cent; so we struck a general average of 15 per cent on all the invoices.

Q. You simply approximated this? You didn't take it actually off our books as the amount actually expended in the importing of these goods?—A. No; we went through the list and knew exactly what the costs were, with freight goods and dutiable goods, and struck a general average.

Q. "Freight, cartage, etc., \$1,950." Do you approximate that 1,950 was paid in for consular invoices, duty, cartage, etc., at 15 per cent?—A. We took the whole thing and struck a general average.

Q. Estimate approximate cost?—A. Yes.

Q. Do you identify these invoices?—A. Yes

(Book of invoices part of evidence on file.)

Q. Were all your books destroyed?—A. The books of the year 1899 were all saved; the books of the previous year were all destroyed by fire.

Q. What was your inventory in the year 1899—amount of stock when you took your inventory the year before the fire?—A. Thirteen thousand six hundred dollars.

Q. Took it on January 1 or last of December?—A. December 30; yes.

R. D. SILLIMAN sworn.

Q. Mr. Silliman, you are familiar with the list of stock of Sing Chan Company?—A. Yes. About the 14th or 15th of January the

manager of the store and Man Poy Hay came to me and said they had a stock of hardware in the quarantine district that was absolutely clean and new goods and hardware, and they thought there could be no contamination about it, nobody had been in contact with it whatever in the quarantined district; that the district was under quarantine; that they would like to have the consent of the board of health to move the property out of Chinatown, the condemned portion, across the river and to their other property in their lumber yard. I applied to Dr. Wood for permission to move the property, and he issued the consent. We began the day of the consent, late on the 19th; we went around there very early on the 20th and started to move the goods; we had gotten a portion of the goods out of the lower floor when we discovered the fire in Kamakapili Church, and we saw then that there was to be a general conflagration, and rushed things as hard as we could, and worked on some time until the fire reached across Beretania street, then great excitement prevailed and we were stopped. We had 4 or 5 dray loads of goods that were just ready to move out in fact we were ready to move out, and we were stopped by a young man who said he was acting under the direct orders of Dr. Emerson and chief of the fire department, to allow nothing more to go outside of the lines because it would add to the confusion. Just then Marshall (or Major) Carrar came along, and this young fellow stated his directions—that he had been requested by Dr. Emerson, who was a member of the board of health, to allow no more people to pass out of Chinatown, and the Major said that he thought if that was the case we ought to stop, but he did not think it was necessary.

Dr. Emerson came along and said he did not issue any such order and he thought it would be better to pass us; so in the interval we were hauling it there was a member of the board of health came along and stopped us. All that was burned, and all the goods in the store were burned; they were locked up and placed in the custody of the board of health across the river, who understood that there would be no removals, and key and padlock was put upon the things which were put in under their supervision, and the key was kept by them until some time after.

Then Mr. Ingals, who had acted for the board of health in the removal of the goods, acted again in inspecting the property there situated, and checked over an inventory which had been made of the property in the warehouse, and that, I believe, has probably been submitted here.

That is all I know about it, except that there was a very large stock of hardware in the building and we only moved a small portion of it and every effort was made, every possible effort. We rushed everybody and paid them double wages, and rushed just as hard as we could and all helped.

I do hereby certify that the foregoing is a full, true, and correct copy of my shorthand notes, taken by me at the hearing as above, before the fire claims commission.

FRANCES MCTIGUE,
Official Reporter.

Subscribed and sworn to before me this 10th day of October, A. D. 1902.

[SEAL.]

H. C. CARTER,
Notary Public, First Judicial Circuit.

EXHIBIT No. —.

REPORT OF THE AUDITOR FOR THE YEAR ENDED DECEMBER 31, 1900.

SIRS: I have the honor to submit the following report of the auditing department for the year ended December 31, 1900:

INTRODUCTION.

This being the annual report for the period preceding the meeting of the first legislature of the Territory of Hawaii, it must serve a useful purpose. I therefore submit it jointly to the chief executive and to the legislature, endeavoring to cover the ground contemplated by the following statute, section 20, act 39, "audit act:"

The auditor shall make an annual report to the governor and biennial report to the legislature. It shall be lawful for the auditor in such yearly report, or in any special report which he may at any time think fit to make, to recommend any plans or suggestions that he may think fit or worthy of adoption for the better collection, custody, and payment of public moneys, and the more economically auditing and examining the public accounts, and any improvements in the mode of keeping such accounts that may at any time be brought to his notice, and generally to report upon matters relating to public accounts.

The year under review has been a peculiarly trying one for this department. Commencing in the midst of the most disastrous epidemic financially which has ever visited these islands, and covering the period of transition in the form of local government from the "republic" to the Territory of Hawaii, many new questions were raised which had to be decided, in accordance with the law and precedence when any precedent applicable to the case, or by the exercise of the limited discretionary power reposed in the auditor when no direct provision could be found.

In all decision and rulings necessitated by these unusual conditions, we have endeavored to correctly construe the law, and at the same time to facilitate public business.

BUBONIC PLAGUE.

The history of this epidemic, with minute details of cost, will doubtless be written by the board of health, covering appropriations coming within the scope of its authority; my object in touching upon the matter is to show in concise form the total extraordinary expenditure upon the different appropriations drawn upon for its suppression.

The following emergency appropriations were made by the council of state in the order named:

Dec. 12, 1899.	Expenses, bubonic plague	\$25,000
Jan. 5, 1900.	Expenses, bubonic plague	250,000
	Garbage crematory	20,000
Jan. 11, 1900.	Construction of buildings, etc., for shelter of persons released from quarantine	15,000
	Temporary maintenance of persons released from quarantine	5,000
Feb. 27, 1900.	Expenses bubonic plague	100,000
	Completion of detention camp No. 2, Vineyard street, including laying of special sewer to the river	10,000
Mar. 23, 1900.	Expenses bubonic plague	10,000
	Expenses bubonic plague	240,000
Apr. 3, 1900.	Temporary maintenance of persons released from quarantine	2,500
		<hr/> 677,500

The extraordinary expenditures under the direct control of the board of health, "expenses bubonic plague," I have subdivided into three general classes, viz, labor, salaries, and material and supplies. I show the distribution of the funds, as per the following statement:

Year and month.	Labor and pay rolls.	Salaries, physicians and superintendents, etc.	Material and supplies.	Total by months.	Number of warrants drawn.
December 1899.	\$2,795.43	\$150.00	\$10,577.76	\$13,523.19	
January 1900.	54,712.07	100.00	3,829.05	58,641.12	
February	62,667.12	1,206.28	37,253.00	101,126.40	
March	28,068.63	3,347.77	180,247.54	211,663.94	
April	26,250.71	5,913.27	96,279.88	128,443.86	
May	2,197.32	1,452.99	67,241.50	70,891.81	
June	1,628.17	132.01	10,847.62	12,607.80	
July	637.00	100.00	7,346.40	8,083.40	
August	457.11		103.90	561.01	
September	1,615.63		15,339.08	16,954.71	
October	609.25		1,803.24	2,412.49	
November					
December			85.27	85.27	
Total	181,633.44	12,402.32	430,964.24	625,000.00	

Department of the interior plague expenditures were as follows:

Appropriations.

Year and month.	Construction of buildings, etc., for persons released from quarantine.	Completion of detention camp No. 2, etc.	Temporary maintenance of persons released from quarantine.	Total by months.	Number of warrants drawn.
January 1900.			\$176.30	\$176.30	
February	\$4,836.63		612.21	5,448.84	
March	842.65	\$634.94	2,191.32	3,568.91	
April	8,795.43	1,841.80	1,762.55	12,399.78	
May	525.29	6,495.65	895.23	7,916.27	
June			841.78	841.78	
July		550.00		550.00	
August			110.00	110.00	
Total	15,000.00	9,422.39	6,579.49	31,001.88	17

Department of foreign affairs plague expenditures from military appropriations, covering pay of soldiers on active-service footing and their maintenance from January 1 on to the end of such service, are as follows:

Appropriations.

Year and month.	Support of military.	Support of military pay roll.	Total.	Number of warrants drawn.
December 1899.		\$9,542.91	\$9,542.91	16
January 1900.	\$6,737.77	27,496.46	34,234.23	60
February		9,068.86	9,068.86	11
March		349.93	349.93	1
April	9,888.15		9,888.15	100
May	877.05		877.05	36
June	535.06		535.06	17
Total	18,088.08	46,448.16	64,486.19	222

Recapitulation, plague expenditures.

9. Board of health	\$13,523.19	
Military	9,542.91	
		\$23,066.10
10. Board of health	611,476.81	
Department of interior	31,001.88	
Military	54,943.28	
		697,421.97
		720,488.07

In addition to the above, two other large expenditures were made for permanent improvements, which may be classed as extraordinary, being considered necessary at the time to successfully cope with the epidemic, viz: For garbage crematory, \$16,844.59, from an emergency appropriation made by the "council of state," and for "quarantine harbor," \$69,676, from the regular "loan appropriation for harbor improvements, Honolulu," making a total extraordinary expenditure of \$807,008.66 from December 12, 1899, or of \$783,942.56 during the year 1900; for which vouchers have been approved and 2,150 warrants drawn in payment.

These enormous expenditures added very materially to the work of this department, which had to be done with a depleted force, as two members of the regular staff were called upon for military service.

The vouchers include items for the clothing, feeding, and housing of thousands of people, set out in the minutest detail; and I can report that all the provisions of the law were as strictly complied with as to approval, checkings and verification as in the ordinary routine business of the government.

APPROPRIATIONS.

The authorized appropriations credited upon the books of this department are given in detail in the statistical portion of this report under the head of expenditures, but as the aggregate reaches such an enormous sum as compared with other periods, some further explanation as to this increase seems desirable.

The country entered upon a new financial period without the election of a regular legislative body to provide appropriations and to adjust revenue laws to meet the requirements, and had it not been for the wise provision of the constitution (article 70, sections 4, 5, and 6) the legality of the expenditures necessary for the carrying on of the government after March 31 would have been open to question.

This constitutional provision reappropriated the "salaries and pay rolls" (act 60, session laws 1898) in full, \$2,209,656; also the "current expense (act 58), with the exception of appropriations for specific purposes, which were eliminated by vote of the executive council, leaving \$1,909,725. The unexpended balances of the old loan act, which did not lapse until March 31, and of the first bubonic plague appropriation were brought forward, \$604,887.51. In addition to these the "council of state," acting under special authority from the president, in its special and regular sessions passed appropriations amounting to \$4,567,357.18 from current and loan funds, making a grand total of \$9,291,625.69.

TRANSFERS FROM CURRENT CASH.

I have approved transfers from the current cash during the past two years for the following purposes:

First. To pay depositors in the postal savings bank, under authority of section 786 of the civil laws, "if at any time the moneys paid into the treasury on account of the Hawaiian Postal Savings Bank, and interest accrued thereon, shall be insufficient to meet the lawful claims of the depositors, it shall be the duty of the minister of finance to pay the amount of such deficiency out of any moneys not otherwise appropriated, and report the said amount to the next legislature," amount as follows, viz:

August, 1899	\$10, 00
December, 1899	20, 00
May, 1900	5, 00
June, 1900	15, 00
	<hr/> 50, 00

Of this amount the postal savings bank returned to current cash in October, 1900, \$16,388.69 (being the amount of interest due depositors from January 1 to June 30, paid from the appropriation "interest on all loans and advances," and cash on hand when the United States Government commenced paying depositors), leaving a balance of \$33,611.31 to be reported.

Second. To the loan fund under authority of section 1, act 63, session laws 1898 (making loan appropriations): "Provided, however, That moneys advanced from current receipts or from deposits in the postal savings bank for the objects named may, as soon as practicable, be reimbursed from moneys obtained from such loan," as follows:

December, 1899	\$100, 00
February, 1900	100, 00
March, 1900	250, 00
July, 1900	100, 00
August, 1900	100, 00
October, 1900	25, 00
November, 1900	124, 00
	<hr/> 799, 00

which with the balance due from postal savings bank makes a total of \$832,611.31 due to the current cash. The payments to the postal savings bank were made necessary by the withdrawals exceeding the deposits in the regular course of business, and probably no legislative enactment is required to make it permanent, it being a statutory provision.

The transfers to loan fund were made in the nature of advances as implied by the wording of the act, "May, as soon as practicable, be reimbursed, etc., and must be returned to current cash from the first loan negotiated by the Territory unless made permanent by an act of the legislature. When the first transfer was made in December, 1899, the treasury was in the most flourishing condition ever recorded, having a balance in the current cash of over \$1,600,000, and the minister of finance did not deem it advisable to further increase the bonded indebtedness of the country when sufficient funds were in hand to meet the requirements for both the current and loan expenditures from appropriations then authorized.

concurred in this opinion and approved the transfers, with the proviso quoted above and the understanding that the matter would be referred to the first legislature.

The loan-fund expenditures for the year 1900, with the balance on December 31, 1900, of \$58,497.20, make a total of \$781,002.39, within a few thousand dollars of equaling the amount transferred. The following general statement will give a fair conception of how the money was expended:

Island of Oahu:		
Sewerage of Honolulu	\$284,804.40	
Waterworks, Honolulu	118,921.03	
Harbor improvements, Honolulu.....	101,679.28	
Improvements, Nuuanu Stream	3,536.07	
		\$508,940.78
Island of Hawaii:		
Harbor improvements, Hilo	5,633.62	
Sewerage, Hilo.....	3,373.38	
Waterworks, Hilo	11,894.68	
Roads and bridges, Hawaii	92,132.90	
Postoffice, Hilo	461.75	
		113,496.33
Island of Maui:		
Waterworks, Wailuku and Kahului	36,341.98	
Roads and bridges, Maui.....	50,115.95	
		86,457.93
Island of Kauai:		
Roads and bridges, Kauai.....		765.00
General	2,345.15	
Subsidy O. R. & L. Co.....	10,500.00	
		12,845.15
		722,505.19

It will be seen from the above and from the detail of expenditures under the loan act, given in the statistical portion of this report, that the money was spent for necessary public improvements which were virtually completed when the loan fund became exhausted, and that a stoppage of the works would have resulted in great loss to the country.

TERRITORIAL GOVERNMENT.

The change in the form of local government inaugurated by the organic act on June 14 created less friction than was at first anticipated. It was deemed unnecessary to attempt to close the accounts of the republic on June 13 and open them again as of June 14 for the territorial government, as the liabilities of the republic were assumed by the "Territory," and the laws governing appropriations were continued almost unchanged.

The salaries of all the offices abolished and those taken upon the payroll of the Federal Government by the organic act were paid through June 13, and have not been drawn upon since, with the following exceptions: Minister of finance, land agent, commissioner of agriculture, minister of the interior, auditor-general, deputy auditor-general, surveyor-general, marshal, clerical assistance auditor-general, and clerks, etc., interior department. In the matter of continuing the payment of these salaries, I asked the attorney-general for an opinion, from which I will quote the following paragraph:

I am of opinion that there is no occasion for any hiatus in administering the affairs of the local government. I think that wherever an old office has been abol-

ished by name and a new office, invested with the same responsibilities and duties has been created, it is proper and lawful for the auditor to pay the salary heretofore attached to the office until a change is made.

Acting upon this opinion, the salaries for all the new offices created, with the exception of the "superintendent of public instruction," have been paid.

The duties of the "superintendent of public instruction" were formerly performed by the minister of foreign affairs, who was ex officio minister of public instruction, with no independent salary attached; hence the "superintendent of public instruction" has served without pay from the date of his appointment, being content to look to the legislature for suitable compensation.

The expenses of making final collections and closing the books of the custom-house and post-office after their transfer to the Federal Government were charged to the incidental appropriations for the bureaus on vouchers approved by the governor.

REVENUE AND EXPENSES.

As no separation can be made in the annual financial statement of the receipts and expenditures of the republic from those of the Territory, I have prepared the following general statement of the receipts and expenditures on account of current cash for the past five months.

Receipts current cash.

	General.	Taxes.	Special deposits.	Total.
1900.				
August.....	\$88,586.30	\$6,401.00	\$2,183.00	\$97,170.30
September.....	59,071.88	5,441.20	1,305.00	65,818.08
October.....	102,594.48	12,971.30	1,170.20	116,736.98
November.....	48,390.17	464,983.81	2,684.37	515,958.35
December.....	81,189.17	452,775.83	10,973.78	544,938.78
Total.....	379,832.00	942,573.14	18,316.35	1,340,721.49

Expenditures (less bubonic plague bills).

	General.	Interest.	To special deposit.	Total.
1900.				
August.....	\$176,976.38	\$6,065.25	\$2,183.00	\$185,224.63
September.....	177,713.85	6,566.00	1,305.00	185,584.85
October.....	167,150.13	66,773.51	1,170.20	235,093.84
November.....	155,434.44	10,251.25	2,684.37	168,370.06
December.....	177,402.51	9,772.19	10,973.78	198,148.48
Total.....	854,677.31	99,427.20	18,316.35	972,420.86

The average monthly receipts from taxes for the year (less taxes credited to special deposit) is \$97,951.81, and from other sources on basis of past five months \$75,966.40, making a total of \$173,918.21. The average monthly general expenses for past five months is \$170,935.46. Add to this the monthly interest on the Territory's share of the bonded indebtedness, \$3,897.50, making a total of \$174,832.96, showing a deficit of \$914.75 a month. Add to this amount \$15,903.08 per month advanced to pay interest on bonds assumed by the Federal Government makes the actual deficit of \$16,817.83.

Estimate of the resources and expenses of the Territory to June 30, 1901.

on hand December 31, 1900	\$824, 471. 25	
warrants outstanding	30, 292. 67	\$594, 178. 58
payments from general revenue, six months		450, 000. 00
payments from collections of personal taxes, less road tax on basis of 1900, for the first six months of the year		210, 000. 00

STATEMENT OF LOAN INDEBTEDNESS.

	1899.	1900.
CURRENT ACCOUNTS.		
standing bonds.....	\$4,214,400.00	b \$4,186,400.00
postal savings bank.....	768,181.62	c 98,471.81
Total.....	4,982,581.62	4,284,871.81
loan fund cash balance.....	92,230.13	58,497.20
Net loan indebtedness.....	4,890,351.49	4,226,374.61

a \$90,100 bonds paid from "land sales, special deposit."

b \$28,000 bonds paid from "land sales, special deposit."

c \$66,096.50 paid by United States Government to date.

TREASURY WARRANTS.

The following is a list of the warrant books, showing the number of warrants drawn for all approved salaries and claims against the government for the year January 1 to December 31, 1900:

	Number warrants.
President and permanent settlements	38
Foreign affairs.....	918
Judiciary department.....	1,007
Finance department.....	362
Postal bureau.....	1,896
Customs bureau.....	783
Tax bureau.....	411
Attorney-general's department.....	6,310
Public instruction.....	6,453
Commission public lands.....	321
Waterworks bureau.....	565
Public works bureau.....	2,997
Board of health bureau.....	4,809
Forests and nurseries.....	201
Public grounds, general.....	92
Fire department.....	365
Interior department.....	990
Survey bureau.....	345
Conveyance bureau.....	105
Immigration bureau.....	27
Loan fund.....	1,286
Total	30,281

The total expenditures approved for which warrants are required amounted to \$3,315,140.34, or an average of \$109.47 for each warrant.

PUBLIC ACCOUNTS.

All the time possible has been devoted to the methodical examination of the public accounts in Honolulu and on the other islands, it being its purpose to check accounts for the collection of revenue in the different offices from original documents and books of entry, commencing with January 1, 1898. The custom-house and postal receipts have been checked to the date of transfer to the Federal Government, and were found to agree with payments to the treasury.

The following summary shows the work performed to date:

Number of accountants checked for receipts:

Oahu
Hawaii
Maui

Total number accounts examined

Number errors and omissions:

Oahu (short paid, \$131.31)
Hawaii (short paid, \$222.70)
Maui (short paid, \$30.50)

* Total (short paid, \$386.51)

Two amounts have been paid into the treasury in excess of collections and discovered too late for correction before the end of the period, viz, by H. M. Dow, clerk to the high sheriff, on account of fines and costs, \$439.95; and by C. H. Dickey, assessor second division, on account of taxes, \$336.71. I would recommend that an appropriation be provided at this session of the legislature to reimburse the amount so paid in excess. The total amount of collections checked from the original account in the various offices to date is \$5,948,167.52 or about 10 per cent of the total revenue for three years.

RECOMMENDATIONS.

I would respectfully make the following recommendations:

First. That the biennial period be changed to conform to the first year of the Federal Government, the new period to commence July 1, 1901.

Second. That an act be passed making the transfers from current cash to "loan fund" (as reported herein) permanent. I believe that the revenue laws can be changed so as to meet the requirements of the new period for current expenses without the return of this money.

Third. That the merchandise-license law be amended as soon as possible so as to again legalize the collection of revenue from that source. This tax will produce an income of \$100,000 per annum, and the Territory can not afford the loss.

Fourth. That the law relating to the collection of property taxes be amended at once, dividing the tax into two equal parts for the purpose of collection; one-half to be collected from the 15th to the 30th of June and the remainder from the 1st to the 15th of December each year, with the usual penalty for delinquency.

I believe this to be the speediest remedy the legislature can apply to provide means for meeting the necessary current expenses of the government after July 1, 1901.

This year over \$916,000 was paid into the treasury during November and December; by collecting half of the assessment in June, the drain on the money market will not be felt, a part of the first installment will find its way into circulation through government expenditures before the second half becomes due.

Fifth. That the auditing department be placed upon the same basis as other departments of the government as to appropriations.

Several changes are required in the audit act to adapt the law to present conditions, which I will make the subject of a special report during the coming session of the legislature.

DETAILED STATEMENT OF RECEIPTS AND EXPENDITURES.

The following statements will show the receipts of the government in the returns of public accountants in detail, and the expenditures appropriations, balance unexpended, and warrants outstanding on each account:

H. C. AUSTIN, Auditor.

To the GOVERNOR AND LEGISLATURE,
TERRITORY OF HAWAII.
AUDITOR'S OFFICE, Honolulu, January 31, 1901.

EXHIBIT No. 6.

ANNUAL REPORT OF THE COMMISSIONERS OF CROWN LANDS, 1894.

[Compiled by C. P. Laukea, agent of crown lands.]

HONOLULU, *May 1, 1894.*

SIRS: I beg leave to submit for your consideration the following report and returns of the crown lands for the two years ended March, 1894.

I have, etc.,

C. P. LAUKEA,
Agent of Crown Lands.

To the COMMISSIONERS OF CROWN LANDS.

REPORT.

Under the provisions of the act approved January 3, 1865, by virtue of which the business of this office is transacted, the crown lands cannot be alienated in fee, but can only be obtained by lease for a term of years not to exceed thirty, authority to lease the said lands being vested in a board of commissioners consisting of three members, two of whom shall be appointed from the executive council and the other to act as agent.

Heretofore, or prior to January 17, 1893, the crown lands were administered more or less in the nature of a private estate, it being held that the sovereign, to whom the revenues belonged, had a vested right to the lands. As the question of the validity of the claim was never raised, the sovereign always exercised a certain amount of control over the management and disposition of the lands.

At the beginning of the year 1892 a new system of leasing was introduced, the main feature of which was to secure to small holders, more particularly native Hawaiians, the opportunity of acquiring under fair conditions suitable sections on the crown lands for homestead and agricultural purposes.

OLAA SETTLEMENT.

The opening of the new Volcano road through the crown land of Olaa, in Puna, Hawaii, made accessible to settlement a large area of fertile land which had hitherto remained practically unknown. The desire for land which followed necessitated the adoption of a more liberal system of leasing, so as to meet the requirements of the class desirous of taking up land. With this object in view, the principle of free selection in limited areas was introduced and the land thrown open free for the first three years, subject to certain conditions of improvement and cultivation, the tenure being a thirty-year lease.

As a direct result of this system, the total area now occupied at Olā for actual settlement and cultivation, exclusive of the homestead reservation for native Hawaiians, is 11,478 acres in 85 separate holdings, an average of 135 acres to each selector.

HOMESTEAD RESERVATION, OLĀ.

In response to the claims of a number of native Hawaiians, tenants of the land of Olā, a reservation of 1,400 acres was set apart specifically for their use. Suitable sections were allotted to each in the nature of homesteads, a continuous residence of five years being required, during which period no rent was chargeable. Forty-seven have acquired holdings, occupying a total area of 482 acres. The settlers with their families, numbering over 100 persons, are thrifty and in comfortable circumstances. A church has been erected at the settlement, and that which is now necessary is a suitable school where their children may receive the advantages of an early training and education. The attention of the government is respectfully invited to the needs of the settlers in this regard.

The appended tables, marked "A" and "B," give the names of the selectors at Olā, together with the area held by each, whilst the accompanying maps, Exhibits 1 and 2, show the sections now occupied and actually under lease.

KAIMU AND WAIKOLEA HOMESTEADS.

The satisfactory results attained at Olā under this system led to its application to the lands of Kaimu and Waikolea in Puna, Hawaii. All of the tenants have acquired homesteads, the total area occupied being 139.8 acres. Table C, appended herewith, contains full details.

PUUKAPU HOMESTEADS.

During the latter part of 1893 arrangements were concluded with the trustees of the Parker estate by which a large section of the crown land of Puukapu, in Waimea, Hawaii, under lease to the Parkers, was surrendered to the commissioners and devoted to homestead purposes. This tract, containing 1,000 acres, adjoins the village of Waimea and comprises some of the choicest land in the neighborhood. The government road to Hamakua crosses the middle of the reservation at an elevation of about 2,500 feet.

In offering the land for settlement preference was given to native Hawaiians, the intention being to afford them every opportunity of acquiring suitable sections of land whereon they may build and establish permanent homes. As an additional inducement the cost of survey was assumed by the commissioners. Fifty-nine selectors have secured homesteads, occupying a total area of 933.75 acres. Of the present holders all are native Hawaiians with only three exceptions. The reservation practically disposes of the whole reservation, the remaining area being taken up for roadways, etc.

A map of the homestead reservation is appended herewith, also a statement, marked Table D, giving the names of the selectors, together with the area of each holding.

The following is the summary of crown lands held under special settlement conditions:

Settlement.	Date when formed.	Number holding.	Total area taken up.	Average area each holding.	Annual rental payable.
Homestead	Jan. 1, 1892	47	<i>Acres.</i> 482.14	<i>Acres.</i> 10.26	\$482.19
Waia and Waiakeola	do	15	139.80	9.32	71.49
Settlement	July 1, 1892	86	11,478.97	135.06	14,889.24
Open settlement	Sept. —, 1893	59	933.75	15.83	238.65
Total		206	13,034.66	63.27	15,681.57

It will be seen from the foregoing statement that the total area of crown lands now held under lease, subject to special conditions of improvement and cultivation since January 1, 1892, the date when the first settlement was formed, is upward of 13,034.66 acres in 206 separate holdings, aggregating a total rental of \$15,681 per annum. The results above disclosed are important, as showing not only what may be done by opening up the lands and making them accessible to the small holders, but also as indicating what the future might accomplish under a vigorous policy of land settlement was pursued under conditions more favorable to the settler than at present exist. A system that would secure to the lessee the value of his improvements with right to acquire the freehold to his allotment after fulfillment of certain conditions seems to be what is needed—a system free from the evils of speculative auction sales.

TENURE AND CONDITIONS.

The tenure under which the lands are held, is a lease for thirty years and the conditions substantially as follows: Payment of rent commences at the end of the third year, which varies according to location and quality of land. At Olaa the maximum rent per annum is \$2 and the minimum \$1 per acre. At Puukapu the rental is fixed at 2 cents per acre per annum. Lessee pays all taxes and other impositions required by law. Within one year from commencement of lease must clear and plant not less than 2 per cent of the allotment, during the second year 3 per cent, and within the third year 5 per cent with coffee and fruit trees, and during the continuance of lease properly cultivate the same. In addition to the above the land must be further improved by the erection of buildings and fences to the value of \$500. Residence, except at the homestead reservations at Puna, Hawaii, is not compulsory, but actual settlers are granted a special reduction of rent at the rate of one-fourth the amount. A provision in the Olaa laws prohibits the cutting or destroying of trees, brush, or natural overgrowth within 250 feet of the Volcano road, except for purposes of roadway. The form of lease, marked Exhibit 5, is herewith appended.

PERMANENT IMPROVEMENTS.

In order that a good idea may be formed of the progress that has been made by the settlers, I would respectfully call attention to the

report of Mr. E. D. Baldwin, herewith annexed, who has had personal supervision, in connection with this office, of the survey operations at Olaa and the Kaimu and Waiakolea homesteads. His report is very interesting and contains a detail statement of the improvements made at the settlements, especially at Olaa, where most of the settlers are. The returns show that 117 houses and cabins have been built, valued at \$23,344. Of the 600 acres cleared, nearly 400 are planted in coffee, also a lot of cocoa trees, tea plants, and assorted foreign and domestic fruit trees. The total value of improvements, including the Puukapu returns, is estimated at \$50,490.

I would also call attention to that portion of Mr. Baldwin's report recommending the opening of a road between Olaa (crown) and the land of Keaau (private) as shown on the accompanying map, marked Exhibit 6. The proposed road will open up a large tract of good coffee land at present inaccessible, estimated between 20,000 and 30,000 acres.

THE CROWN LANDS.

The total area of the crown lands is approximately 971,463 acres valued at \$2,314,250, and distributed by islands as follows:

Islands.	Number of acres.	Value.
Hawaii	642,852	\$98,121
Maul	69,121	14,400
Molokai	20,882	2,400
Lanai	17,369	1,400
Oahu	66,593	5,400
Kauai	154,636	5,400
Total	971,463	2,314,250

Table E, appended herewith, contains a full and complete schedule of the lands and shows their approximate area, locality, whether or not leased and to whom, annual rental, date of expiration of lease, nature and general character of land, and estimated value.

It is almost impracticable at the present time to make distinction with any degree of accuracy, between the various classes of land. Some of the larger and more valuable tracts are still unsurveyed and practically unknown. A striking illustration of this is the land at Olaa, near Hilo, which was generally regarded of very little value for agricultural purposes. Since the opening of the new Volcano road this tract has been found to contain a vast region of fine coffee land equal, if not superior, to any in that neighborhood.

For the reasons above stated, and in the absence of more reliable data as to the proportionate area of arable land, or what constitutes mountain or barren tracts, the work of estimating the value of the crown lands has been attended with considerable difficulty. Sufficient information is at hand, however, enabling this office, with the assistance of Mr. J. F. Brown, of the surveyor-general's department, to prepare a careful estimate of their value which for all practical purposes might be deemed sufficient. As will be seen by reference to Table E, before mentioned, the present estimated value of the crown lands is approximately \$2,314,250.

description of all the lands, excepting small pieces and remnants, comprising this report, which is intended to show in as concise a manner as possible the nature and general character of the lands. This work has occupied much time and labor, and it is to be hoped that the information therein given may serve to show the extent to which the lands might be made available for settlement and agricultural development.

REVENUE.

The revenue from the crown lands is derived entirely from rents, amounting as of March 31 last to \$49,268.75 per annum, or for the five years nearly \$100,000. This, however, does not include the rentals represented by special leases issued under settlement conditions or in the nature of homesteads. These are payable according to the terms of the lease at the commencement of the fourth year, and they aggregate a total of \$15,681.57 annually. The rent roll, marked "E," is appended herewith and contains a full and complete statement of all leases now in existence. It shows the names of the present lessees, date of leases, term of years, annual rentals, and the lands included under each lease.

By reference to the rent roll, it will be seen that many of the lands, and particularly the valuable ones, are held for long terms of years, and in a number of instances the rentals, compared with present market ruling rates, are exceedingly low. The following statement will illustrate this:

Name of tract.	Locality.	Area.	Annual rental.	Remarks.
Wapala.....	Kau.....	172,780	\$1,200	Excellent grazing land.
Wabunu.....do.....	15,210	600	150 acres cane, with valuable water springs.
Waka.....	Hilo.....	96,000	2,000	3,000 acres cane; good coffee land.
Wakula.....do.....	101,000	1,000	500 acres cane.
Wakala.....	Hamakua.....	5,186	306	800 acres cane.
Wakalimu.....	Honolulu.....	500	100	Valuable town lots.
Wakalo.....	Koolau.....	6,500	1,500	1,200 acres cane.
Wakalei.....	Waianae.....	14,772	700	500 acres cane.
Waka and Anahola...	Kauai.....	18,474	600	1,700 acres cane.
Total.....	424,422	8,006	Area cane land, 7,850 acres

The above figures show that of a total acreage of 424,422 (nearly one-half the whole area of the crown lands) the rental per acre averages less than 2 cents. These tracts comprise a very large proportion of some of the choicest lands in the country, and include upward of 400 acres cane land now actually under cultivation besides a very large area suitable for coffee and other tropical products.

REPORT UPON THE VALUE OF IMPROVEMENTS, AND NUMBER OF COFFEE TREES, ETC., SET OUT UPON THE OLAA LOTS, SERIES B.

HILO, HAWAII, March 31, 1894.

M. C. P. IAUKEA, *Agent of Crown Lands.*

SIR: In accordance with your request for a statement of the value of improvements and number of coffee trees, etc., set out upon the Olaa lots, I wish to present the following report:

Total number of leases issued, 93, out of which have been canceled 8; leaving in actual operation 85. These 85 lessees cover a total acreage of 11,478.97, at a total

annual rental of \$14,889.24. Sixty-five leases, or about 75 per cent, are doing something to improve their lots.

Number of houses and cabins built	
Number of acres cleared	
Number of acres planted in coffee	
Number of acres in use as house yards, nurseries, and planted with assorted fruits, etc.	
Number of coffee trees set out	257
Number of cocoa trees set out	
Number of tea plants set out	
Number of assorted foreign and domestic fruit trees set out	1
Value of houses and fences	\$15.40
Expenses of clearing (not including the expenses of planting, up-keep, etc.)	14.72
Value of the coffee trees set out, at the rate of \$8 to \$50 per thousand	5.50
Value of assorted fruit trees, cocoa, tea, etc., about	1.80
Total	37.52

At the close, nearly, of the second year since issuing the first Olaa leases, we find that the value of permanent improvements and number of coffee trees planted is a little more than double what they were at the end of the first year. This tends to show that there is a steady growth in the amount of improvements put upon the lots.

Then again, the total value of improvements as given above does not represent the amount of money that has been put into Olaa, this only representing the permanent improvements, while about one-fourth of the above value of permanent improvements, or about a total value of \$9,396 additional, has been put into Olaa in the way of general expense and up-keep.

It may be well to consider somewhat the style of houses built. Out of the 80 houses and cabins, 7 may be considered as small cabins or shanties, worth a total value of \$111; 5 are good, comfortable dwelling houses, put up at an average cost of about \$500 to \$1,500 apiece; the remaining 67 houses average from the value of \$50 to \$100. J. R. Wilson has put up a good, substantial, and comfortable hotel at Olaa, called "Mountain View House," located at a central point 16½ miles from Hilo.

Coffee planting at Olaa is still upon its own merits, and can thus far only be considered from an experimental point of view, as thus far we have no systematic statistics upon the possibilities of crop bearing, except those from a few individual trees scattering through Olaa, which have borne large crops of berries. Those planted thus far are coming on well, and some that are only a little over a year will give every promise of a small maiden crop this year.

The acreage cleared, as well as planted, may be considered under three methods. First, where nearly everything has been cleared, and almost all burned except the fern stumps and some of the larger logs; under this head some 120 acres have been cleared, 73 acres of which are planted with 49,600 coffee trees. Second, where nearly everything has been cleared, and rowed, but burned; under this head some 174 acres are cleared, and 107 acres planted with 73,692 coffee trees. Third, where only the underbrush and small trees have been cut; under this head most of the clearing and planting has been done—that is, 258 acres have been cleared, and 144 acres planted with 123,292 coffee trees.

Cocoa planting has decreased somewhat, mostly on account of the difficulty first in starting the young trees, also on account of not knowing whether the variety planted is the best, the seed having been obtained mostly from a few trees grown at Hilo and Honolulu.

The foreign fruits planted are some 50 best budded Riverside oranges, and over 200 assorted apples, apricots, peaches, quinces, figs, cherries, plums, etc. Olaa soil seems thus far to be adapted to almost all kinds of plant growth. Irish potatoes of an excellent quality are raised, and find a ready sale at the home market. Vegetables of all kinds flourish luxuriantly; also many fiber plants grow in large quantities in the woods, such as olona (*Touchardia latifolia*) and mamaki (*Pipturus albidus*).

In referring to surveys and cost of same, it is well to remark, that the foundation work has been carried on at the expense of the commissioners of crown lands. A careful traverse of both the old and new Volcano roads; each point being well marked on a solidly embedded stone, and nearly all of the traverse points from the 16-mile post running mauka are marked on the curbstones of the Volcano road; these being less liable to be disturbed. From these fixed points the corner of the lots are easily determined, and I would suggest here that with a little expense

be advisable to fix more permanently these road points by cementing them with concrete and marking each one with its proper number, so that it can be distinguished by any surveyor. The cost of surveying each lot has been borne by the lessee, and the cost has been about \$25 per lot of 50 acres, within a half a mile of the Volcano road, with a reduction on larger areas. It was deemed best to have good, permanent surveys of all the lots, referring these to the Olaa first government survey triangulation point, by the coordinate system. This has been done out in all cases. The road traverse especially has been made with a great deal of care, and checked by remeasurements of all the distances. One can readily see the necessity of a careful traverse when we note that after entering the woods a mile above the 13-mile post there is no opportunity for a check until traversing 11½ miles to near the bullock pen, on the old Volcano road. The traverse of the new volcano road has been finished to the bullock pen, a distance of 11½ miles from the 13-mile post, or to a point better known as 24½ miles from Hilo, and the old Volcano road traverse has been finished to within a mile of the same bullock pen. The work of dividing up the lots has been carried on mostly in patches here and there, as it was done for by the lessees.

The cost to the commissioners of crown lands has been:

Map work to date	\$177. 50
Plaster prints and 52 blue prints, and 2 frames	71. 90
Field work traversing roads, etc., at Olaa, also miscellaneous map work, etc.	1, 131. 80
Total	1, 381. 20

Between every two lots a space of 30 feet in width has been reserved for side roads, these roads, being inaccessible on account of the dense growth of underbrush and fern upon them, need opening up by clearing the forest from them. A beginning has been made at this by clearing (as an experiment) parts of three of the roads, a distance of 1½ miles at an expense of \$191.05. By contract the said roads can be cleared of all timber and underbrush at about \$75 per mile. Much inaccessible land can thus be opened up for settlement.

The success with which the new volcano road has opened up the wild and almost unknown Olaa land goes to show what can be accomplished by a good road. Back of the present lots as shown laid out on the map is a vast region, with soil of equal fertility to that which the new volcano road runs through. This region only needs a good road to open it up to settlement; such a proposed road as is shown on the accompanying map would accomplish this object, and it would pay the government to build such a road, extending it as the land is called for. The road could be built at a less cost per mile than the present volcano road and yet be a good, serviceable road. By a less cost per mile, would mean that the road would not be open to such a large traffic as the present new volcano road, and would not, consequently, need to be constructed with the same degree of width or solidity.

The land of Olaa contains, by boundary certificate, 54,260 acres. The lots as laid out upon the Olaa map comprise about 20,000 acres. There are between 35,000 and 40,000 acres of good coffee land in Olaa between the elevations of 640 to 3,000 feet. The temperature is neither too cold nor too warm, and the rainfall, which averaged 100 inches last year, is on a par with the average of the best coffee districts of Guatemala. The soil is very rich, composed mostly of decomposed vegetation and rock, and from 3 to 8 feet in depth; under this comes a layer of somewhat decomposed aa, which gives an almost perfect drainage.

The present new volcano road opens up an acreage of about 15,000 acres, extending to within a mile north of the road, also all of the section south of the road, so that there remains a section back of this of some 20,000 to 25,000 acres of good coffee land which only needs a good road to open it up.

Respectfully submitted.

E. D. BALDWIN.

Report upon the value of improvements and number of coffee trees set out upon the Olaa homestead lots and also, separately, the Kaimu and Waiakolea homesteads up to March 31, 1894.

On the Olaa homestead reservation:

Number of homestead lots selected	47
Including a total area in acres	482. 14
Number of houses built, including one church	26
Number of acres planted with kalo and coffee	53
Number of coffee trees set out	7, 300

Olaa homestead reservation—Continued.

Value of houses and fences.....	\$4.00
Value of 45 acres kalo, at \$40 per acre.....	1.80
Value of coffee trees, at \$8 per thousand.....	—
Total.....	6.77
Thirty-eight of the homesteads are doing something with their lots.	
Twenty-three have built houses upon their lots.	
Kaimu and Waiakolea homesteads:	
Number of homesteads, some including 2 lots.....	—
Area, acres.....	—
Number of houses.....	—
Number of acres planted.....	—
Number of coffee trees set out.....	—
Value of houses.....	\$2.00
Value of kalo and coffee planted.....	1.00
Total.....	—
Respectfully submitted	E. D. BALDWIN

DESCRIPTION OF THE CROWN LANDS.

ISLAND OF HAWAII.

KONA DISTRICT.

Puuwaawaa.—This is one of the most northern of the Kona lands running from the sea to within a mile of the summit of Mount Haleohihi, a distance of 15 miles. It has about 6 miles of seacoast, the last landing being at Kiholo, where a few hamlets are. The government road from Kailua to Kawaihae passes through the village of Kiholo. There are very few inhabitants on the land. The only good land for cultivation is near the Puuwaawaa Cone, distant 8 mi. from the coast. Here fruits, particularly peaches, grow luxuriantly, also potatoes and taro. The makai portion of the land, say about one third, is extremely rocky and would offer but scant pasturage to a herd. Above this, in the wood, is found some of the best grazing land in that part of the country. The forest in places is very heavy, the principal wood being koa and ohia. Dependent on rain for water supply, which is generally sufficient for all purposes. Area about 40,000 acres.

Haleohihi.—One of North Kona lands running from the sea into the woods a short distance. Long and narrow, in places not more than 200 or 300 feet wide, very rocky below. The upper government road runs across the land at about an elevation of 1,200 feet. The land in its immediate vicinity is good coffee land. The rainfall is sufficient for all necessary purposes. The nearest landing is at Kailua, a short distance away, although boats can land anywhere along the coast in most weathers. It is said to hold a good sea fishery. The land about the government road may be valued at \$20.33½ per acre, and is suitable for homesteads. Area, 1,000 acres approximately.

Waiaha II.—This land is situated near the center of North Kona and runs from the sea to lower edge of the woods. Some parts are extremely rocky and only fit for goat pasture. The rest of the land is one of the best in that part of Kona, growing fine bananas, pine

es. potatoes, and taro. Coffee, orange, limes, lemons, and ramie all do well in the vicinity of the upper government road, which crosses the land about 2 miles from the coast at an elevation of 1,200 feet.

Would make good homestead lots. Value about the same as all other lands. The nearest steamer landing is at Kailua, distant 2 miles, to which the lower government road runs. Boats can land anywhere along the coast.

Maia—This land adjoins Waiaha II, and is similar to it in many respects. Area, 859 acres.

Houli.—The best portion of this land has been sold. The part sold lies above the government road and is principally a heavy forest of koa and ohia. The rainfall is very heavy. At the lower end of the forest near the road some good coffee land may be found. Kailua landing is the nearest, distant 4 miles. Area, 367 acres.

Honomalino.—A large land in South Kona near the Kau line. The landing at Honomalino is good, about 2 miles from the upper government road where the population resides. No special difficulties in making good roads to the landing. The upper government road runs at an elevation of 1,500 feet across the land. About one-third of the land nearest the coast is rocky and affords a scanty living to a few goats and cattle. The land extends to the upper edge of the Kona forest. About one-third of the land is inclosed in this heavy forest of koa, ohia, and some sandal woods. The remaining third is one of the most fertile of Kona lands. The water supply is from the rainfall which is ample for all agricultural purposes. Awa is a profitable crop. Coffee and ramie will do well, especially the latter. Almost any tropical production can be raised, and the land is easy of access. The landing through the good belt would make desirable homesteads. Approximate area, 6,000 acres.

KAU DISTRICT.

Waiohinu.—This is one of the best lands in Kau. On it is situated the village of Waiohinu, where a large number of inhabitants reside. Kailua landing is distant 7 miles and Honuapo 5 from the village, with good roads to both landings. The land extends from the sea to the edge of woods, the part below the Honuapo road being very rocky and only fit for grazing. Around the village is some good land which would make excellent homesteads. A large amount of water is furnished by springs. The woods are very heavy, consisting principally of koa and ohia. Elevation of the village is about 1,200 feet, and the climate unsurpassed. There are about 200 acres cane land. Total area of the Ahupuaa is 15,210 acres.

Kapapala.—One of the largest lands in Kau. Extends along the coast more than 20 miles, then to summit of the crater on Maunaloa. The road to the volcano from Punaluu runs across the land. All below that road is very rocky, but above this lies a belt of valuable land now occupied by the Hawaiian Agricultural Company, which has on it a large number of cattle. There is not a very great extent of woodland. Where the company has a dairy there is ample water to be found. The land in this neighborhood would make excellent homestead lots, as almost all agricultural products will grow well. Fine oats and wheat have been raised there in years past. The nearest landing is Punaluu, distant about 10 miles. The rainfall is generally sufficient for all purposes. Area, 172,780 acres.

DISTRICT OF PUNA.

Olaa.—This land is one of the inland ahupuaas, not reaching the sea. It is situated to the south of Waiakea on the boundary line that divides the Hilo and Puna districts. Its nearest point is 11 miles from the port of Hilo where the new volcano road enters the land and travels through its entire length a distance of $18\frac{1}{2}$ miles to within a mile and a half of the volcano of Kilauea. This land is very valuable and especially adapted for coffee culture. Fruits of all kinds would do well. Nearly all of the available portion lying on each side of the volcano road for a distance of 13 miles has been eagerly sought and taken up by settlers, the total area now occupied being in the neighborhood of 18,000 acres. This area will be very largely increased in the near future by the opening of new roads. This tract is said to comprise between 35,000 and 40,000 acres of good coffee land. The rainfall is heavy, the drainage is almost perfect, and the soil very rich. The elevation at the lower end of the land is 600 feet and gradually rises to 4,000 feet at the Volcano House. Total area, 54,260 acres.

Apua.—A rocky ahupuaa in Puna, near Keauhou, running from the sea toward the volcano. This land is only suitable for grazing. The uplands oranges and coffee might do well. There is quite a good landing on the coast. No inhabitants. Area, 9,420 acres.

Warakolea.—Quite a good land for Puna, mostly adapted to grazing. Breadfruit and potatoes do well. The makai portion is devoted to homestead purposes. There is a very good fish pond on the land. No landing. Area, 313 acres.

Kaimu.—The land of Kaimu extends from the sea to the highland. A considerable portion is very rocky, but much of it is suitable for coffee, grapes, or ramie farms. There is quite a number of inhabitants on the land, all of whom have been given suitable sections in the nature of homesteads under long leases. About 130 acres have been taken up, mostly near the beach where the village is located. Coconut trees abound. Dependent on rain for water. Area, about 4,000 acres.

HILO DISTRICT.

Waiakea.—This head embraces all that land lying on the south side of Hilo and extending from the sea to the slope of Mauna Loa, far above the forest belt, a distance of 15 miles. The land on the coast is very rocky excepting about the bay at the mouth of the Waiakea River, a tract of about 100 acres, which is very valuable. The portions above the volcano road and above or mauka of it are somewhat rocky, but the soil is very rich and is mostly under the cultivation of cane by the Waiakea Mill Company. This section contains about 3,000 acres of good cane land. Above this and extending into the forest, which is very dense, is a vast region of excellent coffee land, equally as good as the Olaa lands. A good road connects the plantation with Hilo town. The sugar from the mill is boated down the Waiakea River about half a mile to the landing. A very good fishery belongs to the land, and several excellent fish ponds. There are no running streams on the land, but several fine springs, especially at the seacoast. The old forest extends to within a mile of the coast and 2 miles to the Waiakea side of the harbor. Area, about 95,000 acres.

• *Ponaharwai*.—This tract of land runs from the Halai Hills, back of Hilo town, for a distance of 10 miles toward Mauna Loa. There are

lots in town and a large portion of the sea frontage. The section between this and the lower edge of the bush or forest has been 1. From thence at an elevation of about 700 feet a fine stretch of commences and runs into the woods about 2 miles, containing, say, acres; then it is cut off by the flow of 1881, which has covered st of the upper part of this land. Koa and ohia are scattered ough its whole length. The soil is suitable for coffee, ramie, cocoa, other tropical plants. Area, 2,946 acres.

Piihonua.—A large ahupuaa extending from the beach on Front eet. in Hilo town, to the summit of Mauna Loa. There are several es in the town divided up into building lots and mostly situate on th sides of Waianuenue street, the principal thoroughfare in Hilo. om thence into the woods for about one-half mile extends a fine tract land suitable for raising fruits or coffee. The forest, as are all lo forests, is very dense, and is composed principally of koa and ia, large quantities of which would be suitable for cutting into lum-r. The woods are full of wild cattle. The flow of 1885 and 1886 ade it practicable to construct a good road into the upper portion of e land lying above the woods. There is a stretch of land there about miles long and from one-half to $1\frac{1}{4}$ miles in width which contains out the finest land in the country for raising wheat, oats, or any other the cereals, as also potatoes. The climate is dry, with enough oisture to furnish all the water needed for use. Above this tract, retching away to the summit of Mauna Loa, the land is rocky and od only for grazing purposes. It joins the land of Humuula above e woods. The land rises gradually to the high table-lands, being 000 feet altitude at the lower edge of the woods and about 5,000 et at the upper end, 15 miles distant. The land of Piihonua contains 1,236 acres, about 600 of which lie below the woods. There are etween 200 and 300 acres of cane land.

Humuula.—This large tract runs side by side with Piihonua to the mmit of Mauna Loa, but grows considerably narrow as it reaches the a in North Hilo. The land below the woods is valuable as cane land, etween 400 to 500 acres now under cultivation by the Ookala Sugar ompany. The forest, which consists principally of heavy koa and ohia, xtends $4\frac{1}{4}$ miles. The upper portion of this land is used for sheep aising by the Humuula Sheep Station Company, who have erected arge and extensive paddocks at Kalaieha, the company's station. A air road connects the station with the Ookala plantation. Around alaieha is a large and fine tract of land suitable for cultivation, and f settled with small holders would sustain a large population. There o no streams mauka of the woods, but enough rain generally falls o supply all the water needed. A fairly good wagon road connects he company's station with Waimea, distant 35 miles. Another road uns from Waimea to Keanakolu; also a station of the company's, on he Hamakua side of Maunakea, thence to Kalaieha. The altitude of the agricultural lands above the woods is about 6,000 feet. The total area of Humuula is approximately 101,000 acres.

Hakalau-iki.—This is a tract of a little over 500 acres entirely under cultivation by the Hakalau Sugar Company for cane. This land is very valuable and runs from the sea to lower edge of woods; would make splendid homestead lots. The nearest landing is at Haka-lu Gulch, distant 1 mile. The elevation at sea is about 300 feet, and at the woods 1,000. It is well watered. No inhabitants.

Manowaiopae.—This also is a small tract in North Hilo about 2 mi from Laupahoehoe landing, and situate between two gulches with running streams. All of it, excepting the sides of the gulches, is valuable as cane land, under cultivation by the Laupahoehoe Sugar Company. Extends from sea to the edge of woods, long and narrow; has valuable water rights. Area, 180 acres.

HAMAKUA DISTRICT.

Kalopa.—A valuable tract of land extending from the Hamakua coast into the woods. The portion below the woods is very valuable and contains about 1,000 acres of good cane land now held by the Paaupau plantation. The government road crosses the land about 1 mile from the coast at an altitude of 1,000 feet. Dependent on rain for water supply, which is generally sufficient. The forest contains a large tract of fine koa trees running up to the slopes of Maunakea, and as far as the land goes good grazing is found. Coffee grows well in the gulches. This would make one of the best lands for homesteads, and could support a large population. Land in this vicinity is rented at a very good figure; for sugar land \$3.75 per acre is paid. Total area, 6,600 acres.

Honokaia.—This land has quite a fair landing in good weather. The government road crosses it as at Kalopa, and all the land below this, although a little rocky in places, is very rich and will raise all tropical products. This land at the sea is very narrow, but very wide in the woods, where good grazing is found. All below the line of the forest is held by the Honokaa Sugar Company, and mostly under the cultivation of sugar cane, exclusive of kuleanas, of which there are a great number. The sugar land contains between 700 and 800 acres, and is worth \$10 to \$20 per acre. In the woods is a good spring of water, which, in dry weather, is invaluable. Area, 5,186 acres.

Waimanu.—A deep valley and almost inaccessible. The land in the valley is very rich and is suitable for rice and taro, and well watered. The landing is very poor and oftentimes dangerous. Without a good road connecting it with Waipio, which at present is only a trail, the land would have but little attraction for settlers. There are quite a number of inhabitants living in the valley. This land contains about 5,000 acres, all but 50 of which is principally grazing and mountain tract.

KOHALA DISTRICT.

Pololu.—This valley is on the southern side of North Kohala and has a fair landing in most weathers. The whole of the valley is principally used for rice culture. Much of the water formerly running into the Pololu stream has been diverted and taken to the adjoining land of Makanakahi. There are not many people residing on this land. Area, 1,343 acres, mostly rugged and precipitous.

Kaauhuhu.—This is a fine tract of land running from the sea to the top of the Kohala ridge of mountains. Most of the lower section of this land, about 150 acres, is under cultivation of cane; the remaining portion is good grazing land. There are no streams on the land, but enough rainfall to insure good crops. This tract would make choice homestead lots, and contains 1,737 acres.

Kawaihae.—This large tract also extends from the sea to the top of the Kohala ridge of mountains. All of the portion lying makai of the

er government road is very dry and rocky and only fit for pastur-

Above said road, at an altitude of 1,500 feet, some good land commences which has in former years raised fine crops of Irish potatoes and corn. It is now used principally for grazing. In the upper part of the land there are a few inhabitants. A fine stream of water runs to a short distance below the government road. At the beach near the Kawaihae landing there is quite a large village, where most of the inhabitants are. This land has a good fishery. Area, about 13,000 acres.

Waimea.—The ahupuaa of Waimea comprises all that tract of land extending from Kawaihae to the Hamakua boundary and running from the sea to the top of the Kohala Mountains, containing an area of about 10,000 acres. On it is situated the village of Waimea, distant 12 miles from Kawaihae, the nearest landing. The government road from Kawaihae to Hamakua passes through Waimea. From a short distance above the road to the sea the land is very rocky and only fit for passage, while the rest of the land is very fertile and will produce almost all tropical fruits. There are two running streams on it. In and around the village the land is cut up by a number of kuleanas, which are mostly occupied. In the vicinity of the government road, which crosses the land at an altitude of 2,600 feet, including the slopes back of the village, may be found some of the best lands for agricultural purposes and could support a very large population. A section of land on Puukapu adjoining the village, comprising 1,000 acres, and lately laid out into homestead lots, has all been eagerly sought and readily taken up by native Hawaiians.

Mulincai.—Ili of Waipio. This tract, excepting about 40 acres in the valley, is principally mountain and woodland and is inaccessible. The area is approximately 5,000 acres.

Koohia and Pohakumaululu.—Two small pieces in Waipio Valley containing, respectively, 12 and 26 acres. Most of these tracts are under the cultivation of rice and taro.

ISLAND OF MAUI.

LAHAINA DISTRICT.

Mala.—Otherwise known as Wabikuli. This tract is on the outskirts of the town of Lahaina, in the direction of Kaanapali, and is mostly dry and barren land. A small section makai is available for use. On it is a very large cocoanut grove. The upper portion is ill suitable for grazing. Area, 2,807 acres.

Alamihī.—This and the following 9 lands named in the schedule of town lands in the district of Lahaina are small pieces and distributed throughout Lahaina, most of which are under cultivation of cane by the Pioneer Mill. The Mokuhinia fish pond, near the Wainee Church, and the pond known as Alamihī are included in this category.

Kauarua.—This land was given in exchange for a tract in the district of Puna, Hawaii, known as Kehena.

Olowalu.—A large tract in Olowalu, distant about 6 miles from Lahaina, where the Olowalu Sugar Company has its plantation. Nearly all of the lowlands are under the cultivation of cane, about 300 acres. Most of the land is very rocky and precipitous, the mountains rising abruptly, and, in places, quite near the sea. The plantation has

a good landing. The road from Lahaina to Wailuku crosses the land near the sea. Area is approximately 6,000 acres.

Ukumehame.—This large tract of 11,040 acres adjoins Olowalu, and comprises all that point of land lying at the most southern part of West Maui, leading into Maalaea Bay. The coast line extends for a distance of about 12 miles to Kapoli Spring, on the boundary between Ukumehame and Waikapu, near the Maalaea landing. Excepting a small portion in the valley adjoining Olowalu, the land is extremely rocky and very much cut up by deep gulches and ravines. The road from Lahaina to Waikapu crosses this land at Pohakuloa at an elevation of 1,185 feet. A trail also follows the coast to Maalaea landing.

KULA DISTRICT.

Keokea and Waiohuli.—These two tracts comprise some of the choicest land in this district, and of the crown lands are the most valuable on the island of Maui. They lie adjacent and extend from the sea, at the Kalepolepo landing, to the Kahikinui boundary, at a point called Kalepeamoa, distant 13 miles. The elevation here is about 9,000 feet. The upper government road through Kula crosses the lands at an altitude of about 3,000 feet. Above this lies a stretch of fine corn and potato land, and all below it is excellent grazing. The area of agricultural land is estimated between 2,500 and 3,000 acres, worth \$25 an acre. A good road also crosses the lands near the sea which connects with the Maalaea landing, distant 4 miles, and Makena, 10 miles. Kalepolepo landing, once a calling place of whale ships for supplies, is on the boundary line of Waiohuli and adjoining land. Keokea comprises an area of 5,332 acres, and Waiohuli 10,734.

Kealahou.—A small tract of 217 acres in Kula, adjoining the government land of Waiakoa. A large portion of this, above the road, is good arable land. Elevation, about 3,060 feet.

DISTRICT OF HANA.

Waiohonu.—A valuable tract near the Reciprocity Sugar Company's mill at Mokae. About 125 acres of it is good cane land, the rest suitable for grazing. Has a good landing at Pohakuloa, 1 mile from the company's landing. Area, 310 acres.

Wailua.—A narrow strip of land situate about 3 miles from Waiohonu, near the land of Muolea; only valuable for its water, which supplies a portion of the Reciprocity Sugar Company's lands. It is very narrow at the sea, being not more than 250 feet in width. Total area, about 300 acres.

KOOLAU DISTRICT.

Wailua 1 and 2—Keanae and Honomanu.—These three lands adjoin each other and extend along the coast from Makoloaka Point where Wailua joins the government land of Waiohue on the east, to a ravine called Napuamahoenui at the extreme westerly end of Honomanu, a distance of about 6½ miles. These tracts are mostly mountain and wood land and full of deep and precipitous gulches. At Keanae there is quite a stretch of low table-land, where considerable taro is cultivated and where most of the natives reside; has a very good landing. In the Wailua Valley all of the lower portion is rice land, about

acres. On these lands there is at all times a great abundance of water. The land of Honomanu is valuable for its water, from which a large section of the Hawaiian Commercial and Sugar Company's land is supplied. Wailua contains about 3,000 acres; Keanae, 11,148; and Honomanu, 3,260.

WAILUKU DISTRICT.

Polipoli.—A small tract in Waiehu of about 70 acres. A large portion is good cane land now under cultivation by the Waihee Mill Company. There is very little waste land.

KAANAPALI DISTRICT.

Kahakuloa.—A large ahupuaa near the most northern point of west Maui, extending from Waihee to Honokahau. It is very wide at the sea, about 8 miles, and runs to a point at the top of the mountain called Eke; altitude 4,500 feet. There are several small streams on the land which give an abundance of water. A good deal of the land is not of much value, being rocky and barren. Portions, however, especially in the valleys, are extremely fertile and would produce a large variety of tropical fruits. The section nearest Waihee is suitable for cane. Total area, 10,523 acres.

Napili.—A small tract of about 300 acres in Kaanapali, near Honokahau, about 9 miles from the town of Lahaina. Mostly dry grazing land and very rocky above.

Honokawai.—This tract of land is situated on the boundary line between the Kaanapali and Lahaina districts and compares favorably with any of the lands in this locality. Some of the lower sections are suitable for cane, but the remainder of the land is mostly dry grazing. In the valley there is quite an area of good taro land. The government road to Kaanapali crosses the land near the sea. Total acreage is about 4,000 acres.

ISLAND OF MOLOKAI.

Ualapue.—This tract is situated on the southwesterly side of the island, within 3 miles of the landing at Pukoo, and extends from the sea to Wailua Valley, distant about $3\frac{1}{2}$ miles. The land of Kaluaha forms the boundary on the east, and Kahananui on the west. Below the government road, which crosses the land a short distance from the sea, there is a lot of good taro land and a large fish pond which is very valuable. All of the upper part of the land is mostly used for grazing. Area, 709 acres.

Kalamaula.—This ahupuaa runs parallel with the land of Kaunakakai (Bishop estate), and comprises all that portion between Kaunakakai and the land called Kabanui, containing an area of 6,747 acres. The whole of this land is only adapted for grazing. There are no running streams on the land, but near the upper boundary are found some valuable springs of water. At the beach is a very large coconut grove planted by Mr. R. W. Meyer during the reign of Kamehameha V. During certain seasons of the year large quantities of potatoes might be produced. At the sea are two large fish ponds.

Palaau.—One of the largest lands on Molokai, in 3 sections and comprising a total area of 11,258 acres. It is situated about 3 miles west of Kaunakakai and extends from a point on the seacoast called

Moomomi, 6½ miles in an easterly direction. Near the beach the land is extremely dry and rocky, but the largest portion is very good. It makes excellent grazing land. There are no streams on the land. Its highest point the elevation is only 748 feet.

Kapaakea.—This land forms the eastern boundary of Kaunakakai with the government land of Kaimiloa to the southeast. It is very long and narrow, being only a little more than one-half mile wide at the sea, where the government road crosses the land. Mostly grazing land. There is a large fish pond at the coast. Area, 2,078 acres.

ISLAND OF LANAI.

Kamoku.—The ahupuaa of Kamoku on this island is a large and valuable tract extending from the sea to the top of the mountain ridge where a good supply of drinking water from a spring is obtained very far from the Gibson homestead. The government road crosses the land a short distance below the homestead. From this point it commences a beautiful stretch of country extending for miles around. The soil is very rich and is capable of producing large crops of corn and potatoes. Has a very good landing. Area, 8,291 acres.

Puomai.—This tract is situated south of Kamoku and stretches right across the island of Lanai from sea to sea. It is very narrow, in places not more than 2,000 feet wide. The landing of Awalua is on this land. Area, 9,078 acres.

ISLAND OF OAHU.

KONA DISTRICT.

Kahauiki.—A tract of 1,344 acres lying between the government land of Kaluaopalea at Kalihi and Moanalua. It extends from the sea a little over half a mile wide, to a point on the slopes of the Koolau Mountains, distant 4 miles. In the vicinity of the government road, which crosses the land near the lower end, the soil is very rich and productive. On this portion is an artesian well which furnishes a good flow of water for the rice and banana fields. The rest of the land is mostly used for grazing. A section of about 150 acres would make desirable homestead lots, worth from \$100 to \$300 an acre. This land has a good fish pond called Weli.

Luakaha.—This valuable tract comprises all of the upper portion of Nuuanu Valley, extending from a point near J. H. Wood's premises on the Nuuanu road to the top of the mountain ridges on both sides of the valley, and thence running to the top of the Koolau Mountains, from Konahuanuia, at Manoa, to a point near Lanihuli, overlooking Kanohe. This land is valuable for the water, which is the main source of the city's supply, and where the government has extensive reservoirs and waterworks. A very large portion of this land is well adapted for homestead lots. Area, 2,220 acres.

Auwaiolimu.—This tract, containing about 500 acres, takes in all of the western portion of Punchbowl Hill, situated directly back of and overlooking the city, the division line being near the old flagstaff. On the lower slopes, bordering on Kinau and Punchbowl streets, are valuable building lots, mostly built upon and occupied by Portuguese and native families. There are also some valuable lots in town, with fish ponds and salt works at Kakaako, near the sea. The remainder of the land, about 400 acres, embraces a large portion of the barren hillsides of Punchbowl.

Pukele and Waiomao.—These two lands are situated in Palolo Valley, about $3\frac{1}{4}$ miles from the tram-car terminus at Punahou. Waiomao contains 748 acres, and Pukele 198, in two sections. A large portion of these lands are on the hillsides, and mostly woodland, the rest is grazing land. Sections, however, are suitable for the cultivation of oranges, limes, etc., and would make very desirable homesteads. Water supply sufficient for all necessary purposes.

Kameloa.—An ili of Waikiki, and comprises all of the land known as the Kapiolani Park premises, containing 171 acres. It extends from the causeway near Mr. Cunha's residence to and including Mr. G. Irwin's at the sea, and running up to Nolte's at the mauka or upper end of the land. The portion across the stream and adjoining on the town side—about 10 acres—is good rice land. This land has good and valuable sea fishery. The lots at the seaside are very valuable, and on nearly all are handsome and beautiful residences.

Kaliouou.—A long, narrow strip extending from the sea at the boundary line of Maunaloa and running to the top of the mountain range overlooking Waimanalo. The land where the government road crosses it is only 1,500 feet wide, and does not exceed 2,000 feet at its widest point. This land is mostly adapted for grazing purposes. Five hundred and eighteen acres.

DISTRICT KOOLAUPOKO.

Waimanalo.—This Ahupuaa comprises all that valuable tract of land lying between the Kailua ridge of hills and Makapuu, the most easterly point on the island of Oahu. It is $6\frac{1}{4}$ miles in extent at the seashore, and runs up to the top of the mountain ridge at a point called Lanipo. There are about 1,200 acres of cane land under cultivation by the Waimanalo Sugar Company, the rest of the land being only suitable for grazing purposes. Has a very good landing, distant about 2 miles from the plantation. The government road which crosses the land and connects with the landing and joins the road leading around Makapuu point to the leeward side of the island. Approximate area, 5,500 acres.

Kairailoa.—An Ili of Kailua in two sections, containing 525 acres of fine land, which is now mostly used for grazing purposes. The soil is very rich and can produce large crops of corn, potatoes, taro, etc. Has an abundance of water at all times of the year from springs. There are about 10 acres under the cultivation of rice, besides a large number of taro patches. This land is quite valuable, being worth from \$10 to \$20 an acre. Would make excellent homesteads. The government road crosses the middle of the land. At the sea is a section of about 68 acres, mostly grazing. A small island called Popoia belongs to this land, about $3\frac{1}{4}$ acres in extent. Has a good sea fishery.

Kaahala.—This tract is in Kaneohe, near the Heeia boundary line. The government road passes a little below it. A section of about 100 acres is suitable for cane and is now under cultivation by the Heeia Agricultural Company. The rest of the land is only suitable for grazing. Area, 379 acres.

Makanae and Hohekeke.—These two tracts are intimately connected and are for the most part pasture lands. They are in six sections and contain a total area of 1,261 acres. At the sea, where the road crosses the lands, and in its immediate vicinity, there are about 30 acres of

rice land, in several small sections. Above this, and extending near to the foot of the hills, a section of, say, 200 acres might be made available for homesteads. There are two running streams on the hills which furnish all the water needed.

KOOLAULOA DISTRICT.

Hauula.—This tract adjoins Makawao, and extends from the top of the mountain ridge, where the land of Punaluu joins it. It is about a mile wide at the sea, where the government road crosses the land. From this point to the foot of the hills may be found excellent grazing land. The soil is very rich, with an abundant supply of water from the streams, which are running nearly through the whole year. Area, 1,576 acres.

Waialea.—A small tract of 733 acres, principally grazing land. Extends from the sea, where the land is about three-fourths of a mile wide, to a narrow point halfway up the mountain ridge. From the Kahuku Plantation it is distant about $3\frac{1}{4}$ miles, in an easterly direction. In the vicinity of the government road is a large fish pond and a number of taro patches, fed from springs. Above the road, to the foot of the hills, the land is only suitable for grazing.

Paumalu and Pūpūkea.—These two lands lie adjacent to one another and comprise a total area of 4,363 acres. They extend from the top of Kaunahu on the Kahuku side to the Waimea River, a distance of about 4 miles, thence to the top of the dividing ridge of hills between these lands and Waimea on the Waialua side. There are no running streams on these lands, and during the summer months the land is very dry. Portions of these lands are somewhat rocky, but the whole is very little waste land, the whole being available for grazing.

DISTRICT OF WAIANAE.

Waianae.—This large and valuable tract of land is in two sections and extends from the seashore at Waianae to the top of the Koolau ridge of mountains overlooking Kahana and Waikane in the Koolau district.

Waianae-kai, area 6,143 acres, comprises all that portion extending from the top of the Kaala ridge of mountains to the sea. Considerable of the lower part of this land is good cane land, and now under cultivation by the Waianae Sugar Company. Above in the valleys a large portion is suitable for coffee. Oranges, limes, and other tropical fruits will do well. The Waianae stream runs through the land, and furnishes generally sufficient water for all purposes. A good road crosses the land near the coast, and connects it with the railroad terminus at Ewa Plantation, distant about 12 miles. The landing is good where the Inter-Island Company's steamers call regularly once or sometimes twice a week.

Waianae-uka extends from the top of the Kaala ridge, overlooking Waianae, to the top of the Koolau ridge, a distance of about 15 miles. This section is at present used entirely for grazing purposes. Both branches of the Kaukanohua streams form a junction near the boundary of this land, which give an abundant supply of water for all necessary purposes. The Waieli stream on the Honouliuli boundary is also another source of water supply for that portion of the land. Around

foothills and in the hollows a large section of this land might be available for coffee. The land at its highest point is 4,050 feet above the top of the Kaala ridge, receding to an elevation of about 900 feet where the Government road to Waialua crosses the land near the Ewa side, and then it rises again gradually to the top of the Koolau ridge, a distance of 10 miles, to an altitude of 2,360 feet. The total area of Waianae-uka is 14,678 acres.

Ewa.—A valuable tract of 2,431 acres, lying between the lands of Ewa and Makaha, about 2 miles beyond Waianae-kai. It is about 2 miles wide at the sea, and runs to a point inland distant 3 miles from the coast. The soil is very rich, and in the upper portion excellent coffee land may be found. A small section of the land is at present under cultivation of coffee and a variety of tropical fruit trees.

Lualualei.—This tract is one of the best and most valuable of the Ewa lands on the island of Oahu. Without exception it surpasses all the other lands for richness and great fertility of soil. The lower portion, about 500 acres, is under cultivation of cane by the Waianae Sugar Company, where the yield is said to be enormous. Most of the company's planting interests are now centered here. Several hundred more acres might be made available for cane. The remaining portion of the land would grow almost anything. For breeding purposes this land excels any other, as it is known to be the best fattening land on the island. This land adjoins Waianae on the Ewa side, and extends along the shore for a distance of $5\frac{1}{2}$ miles, thence to the top of the ridge of the Waianae Mountains, distant about 7 miles from the sea. It contains an area of 14,772 acres.

Nanakuli.—This tract is also situate in Waianae, and runs parallel with Lualualei on the boundary line between the Ewa and Waianae districts. The coast line is about $1\frac{1}{2}$ miles long. Most of this land is at present only available for grazing. The road to Waianae crosses the land at the seashore. The land is somewhat low, but rises abruptly as it reaches the foothills to an elevation of about 3,000 feet. Area 431 acres.

DISTRICT OF EWA.

Ohua Waikakalaua.—This tract is an ili of Waikale, situate between Waianae-uka and Waipio on the road to Waialua, distant about 6 miles from the junction of the Waianae and Waialua roads near the Ewa Church. It is mostly grazing land. Elevation about 800 feet. Total area, 490 acres.

Pouhala.—In two sections. The upper section, containing 810 acres, adjoins Ohua Waikakalaua near the government road to Waialua, distant 5 miles from the Ewa stream. The whole of it is only suitable for grazing purposes. Lower Pouhala is situated near the sea at Pearl River, and adjoins the Hawaiian Fruit and Packing Company's lands at Apokaa. It is a long, narrow strip running from the government road to the shore, and includes a valuable fish pond and some taro land. The railroad crosses the land near the sea. The fish pond contains 29 acres, including the taro land, and the kula portion 43 acres. Would make desirable homestead lots.

Weloka.—A valuable fish pond at Manana, lying on the mauka side of the Oahu R. and L. Company's property on the peninsular with 5 acres of land on the said peninsular adjoining the old Ford homestead. The fish pond covers an area of 21 acres.

Honokawailani and Kauhihau.—These are two small ilis in Waiākea near Aki's rice mill at Ewa. They are in five sections, partly in Ewa but principally kula land. Contains a total area of about 11 acres.

Aiea.—A long narrow strip of 1,185 acres, lying between the shore of Halawa and Kalanauo in Ewa. It extends from the shore of East Loch at Pearl River to a point called Uau on the uplands, at an elevation of 1,700 feet, a distance of $4\frac{1}{2}$ miles. About half a mile from the shore the government road to Ewa crosses the land. All of the portion of this land is under cultivation of rice and taro, a great portion consisting of kuleanas. From the road, and running up as far as the land extends, good grazing is found. At an elevation of say 1,000 feet sections might be made available for coffee and various tropical crops.

NOTE.—The lands not found in the above descriptions are partly omitted, they being small sections of 2, 3, or 4 acres and located in different parts of the Kona district on Oahu. They are principally taro, banana, or rice lands.

ISLAND OF KAUAI.

Hanalei.—Hanalei was once a flourishing little settlement during the prosperous year of the Princeville Plantation Company, but since the cane lands in the valley have been mostly converted into rice fields. The land of Hanalei in the district of Halelea comprises an area of 16,400 acres, a large portion of which is woodland and about 1,000 acres cane land. Above in the valley, where a number of the old families are residing, are extensive taro lands. Oranges and other tropical products grow well here. Quite a large portion might be made available for homesteads. The Hanalei River is the largest on the island. The weather is moist, but healthy. Has a good landing and a fine harbor where large vessels can safely anchor. This land has extensive and valuable fisheries.

Anahola.—This land is situated in the district of Koolau, and comprises an area of 6,237 acres. Nearly all the land in the valley is good rice land, mostly on kuleanas. The Anahola stream furnishes an abundant supply of water. A considerable portion above the valley, about 500 acres, is under cultivation of cane by the Makee Sugar Company, the remainder being good pasture and wood land. The roads connect it with the plantation.

Kapaa.—This valuable tract extends from the sea to the mountain a distance of about 7 miles, and contains, by boundary certificate No. 5, an area of 7,237 acres. It has between 1,200 and 1,500 acres of cane land besides a large area of good rice land, which at present is not utilized. A large portion of this land in the valley would make comfortable homesteads. There is sufficient water in the streams for all purposes. Toward the foothills as far as the land extends is for excellent grazing. The government road crosses the land near the coast for a distance of about 2 miles. Has a good landing.

Wailua.—The Wailua lands in the district of Puna comprise an area of 20,255 acres in two sections—Wailua-kia and Wailua-uka. Wailua-uka is very fertile, containing several hundred acres of good cane land besides an immense forest land, a large portion of which might be made available for coffee. Taro is now grown in some portions of the valley, and for a long distance on either side may be seen indications of extensive taro cultivation in past years. This land is well watered, and could support a large population. Waiehu Falls, a

t the head of the valley and which is also the source of the la River, irrigates about 600 acres of the Lihu and Hanamaulu

Wailua-uka has 17,455 acres. Wailua-kai, 2,800 acres, con- or the most part of pasture land. A large portion of the rice und here is mostly on kuleanas. There is about 75 acres of n the lower part of the land.

aleo.—This tract is situated in the district of Kona, and contains a of 4,045 acres. This is principally pasture land. A large sec- bove, in the woods, might be made available for coffee or for the ation of oranges and other tropical fruits. The celebrated fish pf Nomilu is on Kalaheo, and is very valuable.

imea.—A very large and valuable tract containing by boundary cate No. 28, 92,462 acres. Below the bluffs, from Waimea Val- Mana, lies a stretch of rich land, mostly under the cultivation of say 1,500 acres. Above this is a large amount of waste land. is very little water to be found from here to the Waimea settle- , a distance of 15 miles. The valley is considerably cut up by nas, now mostly in rice, a few acres of which are on the crown

The water from the Waimea River is at present not much used, he probabilities are that before many years this immense body of r now running to waste will be in demand for irrigation purposes, from which a very large revenue will be derived. Under the exist- lease, which expires 1917, two-thirds of the proceeds from the r belong to the lessors.

anapepe.—A valuable tract in the Kona district adjoining the aian Sugar Company's lands at Makaweli. The land at Hanapepe prises about 600 acres of cane land and also a large area of good land. All of the upper portion of the land is suitable for grazing, e being no woodland. The water used for irrigating the Sugar npany's extensive cane fields on Makaweli is obtained from a branch he Hanapepe River. The Ahupuaa of Hanapepe contains approxi- ely 8,000 acres, nearly all of which being rich and very fertile.

LE A.—Leases issued by the crown land commissioners on thirty years' term, at the ana settlement, Puna, Hawaii (Section B), under special conditions of improvement.

EXHIBIT 5.

This indenture made this _____ day of _____ 189— by and between the commissioners of crown lands, of the Hawaiian Islands, lessors, and _____ of _____ island of _____ lessee—, witnesseth:

That the lessors do hereby demise and lease unto the lessee— all th— ce— piece— or parcel— of land situate at _____ district of _____, island of _____, lot No. _____, section _____, containing _____ acres, as per survey of the said land on file in the office of the lessors in Honolulu, dated _____.

To have and to hold the said demised premises with the appurtenances unto said lessee— and _____ executors, administrators, and assigns for the term of _____ years, beginning with the _____ day of _____, A. D. 189—.

Yielding and paying therefor rent as follows: For the first three years of the term hereof no rent shall be paid, and thereafter, commencing with the fourth year of term hereof, the rent shall be at the rate of \$_____ per annum, payable semiannually in advance.

And the lessors for themselves and their successors in office do hereby covenant with the said lessee— and _____ representatives and assigns that so long as lessee— or those claiming under _____ shall well and truly do and observe all the covenants and agreements herein agreed to be kept or performed by the lessee— and _____ representatives or assigns the lessee— and _____ representatives shall during the term of this lease peaceably hold and enjoy the said demised premises.

And the lessee—, for _____ and _____ respective executors, administrators, assigns, do hereby jointly and severally covenant and agree with the lessors and their successors in office as follows, viz:

1. That the lessee—, or _____ executors, administrators, or assigns, will pay the rent hereinbefore reserved in manner therein stated; and also all taxes and assessments which during the term of this lease may be levied upon the demised premises, without making any charge therefor to the lessors.

2. That they will not assign this lease or the premises hereby demised, or sell the whole or any part thereof, or sell or assign any improvement in part or in whole which may be during the term of this lease placed upon the demised premises, without the consent in writing of the lessors.

3. That they will not suffer or make any strip or waste or any unlawful or offensive use of the demised premises or the improvements that may be placed thereon. The clearing of land, other than that hereinbelow prohibited, for purposes of cultivation shall not be deemed waste.

4. That they will within one year from the date of this lease clear and plant not less than 2 per cent of said land; within two years from such date, clear and plant not less than 3 per cent of said land; and within three years of such date, clear and plant not less than 5 per cent of said land, with coffee or fruit trees, and during such time and thereafter during the term of this lease, will properly, and in good and husbandlike manner, care for and cultivate the same.

5. That within three years from date hereof they will erect buildings and fence

a said leased premises of the value of not less than —— dollars, and during the term of this lease maintain them in good repair.

That they will not cut any trees or destroy any shrub or natural undergrowth on the said premises within 250 feet of the government Volcano road, except such as may be necessary to cut to make a roadway from the said government road to rear of said premises; and that they will not cut any trees upon any other portion of said premises, except for building or fencing purposes to be used only on the leased premises, and except clearings as may be made for purposes of cultivation.

That they will allow the lessors, or those representing them, at all reasonable times to enter and examine the demised premises and see whether or not the covenants and conditions of this lease have been and are properly carried out, and will at the end of the term herein mentioned, or other sooner termination thereof, peacefully and quietly surrender the leased premises and all improvements thereon to the lessors or their successors.

It is provided, however, and these presents are upon this express condition, that if the lessors, or those claiming under ——, shall at any time fail to do or observe any of the covenants herein contained, the lessors or their successors may then or at any time thereafter enter upon and take possession of the leased premises and cancel this lease without any process or law and remove the lessee, and those claiming under —— and their effects from the demised premises, and any such action on the part of the lessors or their successors shall absolutely terminate this lease and all right of the lessee — and those claiming under —— in and to the demised premises, whether in law or equity, and re-vest the said demised premises in the lessors or their successors as of their estate prior to the execution of these presents.

And the lessors shall not, by reason of any such action as hereinabove set forth, be deemed to have waived any right of action against the lessee — or those claiming under —— for any breach of any covenant herein contained or otherwise.

In witness whereof the said parties have hereunto and to another instrument of the same date and even tenor set their hands and seals the day and year first above written.

Exhibits filed by Samuel Parker and his associates in the matter of the ditch controversy.]

EXHIBIT 1.

[1st draft.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas two applications for a license to build a ditch in Kohala, now pending before the government of the Territory of Hawaii, in the names of J. W. Jones, trustee, and Samuel Parker, respectively;

Whereas it has been agreed between said Samuel Parker and J. W. Jones, trustee, and those interested with them, respectively, to consolidate their interests:

Now, therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit: J. W. Jones, trustee, and those interested with him shall have fifty-one (51) per cent the promotion stock, and shall furnish all necessary plans, surveys, and preliminary work to put the plan in proper shape necessary for presentation to capitalists, and shall have the option of raising a portion of the capital required.

Samuel Parker and those interested with him shall furnish the option of Elizabeth F. Booth and Charles W. Booth, to be accepted and paid for by the corporation when formed, and all rights in lands or leases owned or controlled by said Samuel Parker which shall be necessary to the prosecution of the work contemplated, receiving therefor forty-nine (49) per cent of the promotion stock.

The majority stock thus owned by J. W. Jones, trustee, and those interested with him, shall carry the control of the expenditure of all further moneys necessary to promotion work up to the point where the final capital is to be secured.

Upon the terms and arrangements as to the proportion of promotion stock in the final capitalization, a two-thirds ($\frac{2}{3}$) vote of the promoters shall be necessary.

EXHIBIT 2.

[2nd draft.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas two applications for a license to build a ditch in Koloa and Hamakua, each now pending before the government of the Territory of Hawaii, in the names of Samuel Parker and J. W. Jones, trustee, respectively; and

Whereas it has been agreed between said Samuel Parker and J. W. Jones, trustee, and those interested with them, respectively, to consolidate their interests,

Now, therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit: J. W. Jones, trustee, and those interested with him shall have fifty-one (51) per cent full paid of the promotion stock and shall have control of the furnishing of all necessary plans, surveys, and preliminary and final work and the employment of all persons and employees to put the plan in proper shape and promote the same, necessary for the presentation to capitalists; and all expenses incurred therein shall be charged against (the interests of both parties hereto and against) the corporation first formed hereunder, and said J. W. Jones, trustee, and those interested with him shall have the option of raising fifty-five (55) per cent of the capital required and of placing 55 per cent of the number of shares in bonds, or both, therein.

Samuel Parker and those interested with him shall assign over the option of Elizabeth K. Booth and Charles W. Booth, if requested to do by the corporation hereafter to be formed, and upon such request and assignment said corporation shall accept the same and pay therefor. Also said Samuel Parker shall convey to said corporation all right in lands or leases owned or controlled by said Samuel Parker which said corporation shall deem to be necessary to the prosecution of the work as contemplated, receiving therefor forty-nine (49) per cent full paid of the promotion stock.

The majority of the promotion stock thus owned by J. W. Jones, trustee, and those interested with him, shall carry the control of the expenditure of all further moneys and the making and execution

ligations to procure the same when necessary to the promotion work, to the point where the final capital is to be secured. As to the proportion or percentage of the entire stock of the company which shall be given to the persons who finance the undertaking and the terms and conditions upon which the same shall be allowed, all take a two-thirds vote of the promoters, stock to be binding.

EXHIBIT 3.

[3d draft. K. B. & McC.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas two applications for a license to build a water ditch in the northern portion of the island of Hawaii are now pending before the government of the Territory of Hawaii in the names of Samuel Parker and J. W. Jones, respectively; and

Whereas it has been agreed between said Samuel Parker and his associates and J. W. Jones, trustee, and his associates to consolidate their interests;

Now, therefore, it is agreed by the parties hereto that such interest shall be consolidated on the following basis, to wit:

I.

J. W. Jones, trustee, and his associates shall have fifty-one per cent (51 per cent), fully paid, of the promotion stock in any corporation to be hereafter formed, and Samuel Parker and his associates shall have forty-nine per cent (49 per cent) of said promotion stock.

II.

J. W. Jones, trustee, and his associates shall have control of the furnishing of all necessary plans, surveys, and preliminary and final work and the employment of all persons and employees to put the plan into proper shape and promote the same, necessary for the presentation to capitalists, and all expenses incurred therein from the date thereof shall be charged against the corporation finally formed.

Provided, however, that in the event of the capitalists objecting to such charge and the promoters by a two-thirds vote deeming it inadvisable to insist, then such expenses shall be charged, in the form of stock, against the promoters interested in such corporation. Such expenses shall be advanced in the first instance by J. W. Jones and his associates, and in no event shall it be charged as a cash liability against Samuel and his associates.

III.

J. W. Jones, trustee, and his associates, shall have the option of raising fifty-five per cent (55 per cent) of the capital required and of placing fifty-five per cent of the number of shares or bonds, or both, in the corporation finally formed.

IV.

In the event of any easements, licenses, or rights being purchased of Elizabeth K. Booth or Charles W. Booth or acquired from said Elizabeth K. Booth or Charles W. Booth, other than by compulsory legal process, the option of said Elizabeth K. Booth and Charles W. Booth now held by Samuel Parker shall be accepted by the corporation finally formed and its acceptance shall be an express condition of the promoters. And Samuel Parker shall assign said option at the request of the corporation upon said corporation signifying its willingness to accept the same and pay therefor. Upon such acceptances of the Booth option said Samuel Parker shall convey to said corporation, for a nominal consideration, all rights in lands or leases owned or controlled by said Samuel Parker which shall be necessary to the prosecution of the work as contemplated.

V.

In the event that said option from Elizabeth K. Booth and Charles W. Booth shall be deemed worthless by the corporation hereafter to be formed, and no rights being secured from said Elizabeth K. Booth or Charles W. Booth otherwise than by compulsory legal process, the cost of the said Booth option shall be charged against the promotion stock of Samuel Parker and his associates, said Samuel Parker and his associates reserving the right to procure a cancellation of said option if possible at any time or to relieve themselves from liability under said option by the surrender of all or a portion of their interests in the company. Until the acceptance or cancellation of said Booth option said Samuel Parker and his associates shall not be required to do any act or thing which shall make said option or the covenant and agreement therein finally binding upon him or them.

VI.

The majority of the promotion stock thus owned by J. W. Jones, trustee, and his associates, shall carry the control of the expenditure of all further moneys and the making and execution of obligations and to procure the same when necessary and the promotion work up to the point where the final capital is to be secured. Said J. W. Jones and his associates shall create no liabilities on behalf of Samuel Parker and his associates, it being expressly understood and agreed that the parties hereto are not partners, and said J. W. Jones, trustee, and his associates will save and hold Samuel Parker and his associates harmless from all obligations not expressly agreed to in writing by those proposed to be bound, signing personally.

VII.

A two-thirds vote of the promoters' stock or interest shall be necessary for decision as to the proportion or percentage of the entire stock of the corporation finally formed which shall be given to the persons who financed the undertaking and the terms and conditions upon which the same shall be allowed. Immediately upon the issuing of the license herein contemplated said J. W. Jones, trustee, shall

ecute a declaration of trust in accordance with the terms of this agreement, which terms, however, may be expressed in a more complete and formal manner.

VIII.

The parties hereto shall use every endeavor to facilitate the granting of the license in the name of J. W. Jones, trustee, as herein contemplated, but the right is reserved on the part of Edmund B. McClanahan, one of the associates of Samuel Parker, now absent on the island of Hawaii, to rescind and abrogate this agreement at any time before the license is actually issued.

EXHIBIT 4.

[4th draft. A. G. M. R.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas two applications for a license to build water ditches and to impound and conserve water in the northern portion of the island of Hawaii are now pending before the government of the Territory of Hawaii in the names of Samuel Parker and J. W. Jones, trustee, respectively; and

Whereas it has been agreed between said Samuel Parker and his associates and J. W. Jones, trustee, and his associates to consolidate their interests;

Now, therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit:

I.

J. W. Jones, trustee, and his associates shall have fifty-one per cent (51 per cent), full paid, of the promotion stock in any corporation to be hereafter formed, and Samuel Parker and his associates shall have forty-nine per cent (49 per cent), full paid, of said promotion stock, subject, however, to the terms and conditions hereafter contained.

II.

J. W. Jones, trustee, and his associates shall have control of the furnishing of all necessary plans, surveys, and preliminary and final work and the employment of all persons and employees to put the plan into proper shape and promote the same, necessary for the presentation to capitalists, and all expenses incurred therein from the date hereof shall be charged against the entire stock of the corporation finally formed, and in no event shall the promoters be responsible for any liability except as against their stock or holding in the corporation, and which shall be paid in stock and not in cash.

III.

J. W. Jones, trustee, and his associates shall have the option of raising fifty-five per cent (55 per cent) of the capital required and of placing fifty-five per cent (55 per cent) of the number of shares of stock or bonds, or both, in the corporation finally formed.

IV.

In the event of any easements, licenses, or rights being purchased by said proposed corporation in the land of Laupahoehoe, island of Hawaii, of Elizabeth K. Booth and Charles W. Booth, or either, acquired from said Elizabeth K. Booth and Charles W. Booth, either, other than by compulsory legal process, the option of Elizabeth K. Booth and Charles W. Booth now held by Samuel Parker, a copy of which is hereto annexed and marked "A," shall be accepted by and binding upon the corporation finally formed, and for by said corporation according to the terms expressed in said option. And the said Samuel Parker hereby agrees, upon the payment to him of the sum of one dollar, and at the request of the corporation, to request of said J. W. Jones to assign to said proposed corporation to said J. W. Jones in trust therefor, said option of Elizabeth K. Booth and Charles W. Booth, which said option is dated the 8th of May, 1901. And the said Samuel Parker agrees to immediately notify said J. W. Jones, or the proposed corporation through the said J. W. Jones, of the receipt of notice from said Elizabeth K. Booth and Charles W. Booth, or either or both, of their intention to terminate said option.

V.

In the event that said option from Elizabeth K. Booth and Charles W. Booth shall be deemed worthless by the corporation hereafter to be formed, and no rights by said corporation secured from said Elizabeth K. Booth and Charles W. Booth, or either, otherwise than by compulsory legal process, the cost of said Booth option, if for any reason enforceable by Booth, shall be charged against the promotion stock of Samuel Parker and his associates, said Samuel Parker and his associates reserving the right to procure a cancellation of said option, if possible, at any time to relieve themselves from liability under said option by the surrender to J. W. Jones and his associates, or to said corporation, of all or a portion of their interests and promotion stock in said company or proposed company, said portion of the interests and promotion stock to be so surrendered to be not less than one-third ($\frac{1}{3}$) of the forty-nine per cent (49 per cent) mentioned in the first section of this agreement; it being distinctly understood and agreed, however, by the said Samuel Parker and his associates and J. W. Jones and his associates that nothing in this agreement contained in any way makes said Booth option or the cost thereof a charge upon the liability against said J. W. Jones and his associates or their interests in the proposed corporation, or upon or against the proposed corporation or corporation to be finally formed. Until the acceptance and cancellation of said Booth option said Samuel Parker and his associates shall not be required to do any act or thing which shall make said option or the covenant and agreement therein finally binding upon him or them, but nothing herein contained shall hinder or delay the formation of a corporation when, in the judgment of the persons who undertake to finance the proposed undertaking, such corporation should be formed.

VI.

The majority of the promotion stock thus owned by J. W. Jones and his associates and their interests herein shall carry the control of the expenditure of all further moneys and the making and execution of obligations to procure the same, when necessary for the promotion work in their judgment, up to the point where final capital is secured. Said J. W. Jones and his associates shall create no liabilities on behalf of Samuel Parker and his associates, except as against their stock, and agreed that the parties hereto are not partners.

VII.

A two-thirds vote of the promoters stock or interest herein shall be necessary for decision as to the proportion or percentage of the entire stock or bonds, or both, of the corporation finally formed, which shall be given to the persons who finance the proposed undertaking, and the terms and conditions upon which the same shall be allowed.

VIII.

Immediately upon the issuing of the license herein contemplated, said J. W. Jones, trustee, shall execute a declaration of trust in accordance with the terms of this agreement, which terms, however, may be expressed in a more complete and formal manner.

EXHIBIT 5.

[5th draft. K. B. & McC.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas two applications for a license to build water ditches and to impound and conserve water in the northern portion of the island of Hawaii are now pending before the government of the Territory of Hawaii in the names of Samuel Parker and J. W. Jones, trustee, respectively; and

Whereas it has been agreed between said Samuel Parker and his associates and J. W. Jones, trustee, and his associates, to consolidate their interests:

Now, therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit:

I.

J. W. Jones, trustee, and his associates shall have fifty-one per cent (51 per cent), full paid, of the promotion stock in any corporation to be hereafter formed, and Samuel Parker and his associates shall have forty-nine per cent (49 per cent), full paid, of said promotion stock, subject, however, to the terms and conditions hereafter contained.

Samuel Parker may, however, decline to enter or become interested in any corporation until the acceptance, cancellation, or termination of the Booth option hereinafter referred to; in case of which declination one-third of the 49 per cent above referred to shall be held as treasury stock by said corporation.

II.

J. W. Jones, trustee, and his associates, shall have control of the furnishing of all necessary plans, surveys, and preliminary and final work and the employment of all persons and employees to put the plan into proper shape and promote the same necessary for the presentation to capitalists, and all expenses incurred therein from the date hereof shall be charged against the entire stock of the corporation finally formed, and in no event shall the promoters be responsible for any liability except as against their stock or holding in the corporation and which shall be paid in stock and not in cash.

III.

J. W. Jones, trustee, and his associates shall have the option of raising fifty-five per cent (55 per cent) of the capital required, and of placing fifty-five per cent (55 per cent) of the number of shares of stock or bonds, or both, in the corporation finally formed.

IV.

In the event of any easements, licenses, or rights being purchased by said proposed corporation in the land of Laupahoehoe, island of Hawaii, of Elizabeth K. Booth and Charles W. Booth, or either, or acquired from said Elizabeth K. Booth and Charles W. Booth, or either, other than by compulsory legal process, the option of said Elizabeth K. Booth and Charles W. Booth now held by Samuel Parker, a copy of which is hereto annexed and marked "A," shall be accepted by and be binding upon the corporation finally formed, and paid for by said corporation according to the terms expressed in said option. And the said Samuel Parker hereby agrees, upon the payment to him of the sum of one dollar, and at the request of the corporation or the request of said J. W. Jones, to assign to said proposed corporation or to J. W. Jones in trust therefor, said option of Elizabeth K. Booth and Charles W. Booth, which said option is dated the 8th day of May, 1901. And the said Samuel Parker agrees to immediately notify said J. W. Jones, or the proposed corporation through the said J. W. Jones, of the receipt of notice from said Elizabeth K. and Charles W. Booth, or either or both, of their intention to terminate said option.

And it is further agreed that after the acceptance, cancellation, or termination of the Booth option, the said corporation, when formed, will buy of Samuel Parker, and said Samuel Parker will convey to said corporation, all rights in lands or leases owned or controlled by the said Samuel Parker which shall be necessary to the prosecution of the work as contemplated under the license as issued, the corporation paying therefor the one-third of 49 per cent of the promotion stock in the treasury as provided in Section I hereof.

V.

In the event that said option from Elizabeth K. Booth and Charles Booth shall be deemed worthless by the corporation hereafter to be formed, and no rights secured by said corporation from said Elizabeth K. Booth and Charles W. Booth, or either, otherwise than by compulsory legal process, the cost of said Booth option, if for any reason enforceable by Booth, shall be charged against the promotion stock of Samuel Parker and his associates, said Samuel Parker and his associates reserving the right to procure a cancellation of said option, if possible at any time until notified in writing by said J. W. Jones, said corporation not to procure nor consent to a cancellation of said option, and reserving the further right to relieve themselves from liability under said option by the surrender to J. W. Jones and his associates, or to said corporation, of all or a portion of their interests and promotion stock in said company or proposed company, said portion of the interests and promotion stock to be so surrendered to be not less than one-third ($\frac{1}{3}$) of the forty-nine per cent (49 per cent) mentioned in the first section of this agreement. It being distinctly understood and agreed, however, by the said Samuel Parker and his associates and J. W. Jones and his associates, that nothing in this agreement contained in any way makes said Booth option or the cost thereof a charge upon or liability against said J. W. Jones and his associates or their interests in the proposed corporation, or upon or against the proposed corporation to be finally formed, except in any one of the following events—that is to say:

(a) In case said J. W. Jones or the said corporation requests the assignment to him or it of said Booth option.

(b) In case said J. W. Jones or said corporation accepts the said Booth option or requests Samuel Parker to accept it.

(c) In case said J. W. Jones or said corporation notifies the said Samuel Parker in writing not to procure nor consent to a cancellation of said option.

In any of which events the said Booth option shall hereafter be a charge upon the corporation as a whole, or if the corporation is not then formed, upon all the promoters until the corporation is formed.

Until the acceptance or cancellation of said Booth option said Samuel Parker and his associates shall not be required to do any act or thing which shall make said option or the covenant and agreement therein contained binding upon him or them, but nothing herein contained shall hinder or delay the formation of a corporation, when in the judgment of the persons who undertake to finance the proposed undertaking, such corporation should be formed.

VI.

The majority of the promotion stock thus owned by J. W. Jones and his associates and their interests herein shall carry the control of the expenditure of all further moneys and the making and execution of obligations to procure the same when necessary for the promotion work in their judgment, up to the point where final capital is secured. Said J. W. Jones and his associates will create no liabilities on behalf of Samuel Parker and his associates except as against their stock as provided in section II hereof, it being expressly understood and agreed that the parties hereto are not partners.

VII.

A two-thirds vote of the promoters' stock or interest herein shall be necessary for the decision as to the proportion or percentage of the entire stock or bonds, or both, of the corporation finally formed, which shall be given to the persons who finance the proposed undertaking, and the terms and conditions upon which the same shall be allowed.

VIII.

Immediately upon the issuing of the license herein contemplated said J. W. Jones, trustee, shall execute a declaration of trust in accordance with the terms of this agreement, which terms, however, may be expressed in a more complete and formal manner.

EXHIBIT 6.

[6th draft, A. G. M. R.]

PRELIMINARY MEMORANDUM OF AGREEMENT.

Whereas, two applications for a license to build water ditches and to impound and conserve water in the northern portion of the island of Hawaii are now pending before the government of the Territory of Hawaii in the names of Samuel Parker and J. W. Jones, trustee, respectively; and

Whereas, it has been agreed between said Samuel Parker and his associates and J. W. Jones, trustee, and his associates, to consolidate their interests;

Now, therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit:

I.

J. W. Jones, trustee, and his associates, shall have fifty-one per cent (51 per cent), full paid, of the promotion stock in any corporation hereafter formed, and Samuel Parker and his associates shall have forty-nine (49 per cent), full paid, of said promotion stock, subject, however, to the terms and conditions hereinafter contained. Samuel Parker may, however, decline to enter or become interested in any corporation until the acceptance, cancellation, or termination of the Booth option, hereinafter referred to; in case of which declination one-third of the forty-nine per cent (49 per cent) of the promotion stock above referred to shall remain unissued, to be disposed of in accordance with the last paragraph of section IV hereof.

II.

J. W. Jones, trustee, and his associates, shall have control of the furnishing of all necessary plans, surveys, and preliminary and final work, and the employment of all persons and employees to put the plan into proper shape, and promote the same necessary for the pres-

tion to capitalists, and all expenses incurred therein from the date of shall be charged against the entire stock of the corporation finally formed; and in no event shall the promoters be responsible for any liability except as against their stock or holding in the corporation, which shall be paid in stock and not in cash.

III.

J. W. Jones, trustee, and his associates shall have the option of raising fifty-five per cent (55 per cent) of the capital required and of raising fifty-five per cent (55 per cent) of the number of shares of the stock or bonds, or both, in the corporation finally formed.

IV.

In the event of any easements, licenses, or rights being purchased by said proposed corporation in the land of Laupahoehoe, island of Hawaii, of Elizabeth K. Booth and Charles W. Booth, or either, or acquired from said Elizabeth K. Booth and Charles W. Booth, or either, other than by compulsory legal process, either directly or through the Territory of Hawaii or the Government of the United States, in compromise of such compulsory legal process, the option of said Elizabeth K. Booth and Charles W. Booth now held by Samuel Parker, dated May 8, 1901, a copy of which is hereto annexed and marked "A," shall, if then in force, be accepted by and be binding upon the corporation finally formed, and paid for by said corporation according to the terms expressed in said option. And the said Samuel Parker hereby agrees, upon the payment to him of the sum of one dollar, and at the request of the corporation or request of said J. W. Jones, to assign to said proposed corporation, or to J. W. Jones in trust therefor, said option of Elizabeth K. Booth and Charles W. Booth heretofore referred to.

And it is further agreed that after the acceptance, cancellation, or termination of the Booth option the said corporation, when formed, upon demand of Samuel Parker, made before delivery of water to customers within the terms of the license, will buy of Samuel Parker, and the said Samuel Parker will convey to said corporation, all rights in lands or leases owned or controlled by or wherein the said Samuel Parker is interested which shall be necessary to the prosecution of the work as contemplated under the license, the corporation paying therefor the one-third (1/3) of forty-nine per cent (49 per cent) of the promotion stock specified in Section I hereof.

V.

In the event that said option from Elizabeth K. Booth and Charles W. Booth shall be deemed worthless by the corporation hereafter to be formed, and no rights are secured by said corporation from said Elizabeth K. Booth and Charles W. Booth, or either, otherwise than by compulsory legal process, the cost of said Booth option, if for any reason enforceable by Booth, shall be charged against the interests and promotion stock of Samuel Parker and his associates herein. And the said Samuel Parker agrees to immediately notify said J. W. Jones, or the proposed corporation through the said J. W. Jones, of the

receipt of notice from said Elizabeth K. Booth and Charles W. Booth or either or both, of their intention to terminate said option, or of a understanding or agreement he may have with them with reference to the termination thereof, said Samuel Parker and his associates reserving, nevertheless, the right to procure a cancellation of said option possible at any time until notified in writing by said J. W. Jones or said corporation not to procure nor consent to a cancellation of said option, and reserving the further right to relieve themselves from liability under said option by the transfer and surrender to J. W. Jones and his associates of all or a portion of their interests and promotion stock in said company or proposed company or corporate said portion of the interests and promotion stock to be so surrendered and transferred to be not less than one-third ($\frac{1}{3}$) of the forty-nine per cent (49 per cent) mentioned in the first section of this agreement. It being distinctly understood and agreed, however, by the said Samuel Parker and his associates and J. W. Jones and his associates that nothing in this agreement contained shall in any way make said Booth option or the cost thereof a charge upon or liability against said J. W. Jones and his associates or their interests in the proposed corporation or upon or against the proposed corporation to be finally formed, except in any one of the following events, marked (a), (b), and (c)—that is to say:

(a) In case said J. W. Jones or the said corporation in writing requests the assignment to him or it of said Booth option.

(b) In case said J. W. Jones or the said corporation in writing accepts the said Booth option or requests Samuel Parker to accept it.

(c) In case said J. W. Jones or said corporation notifies the said Samuel Parker in writing not to procure nor consent to a cancellation of said option.

In any of which events the said Booth option shall thereafter be a charge upon the corporation as a whole, or, if the corporation is not then formed, upon the interests of all the promoters in the corporation.

Until the acceptance or cancellation of said Booth option, said Samuel Parker and his associates shall not be required to do any act or thing which shall make said option or the covenant and agreement therein finally binding upon him or them, but nothing herein contained shall hinder or delay the formation of a corporation, when, in the judgment of the persons who undertake to finance the proposed undertaking, such corporation should be formed; and the parties hereto hereby agree to give their immediate consent to and to assist in the formation of such corporation at such times as to the persons who undertake to finance this undertaking, or who undertake to furnish fifty-five per cent (55 per cent) of the capital required therefor, seems to be proper.

VI.

The majority of the promotion stock thus owned or to be owned by J. W. Jones and his associates, and their interests herein, shall carry the control of the expenditure of all further moneys and the making and execution of obligations to procure the same, when necessary in their judgment, for the promotion work up to the point where final capital is secured. Said J. W. Jones and his associates shall create no liabilities on behalf of Samuel Parker and his associates, except as against their stock and interests herein, and any liability so created

be payable in promotion stock and not in cash, it being expressly understood and agreed that the parties hereto are not partners. The "promotion work" shall be held to mean and include any and every act or thing done or performed, or to be done or performed, or may be done or performed, in procuring and getting the license, up to the point where fifty-five per cent of the capital for the proposed undertaking is secured.

VII.

Said Samuel Parker agrees that he will not convey to any other person or persons than the promoters herein, or the corporation formed by them, any rights of way over the lands, or any rights in the lands, easements, owned or controlled by said Samuel Parker, or any lands or easements wherein said Samuel Parker is interested, which may, in the judgment of the persons interested herein and hereunder or the corporation formed by them, be necessary to the prosecution of the work contemplated herein under any license that may be issued to the persons interested herein, nor allow the use of any such rights of way, easements, or leases to any other person except those now interested in the cattle or ranch business with him, and then only for the purposes of the cattle or ranch business, and for not longer than the unexpired term of his lease or leases.

VIII.

A two-thirds vote of the promoters' stock or interest herein shall be necessary for decision as to the proportion or percentage of the entire stock or bonds, or both, of the corporation finally formed, which shall be given to the persons who finance the proposed undertaking, and the terms and conditions upon which the same shall be allowed.

Immediately upon the issuing of the license herein contemplated, said J. W. Jones, trustee, shall execute a declaration of trust in accordance with the terms of this agreement, which terms, however, may be expressed in a more complete and formal manner.

EXHIBIT 7.

COMMISSIONER OF PUBLIC LANDS,
TERRITORY OF HAWAII,
Honolulu, February 18, 1901.

MESSERS. KINNEY, BALLOU & McCLANAHAN (for Samuel Parker).

GENTLEMEN: Your favor of January 31, ultimo, stating that Mr. Parker is desirous as lessee of the government land of Puukapu, of making beneficial use of the waters now running to waste on said land, and as the undertaking is of considerable magnitude and involving a large outlay of capital, he therefore desires to obtain from the government the right of way for ditches, tunnels, flumes, etc., over all government lands lying between Puukapu and the extreme northern point of the island of Hawaii; also right to conserve and use any surplus waters, etc., for the term of, say, ninety-nine years, etc.; also offering an annual rental of \$500 has been duly received. I would beg to say

in reply that before the matter can be considered, the government deemed it advisable to ask that you furnish this office with a map showing the course of such proposed ditches, tunnels, flumes, etc.; the land it will run through, government and private; and in its course, streams, springs, etc., will it tap; also sites of reservoirs, if any, where surplus waters will be conserved; also state approximate quantity of water that will be taken from each stream, springs, etc.; capacity of such proposed ditches, tunnels, flumes, etc., and such other information that would further enlighten this office in the consideration of your request.

Very respectfully,

E. S. BOYD, *Secretary*

EXHIBIT 8.

[Copy of original license.]

Upon the terms and conditions herein stated a license for the period of ninety-nine (99) years from the date hereof is hereby granted to Samuel Parker, of the city of Honolulu, island of Oahu, Territory of Hawaii, or such company or domestic corporation as shall hereafter by him be formed, to build, construct, maintain, and operate a ditch on the higher elevations over, along, and under all government land situate and lying in the district of North Kohala between and including Puukapu and the northerly portion of the island of Hawaii, which said ditch, with its feeders, is herein designated as the "Upper Kohala Ditch," and also a ditch on the lower elevations over, along, and under all government land, situate and lying in the said district between and including Mauiawai and the northerly portion of the said island of Hawaii, which said ditch, with its feeders, is herein designated as the "Lower Kohala Ditch."

(1) Commencing with the date hereof, a license fee of five hundred dollars (\$500) shall be paid by the licensee to the commissioner of public lands each year for the first ten (10) years of this license, and at the commencement of the second ten years; and at the commencement of each succeeding decade of the period of this lease there shall be paid a license fee the amount of which shall be fixed by arbitration, provided that such fee for no one year shall be less than the sum of five hundred dollars.

(2) As the term is used in this license, a "ditch" shall be held to include a tunnel, flume, inverted siphon, waterway, or other means commonly used in confining and carrying water; provided, however, such term shall not include reservoirs.

(3) The licensee to furnish water at one or other of said ditches to all government homesteaders applying for same for domestic purposes (such as household uses, both drinking, washing, and cooking, and the watering of all kinds of stock) at a uniform rate per gallon to be fixed by the commissioner of public lands.

(4) The licensee to furnish water to all government homesteaders applying for same for agricultural purposes, upon such terms and at a low rate as it shall sell its water to any private person or corporation.

(5) The licensee, without expense to the government, to comply with such reasonable requirements of the commissioner of public lands concerning the preservation of the forests, by means of the

off of wild cattle, fencing of lands and planting of trees, on all adjacent lands forming the watersheds through which the ditches, heretofore of them, shall pass.

The licensee to divert no water for any purpose from government land, gulches, or streams on or forming any part of the watershed of Waimea, but the diversion of water authorized hereunder is confined solely to the watersheds draining toward Waipio and northerly portion of said North Kohala.

If the licensee at any time during the continuance of this license be unable, because of an insufficiency of water under its control, to supply all the users of water at such time with the full amount required, then such water as shall at such time be under the control of the said licensee shall be by arbitration apportioned equitably between the several users so long as such inability of said licensee continue.

The arbitration provided for in the first and seventh conditions shall be made by three (3) disinterested persons, one to be selected by the commissioner of public lands, one by the licensee, and a third by the other two, and the decision of any two shall be binding and final upon the parties interested.

This license shall be subject to the rights of the United States. The licensee shall in no way interfere with or interrupt the enjoyment of the vested rights of private parties, it being understood that the consent of the lessee of the government land of Puukapu has been given for the construction and maintenance of said "Upper Kohala ditch" through said Puukapu for the unexpired term of the lease, and shall not interfere with the right of the government to use, sell, lease, or otherwise dispose of government land across which said ditches or any of them shall pass. But any use, sale, lease or other disposition of government lands hereafter made shall be made subject to this license.

(9) All rights under this license shall be forfeited if actual construction of either the "Upper Kohala ditch" or the "Lower Kohala ditch" is not commenced within two years from the date hereof, and if one of said ditches is not completed and delivering water within five years from the date hereof. The Upper Kohala ditch shall be deemed completed when it is delivering water upon government land known as government lease 471, including Poakulua, Kalala, and Pahinahina, and the Lower Kohala ditch shall be deemed completed when it is delivering water upon the government land known as Kehena. Provided, however, that if the licensee shall claim that it is impracticable, through lack of sufficient water or otherwise, to extend either of said ditches as far as the government lands respectively named, then the location of the point of termination of said ditch at the Kohala end shall be decided by arbitration as provided in paragraph 8, and completion of either ditch to the point fixed by the arbitrators shall be deemed a completion of said ditch. If one of the ditches is so completed within five years from the date hereof, then the licensee shall have an additional five years in which to complete the second ditch, in default of which completion the second ditch shall be deemed to have been abandoned and all rights under this license as to such abandoned ditch shall be forfeited.

(11) It being the understanding that a domestic corporation is to be licensed to construct and operate said ditches under license from the government, it is agreed that whenever this license, at any time within

the period of two years from its date, is surrendered to the commissioner of public lands, another one of like tenor, and granting same rights under the same and no other conditions, shall be substituted therefor, running to such domestic corporation as shall at the time of such surrender be in existence and empowered to receive license. But nothing herein contained shall be construed to extend the time limitation set forth in the tenth condition herein.

EXHIBIT 9.

[License which Mr. Parker stated he was willing to accept.]

Upon the terms and conditions herein stated, a land license for period of ninety-nine years from the date hereof is hereby granted Samuel Parker, of Honolulu, island of Oahu, Territory of Hawaii, to collect, conserve, impound, and divert all water upon and from all government lands situate on the island of Hawaii of said Territory within the following-described area, to wit: Bounded on the north by the sea, on the east by Waipio Valley and by the summit separating the Waimea watershed from Kohala watershed, on the south by the summit of the Kohala Mountains, and on the west by the Honouliuli Gulch, such area being hereinafter called the Kohala watershed, subject to vested rights of private parties in such waters, and to sell such waters for irrigation, domestic use, and development of power for other purposes, and to use such water for the purposes of carrying out this enterprise, and for the further purpose of developing power for sale, such further use not to materially reduce the amount of water available for irrigation; and for the proper collecting, conserving, delivering, and sale thereof; to construct reservoirs, dams, impounding embankments, tunnels, ditches, feeders, wasteways, flumes, inverted siphons, pipe lines, or any other works necessary or convenient for the confining and carrying water upon, through, along, under any of such government lands in said Kohala watershed, and any government lands in the district of North Kohala across which may be necessary to carry such water. The plans for the construction and location of such waterworks to be subject to the approval of the superintendent of public works in his reasonable discretion.

This license, however, shall not be construed to confer a franchise or an exclusive right in the waters of said district, but the licensee shall have a vested right in only so much of said waters as he or the corporation hereafter to be formed shall first beneficially appropriate.

The construction of such waterworks shall be begun within two years from the date hereof, and within five years from said date the licensee shall be prepared to deliver such waters to customers in the district of North Kohala, exclusive of such time as may be lost by litigation and strikes and by reason of the acts of those over whom he shall have no control. All materials on the said government lands, such as earth, rocks, and trees, may be freely used by the said licensee without charge therefor on the part of the government for the construction and repair of any and all works necessary to the completion, maintenance, and repair of such waterworks.

The licensee shall divert no water draining towards Waimea nor in any way interfere with the source of any water supply of Waimea, the waters hereby authorized to be diverted being confined solely to

on the watershed draining from the Kohala Mountains in a westerly direction. The government of the Territory of Hawaii fix the dividing line between the Waimea watershed and the Kohala watershed hereinbefore described, it being expressly understood and agreed that should any swamp exist near such dividing line the waters of which may be deemed by the government to affect in any degree the water supply of Waimea, such swamp shall be excluded from the Kohala watershed and its waters shall not be used by the licensee.

The licensee shall not diminish the supply of water now being used beneficially in Waipio and Honokane valleys, or on the Kohala watershed above defined.

From the date hereof a license fee in the sum of \$1,000 per annum during the term of construction shall be paid by said licensee to the government of the Territory of Hawaii, in equal semiannual installments of \$500, and after the termination of five years the said licensee shall pay an annual rental to said government of \$1,000 and ten per cent of the gross revenues received from the sale of said water; provided, that in no event shall the annual rental after said five years aggregate less than \$2,500. At the end of fifty-five years from the date hereof the annual compensation to be paid to the government by the licensee shall be readjusted by arbitration, as hereinafter provided, for the rest of the term of ninety-nine years. After the end of five years the licensee shall file quarterly with the commissioner of public lands an account of the receipts and disbursements of the said enterprise.

The said licensee shall furnish water from the ditches, flumes, and reservoirs constructed for the conservation or conveyance of water to government homesteaders applying therefor, for domestic purposes, at a uniform rate to be fixed and agreed upon by the commissioner of public lands and said licensee once every ten years, provided that in case of failure of said licensee and commissioner to agree the rate shall be fixed by arbitration, and until such time as the rates may be agreed upon or fixed, the licensee may charge such rates as appear to be reasonable in the premises.

In like manner the licensee shall furnish water to all government homesteaders applying for the same for agricultural purposes, at as low a rate as it shall sell its water to any private person or corporation. In furnishing water to homesteaders for domestic or agricultural purposes as aforesaid, the licensee shall furnish such water at such points as the ditches, flumes, or reservoirs as shall be reasonably convenient to such applicants. The word "homesteaders" in this instrument shall mean all persons or their heirs or assigns holding land from the government under the homestead leases, right of purchase leases, freehold agreements, Puukapu leases, special agreements of sale under the land laws of 1895.

All other applicants for water who are in the possession of lands conveniently accessible to water from the ditches, flumes, pipes, or reservoirs of the licensee shall be equitably supplied by him, at uniform and reasonable rates for the water supplied at each ditch.

The licensee, without expense to the government, shall take all reasonable steps and make all reasonable efforts to preserve the forests and trees growing upon said Kohala watershed, and particularly shall construct and maintain cattle-proof fences on the unleased portions of

government lands, and hereafter upon such government lands in the said Kohala watershed as are now leased immediately upon the termination of such leases and so long as they shall remain unleased. Whenever such fences may, in the judgment of the commissioner of public lands, be necessary to protect the forests from cattle, and shall make all reasonable efforts for the extermination of all wild animals within the said forests, and shall make all reasonable efforts to prevent and extinguish all forest or bush fires within the said Kohala watershed.

If the licensee at any time during the continuance of this license shall be unable because of an insufficiency of water under its control to supply all its customers with the full amount of water required by them, then such water as shall at such time be under the control of the said licensee shall be by arbitration apportioned equitably between the several customers so long as such inability of the licensee shall continue.

All arbitration herein provided for shall be made by three distinguished persons, one selected by the commissioner of public lands, one selected by the licensee, and one selected by these two; the decision of any two to be final and binding upon the parties interested. The expenses of such arbitration shall be divided equally between the commissioner of public lands and the licensee.

At the end of ninety-nine years from the date hereof the licensee shall surrender to the Territory of Hawaii all rights acquired under this license and all improvements constructed under the terms hereof by said licensee, and all rights and improvements acquired by him on the lands of third parties for the conservation, conveyance, or delivery of the waters from the lands aforesaid.

It is hereby understood and agreed that the licensee shall, within five years from this date, organize a corporation under the laws of the Territory of Hawaii to construct and operate the said proposed waterworks under this license, which shall be deemed a public corporation and shall thereupon surrender to the government of the Territory of Hawaii and cancel this license, and that the government of the Territory of Hawaii shall thereupon issue to such corporation a license like tenor herewith, granting to such corporation the same rights and powers as are hereby granted but not extending the beginning of the said term of ninety-nine years beyond the date fixed in this instrument for the beginning of the term of construction.

Such corporation shall not be empowered by its charter to enter into the business of buying, selling, leasing, or otherwise dealing in land or real estate or of agriculture, nor shall it buy, sell, lease, or otherwise deal in land or real estate beyond the direct necessities of its business of conducting the enterprise of developing, conserving, and selling water and making the limited use thereof as hereinbefore set forth; nor shall it engage in agriculture.

Nor shall an owner or owners of stock in the said corporation represent a controlling interest therein, engage as a corporation, partnership, combination, or individual in the business of buying, selling, leasing, or otherwise dealing in land or real estate, nor in agriculture, in such parts of North Kohala, on said island of Hawaii, as may be supplied with water from the waterworks of the said corporation.

This license shall be forfeited:

(1) If the corporation last above mentioned be not legally formed and organized within five years from the date hereof.

1) If actual construction shall not be begun within two years from date hereof.

2) If delivery of water to customers within the district of North Kala shall not have been begun within five years from said date, or

3) If at any time within the said term the licensee fails substantially to carry out the stipulations made by him in this instrument.

It is hereby understood that where the words "Superintendent of public works" and "Commissioner of public lands" are used in this instrument, the agreement, in case of a change of government, by which the names of such officials become changed, they shall apply to such officials as shall represent substantially the duties and authorities respectively of the superintendent of public works and commissioner of public lands.

This license is issued subject to the approval of the secretary of the Interior, and shall be valid only upon such approval, and the date of such approval shall be the date of this license for all purposes.

Exhibits filed by J. W. Jones and his associates in the matter of the ditch controversy.]

EXHIBIT A.

APPLICATION FOR LICENSE.

HONOLULU, HAWAII, *June 6, 1901.*

TO THE COMMISSIONER OF PUBLIC LANDS

OF THE TERRITORY OF HAWAII,

Honolulu, Hawaii.

SIR: As trustee for himself and others, the undersigned respectfully applies to you for a license to collect, conserve, impound, divert, and use for the purposes of power and irrigation and otherwise all waters upon the certain government lands lying within the tract hereinafter mentioned, and to tunnel, ditch, and flume the same through or over any government lands in the district of Kohala, subject to any existing vested rights of others, and to make all necessary surveys of and upon such lands.

The tract referred to above for the collection, conservation, and impounding of said waters is that tract on the island of Hawaii which extends in a northwesterly direction from Waipio Valley, in the district of Hamakua to Honokani Gulch, in the district of Kohala, and extending mauka from the sea to the boundary line of the tracts of land known as Puukapu and Kawaihae 1. The lands within said tract are further known as Muliwai, Laupahoehoe, Nakooka, Apua, Waikapu, Honopueo, and Awini, and any and all other government lands within the described tract, as shown on the map presented herewith, colored yellow.

The term of the license shall be fifty years. At the expiration of that time all improvements upon the land shall revert to and become the property of the government.

In the joint interest of the government and ourselves, we will agree to the insertion in the license of proper restrictions for the preservation of the forests.

The collection, conservation, diversion, and impounding of these waters shall be commenced at the earliest possible time, and the work shall be completed within three years from the date of the license, excluding from said three years such time as may be lost by reason of the acts of others over whom we have no control.

For the rights and licenses petitioned for as above, we offer compensation as follows: The sum of \$1,000 per annum for the term of construction, not to exceed three years. After completion of the work, the annual compensation to be paid to the government shall be an annual rental of \$1,000 and 5 per cent of the gross revenues which we derive from the use of the water provided that in no event shall the annual rental be less than \$2,500.

The license shall contain such stipulations regarding the forfeiture thereof and such other conditions as will protect the interests of the government.

We respectfully request a hearing in this matter at your earliest convenience.

Respectfully submitted.

J. W. JONES.

EXHIBIT B.

AGREEMENT FOR CONSOLIDATION OF JONES AND PARKER PLANS. THE
HAS NOT BEEN REVOKED, BUT UNDER IT WE CLAIM.

Whereas two applications for a license to build water ditches and to impound and conserve water in the northern portion of the island of Hawaii are now pending before the government of the Territory of Hawaii in the names of Samuel Parker and J. W. Jones, trustees respectively, and

Whereas it has been agreed between said Samuel Parker and his associates, and J. W. Jones, trustee, and his associates, to consolidate their interests,

Now therefore, it is agreed by the parties hereto that such interests shall be consolidated on the following basis, to wit:

I.

J. W. Jones, trustee, and his associates, shall have fifty-one per cent (51 per cent) full paid of the promotion stock in any corporation hereafter formed; and Samuel Parker and his associates shall have forty-nine per cent (49 per cent) full paid of said promotion stock subject, however, to the terms and conditions hereinafter contained. Samuel Parker may, however, decline to enter or become interested in any corporation until the acceptance, cancellation, or termination of the Booth option hereinafter referred to; in case of which decline, one-third (1/3) of the forty-nine per cent (49 per cent) of the promotion stock above referred to shall remain unissued to be disposed of in accordance with the last paragraph of Section IV hereof.

II.

J. W. Jones, trustee, and his associates, shall have control of the furnishing of all necessary plans, surveys and preliminary and final work

the employment of all persons and employees to put the plan into proper shape and promote the same necessary for the presentation to capitalists, and all expenses incurred therein from the date hereof shall be charged against the entire stock of the corporation finally formed, and in no event shall the promoters be responsible for any liability except as against their stock or holding in the corporation, which liability shall be paid in stock and not in cash.

III.

J. W. Jones, trustee, and his associates shall have the option of owning fifty-five per cent (55 per cent) of the capital required and of owning fifty-five per cent (55 per cent) of the number of shares of the stock or bonds, or both, in the corporation finally formed.

IV.

In the event of any easements, license, or rights being purchased by said proposed corporation in the land of Laupahoehoe, Island of Hawaii, Elizabeth K. Booth and Charles W. Booth, or either, or acquired from said Elizabeth K. Booth and Charles W. Booth, or either, other than by compulsory legal process, either directly or through the Territory of Hawaii or the Government of the United States, or in compromise of such compulsory legal process, the option of said Elizabeth K. Booth and Charles W. Booth now held by Samuel Parker, dated May 1, 1901, a copy of which is hereto annexed and marked "A," shall be accepted by and be binding upon the corporation finally formed, and said for by said corporation according to the terms expressed in said option. And the said Samuel Parker hereby agrees, upon the payment to him of the sum of one dollar, and at the request of the corporation or request of said J. W. Jones, to assign to said proposed corporation or to said J. W. Jones, in trust therefor, said option of Elizabeth K. Booth and Charles W. Booth heretofore referred to.

And it is further agreed that after the acceptance, cancellation, or termination of the Booth option, the said corporation, when formed, upon demand of Samuel Parker made before delivery of water to customers within the terms of the license hereafter obtained, will buy of Samuel Parker, and the said Samuel Parker will upon demand of said corporation convey to said corporation all his rights in lands or easements owned or controlled by, or wherein the said Samuel Parker is interested, which may be necessary to the prosecution of the work as contemplated herein and under any license that may be issued to the persons interested herein, the corporation paying therefor the one-third, or forty-nine per cent (49 per cent), of the promotion stock specified in Section I hereof. If, at the time of said delivery of water to customers, said Booth option has not been accepted, cancelled, or terminated, said Samuel Parker must either assume all liability of said option or else surrender his interest in said promotion stock, which is one-third ($\frac{1}{3}$) of the forty-nine per cent (49 per cent) referred to in Section I hereof, whereupon such stock shall be issued to all the other promoters in proportion to their respective interests hereunder.

V.

In the event that said option from Elizabeth K. Booth and Charles W. Booth shall be deemed worthless by the corporation hereafter to

be formed, and no rights are secured by said corporation from said Elizabeth K. Booth and Charles W. Booth, or either, otherwise than by compulsory legal process, as above set forth, or compromise thereof the cost of said Booth option, if for any reason enforceable by law, shall be charged against the interests and promotion stock of said Samuel Parker and his associates. In the event of the receipt of notice from said Samuel Parker of his attorneys, Messrs. Kinney, Ballou & McCallahan, from said Elizabeth K. Booth and Charles W. Booth, or either, or both, of their intention to terminate said option, or in case of an understanding or agreement between said parties concerning the termination of said option, the said Samuel Parker agrees to immediately notify the said J. W. Jones of the proposed corporation through the said J. W. Jones, of such notice, understanding, or agreement; said Samuel Parker and his associates reserving nevertheless the right to procure a cancellation of said option, if possible, at any time until notified in writing by said J. W. Jones, or said corporation, not to procure consent to a cancellation of said option, and reserving the further right to relieve themselves from liability under said option by the transfer to J. W. Jones and his associates of all or a portion of their interests and promotion stock in said proposed corporation, said portion of the interests and promotion stock to be transferred and surrendered, to be not less than one-third ($\frac{1}{3}$) of the forty-nine per cent (49 per cent) mentioned in the first section of this agreement. It being distinctly understood and agreed, however, by the said Samuel Parker and his associates and the said J. W. Jones and his associates, that nothing in this agreement contained makes, or shall in any way make, said Booth option, or the cost thereof, a charge upon or liability against said J. W. Jones and his associates, or their interests in the proposed corporation to be finally formed, except in any one of the following events marked (a), (b), and (c), that is to say:

(a) In case said J. W. Jones or the said corporation, in writing requests the assignment to him or it of said Booth option.

(b) In case said J. W. Jones or the said corporation, in writing accepts the said Booth option or requests Samuel Parker to accept it.

(c) In case said J. W. Jones or said corporation notifies the said Samuel Parker, in writing, not to procure nor consent to a cancellation of said option.

In any of which events the said Booth option shall thereafter be a charge upon the corporation as a whole, or, if the corporation is not then formed, upon the interests of all promoters in the corporation.

Until the acceptance or cancellation of said Booth option, said Samuel Parker and his associates shall not be required to do any act or thing which shall make said option or the covenant and agreement therein finally binding upon him or them; but nothing herein contained shall hinder or delay the formation of a corporation when in the judgment of the persons who undertake to finance the proposed undertaking such a corporation shall be formed; and the parties hereto hereby agree to give their immediate consent to the formation of such corporation at such times as to the persons who undertake to finance this undertaking, or who undertake to furnish fifty-five per cent (55 per cent) of the capital required therefor, seems to be proper.

VI.

The majority of the promotion stock thus owned or to be owned by J. W. Jones and his associates, and their interests herein, shall carry

control of the expenditure of all further moneys and the making and execution of obligations to procure the same when necessary, in his judgment, for the promotion work up to the point where final capital is secured to construct or commence actual construction work. Said J. W. Jones and his associates shall create no liabilities on behalf of Samuel Parker and his associates except as against their stock and interests herein, and any liability so being expressly understood and agreed that the parties hereto are not partners. The term "promotion work" shall be held to mean and include any and every act or thing done or performed, or to be done or performed, or that may be done or performed, in procuring and getting the license, and up to the point where fifty-five per cent (55 per cent) of the capital for the proposed undertaking is secured.

VII.

And said Samuel Parker agrees that he will not convey to any other person or persons than the promoters herein for the corporation to be formed by them, or to the corporation so formed, any rights of way over the lands, or any rights in the lands or leases owned or controlled by said Samuel Parker, or in any lands or leases wherein said Samuel Parker is interested, which may, in the judgment of the persons interested herein and hereunder, or the corporation formed by them, be necessary to the prosecution of the work as contemplated herein, and under any license that may be issued to the persons interested herein; nor will the said Samuel Parker allow the use of any such rights of way, rights of leases, or rights in land or persons, except deemed necessary as aforesaid, to any other person or persons except those now interested in the cattle or ranch business with him, and then only for the purpose of such cattle or ranch business, and for not longer than the unexpired term of his lease or leases.

VIII.

A two-thirds (2/3) vote of the promoters' stock or interest herein shall be necessary for decision as to the proportion or percentage of the entire stock or bonds, or both, of the corporation finally formed, which shall be given to the persons who finance the proposed undertaking, and the terms and conditions upon which the same shall be allowed. Immediately upon the issuing of the license herein contemplated, said J. W. Jones, trustee, shall execute a declaration of trust in accordance with the terms of this agreement, which terms, however, may be expressed in a more complete and formal manner.
Honolulu, September 17, 1901.

ARTHUR C. GEHR.

EXHIBIT C.

A.

For and in consideration of the sum of ten dollars (\$10) to us in hand paid by Samuel Parker the receipt whereof is hereby acknowledged,

we, Elizabeth K. Booth and Charles W. Booth, her husband, do hereby grant to said Samuel Parker the following option for the term of one year or until the expiration of sixty (60) days from the service of a notice of our intention to determine the same (whichever is the earlier date), viz:

Upon the acceptance in writing within the time specified of this option we hereby agree to grant to said Samuel Parker, or to such corporation hereafter to be formed as he may designate, the right to use all the waters on Laupahoehoe-nui, Waimea, Hawaii, being land commission award 6245 to Kalaeokekoi-nui, over and above the water necessary for irrigating one hundred (100) acres of land for the cultivation of rice or any other crop, and the kuleanas in the said land, together with the right to tunnel for and develop water and all necessary rights of way to conduct water over and across said land of Laupahoehoe-nui as now owned by us, including flumes, ditches, tunnels, and inverted siphons wherever necessary, said grant to be for a term of ninety-nine (99) years from the date thereof.

The said Samuel Parker or said corporation paying for said grant, if this option is accepted by him or them, the sum of fifty thousand dollars (\$50,000) cash and fifty thousand dollars (\$50,000) par value, in paid-up stock in a corporation to be formed for the purpose of developing this and other water in the district of North Kohala, the capital stock of which corporation shall not exceed two million five hundred thousand dollars (\$2,500,000).

And in further consideration of the granting of this option the said Samuel Parker hereby covenants and agrees with the said Elizabeth K. Booth and Charles W. Booth that if any corporation in which said Samuel Parker is, or his assigns are, in any degree interested is formed and capital secured for the purpose of building a water ditch or ditches along the northern coast of the island of Hawaii, or if a water ditch is built along the northern coast of the island of Hawaii by any person or persons holding any rights through or under said Samuel Parker, including the right to cross any lands now or then held by said Samuel Parker under lease or otherwise, this option will be accepted whether the route of the proposed ditch or ditches touches the land herein specified or not, provided this option is still in force, it being within the power of said Elizabeth K. Booth and Charles W. Booth to keep this option in force by successive renewals thereof; but if the option is allowed to lapse before said corporation is formed, or before anything is done in relation to the making of such a ditch by any person or persons, then this obligation shall terminate also.

It is hereby expressly agreed that all costs and expenses in connection with the preparation, execution, or completion of all deeds and other instruments requisite or necessary hereunder shall be borne and paid for by the said Samuel Parker; that the mailing of any notice required hereunder addressed to the said Samuel Parker at Honolulu or to his attorneys, Kinney, Ballou & McClanahan, at Honolulu, shall be deemed good service of such notice.

Dated Honolulu, May 8th, 1901.

SAN FRANCISCO, *May 29, 1901.*

r. EDMUND B. McCLANAHAN, Esq.

DEAR SIR: In accordance with your suggestion I beg to make you the following programme with regard to developing the Waipio (Hawaii) scheme:

On March 25 I suggested to Mr. McCrosson the advisability of—

(1) Making trails into the different waterheads, about the proposed diversion points, so they could be weired.

(2) Making trail toward Kohala on approximate ditch route to use as a base for surveys.

(3) The necessity of having trail made before bringing engineer corps on the ground.

(4) Procuring the exact amount of water available, so as to design the size and capacity of ditch, and get a line on the capital and scope of the proposed company.

There can hardly be a doubt as to the presence of a substantial quantity of water of commercial value, and the real question to be solved is what is the most certain way for the promoters to convert the scheme into a practical shape to which capital can be induced to advance money for the construction.

From my experience with similar propositions I think three elements will rule in this case—(a) the amount of water, (b) the cost of conveying it to the land, and (c) the revenue to be derived from the sale of the water.

(a) The amount of water can be determined from actual measurements for a period of, say, three or four months.

(b) The cost of ditch can only be obtained by a complete and thorough survey, and the comparison of different routes and expedients for bringing the water. As the country is very rough, such a work might take three or four months with a fully equipped survey party, of which personally I would take charge. Besides myself it would be necessary to employ 1 transitman at \$125; 1 leveler, \$90; 1 rodman, \$50, and about 10 men helpers at \$25 each, or \$250; or \$515 per month in all, not counting board and camp transportation.

Such a survey, while not giving the absolute final location, would be so near that the approximate cost would be very closely estimated.

It would be far more satisfactory than a rough preliminary report made from personal observation and guesswork, and would carry more weight in convincing capital of the practicability of the scheme.

(c) If all the water rights are absolutely secured preliminary contracts could be made with some of the present plantations on a basis, say, of \$50 per acre per year, limiting the supply to 1,000,000 gallons per acre; or else options should be procured on some of the cane land now uncultivated in Kohala for want of water.

Personally I am willing to put three or four months of my exclusive time into the proposition on the basis suggested by McCrosson February 14, 1901, of receiving 2½ per cent of paid-up stock, or \$25,000, and \$300 a month from time I reach Honolulu, as well as travel and living expenses from there to Hawaii and back, I to pay my own liv-

ing expenses and travel from San Francisco to Honolulu, and if the work goes ahead I am to get 5 per cent for engineering supervision on actual cost.

Those conditions are practically identical with those suggested by Mr. McCrosson, only that \$300 a month cash is put in instead of \$500 flat, which was to cover a rough preliminary report, such as we then considered necessary.

A more detailed and complete investigation I now believe necessary: hence I suggest the necessity of my putting in a longer time on it to do it thoroughly.

If you will kindly notify me as soon as you have definite facts to go on, and that you desire me to undertake this work, I will leave here with a full outfit of instruments, etc., to take hold of this proposition.

Very truly, yours,

M. M. O'SHAUGHNESSY.

EXHIBIT E.

GRAND PACIFIC HOTEL, *October 28, 1901.*

Col. SAMUEL PARKER,
Washington, D. C.

MY DEAR COLONEL: I arrived in Chicago on the 1st and expected to be in Washington before now, but will have to wait another week. Mr. Wundenburg's action on your behalf, after you left, was the cause of considerable surprise to me, and I will not believe that it was authorized by you until you confirm it. There were developments of importance after you left. Of some of them you were doubtless apprised. Of others I do not care to speak until after I have had a talk with you. All I care to say now is that my personal preference is in favor of working harmoniously with you, if that can be done without sacrificing what I believe to be the just claims of my associates and myself.

I should be glad to hear from you, and will probably see you in a week or two.

Very truly, yours,

ARTHUR C. GEHR.
Per M. B. THOMPSON,
6 East Madison Street.

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, October 31, 1902.

Hon. JOHN H. MITCHELL,
*Chairman Subcommittee on Pacific Islands, etc.,
United States Senate, Washington, D. C.*

SIR: The deputy auditor, Mr. H. C. Meyers, is sending you, by my direction, in this mail, a statement of the accounts of the board of health in connection with the bubonic-plague epidemic. This statement is taken from the records of the auditor's office.

Very respectfully,

SANFORD B. DOLE.

AUDITING DEPARTMENT, TERRITORY OF HAWAII,
Honolulu, November 1, 1902.

MR. JOHN H. MITCHELL,

*Chairman Subcommittee of Porto Rico and the
Pacific Islands, Washington, D. C.*

DEAR SIR: By registered mail I send you this day, in compliance with request made by you while in Honolulu, a detailed statement of expenditures connected with the suppression of bubonic plague in the Territory of Hawaii, during the years 1899 and 1900.

I remain, yours, respectfully,

H. C. MEYERS, *Deputy Auditor.*

SAN FRANCISCO, CAL., *November 1, 1902.*

MR. JOHN H. MITCHELL,

*Chairman of the Subcommittee of the
Senate Committee on Pacific Islands and Porto Rico.*

SIR: I inclose a statement made by the managers of the plantations of North Kohala, which will, I think, go far to corroborate the statement which I made before your committee in Washington on the 28th of last April, as shown on page 56 of the record, lines 13 to 16.

Before I arrived in Hawaii, Mr. McCrosson saw the planters and obtained the ratification of the previous petition which was presented to you in Honolulu. After the adjournment of your sessions, with the record and proofs I went to Kohala, and at a public meeting of the planters, held at the Kohala Club, speaking only from the record, I showed conclusively that our methods were more in harmony with the interests of the planters than were those of the Hawaii Ditch Company. At first there was some hesitation about revoking a petition which had subsequently been reaffirmed, but the proof was so strong that the bills introduced in Congress by the Hawaii Ditch Company were not in accord with the understanding of the planters at the time they signed the petition and ratification that the inclosed paper was signed for presentation to you. Mr. Renton is the manager of the Union Mill Company and a large stockholder. Mr. Olding is manager of the Kohala Sugar Company, in which Dr. Bond, whose name does not appear on the petition of the Hawaii Ditch Company, is a large owner. Mr. Hall is manager of Niulii Plantation. Mr. Wight Atkins, who is acting manager for Halawa Plantation in the present absence from Hawaii of Mr. Kay, is a grandson of Dr. Wight, the owner of Halawa. Mr. Bryant is manager of Puakea Plantation, and is the man who obtained for the Hawaii Ditch Company many of the signatures to their petition. Mr. Tulloch is manager of the Kohala Telephone Company. Mr. S. P. Woods, who signed for the Kohala Ranch Company, is a nephew of Samuel Parker, and has, as he told me, a power of attorney to act for his eight brothers and sisters, who own the ranch.

I desire to call to your attention the indorsement and approval of those who were quoted as opposing our interests last year. The signatures which I now present to you are the signatures of the men who, according to the statement of Mr. McCrosson at one of the hearings at the Hawaiian Hotel, approved the plans of the Hawaii Ditch Company and were opposed to us, "probably because they have good

sense." You may remember that at that time, in response to a question put by one of your committee to Samuel Parker, Mr. McClanahan and Mr. McCrosson, each one replied that he was willing to leave the probable users of the water the matter as to whom the right should be granted.

We have been unable to read over the record of the hearings in Honolulu to see if our statements were accurately reported, nor when I left Honolulu on the 21st instant had I received back the exhibit which I handed to the stenographer. Among them is the original copy of the Parker agreement, signed by Mr. Ballou. If convenient I should like to read the record before it is printed.

Last Monday evening at the Occidental Hotel Mr. John T. McCrosson told me that he had positive proof that some of the money which it has been claimed certain of the Territorial officials have embezzled had been used to further our interests in the ditch matter, and that Governor Dole and Secretary Cooper had said that they had been importuned by E. S. Boyd, J. H. Boyd, and W. H. Wright to grant us the license. I have no doubt but that these statements have been conveyed also to your committee.

Regarding the last part of the statement I can not speak of my own knowledge. There is much in the record referring to the attitude of Mr. Boyd, and to that I refer.

That part of the statement referring to the use of the money is absolutely, unqualifiedly, unequivocally, and in each and every particular, untrue.

I asked your committee publicly in Honolulu to investigate these reports. I did not think that in a matter of that kind definite proof would be required, but I did think that our opponents would attempt to offer some kind of an excuse for the outrageous statements which they had made. Instead of that, what did they say? These statements were based, according to the testimony of Mr. McClanahan, a clever lawyer who knows the meaning of words, "solely on vague rumor." This is the testimony of a man who admitted that he was willing to join forces with us because of the pull we were supposed to have with the officials, and thereby, if his belief were true, make himself participant in their crimes with us.

I now again request that you require the production before you of these proofs, and under oath.

It seems to me that I am entitled to such action by you as will definitely and conclusively settle this question, and show who is before you in this matter with clean hands, as one side or the other is absolutely unworthy of your favorable consideration.

My address for the present will be Riverside, Cook County, Ill.

Very truly, yours,

ARTHUR C. GEHR.

STATEMENT OF THE PLANTERS OF KOHALA, HAWAII, WITH REFERENCE
TO THE SENATE BILL 11997.

NORTH KOHALA, HAWAII, *October 16, 1901.*

MR. ARTHUR C. GEHR:

The petition which we signed under date of November 14, 1901, requesting the passage of the Hawaii Ditch Company bill, now pending,

ing in Congress, and the subsequent indorsement thereof made a weeks ago, were made and signed under a misapprehension of the concerning the ditch proposition.

e do not approve of the passage of the bill, H. R. 11997, nor r consideration by Congress, nor do we think that Congress should t any special legislation of this character.

e approve the passage of a bill like that proposed by Senator ker as a substitute for the said original bill, H. R. 11997.

JAMES RENTON

Per J. S. Low, *Manager*.

I hereby pledge myself to return the above to Mr. James Renton in ten days from the date hereof, unless it shall be further indorsed and approved by Theo. H. Davies & Co. and by Castle & Cooke and Henry Waterhouse & Co., of Honolulu.

ARTHUR C. GEHR.

Approved October 2, 1892.

THEO. H. DAVIES & Co, LIMITED,

F. M. SWANZY, *Managing Director*.

Approved:

CASTLE & COOKE, LIMITED,

J. B. ATHERTON, *President*,

Agents Kohala Sugar Company.

Approved:

HENRY WATERHOUSE & Co.,

Agents for Dr. James Wight.

This paper does not contain so many signatures as the petition presented by the Hawaii Ditch Company, but it contains the signatures of those who control and own the lands of North Kohala, for which the ditch has been promised by both parties.

It does not need padding by the use of twenty names, as I am informed by an old resident, of men who do not own real estate in the district.

COPY LETTER OF T. J. RYAN.

MOUNTAIN VIEW, HAWAII, *October 23, 1902.*

Hon. J. H. MITCHELL,
*Chairman Subcommittee Pacific Islands
 and Porto Rico, Portland, Oreg.*

DEAR SIR: Herewith I have the honor to inclose, for consideration by your committee, a written statement made by Mr. J. V. Duintjer, residing near Mountain View, Hawaii, concerning his experience in coming to and remaining in Hawaii. It is rather lengthy and some statements may be immaterial, but I hope you will read it throughout, as his experience is much like many others coming here. Mr. Duintjer is a Hollander, of good education, and I know him to be a truthful man. Besides, I personally know of the manner in which the Oloa Sugar Company treated him. He wrote the statement himself and I copied it for him, as his handwriting, though very excellent, is of such a pronounced German style that it is not easily read by persons not accustomed to it. I could obtain many statements from others along these lines, but I feel quite certain your committee did not fail to see that industrious, independent, educated white men from the United States or Europe are not wanted in Hawaii by the planters.

Instead of encouraging such men to plant such an amount of cane as they would be able to take care of by their own labor and the labor of their families, the planters are determined to force their present plan of operation by Asiatic coolie labor.

Very respectfully,

T. J. RYAN.

STATEMENT OF J. V. DUINTZER.

After residing seven years in the State of Sinaloa, Northern Mexico engaged in the culture of sugar cane for most of the time I got, at last, thoroughly disgusted with the there existing conditions. About that time the annexation of the islands of Hawaii to the United States became a fact, and, consequently, I made up my mind to go there and try again the culture of sugar cane in Olaa, on the island of Hawaii where, in a splendid climate, with sufficient rainfall, under a free and enlightened government, as I thought, would give all the chances for success.

I got my information about Hawaii from the pamphlets and writings edited by the Hawaiian government, which I became convinced afterwards are made up with the only intention to get tourists to the islands, and are, therefore, liable to give a wrong impression of the islands.

After a stay in the islands of three and a half years, personal experience gave me the firm conviction that the present government of the islands is practically the old one, i. e., that it is dominated by the great sugar corporations and that it is not emigration of industrious people but of tourists to the islands that is wanted.

Consequently, the practical settler here soon finds that no help is given him, but that all things tend to discourage him. That the reason there is a constant influx from the United States to the islands, as the steamer's passenger lists show, and that so few of them remain for any length of time in the islands that the white population does not increase perceptibly.

ing as this influence from the great corporations upon the government here is not broken and a really free and independent government established no settlers should come to these islands. The chances are to one that they will lose both the money they possess and energy and labor expended to the profit of the sugar corporations, of the ways in which this is managed the following experience writer shows:

On I, in February, 1899, arrived in San Francisco, accompanied by son-in-law, his wife, and two children we were, financially, in a weak state, and only the conviction that I, in an emergency, could upon my friend in Holland gave me the courage to start anew. Knowing that the prices asked for furniture in Hawaii, as well as clothes, etc., were far higher than on the coast we resolved to buy furniture in San Francisco. At the steamship office we found that freight rates were charged and above everything else a deposit \$50 for every male steerage passenger was required; all making it impossible for us to buy in San Francisco. This deposit is given back at arrival in Honolulu.^a Nevertheless, it acted as a hindrance to poor settlers wishing to go to Hawaii to make a living, while Asiatic travel is helped by free transportation, together with provisions and clothing; also, houses and employment upon their arrival in Hawaii by the sugar corporations.

In Honolulu we were confronted by very high prices at boarding houses and high rents, which at once necessitated our seeking employment in some of the many sugar mills as machinist, millwright, or in similar capacity. In the government pamphlets we had previously read that high wages were paid in such situations; then we found the reality that no sugar mill wanted our services at any price. After much traveling, and visiting many offices and mills, we were forced to the conclusion that we were not wanted at all and would be compelled under circumstances to leave the islands if we could not make a living on the side of the sugar mills.

Therefore, we resolved to go to the public land office with the intention of taking up government land on the island of Hawaii. There we found that a trip to Hilo was necessary for that purpose, and the only steamship a round-trip ticket cost \$25. At last we got the information out of Land Commissioner Brown that we could not take government land because we were not American citizens, and that under the existing circumstances we should have to make a trip to Washington, D. C., to take out our first papers of naturalization.

Of course we could not do that, and not the least information or help was given us by such officials to settle on any unoccupied lands. We await the time when the courts were empowered to issue naturalization papers, as we had made it clearly evident that it was our bona fide intention to apply for such naturalization at the first opportunity. Thus we were compelled to try to make a temporary living in Honolulu as best we could.

We did not come to Hawaii with the intention of staying in a luxurious town to be degraded and incorporated in the low classes of an immoral population. Public land we could not have, said the authorities. Land we wanted to possess, and after months and months of diligent and constant search we at last found, as we thought, what we wanted, with conditions, as we thought, would suit us.

^a I understand this deposit is not required since April 30, 1900.

In Hawaii about all the lower land belongs, either in fee or under long lease, to the sugar corporations, and the high lands in the same manner are occupied by the cattle ranches; the remnants, here and there, which are practically useless to either the sugar barons or the cattle barons, are divided into very small lots for settlers at a low price per acre, and usually 8 per cent interest, payable semiannually in advance.

In trying to obtain one of these small lots, perhaps 50 acres, the settler is placed in competition with a horde of speculators, who live in the towns—merchants, doctors, lawyers, preachers, mechanics, school-teachers—who never live on the land, rarely clearing as much as 5 acres, and building a small board shanty in which they place a Japanese or Chinese to do a little work on the lot, and after a year or two of this kind of residence a patent for the land is awarded them. In this way an extortionate price can be obtained for these lots, no matter how small they may be or how useless they may be to an actual settler who must live on the land and earn money enough to pay for it and support his family out of the uncertain crops he may raise, with practically no market in which to sell. All his products are at the mercy of the small local market and in open competition with similar products raised by Japanese and Chinese. This class of speculators are allowed to take up and hold these lands to-day because they pay the extortionate price required by the government out of income which they do not and could not earn out of cultivation of the land; therefore, bona fide settlers are prevented from obtaining lands, and if perchance they do obtain them, they are driven out by competition of Chinese and Japanese tenants of the speculators. After much of this kind of experience the settlers are obliged to return to the mainland. Those who can not afford to return are compelled to take what they can get; very often undesirable locations and an area insufficient to maintain a home for himself and family even if he got the land for nothing.

From one of the class of speculators above mentioned, a mechanic residing in the town of Hilo, we bought a lot of land known as government lot No. 3 of a certain map, the area of said lot being 2 acres and located about 11 miles from Hilo on the Volcano road, for which we agreed to pay \$5,000 in United States gold coin. He acquired this land about one year before on a right-of-purchase lease from the local government, said lease running twenty-one years, for which he paid \$500.

Only 1 acre of it was planted in cane when we bought it, and a small dwelling house, worth about \$100; as for the rest, it was in its wild original state, overgrown with ferns, trees, underbrush, and vines. We had to pay down \$1,000 in cash and the balance in five years, or \$200 per year.

Being, myself, unable to furnish the cash, I wrote to my friend in Holland, but was disappointed by his answer that he was unable to send it just then on account of the stringency of the money market in Holland caused by the South African war.

Forced by the seller of the land into the almost hopeless dilemma of trying to obtain the money on any terms or conditions or losing all the money and work I had put in the place, I set about to raise the money.

As security I could offer a chattel mortgage on the cane crop growing

on the land. My predicament was known to everyone in the neighborhood, and very soon I received information that the head luna (and boss of field work) of the Olaa Sugar Company would furnish me.

Ultimately I got it from him by giving a chattel mortgage for \$2,000, bearing interest at 5 per cent. He told me that he did not have the money himself but would borrow it from the other lunas (field bosses under him). All these lunas were working on the plantation of the Olaa Sugar Company.

Soon afterwards he produced one of these lunas and gave him a written document—bill or note for \$1,000 due after two years—and under the circumstances I was forced to sign it as security or indorser.

I am now convinced, and surely believe, that it was only to make this my executor in the future, and only to cover up the corporate checks of the Olaa Sugar Company.

Upon the fixed day this man was at the lawyer's office with the money (\$1,000), but only partly in gold coin. Four o'clock that p. m. was the time limit for making the payment and the seller of the land stood ready to foreclose the mortgage I had given him for the purchase price if payment was not made. By such foreclosure he could take the land, buildings, improvements, and growing crops without any payment to me therefor. There is no equity of redemption or no time allowed in which to redeem from a foreclosure sale under the laws of Hawaii.

When the time for payment had nearly expired, all of a sudden, without my knowledge, J. F. Clay, head bookkeeper of the Olaa Sugar Company, rushed into the lawyer's office in Hilo from his place of business, 8 miles distant, and brought the needed \$1,000 in United States gold coin, then, after saying to me, "Now all your troubles are over," rushed out again as suddenly and unexpectedly as he came.

I executed the chattel mortgage for \$2,000, receiving therefor \$1,000 in gold and \$1,000 in usury. In fact, usury is not an adequate name for it.

While I very much disliked to undertake the payment of this usury, I could not help it, and then only thought that the head luna was trying to make that much out of me, which would be bad enough; but if I had been at that time able to see through all of it, I should have stopped work and expenses. As it was, it furnished a sort of respite, and I foolishly proceeded to work again caring for the growing crop of cane, the sale of which I had previously contracted with the Olaa Sugar Company.

At the time of executing the said chattel mortgage I was not able to recognize the powerful influence that constantly bore down upon me, nor had I an inkling that a conspiracy had been concocted by the Olaa Sugar Company through its employees to not only accomplish my ruin financially, but to secure more improvements and care of the crop until maturity, paying only the needed groceries and clothing for my work and cash expended, ultimately to take the land, improvement, and crop at the price fixed by themselves, and at a time when it was utterly impossible for me to get out of their clutches. Right here I ought to state that this land was surrounded by the cane fields of the Olaa Sugar Company and about 2 miles to its mill.

After this experience I felt unsafe and uneasy, so I resolved to sell the place, concluding that I ought to get \$3,000, as I had a crop estimated at 1,000 tons of cane nearing maturity. In fact, it was fully

ripe and ready for mill and under contract as before stated—the Olaa Sugar Company, to be taken when ripe.

At this juncture I began to see into the designs of this company, the result of the conspiracy, but it was too late.

The sugar company refused and neglected to take my crop of time to enable me to make the second payment of \$800 on the land, delayed taking it beyond all reason. I advertised my land for sale in the newspaper, and I found that the head luna, above referred to, told everywhere that I could not sell the land; that I could not get a good title; that the buyer could never sell the cane, as the mill was under no obligation to take it unless the company saw fit to do so.

So that after some delay I was forced to the conclusion that I could not make a sale or exchange for other land, and that I was body and soul in the hands of the said head luna and the Olaa Sugar Company.

This sufficed to convince me that I must give up all hope, as I had now the certainty that I was completely in their trap with no means of escape only on their terms, and that the sugar company was the only party able to buy my land, and it was in a position to name the price, and any more work or money invested by me would only go to enrich the company, and, perhaps more particularly, the officers and head employees who put up the job.

Therefore I offered to sell the land to the head luna for \$8,000, and he offered me in return \$8,000 for the land, including improvements, together with the standing crop of cane ready for mill, which should have been taken long before by the mill, and for which I should have had my money.

Month after month passed, still he refused to offer any more. I then went to the manager of the plantation and told him how his head luna had treated me, and it only resulted in his giving his opinion that he could do nothing for me; that his head luna was a very fine man, that the land and crop was not worth any more money. Even J. I. Clay, the head bookkeeper, had the impudence to say to me: "If I were you, Mr. Duintjer, I would go bankrupt."

After much trouble, I finally got a value of \$9,000 for land, crop and all, out of which all debts against the place, including the \$1,000 usury and interest, was deducted, and for my equity I had to take part of it in lumber and transportation and sundry other things.

I closed the deal, glad to get back my freedom, even at a cost of two years' hard work for two men, besides \$1,500 lost in the operation.

Still, being in the islands and starting anew, I am still subject to the conditions forced upon all other poor settlers here by the sugar interests through their influence with the present government of the Territory, and from which it seems almost impossible to extricate ourselves.

After I sold the land I was able to take out my first papers of naturalization, which qualified me under the law to take up government or public land, and, being compelled to move, I had no other choice.

I went to the public lands office at Hilo only to find that there was but little of the public land surveyed and open to settlement, and that along the only road was all taken up, and I also found that all the parties having taken it, with but few exceptions, resided in Hilo and were not occupying the land, as the law directs, but I could do nothing about it, as there is no contest law in Hawaii by which the cancellation of abandoned or illegal entries can be brought about. So that I, as

a *bona fide* settler, was compelled to take the choice of back lots at from 1 to 3,000 yards back from the road; besides, through the arbitrary order of the Territorial land commissioner, I was only allowed 50 acres, while the law plainly gives me the right to file on 100 acres—this land being at an elevation of about 2,200 feet above sea level, poor soil, and overgrown by a very heavy growth of worthless brush, interwoven with vines and underbrush, and which costs at least \$100 per acre to clear ready for plow.

For this 50-acre lot I filed upon I was obliged to enter into an agreement with the Territorial government to pay at the rate of \$8 per acre and pay interest thereon at the rate of 8 per cent semiannually in advance, located at least half a mile back from the road, and the means of communication with the outside world being a fern trail used by the surveyors and only fit for the passage of pedestrians and pack animals.

For every 1,000 yards over this trail means an expenditure to the settler for the transportation of lumber for his house and moving his furniture, etc., of from \$50 to \$75. Outgoing produce, if I can ever raise and sell any, will be likewise expensive; besides, when the settler raises a crop even on public land, for which he has not yet obtained a title, the laws in Hawaii allow a tax to be levied and collected on the produce whether harvested or not. Every settler must of necessity own some pack animal for want of roads, while the centralized government collects the road taxes from the settlers and takes the funds to Honolulu never to be seen again. The same is true of the schools, and in my neighborhood there are upward of 65 children of school age, with the only schoolhouse at Mountain View, fully 8 miles away from most of them. The officials of Hawaii have in the past, and do at the present, boast of their interest in education, yet here is a sample of their methods and here is the hope of bringing up a rising generation under the American flag to be qualified and useful citizens upon whom must devolve the responsibility of maintaining our now free and unequalled institutions of government. Can the American people through an American Congress longer tolerate such a school as is put forth by public officials in Hawaii? The present situation of ourselves is hard enough, but the future for our children is far more perplexing.

I admit that with this complaint I should suggest some remedy within the jurisdiction of Congress and the Administration at Washington. Therefore I suggest that Congress should promptly take the public domain in Hawaii out of the hands of Territorial officials, who are under the absolute control of the sugar and cattle barons, and place it under the jurisdiction and control of the General Land Office at Washington, where it constitutionally belongs; that all the public lands in Hawaii be surveyed without delay for settlement purposes; that the proceeds from the sale or other disposition of the public lands in Hawaii be made to constitute a fund for school and road purposes, to be expended only in the districts where the land is taken by actual *bona fide* settlers, and not in any town or city; that the price, if any, on public land taken by *bona fide* settlers be made nominal, with no interest, and such payment to be made in not less than five years; that the strictest law possible be enacted and enforced to prevent speculation in and monopoly of the public lands, both as to individuals and corporations; that laws should be devised, enacted, and

enforced to gradually supplant coolie labor by citizen labor, and attention of the President should be called to the fact that the government of this Territory failed, neglected, and refused to sign a good sufficient bill organizing this Territory into counties, which was passed by both houses of the last Territorial legislature and placed in the hands of the governor before the end of the regular session, the only shabby excuse offered by the governor being that he did not have time to read it. By the terms of the bill, which was made after the statutes organizing counties in States and Territories on the mainland, the citizens and settlers could control the expenditure of local taxes raised for road, school, and other local purposes, by which we could easily maintain schools for our children at least, and to a small extent participate in conducting public affairs, which to my mind is a right as well as a privilege of every American citizen. In fact, when I foreswore allegiance to my native country I presumed that I was entering upon the duties and participating in the privileges and rights of an American citizen, but I find in Hawaii all that is a dream, and there is not a monarchy in all Europe possessing absolute and dictatorial powers vested in the Hawaiian oligarchy.

In view of all these facts, is it asking of Congress too much when we respectfully request that these conditions, totally un-American, be speedily changed, and that even the delay thus far has caused much loss, anxiety, and misery among the very people who make up the mainstay of any country, and whose voice is scarcely heard in official circles in Hawaii, much less at Washington?

Very respectfully, yours,

J. V. DUNN

Hon. J. H. MITCHELL,

Chairman, Subcommittee on Pacific Islands and Porto Rico.

MOUNTAIN VIEW, HAWAII, October 14, 1902.

HILO, HAWAII, October 21, 1902.

Hon. JOHN H. MITCHELL,

Chairman of the Subcommittee of the

Committee on Pacific Islands and Porto Rico,

United States Senate, Portland, Or.

MY DEAR SENATOR: Somewhere among the first questions which you put to me after I took the stand to be examined by you during your recent visit in Hilo, you asked me something like this:

"Suppose two vacancies on the supreme bench were to occur, would they call two lawyers?"

As I remember, I told you that they would, and recalled to my mind the case of *Brown v. Brown* (11 Hawaiian, 47), in which W. L. Castle of the Honolulu bar, and Mr. Paul Neumann, of the same place, sat in place of Chief Justice Judd and Justice Frear, disqualified. In that case the opinion of the court was rendered by Mr. Paul Neumann and there was no dissenting opinion.

Then you asked me the further question:

"Supposing to-morrow, before the case is finished, the chief justice is stricken ill, can the two remaining members of the bar continue the case?"

I told you they could. I also called your attention to the fact, if I not forget, that there was a case recorded in our books where two members of the bar wrote the opinion of the court, and the only remaining justice upon the bench rendered a dissenting opinion. As I remember my evidence, I qualified it by saying that I was not quite sure, but that in my opinion it was true.

Since that time I have found the case to which I referred. It is titled "Kahului Railroad Company, a corporation, v. Hawaiian Commercial and Sugar Company, a corporation, and John F. Hackfeld." The exceptions were taken from the circuit court of the first circuit, and the case was submitted to the supreme court September 29, 1898, and decided by them April 10, 1899. In that case Mr. Justice Whiting was the only member of the supreme court bench proper. He presided at the trial. A. G. M. Robertson, esq., of the Honolulu bar, sat in place of Chief Justice Judd, disqualified, and J. T. De Bolt, esq., in the same place, sat in place of Frear, justice, absent. Mr. J. T. De Bolt wrote the opinion of the court, which was concurred in by Mr. Robertson, and Mr. Justice Whiting delivered a dissenting opinion in the case. This case is to be found at page 749 of volume 11 of the Hawaiian Supreme Court Reports, and you can find it in the Supreme Court library in the basement of the Capitol at Washington.

My object in sending you this is simply to intensify the fact that those of us who have given the matter attention are in no sense overrating the facts, even though they seem to be almost incredible, and therefore submit them to you, either that you can make them an exhibit in support of my statement or as a reference, where you can verify the statement if you deem it expedient to do so.

There can be no question, first, that all the members of our supreme court should be Americans, and second, that the statute should provide that, if in the case of sickness, absence, or other disqualification on the part of any justice of the supreme court, that the chief justice, or in case he be disqualified, the presiding justice, should be authorized to swear into office for that case some member of the circuit court bench, who during that case should have all the rights, privileges, and power conferred upon the regular justices of the supreme court, or that the supreme court membership should be increased to five members, so that a quorum could not be broken by the sickness, absence, or disqualification of a member.

Mr. Justice Galbraith is practically the only American on the supreme bench. Mr. Justice Perry is a Portuguese, born in the islands. Mr. Justice Frear was born in Oakland, Cal., and was brought to the islands when he was two years old, and has been here practically ever since. All his interests, all his family ties and family interests, social, financial, and personal, are measured by the same mental horoscope that is characteristic of any other native to the manor born.

With regards, I am,

Very respectfully, yours,

GILBERT F. LITTLE.

EXHIBIT —.

REPORT OF THE GOVERNOR OF THE TERRITORY OF HAWAII

EXECUTIVE CHAMBER, TERRITORY OF HAWAII.
Honolulu, September 30, 1901.

SIR: I have the honor to transmit, in response to your letter of July 5, the following report of the affairs, progress, and development of the Territory of Hawaii for the fiscal year ending June 30, 1901.

POPULATION.

From the United States Census Report for 1900, and other sources, I have obtained the following interesting data on this subject:

Increase of population, by sexes, from 1890 to 1900.

	1890.	1900.	Increase. Per
Males	58,714	106,369	47.655
Females.....	31,276	47,632	16.356
Total.....	89,990	154,001	64.011

Percentage of sexes to whole population, 1890 and 1900.

	Males.	Females.
1890.....	65.2	34.8
1900.....	69.1	30.9

Distribution of population, by islands, in 1890 and 1900.

	Hawaii.	Kauai and Niihau.	Maul. Molokai. and Lanai.	Others.
1890	26,754	11,859	20,183	1,194
1900	46,843	20,734	27,920	1,504
Increase	20,089	8,875	7,737	310

Number of females to 100,000 males, 1890 and 1900.

1890	59.28
1900	44.75

Relative decrease..... 8.48

Population by sex, nativity, and race, 1900.

males	106,369
females	47,632
native born	63,221
foreign born	90,780
foreign white	12,749
Total	154,001
Native white:	
Native parents	37,918
Foreign parents	16,223
Chinese	25,767
Japanese	61,111
negroes	233

The designation "Native white—native parents," used in the report of the United States Census for 1900, means native white persons having both parents native born, one parent native born, and one birthplace unknown, or both parents, birthplace unknown; while the designation "Native white—foreign parents," means native white having one or both parents foreign born.

Hawaiians and part Hawaiians are included with native-born white persons having one or both parents native born, as "Native white."

Increase of native and foreign born population from 1890 to 1900.

	1890.	1900.	Increase.	Per cent.
native born	48,117	63,221	15,104	31.4
foreign born	41,873	90,780	48,907	116.8

Percentage of native and foreign born to whole population.

	Native born.	Foreign born.
1890	53.5	46.5
1900	41.1	58.9

Number of foreign born to 100,000 native born.

1890	87,023
1900	143,592
Relative increase	56,569

Percentages of native white—native parents; native white—foreign parents; foreign white, and Chinese, Japanese, and negroes of total population, 1900.

Native white—native parents	24.6
Native white—foreign parents	10.5
Foreign white	8.3
Chinese, Japanese, and negroes	56.6

Percentage of native and foreign white of whole population for 1890 and 1900.

Year.	Total white.	Native white.	
		Native parents.	Foreign parents.
1890	67.4	33.3	13.3
1900	43.4	24.6	10.5

This decrease is due to the large immigration of Chinese and Japanese, particularly the latter.

Males and females of all nationalities in 1890 and 1900.

	Males.		Females.		Total.
	1890.	1900.	1890.	1900.	1890.
Hawaiians	18,364	15,642	16,072	14,157	34,436
Part Hawaiians	3,085	3,971	3,101	3,886	6,186
Caucasians	11,889	16,581	8,511	12,288	20,700
Chinese	14,522	22,296	779	3,471	15,301
Japanese	10,079	47,508	2,281	13,603	12,390
South Sea Islanders	404	263	184	152	566
Negroes		158		75	
Other nationalities	371		48		419

This table exhibits the annual increase for a period of three years of receipts on account of real and personal property subject to ad valorem taxes, and an account of insurance business and certain classes of personal property subject to special taxes, and the annual decrease for the same period of poll, school, and road taxes. An income tax is imposed by the legislature of 1901 by which \$287,366.80 was realized during the fiscal year.

COMMERCE.

The shipments of merchandise, not including specie, for the past year are less in value than that of the shipments of the year ending June 30, 1901, by \$3,260,695.43. All of this falling off in the value of merchandise shipped from the Territory during last year, except \$6,885.02, is chargeable to the one item of sugar and is due solely to decrease in the market value of that article and not to a diminished production, the sugar shipped the past year being 720,553,357 pounds, against an aggregate shipment of 690,879,234 pounds of the year before, or an increase of 29,674,123 pounds.

The following items also show a falling off from the figures of value of the preceding year, as follows:

Ice	\$7,105.00
Office	185,253.27
Coal	71,503.94
Honey	3,315.00
Molasses (none shipped the past year)	4,615.00
Fruit	10,006.65
Curios (none shipped the past year)	1,698.00
Total decrease	283,494.86

The following items show an increase in value of shipments of the preceding year, as follows:

Hides.....	\$1.41
Sundries.....	195.19
Total.....	196.60

The difference of \$86,885.02 shows the actual falling off in value of shipments other than sugar of the past year as compared with the year before.

Of the total value of shipments, not including specie, from the Territory during the past year of \$24,793,735, \$38,813 represents the value of foreign merchandise shipped, as against a value of \$24,754.84 of domestic merchandise shipped. Of this total value the shipments to foreign countries were worth \$63,547, and those to the mainland were worth \$24,730,188.

I am indebted to the courtesy of the collector of customs for the district of Hawaii for the following tables:

Total value of all articles exported from the Territory of Hawaii and imported from foreign countries for the year ending June 30, 1902.

In the matter of conveyances to the government the question arose whether the Federal Government or the Territory should be the grantee in such cases. After some discussion an opinion by Hon. Willis Van Devanter, United States Assistant Attorney-General, was adopted by the Interior Department to the effect that where such conveyances were for public purposes they should be made to the Territory, leaving it an unsettled question as to which government should be the grantee in other cases.

The water supply for Honolulu is obtained partially from mountain streams, the water of which flows into the mains by gravity, and partially from artesian wells in the city, the water of which is pumped directly into the mains or into reservoirs, whence it flows into the mains by gravity. During the fiscal year it was necessary to pump 1,663,370,668 gallons, which required a consumption of 1,333 tons of coal.

The government conducts waterworks for supply of householders at Hilo and Laupahoehoe, island of Hawaii, at Kahului and Wailuku, island of Maui, and at Kaloa, island of Kauai. It is constructing waterworks for the supply of householders at Lahaina, island of Maui.

PUBLIC SURVEY

The following data are taken from the annual report of the surveyor.

The record of field work shows between 17,000 and 18,000 acres surveyed and subdivided for settlement purposes; also surveys for new roads, settlement of boundaries, water resources, resurveys of public lands, and topographical work; also city surveys of lines for widening and extending streets, street grades, grades for water pipes and levels for fire plugs, car-track grades, lines for poles for electric wires, street plans and profiles showing position and elevation of car tracks, sewers, and sidewalks, reports on applications for building permits, and surveys of government and private properties required for street improvements.

OFFICE WORK.

The general work of the office has been carried on in quite the same lines as those prevailing in January, 1901.

The number of maps, tracings, plans, prints, and descriptions applied for by the various departments of the government have shown a marked increase during the past year. The field parties have required many tracings, copies of former surveys, and such data. The various public improvements have necessitated much work on our part in furnishing street lines, grades, descriptions of all lands taken for public purposes, and in most transactions reports were submitted giving areas, valuations, and recommendations. The correspondence shows that 411 letters were written, many of which were carefully considered reports on applications for the acquirement of government lands by purchase, lease, or otherwise.

Three hundred and ninety-eight grants have been platted in on the registered maps, and there now remains but the adding of a limited number of government deeds to bring this important work up to date.

Block tracings of the principal portion of Honolulu, giving the frontages, areas, etc., have been furnished to the tax assessor's office. This involved a vast amount of computations, as the numerous holdings are mostly very irregular in shape. Total area, 1,450 acres.

The large map of the island of Hawaii, compiled from the numerous maps and records on file in this office, has been completed. This valuable map is drawn to a

of 10,000 feet to the inch, and in addition to the usual information represented on our lines showing approximate heights at intervals of 300 feet. The new of Oahu, now under compilation, is nearly completed.

Number of new maps, tracings, and charts registered and filed	143
Number of copies of surveys furnished	187
Number of field books registered and filed	34
Number of tracings furnished (not including tracings and sketch plans attached descriptions of surveys furnished)	175
Number of blue prints furnished	580
Number of reports and official letters	411

The foregoing gives but a general idea of the routine work of the office, as there is much done in the way of checking old surveys and giving information on a great variety of matters relating to private and government lands not referred to in the foregoing items.

As a general rule, all matters where land boundaries are in dispute require much more careful study.

HYDROGRAPHIC SURVEYS.

The U. S. S. *Albatross*, Capt. Chauncey Thomas, has been engaged in these waters during the months of April, May, and June, making soundings and dredgings that will be of great interest.

We have endeavored to assist in this work by furnishing copies of such maps and tracings of all the islands as we have at hand. Captain Thomas will furnish this service with the results of the survey at an early date, which courtesy will be highly appreciated.

Some work has been done to bring the chart of Honolulu Harbor up to date.

A thorough survey of Kapua entrance and approaches at Waikiki, south coast of Oahu, has been completed to facilitate the landing of the Pacific cable.

TIME.

The local standard and Greenwich time have been obtained from transit observations and the steam-whistle signal given as usual. It is to be hoped that we may in the near future secure a standard time ball apparatus.

Honolulu is now an important shipping point, and needs this improved time signal for navigators, as well as for others.

TRANSFER OF PROPERTY TO THE UNITED STATES COAST AND GEODETIC SURVEY.

On March 8, acting under instructions received from the Superintendent of the United States Coast and Geodetic Survey, Prof. W. D. Alexander made a formal request for such property and records as were considered to properly belong to a coast and geodetic survey.

In compliance with this request we have transferred the 12-inch transit, which has been used solely for triangulation purposes, and something like ninety volumes of reports, scientific works, mathematical tables, etc.

It was found impracticable to transfer any of our own records for the reason that the geodetic and land surveys that have been made here in the past are so inextricably intermingled that they can not be separated.

PLANS FOR FUTURE WORK.

The work for the coming year will be determined by the necessities of the case. The homestead surveys will be pushed rapidly and the city work will be advanced as opportunity offers.

Forest reservation line to be established along the 2,100-foot elevation in South Oahu and a survey and map made of the Makai section, showing topographical and other features in order that the land commissioner may offer further clearing permits for agriculture.

Five thousand acres of Kioloakea, Puumakaa, and Puueo, in Kau, Hawaii, is to be set apart for a forest reservation and the remainder laid out into homesteads.

Statement of expenditures and receipts of the survey department.

RECEIPTS.

Published maps.....	
Tracings.....	
Blue prints.....	
Rating chronometers.....	
Data furnished.....	
Total.....	

[Extracts from the report of Curtis J. Lyons, esq., Territorial meteorologist.]

Records of daily rainfall have been received from about eighty stations, with records being made by voluntary observers, and the monthly totals published in Honolulu papers about the 15th of the succeeding month. About one half of the rain gauges required have been furnished by the Government, the other half by private property. Copper gauges are in a great measure replacing the older tin ones which are not lasting, and fresh measuring glasses are furnished in case of breakage.

Six observers are furnished with maximum and minimum thermometers, and with a mercurial barometer at Pepeekeo, Hilo. These observers report daily temperature, also direction of the wind and brief notes of the weather. Three observers also make daily observations of humidity and report thereon.

The observations at the central office, at 1508 Alexander street, have been kept and somewhat enlarged in scope, involving about thirty entries a day. This covers the nineteenth year of the series. The publication of these observations, as well as those at the outstations in permanent form, begins with the year 1892 and goes back with the year 1898, this last having been published within the last twelve months. Every month a summary, including the averages and changes and comparison with normal meteorological conditions, is published in the local papers. This includes also the average temperature and other items from outside stations, especially the percentage of district rainfall as compared with the normal.

A pamphlet is now in press giving the entire monthly rainfall of each station from the beginning of observation when such beginning was before 1897, and coming down to the close of 1900. In some cases this covers a period of twenty or more years. The table gives the normal average for each month of the year and the average yearly rainfall for each station. As this table covers the entire group, it is hoped that it will be found very useful for the agricultural interests of the Territory.

The United States Monthly Weather Review, the organ of the Weather Bureau at Washington, publishes very full reports which are forwarded from here, and the editor has shown an especial interest in this station. The Hydrographic Office also receives reports from this office. Our published annual reports are sent to the leading observatories and weather offices abroad, and the publications received in exchange have built up an extensive library for this office, which should be well cared for, for the benefit of future students.

TIDES.

The automatic tide gauge in Honolulu Harbor is under the charge of this office and is in continuous service, this being one of the important stations of the world. Duplicates of the records have been sent to Washington, up to April of this year, to the tidal division of the United States Coast and Geodetic Survey. The apparatus has been thoroughly overhauled of late and is in good order, but needs a new shelter house. Seismic waves are a special object of record, and a very interesting one has lately occurred. The mean sea level is also an especial matter of study and has shown some remarkable variations in the last twelve months. The rising and falling of the water in our artesian-well subterranean reservoir is also noted.

The following brief statement of the organization and methods of public survey department was prepared also by Mr. Lyons:

The Hawaiian Government survey was primarily and is still mainly a cadastral survey. Its initial object was to locate on general maps all titles that had previous inception been issued by the Government, and thereby account for all the land in the then Kingdom, and enable the Government to act intelligently in any disposal or might make of the remainder. And also to survey in detail all Government boundaries and all lands subdivided for sale or lease by the Government, and to assist in lining traditional but unsurveyed boundaries of lands, both Government and private. A special need of such a survey was very much increased by the fact that all the metric surveys by which title had been given were simply detached independent surveys, unconnected with any general system or common reference points.

The authority for it was derived from the law which directed the minister of the interior to make all necessary surveys of Government lands, and from the appropriations which have from time to time been made by the legislature.

As a matter of wise public policy there has been added to the work of the survey department of making all maps needed for public purposes, also that of making exact measurements and records needed for public use. The experience of the country has amply justified this policy. Of such exact measurement work may be mentioned tide observations, time observations for public standard, meteorological, magnetic, topographic, and hydrographic.

As is necessary in all reliable general surveys the work is based on a general triangulation, which serves as a foundation for all kinds of surveys which are or may yet be needed, including hydrographic, topographical, and geological. This triangulation is made in thorough accordance with the methods and principles of the United States Coast and Geodetic Survey.

The system of land division in the islands is complicated, and from the nature of the country irregular, but it has been scientifically dealt with, and any attempt to revolutionize the survey system would be disastrous. The triangulation points serve the same purpose to the location of lands that the meridians and parallels do on the United States land system.

As the land was originally minutely subdivided by the Hawaiians themselves, and the ownership was continued when Government titles were given, a great many maps have been needed, considering the size of the country.

The survey was begun in 1871, under Prof. W. D. Alexander as surveyor-general, and then by W. Hutchison being minister of the interior under Kamehameha V. The number of skilled employees has varied from three to a dozen. It has been necessary for a portion of them to understand the Hawaiian language, partly for the sake of understanding the land-commission records, most of the surveys and awards being in Hawaiian, and partly for communicating with Hawaiians who consult the office. The survey has been a general information office for the public on all matters connected with lands, also for scientists, naval officers, and others from abroad. In the development of the country it has fulfilled an important part.

The courts of law and the legal fraternity make constant use of the maps and records of the survey. The poorest Hawaiian can come and find, free of cost, the probable location or the existence or the nonexistence of such titles as he may be concerned in. The peculiar conditions of the country have made such matters peculiarly dependent upon maps, largely from absence in a large proportion of cases of boundary fences.

All the surveying connected with the development of a city like Honolulu, including leveling and grading, has been done by this office. Preliminary surveys of most of the harbors have been made. Many of these were published by the United States Hydrographic Office.

The unit of measurement adopted is the foot, as being adapted to public needs, and the standard of direction the true meridian. As the old surveys were in chains, and the bearings simply local magnetic in a country where local attraction was prevalent everywhere, the work of reduction has been great.

As there are over 2,000 maps on file in the office, and all the documentary matter connected with them, it will be seen that the office is one of great importance to the territory. Where an office has been carried on in the manner indicated it becomes almost impossible to divide its records among new organizations, and a policy of copying would seem better than that of absolute removal of any records.

In the matter of ownership of lands the bureau has confined itself mainly to original titles, i. e., to the location and identification of land commission awards and government grants. No attempt has been made to keep track of transfers and division of private lands, except to procure and place on file copies of city tracts placed

on the market by real estate dealers. This work, if undertaken, should have a supplementary division.

The triangulation of the group is practically completed and theoretically handed over to the Coast and Geodetic Survey. But it should be far more perfect in respects, especially as to records and monuments. The Territorial survey needs these for its own purposes.

The general maps need more complete compiling and very many need reworking to so much consultation.

The boundaries of Government lands need detailed delimiting surveys and descriptions. There are many of these which, while laid down on the maps from such as are at hand, still are not definitely marked on the ground, and are not accurately described by bearings and distances of the lines.

PUBLIC LANDS.

There is an increasing demand for small holdings and the work of the commission of public lands promises to increase steadily if funds are available.

The following data are taken from the annual report of Mr. Edmund S. Boyd, commissioner of public lands.

Land transactions for the year ending June 30, 1902, showing lands taken up under various systems of the land act of 1895 (other than cash sales and Olaa purchases under special conditions of Part IX).

Land districts.	Right of purchase lease.			Homestead.	
	Number.	Acres.	Value.	Number.	Acres.
First—Hilo and Puna	72	4,568.40	\$26,238.18		
Second—Hamakua and Kohala	13	699.78	9,342.57		
Third—Kona and Kau	11	1,319.31	2,375.39		
Fourth—Maui and Molokai	1	92.46	924.60		
Fifth—Oahu				33	
Total	97	6,599.90	\$38,880.74	33	

Under the homestead lease system no appraisements are made. Rights are inalienable.

CASH SALES.

Lot 27, Part C, Olaa, Puna, Hawaii, 4.20 acres \$3
Waiohina, Kau, Hawaii, 3.35 acres 3

The above shows transactions under cash sales for the year.

Lot 27, Part C, Olaa, was an undesirable remnant bounded on all sides by private lands, and of no good to hold. It was decided to be sold to the highest bidder and brought in \$75 an acre.

The land in Waiohina was sold for church purposes to the Anglican Church in Hawaii.

LAND LICENSES.

Licensee, Henry Waterhouse & Co., trustee for J. H. and Phoebe K. Raymond, location, Polipoli Spring, Wailuku, Maui; term, twenty years; annual rental, \$200.

This license was granted to the above parties for the purpose of conducting the surplus water from Polipoli Spring, which is 6,000 feet above sea level, by means of pipes, to more advantageous points for supplying their cattle with water, thus avoiding the necessity for their traveling long distances and to such a great height to the same.

They to construct and maintain watering troughs on public lands along its line. This license was also granted in the interest of the development of grazing and agriculture and the enhancing of the values of the public lands of Kamaole, Kahikolu, and Kanaio.

This land was leased for grazing purposes. The area designated may mislead such persons that not familiar with the land of Manuka, and to criticise the action of this Department in leasing a large area for such an "inadequate" or, more properly saying, insignificant figure. To justify action, it is well to explain the situation fully, viz: The land of Manuka is situated in the district south Kona, and its boundary on the west is the dividing line between the districts of South Kona, Kau, and wholly covered with a-a rock, with the exception of about 500 acres of fairly good grazing land. In the disintegrated lava there has in recent years sprung up a very dense forest of a (an indigenous tree), which covers about 2,000 acres, and may in time cover a greater area. This 2,000 acres of forest land is impracticable for any purpose, even grazing, as the rugged character the a-a rock prevalent in the Kona district is dangerous to life and limbs of any animal kind except goats. The rest is simply barren lava waste devoid of any vegetation, arid and waterless. Consequently, it simmers down to the fact that the lessee has only practically 500 acres of land from which he can realize anything. The lease also requires the lessee to preserve the forest and to reforest in places where same appears in state of diminution, and to keep land where practicable clear of lava.

This land was leased in two tracts, namely: (1) All that forest land extending from the eastern end of the Ahupuaa of Honomanu to the western brink of the gulch of Wailua-iki and from said boundary of Haiku above. (2) All that forest land extending from the western brink of Wailua-iki gulch to the western brink of the gulch between the lands of Kapaula and Puukaa (or Akaa) and extending from the ocean to boundary of Haiku above. Both are situate on the northeastern side of the island of Maui.

These leases were sold at public auction under the following conditions as to forest, etc.: Lessee is obliged from cutting or allowing to be cut any forest trees, except for fencing and domestic purposes, to be used on premises or for development, storage and transportation of water, to replant wherever it appears in state of diminution. It also prohibits the running of cattle on the premises, the extermination of wild cattle; lessee to build and maintain a substantial fence along the per side of the old Government road and to prevent stock from trespassing on the land; and not to interfere with vested interests in water on leased premises; to furnish homesteaders with water for domestic and irrigation purposes at convenient points. These are the principal conditions of the lease.

Main purpose of course, is for water, an article very much sought after by the vast sugar enterprises the west of this island.

This land, though of an extremely rugged and almost inaccessible character and impossible of cultivation on this account, holds a large quantity of water which goes to the sea, benefiting nothing to anybody, and the land has never to my knowledge brought any revenue to the Government.

Under these conditions I think the Government is very fortunate in deriving a revenue from these lands; but this is not all. By these leases the Government is insured against the destruction of the rest by the inroad of cattle, or from fires.

Leased under forest conditions. To fence (repair and maintain same) the whole area, to prevent inroad of cattle, to preserve and increase the forest. These lands have no natural water supply, depending mostly on rain for moisture. What water the lessees can conserve and impound is of course appurtenant thereto.

Receipts public lands office from January 1 to June 30, 1901.

LAND REVENUE.

<i>Leases:</i>	
General leases.....	\$42,977.54
Right of purchase leases.....	2,750.31
Olau leases.....	240.31

LAND SALES.

Purchase, right of purchase leases.....	\$20.00
Special agreements.....	6.00
Homestead.....	2.00
Olaa lots.....	1.00
Kaimu.....	2.00
Cash sales.....	5.00
Total.....	31.00
Land revenue.....	50.07
Land sales.....	31.00
Total.....	81.07

The above shows receipts of this commission for the six months ending June 30, 1901, which have not as yet been reported. A good showing is made especially in land sales. You will notice by comparing this statement with the one heretofore that the amount is comparatively greater than for the year ending June 30, 1900. This is occasioned by the purchase price being paid in on agreements falling due during this period.

Receipts public lands office during the year ending June 30, 1902.

LAND REVENUE.

Rents:	
General leases.....	\$95,577.00
Right of purchase leases.....	5,200.00
Olaa leases.....	10.00
Puukapu leases.....	2.00
Miscellaneous.....	1,200.00
Interest:	
Homestead.....	255.00
Special agreements.....	1,087.00
Olaa agreements.....	61.00
Fees.....	65.00
Total.....	103,880.00

LAND SALES.

Purchase, right of purchase leases.....	\$9,518.00
Special agreements.....	1,902.00
Homesteads.....	1,200.00
Olaa lots.....	12.00
Cash sales.....	315.00
Total.....	13,027.00
Land revenue.....	103,880.00
Land sales.....	13,027.00
Total.....	116,907.00

The above shows an increase in the receipts of this commission for the past year, and has fulfilled all predictions made in our annual report of 1900.

Expenditures of the commission.

	Appropriation.	Drawn.	Balance.
Salary of commissioner.....	\$7,200.00	\$3,600.00	\$3,600.00
Salary of secretary, clerks, subagents, rangers, etc.....	18,950.00	8,920.00	10,040.00
Incidentals.....	5,250.00	3,360.10	1,889.90
Preliminary roads and trails.....	7,000.00	7,000.00
Expenses filing boundary certificates.....	300.00	70.60	229.40
Total	38,710.00	15,950.70	22,759.30

The above table shows a very small balance in our appropriation for incidentals, amounts to less than the pro rata for the year.

Expenses for printing and advertising have been quite heavy, as new blanks had to be printed to conform to section 73 of the organic act. Activity in land transactions also occasioned a heavy expenditure for advertisements, and can not be avoided unless we curtail land transactions; to do so would show a lack of progressiveness.

Nothing has been spent on preliminary roads and trails. The difficulty which this office has to meet in dealing with this question has yet to be solved.

It is a criticism sometimes made on work of this office that lands have been laid out in advance of the construction of roads, whereby smaller value attached to the land itself and the settler was hampered in the operations for the lack of suitable roads, both of which statements are undeniably correct.

On the other hand, if such opening of lands were held back until suitable roads are completed it would cause an indefinite delay in land transactions, and the results so far achieved would not now be in evidence.

This appropriation can only be expended as designated by the item; that is to say, for "Preliminary roads and trails." We are about to construct some very necessary work under this appropriation during the coming year.

The problem which this office has to face is, whether to delay indefinitely the opening of public lands until good roads can be completed or to meet the demand for lands by rougher immediate means of access, with the expectation that improved roads will follow the settlement of lands. I say supply the demand as an initiative and the rest will shape itself.

SURVEY WORK.

This work is still under the supervision of the Government survey office.

A total area of about 8,000 acres and averaging 10 to 50 acres a lot has been surveyed and subdivided during the year.

Statement of land patents issued.

	Number issued.	Acreage.	Consideration.
Homestead leases.....	8	135.23	\$1,316.95
Right of purchase leases.....	54	2,878.09	15,454.69
Time payment.....	25	977.64	13,029.45
Cash freehold.....	4	833.70	1,271.55
Cash purchase.....	5	822.57	36,011.00
Cash and exchange.....	16	1,047.56	1,913.00
Wakapu lots.....	1	16.47	41.15
Total	113	5,711.26	69,087.79

Land patents issued on land-commission awards:

Number issued.....	15
Acreage.....	27,838.26
Commutation.....	\$79.98

From the present outlook and from the applications on file, the number of land patents to be issued on confirmation of land-commission awards during the coming year will far exceed in number those of last year.

AGRICULTURE.

At the Government nursery the following forage plants have been cultivated: Alfalfa, red clover, crimson clover, teosinte, sorgo, buffalo grass, Kentucky blue grass, maize, and pencilleria, records of which are kept by which information is gained as to the value of the plants for cultivation here.

In the same grounds experiments have been made in the cultivation of Hawaiian and Samoan taro and yams.

NEW INDUSTRIES.

Sisal.—Through the agency of the Territorial bureau of agriculture and forestry the cultivation of sisal, *Agave sisalana*, a fiber plant, was taken up several years ago, and at the present time there is one plantation with several hundred acres of sisal under cultivation on the island of Oahu, another of considerable area has just been started on the island of Molokai, and a third is about to be begun on the island of Kauai. The Oahu plantation is nearly ready to take off its first crop and is putting up its machinery.

As the sisal plant will thrive in rocky and comparatively barren soils, its successful cultivation will be of importance in utilizing such lands as well as in adding to the products of the Territory and furnishing a new demand for labor.

It is to be hoped that success in the production of fiber suitable for cordage will promptly lead up to the establishment of local factories for its manufacture.

Castor oil (*Ricinus communis*).—This plant has grown wild for many years in different parts of the islands with great luxuriance. It is a perennial in this climate.

Mr. Koelling has 80 acres under cultivation on the island of Oahu and feels encouraged to double the extent of his plantation. He estimates a yield of 2 tons of beans per acre of his best land and 1½ tons from inferior land. The percentage of oil by hydraulic pressure is 45 per cent and by the benzine process 55 per cent. This would give a possible 275 gallons of oil per acre, worth in San Francisco \$261.25 for No. 1 grade and \$220 for No. 2 grade.

The plants are set 4 feet apart and are cultivated by hoeing and horse plowing.

Vanilla.—Experiments have been made from time to time in the cultivation of the vanilla bean and its preparation for the market with little other result than the demonstration of the suitability of our soil and climate for its production. During the past year a small plantation has been started in South Kona, island of Hawaii, for its cultivation.

Tobacco.—Although tobacco has been cultivated in these islands for many years in a desultory way the product has never been properly cured and the question of the suitability of soil and climate for the production of fine grades is still unsettled. The fact, however, that tobacco grows wild in many parts of the group would seem to be encouraging.

Mr. Smith, in charge of the Hawaii experiment station, reports that he is planning to experiment with Sumatra tobacco at the station.

PINEAPPLE CULTIVATION.

The business of raising and canning pineapples is a growing one and promises considerable development. In its several varieties the pineapple has a wide range of soil and elevation. At present there is but one cannery, which has put up the past year 6,200 cases, which have been sent to the mainland.

SUGAR.

The following information in relation to the use of fertilizers in the cultivation of sugar cane, the yield of sugar per acre, and the total yield for the past seven years, the yield per acre by islands in the year 1901, and the comparative statement of the yield of irrigated and non-irrigated plantations for the past seven years were furnished by Mr. C. F. Eckart, the director of the experiment station of the Hawaiian Sugar Planters Association:

During the year ending September 30, 1901, approximately 25,000 tons of mixed fertilizers were applied to Hawaiian sugar lands. In addition to these some 15,000 tons of special fertilizers, such as tankage, fish scrap, bone meal, nitrate of soda, and various forms of lime were also used, making the average fertilization with bought material, per acre, about 1,000 pounds. The waste products of the sugar mill, such as mud-press cakes, molasses, and furnace ash, are largely conserved and applied as manures, along with the accumulated refuse from the stock pens, on many plantations. The amount of the latter material, used in this way is not definitely known, but annually reaches into thousands of tons.

The question of fertilization has been closely studied by the managers of the various plantations, and owing to the diversified conditions as regards climate and soil, practices vary materially respecting times and methods of applying manures on the different estates. The forms in which the separate fertilizing elements are applied are influenced by a consideration of the rainfall and elevation of lands to be treated, while the proportions of the ingredients to be used are measured by soil deficiencies and the requirements of cane.

Exhaustive chemical analyses of Hawaiian soils have been made and the demands made by the crop upon the plant foods have been carefully investigated. An idea as to the manner in which fertilizing formulas vary on the different islands may be gained from the following table:

	Potash.		Phosphoric acid.		Nitrogen.	
	Lowest.	Highest.	Lowest.	Highest.	Lowest.	Highest.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
Maul.....	4.13	17.24	5.10	14.26	5.04	9.70
Kauai.....	4.89	10.10	5.68	9.39	6.66	9.91
Hawaii.....	4.03	22.54	5.29	14.61	3.25	10.42
Oahu.....	8.50	14.66	7.01	15	4.70	7.10

While the judicious application of suitable fertilizers to the sugar lands of the islands has played an important rôle in the phenomenal yields of many plantations, rational cultivation, particularly on those dependent upon rainfall, has added much to the annual output. Unfortunately the extent to which cultivation may be practiced is limited on many plantations by an inadequate supply of labor.

The islands are particularly free from the serious insect pests common in most sugar-producing countries, and steps have been taken, by establishing a control over cane importations, to lessen the danger of introducing such evils from other countries. The most injurious pest with which the planter has to combat is the cane borer, *Sphenophorus obscurus*, although recently the effects of an insect termed "leaf-hopper," *Fulgoridæ*, have been somewhat pronounced on several estates.

HAWAIIAN INVESTIGATION.

Sugar yields of the Hawaiian Islands.

1900.....	89,682	124,257	6.22
1901.....	48,878	143,943	6.92

The following statement of averages in relation to sugar production were estimated from the reports of three of the largest plantations on the island of Oahu. The items of total cost of irrigation per acre, of irrigation per ton of sugar, of cultivation per acre, and cultivation per ton of sugar were taken from the report of the Ewa plantation alone, other reports not furnishing figures on these items:

Statement of averages of several plantations on the island of Oahu for crop of 1901.

Average yield per acre in tons of sugar.....	8.44
Average tons of cane per ton of sugar.....	8.62
Average pounds of sugar per ton of cane.....	232.31
Average cost of production of sugar per ton.....	\$41.00
Average cost of irrigation per acre.....	\$35.72
Average cost of irrigation per ton of sugar.....	\$3.30
Average cost of cultivation per acre.....	\$265.00
Average cost of cultivation per ton of sugar.....	\$24.28
Average cost, man and containers, per ton of sugar.....	\$4.38

The average cost of production of a ton of sugar on Ewa plantation alone was \$34.94, divided as follows:

On account of labor.....	\$18.45
Other expenses.....	16.49

Distribution of seeds.

Through the courtesy of the Hawaiian Delegate to Congress a large variety of vegetable seeds have been received from the Department of Agriculture and have been distributed throughout the Territory. Under the Territorial appropriation for the importation of seeds a variety of seeds of forage plants, seed potatoes, and seed of many varieties of forest trees have been procured and distributed.

Through the kindness of the Japanese consul at Honolulu several bags of Kinshu rice seed have been procured and distributed to rice planters. As this variety grows on dry land, and under favorable circumstances is reported to yield from 100 to 400 per cent more than any other variety, its introduction may be of considerable public importance.

AGRICULTURAL EDUCATION.

A fine beginning in scientific instruction in agriculture has been made at the Kamehameha school for boys. Mr. Kraus, the teacher, is carrying out a practical system illustrated by actual work in the field and garden. The garden produce for the three Kamehameha schools is raised by the pupils in the course of agriculture, who also conduct a dairy under the same instructor, the product of which is consumed by the schools.

At the Hilo Boarding School (private) and the Lahainaluna Seminary (government) there are courses in agriculture, illustrated by field work of the pupils. The Normal School in Honolulu has a course in agriculture, and the study of this subject is being introduced as rapidly as opportunities permit in the public day schools of the Territory.

FARMERS' INSTITUTE.

In January, 1902, the first Farmers' Institute of the Territory was organized at the Wahiawa colony, Oahu, with a good membership.

FERTILIZERS.

There are two companies in Honolulu manufacturing fertilizers mainly for use in the Territory. The following information is furnished by these companies:

The Pacific Guano and Fertilizer Company manufactures high grade commercial fertilizers, acid phosphate, sulphuric acid, and phosphoric acid.

The factory is modern in all respects and has in use the latest and most improved machinery.

The plant consists of two sulphuric acid works with a capacity of 2,500 tons per annum each; acid phosphate factory, capacity 10,000 tons, and fertilizer works, with an annual capacity of 15,000 to 20,000 tons.

It operates the guano fields on Laysan Island and imports from there annually from 3,000 to 6,000 tons of guano; besides this there are used every year about 2,000 tons of Florida phosphate.

The Hawaiian Fertilizer Company, Limited, sell annually about 4,000 tons of nitrate of soda, imported from Chile, to be used as a fertilizer in its raw state. Before leaving the factory it is ground and screened.

Sulphate of potash, nitrate of potash, and kainit are imported from Germany. Sulphate of ammonia and double superphosphate are procured in England, which is the only country that manufactures sulphate of ammonia on a large scale. It is a by-product of coal-gas works and is the most expensive material used as a fertilizer, costing in England about \$60 a ton. Fish guano comes from Alaska, and the packing houses of the Northwest and the Middle West supply dried blood, tannage, and bone meal.

All the fertilizers imported are raw materials, none of which are applied in the raw state with the exception of nitrate of soda. The average high grade cane fertilizer contains as many as five or six different raw materials.

The sales of this company last year were 17,840 tons, worth about \$779,596.11.

LIVE STOCK.

During the year the Hawaiian Live Stock and Breeders' Association has been organized for the improvement of live stock breeding, the introduction of new pasture grasses, and the preserving and restoring of such forest growth as may be beneficial to grazing lands.

Such an organization has been much needed in the past. It is likely to have a very beneficial influence toward the improvement of ranch management in the Territory, which heretofore, with few exceptions, has been conspicuously without system or any application of scientific principles.

Consumption of Hawaiian cattle and sheep in Honolulu.

	Number.	Value.	Weight.	Average weight.	Average price.
			<i>Pounds.</i>	<i>Pounds.</i>	
Cattle	4,996	\$225,399.75	2,352,841	422.7	\$4

NOTE.—The weights mentioned in the foregoing tables are for dressed meats.

FORESTRY.

Many kinds of deciduous trees of northern latitudes have been tried in different parts of the Territory and generally without success at low

elevations. It is probable that some varieties will do well at higher elevations.

A somewhat similar experience has been had with cone-bearing trees. A few kinds, however, have grown luxuriantly at low elevations where they have been protected and cultivated. Experiments will be made with this class of trees at the higher elevations where the climate approaches that of a more northern latitude. Ironwood (*Casurina quistifolia*) is an exception to other trees of this class. Its range reaches from the seashore to elevations of several thousand feet; it thrives in all kinds of soils, with a preference for beach sand, and stands wind and drought, making a most desirable tree for forestry purposes.

There is a serious increase of insects injurious to trees all over the Territory. This is attributed by experts to the serious decrease of indigenous insectivorous birds, and to the circumstance that many of the forests have become so enfeebled by the presence of cattle and sheep, by which undergrowth is destroyed and the surface roots and lower trunks left exposed to sun and wind, that they have become an easy prey to insect depredations.

Extensive and destructive forest fires occurred in the district of Hamakua, island of Hawaii, during the months of July, August, and September. A long drought had rendered that locality peculiarly favorable to the spread of such accidental fires as might be started. The area burned over is estimated at about 30,000 acres, consisting of public and private lands.

The neighboring sugar planters, under an arrangement with the government, furnished a considerable portion of their laborers for an effort to check these fires. Several weeks were spent in this work and much was accomplished by cutting avenues through the forest and back firing and patrolling the country ahead of the line of fire. The fall rains fortunately began early and gradually extinguished the fires, which the plantation laborers, under the skillful management of Mr. Albert Horner, were substantially holding in check.

It is of extreme importance to this district that an area much larger than the part recently devastated should be forested. The removal of trees for fuel has been very great in years past, and the former streams and springs have been disastrously affected thereby.

On another part of Hawaii, the extreme northern part of the district of North Kona, a forest reservation was made on the 17th of June, 1902, of 74,000 acres, lying between Hualalai and Maunakea, and northwesterly to the sea. This reservation is of lava formation of various ages, and is partly covered with a thin forest growth; this is infested with wild sheep, which are rapidly destroying the undergrowth and threatening the existence of the forest itself. There are a few wild cattle, which are less injurious than the sheep. Both sheep and cattle will be destroyed or removed from the reservation.

It is the intention of the Territorial government to create similar reservations in other localities as opportunity permits.

The visit of Mr. Edward M. Griffith, assistant Forester in the Bureau of Forestry in December last, was of great value to the forestry interests of the Territory. During the few weeks of his visit he made a rapid inspection of the forests of the islands of Oahu, Maui, Molokai, and Hawaii, and thereafter formulated his observations and conclusions in a report which will, I believe, be of material assistance in the organization of a forestry system for the Territory.

I recommend that an assistant forester of the Bureau of Forestry be detailed to study our forests and meteorological conditions with reference to rainfall, water supply, and wind exposure of the several parts of the group and the necessity of foresting areas now exposed, and to assist the Territorial government in organizing a local forest bureau.

Such a bureau should in a few years become self-supporting, and eventually contribute materially to the national revenues. The Hawaiian forests contain a number of beautiful hard woods suitable for furniture and the interior finishing of houses. The lumber of one of these, the koa (*acacia koa*), is in large demand and brings a high price.

Sandalwood is found in various parts of the group. The growth can easily be much increased, and such an enterprise would undoubtedly be most profitable, as the wood has a steady demand in China and is so valuable that it is sold by the pound.

The free distribution of plants by the government nursery reached the number of 32,341.

INSECTS.

INJURIOUS AND BENEFICIAL INSECTS.

The following list, dealing with the more important injurious and beneficial insects of the Hawaiian Islands, is furnished by Mr. R. C. L. Perkins, entomologist in the commission of agriculture and forestry. Many others of some importance in special cases or in restricted localities are omitted.

COLEOPTERA (Beetles).

Fam. CHRYSOMELIDÆ.—*Epitrix parvula*.—This species is well known on the mainland as the tobacco flea-beetle. In these it has proved very injurious locally to the eggplant, and is common in many parts of the forest on the poha (*Physalis*). Probably it has no natural enemies here, but is parasitized elsewhere by a Braconid. From its habit of riddling the leaves with small holes this small beetle is a serious pest in tobacco fields, and would have to be reckoned with in cultivating this plant on a large scale here, since it would probably be soon attracted to these fields. No doubt it is a comparatively recent introduction into these islands, since it was not found by Mr. Blackburn during his six years of entomological work.

Fam. BRUCHIDÆ.—*Bruchus chinensis* and another species.—Introduced in peas, beans, etc., the former at times injurious to these products.

Fam. CERAMBYCIDÆ (chiefly group Plagithmysides, peculiar to these islands).—*Long-horned beetles*.—The larvæ are the "mu" of unsound timber, especially notable in the koa (*Acacia koa*).

Of this family of beetles about 60 species are known to inhabit the islands, and the larvæ of all these are white grubs, which bore in the wood and bark of trees.

Nine of the species have been, no doubt, introduced, but all the rest are peculiar to the islands and are found only in the mountain forests. Of these peculiar species no less than 16 attack the koa (*Acacia koa*) only, 5 the mamane (*Sophora*), 6 the ohia (*Metroniderus*), 4 the alani (*Pelea*), 4 the ahakea (*Bacca*), while the ohia-ha (*Eugenia*), the mamake (*Pipturus*), and the wauke (*Broussonetia*), have each two species peculiar to them; the naio (*Myoporum*), the pua (*Olea*), the kōkō (*Myrsine*), the akala (*Rubus*), and some others but one each. In contrast to this class, two feed on many kinds of wood, whether in the form of wet, decaying logs or of still living trees. One of these, *Egosoma reflexum*, has been noted as attacking the roots of cane and coffee in places previously covered with forest, the larvæ being, no doubt, driven to this by starvation, having remained in the earth after the removal of their natural food.

Of the numerous species of the former class which restrict their attacks, each one to a single kind of tree, the larvæ of only two appear to live in healthy, growing trees. One of these is peculiar to the wauke, the other to the bastard sandal. In

he higher forests of Hawaii, in certain localities, nearly every bastard sandal tree is perforated with the burrows of this insect, but the trees flower and seed freely and are certainly not destroyed unless after many years.

None of the many other species, including the 16 species peculiar to the koa, attack healthy trees, but when a tree is directly injured by fire or ax, or gnawed by goat, deer, or cattle, or indirectly, by the destruction of the underbrush, which exposes the roots to the heat of the sun and inducing a sickly condition, these beetles are attracted in numbers and, breeding with great rapidity, hasten its destruction. It is not unusual for the owners of forest lands to attribute the destruction of their trees solely to the larvæ of these beetles, whereas the injuries caused by running stock in the forest are the primary cause of this destruction, the insects only hastening the decay of trees already sickly and doomed. In virgin forests, untrodden by cattle and untouched by fire or ax, one may spend many weeks without seeing a single individual of the beetles, unless one chances on a tree in a natural state of decay, whereas in adjoining forests occupied by cattle hardly a tree of certain kinds is free from attack. Moreover, the evolution of nearly 60 allied species, so modified that their relationship with foreign forms is very remote, must have required vast ages for its accomplishment, and were they as destructive under natural conditions as under those induced by man all the trees attacked by them would have been exterminated ages before these islands were inhabited by him.

At the present time the various species of the Plagithmysiæ are parasitized by two species of Braconid flies, one a recent, the other an older importation. Both freely attack the introduced Cerambycids as well as the native, and both are continually extending their range and increasing in numbers. In some cases we have known only 1 or 2 per cent of the larvæ to escape destruction from these parasites.

The older species was described from these islands as *Monolexis palliatus*; the recent arrival is probably an undescribed species. One native bird, the remarkable pseudonator, feeds almost solely on the larvæ of these beetles, but it is restricted to a small area on Haleakala only. With regard to the 9 introduced Cerambycid beetles the same remarks apply as already made on the indigenous species. Destructive to sickly trees, they rarely if ever attack such as are in a healthy condition.

Fam. CURCULIONIDÆ.—*Aramigus fulleri*.—Introduced within the last twenty years probably, since it was not obtained by Mr. Blackburn, who collected at Olinda. It is well known on Maui as the olinda bug and in the United States as "Fuller's rose-beetle." It is injurious to the koa and other trees and plants on Maui. It has of late years been carried to Hawaii, where in certain localities it rivals the Japanese beetle in consumption of foliage. It has no natural enemies in this country.

Cylas turcippennis and *Hyperomorpha squamosa*.—Two weevils on sweet potato. The former also on other species of Ipomœa. No natural enemies known.

Sphenophorus obscurus.—The cane borer of these islands. Probably originally introduced in cocoanuts from Samoa, Fiji, or Tahiti. Found in large numbers in all stages in the drupe of seed cocoanuts recently imported from Samoa. Also breeds in banana, royal palm, and papaya.

Olandra oryzae.—In rice and stored grain; introduced with a Chalcid parasite.

Fam. ANTRIBIDÆ.—*Aræocerus fasciculatus*.—Destroying seeds of many forest trees, e. g., koa, mamane, etc.; also in coffee berries. No natural enemies known here.

Fam. SCOLYTIDÆ.—*Hypothenemus maculicollis*.—Reported as injurious to (boring in) alligator pear on Hawaii; also injurious to many trees when pruned or in sickly condition.

H. eruditus often in company with the preceding in many kinds of trees and plants. Both are parasitized by a Bethyloid occasionally. No doubt both are imported species; the *H. eruditus* has been described under many names from different countries.

Xyleborus.—Many species, mostly native, but some (e. g., *X. pubescens*) introduced. Mostly attack only sickly or dying trees. Myriads of *X. pubescens* bred in the partially burnt trees of the plague-infested districts of Honolulu; and this and other species ravage the surviving but injured trees after a forest fire. A native species, probably *X. rugatus*, was destroying most of the surviving hala pepe trees near the head of Nuuanu Valley. No natural enemies known in these islands.

Fam. TENEBRIONIDÆ.—*Gnathocerus cornutus*, *Tribolium ferrugineum*, *Alphitobius piceus*, *Alphitobius diaperinus*, *Tenebrio molitor*.—In flour and stored produce, as in other countries; cosmopolitan introduced species.

Fam. BOSTRICHIDÆ.—*Bostrichus migrator*.—Boring holes in wooden tanks and also in woodwork of houses.

Fam. ANOBIIDÆ.—*Lasioderma serricorne*.—Injurious to cigars and cigarettes. Introduced species.

Fam. ELATERIDÆ.—*Chalcolepidius erythroloma*.—Introduced. Larvæ noticed breeding in numbers in orange trees, but these were probably unhealthy before they were attacked.

Fam. BUPRESTIDÆ.—A small unidentified beetle of this family was breeding in great numbers and doing much injury to trees in the lower part of the planted forest in 1900. A recent introduction.

Fam. MELOLONTIIDÆ.—Introduced within the last ten years, probably from Japan, and generally known in the islands as the Japanese beetle. For some time it was restricted to Oahu, but has now spread to the other islands and has extended its range to a considerable elevation in the mountain forests. As a beetle it is attracted to some shade and forest trees as well as many ornamental plants. Fortunately, unlike many of its allies, it appears to do little or no damage in the larva stage. It has no insect parasites, but is readily destroyed by two species of fungi under conditions of moisture suitable for their growth.

Fam. COCCINELLIDÆ OR LADYBIRDS.—Formerly these beneficial insects were represented by only four species, and it is quite probable that all of these were originally imported with plants from other countries and that none were truly indigenous. These four species consisted of three minute species of *Scymnus* and the larger *Abdominalis*. Owing to this deficiency in ladybirds, many scale insects especially which had been introduced with foreign plants and with no natural enemies increased beyond all bounds. The highly successful introduction of *Vedalia* as a remedy for the attacks of *Icerya* was followed by that of many other species, some of which have flourished, while others have failed to establish themselves. The most important (excluding the *Vedalia*) have been *Cryptolinus montivagus*, *Pentatomus lividigaster*, *Rhizobius ventralis*, *Coccinella repanda*, *Oreus chalybeus*, *Coccinella pupillata*, *Scymnus debilis*, etc. *Chilocorus circumdatus*, which for a time bred freely and did fine work, has become extremely scarce, although its food remains abundant. A number of small and inconspicuous species are well established and abundant whenever an increase takes place in their special food.

Fam. NITIDULIDÆ.—*Carpophilus maculatus*, *Carpophilus dimidiatus*.—Domestic attacking various articles of food.

Haptoncus spp.?—Breeding in fermenting exudation of growing cane, where attacked by other insects, and in seeds of some forest trees in company with *Brachyepicus*.

LEPIDOPTERA (Butterflies and moths).

Fam. CARADRINIDÆ.—*Agrotis upsilon*, *Agrotis crinigera*, *Agrotis dislocata*.—The caterpillars of these three species are the most widely spread and destructive of Hawaiian cutworms. They are properly called "Peelua" by the natives, from their habit of hiding themselves beneath the earth in the daytime. The native name, "Peelua," sometimes applied to these caterpillars, is more correctly restricted to other kinds. That of *A. crinigera* is the largest, and when, as often, it is found in myriads in a limited area, it destroys nearly all kinds of vegetables and garden produce. Sometimes all three species are found in company, and the caterpillars considerably resemble one another, although the moths are extremely different. The cutworm which produces *A. upsilon* is easily distinguished from the other two by the greasy appearance of the skin, which is seen even with a moderate lens to be distinctly shagreened, and by the nearly entirely dark sides of the head. It is a foreign species. The other two species are supposed to be peculiar to the islands, and their cutworms greatly resemble each other. *A. dislocata* is smaller, the eyes are placed on a distinct dark spot, and there is another largish spot above this. The *crinigera* cutworm attains a much larger size and is without the above-mentioned dark spots. Each of these cutworms is subject to the attack of and destruction by Tachinid flies. *A. dislocata*, at least, is destroyed by an Ichneumon fly of the genus *Limnerium*, but in spite of this it is locally and periodically abundant and injurious. There are 23 other species of cutworms of this genus known to inhabit the islands, but none of these have been reported as injurious.

Heliothis armiger.—Common in the islands, but not hitherto reported as injurious as in other countries. Much parasitized by Tachinid fly. This is the well-known "bollworm," so injurious to cotton, cereals, etc., on the mainland.

Leucania unipuncta.—Very destructive in other countries, but so far not so reported in these islands. The true "army worm," which name is often applied in these islands to the following species, the *S. mauritia* or grass worm.

Spodoptera mauritia.—Caterpillar injurious to young sugar cane and highly injurious to pasture lands periodically, when it is seen in incredible numbers devouring the fresh blades of grass. No parasites reported, but no doubt it is attacked by Tachinid flies. It appears probable that this species is identical with the well-known and injurious *Laphygma frugiferda* of America. It forms a favorite food of the zebra plover and ring dove, which attains its finest condition when feeding on the caterpillars.

S. Erigua.—Sometimes injurious to garden produce, cabbage, etc.

Fam. SELIDOSEMIDÆ.—*Scotorhythra idolias*.—The caterpillar of this moth is well known from the fact that it periodically destroys the foliage of the koa in the forests of Hawaii. This periodical defoliation of every tree over large areas would appear to be of comparatively recent origin and is probably to be attributed to the great decrease that has taken place in the numbers of the native birds, with many of which these caterpillars are a favorite food. They are apparently not greatly subject to the attacks of parasites, but are sometimes destroyed by the Ichneumonid flies of the genus *Limnerium*, and probably by some of the species of *Enicospilus*. Similar ravages in the koa forests of east Maui appear to be due to the caterpillars of the closely allied *S. aludicola*, but as nearly forty species of the genus are known, and the caterpillars of several may often be found on a single tree, it is probable that other species also join in the attack on the koa. *Scotorhythra* is a genus quite peculiar to the Hawaiian Islands, and consequently the chance of procuring parasitic enemies from elsewhere is not hopeful. An increase in the numbers of native birds which habitually feed on these caterpillars is required to keep down their numbers.

Fam. PIERIDÆ.—*Pieris rapæ*.—The cabbage or garden white butterfly is a recent introduction and, as in all other countries where it is native or has been introduced, injurious to cabbage. Nevertheless, it has not increased to the extent that might have been expected in the absence of its natural enemies, at least around Honolulu. This is certainly largely due to the fact that here it almost ceases to appear during the summer months, and that the caterpillar is preyed on by one of the foreign wasps, while the eggs are devoured by some of the imported species of ants. These enemies seem to more than make up for the absence of the European parasites. In this country only the summer form of the butterfly is produced, there being no seasonal dimorphism. In places remote from cultivation the caterpillar of this butterfly feeds as freely on the native *Capparis* (Puapilo) as it does on the cabbages in gardens.

Fam. PHYCITIDÆ.—*Ephestia chutella* and other species.—Imported domestic species, injurious to stored produce, as in nearly all countries.

Fam. PYRAUSTIDÆ.—*Margarona exaula*.—Caterpillar between the leaves of many kinds of Euphorbiaceous plants, both native and introduced, often entirely destroying the foliage. It is eaten by the sparrow in Honolulu and in the forests is killed by native predatory wasps.

Omiodes blackburni.—The caterpillar of this moth is the cocoanut leaf worm, and few of these palms can be seen which are not greatly disfigured by its attack. It also feeds on the leaves of other palms and sometimes entirely kills those of the banana. It is much parasitized in many localities by a species of *Ecthomorpha*, as well as by the introduced *Chalcis obscurata*; sometimes also by *Pimpla*. But for the attacks of these it is probable that the cocoanut palm could hardly exist here. The cocoanut moth is peculiar to these islands.

Omiodes accepta, *Omiodes epicentra*.—Caterpillars feed on grasses and the leaves of sugar cane. Rather injurious. Much sought after by predaceous native wasps (*Odynerus*), being the favorite food of some species.

Omiodes, other species.—Of several of these the caterpillars are grass eaters, but they appear to choose generally such kinds as are of little value as pasturage. Consequently, although extraordinarily numerous in most pasture lands, their attacks are of small account.

Hellula undalis.—Caterpillar well known on the American continent as the webworm of the cabbage, to which it is also injurious in these islands. No natural enemies are known in this country, but on the Continent it is parasitized by the Ichneumon fly, *Meteorus*, and a Braconid *Porizon*.

Tortricina and *Tineina*.—The small moths comprised in these two groups are very numerous represented in the islands, and in some cases the species are important economically. As an extensive work on these is now in the press it is not possible at the present time to refer to the species listed below by their scientific names, as these are for the most part not yet published.

(1) *Yellow Tortrix of the Citrus*.—Probably a very recent introduction, most probably brought on citrus trees from Australia, where it is known to occur, as also in New Caledonia. Though especially injurious on lime and orange trees, the yellow or green caterpillar is polyphagous, feeding on such diverse plants as *Euphorbia*, *Oleander*, *Nasturtium*, cotton, seeds of *Acacia koa*, fruit and seed of *Eugenia*, etc. It appears to be rapidly increasing each year, although parasitized by *Chalcis*, *Chelonus*, and *Pimpla*. On citrus trees it not only eats the leaves, especially those of young shoots, but gnawing at the base of the young fruit causes this to drop off, so that sometimes 90 per cent or more of the fruit on a tree which is badly attacked is lost.

(2) *Small red Tortrix of the Koa*.—Very numerous in many koa forests, caterpillar feeding on terminal twigs and on seeds.

- (5) *Dark-colored Tortrix of Koa*, feeding in gall-like swellings of the stem.
 (6) *Larger red seed-eating Tortrix*.—Seeds of sapindus, koa, acacia farnesiana, etc. Sometimes destroying every seed of the last named, the flowers of which are valuable for making perfume, and the beans as food for cattle.
 (5) *Gray tortrix of the Mamane (Sophora) caterpillar*; destroying seeds.
 All the above species are important as destroying large quantities of seed of valuable forest trees, especially Acacia koa and Sophora chrysophylla. They are hardly, if at all, accessible to the attacks of any species of birds, but some of them are a favorite food of many native wasps, but for which, with the aid of many other species of their own family, they would probably devastate the forest. Several are certainly foreign insects, imported with seeds and plants, and it is probably due to the attacks of one or other of these that in some districts it is said that hardly a sound seed of the koa is now attainable.
 (6) *Gray Tortrix of the Ohia (Metrosiderus)*.—Numerous in places and injurious, but the caterpillars destroyed to an enormous extent by native wasp.
 (7) *Azimis hilarella*.—Caterpillar defoliating the koa tree (*Cordia subcordata*) or greatly disfiguring it. Sometimes parasitized by Pimpla. Only attacks the native Cordia. An introduced and handsome species is quite free from this caterpillar.
 (8) *Gelechiid (undetermined)*, attacking cotton bolls.

[Parasitized by *Chelonus blackburni*.]

HEMIPTERA (BUGS, PLANT LICE, SCALE INSECTS, ETC.).

The native Hemipterous fauna consists to a large extent of Capsidae in the one section and of Fulgoridae in the other. All these are confined entirely to the mountain forests and even when abundant are apparently harmless. Scale insects and Aphididae were certainly absent until carelessly imported with plants by the white man, but are now represented by numerous species, some of which have proved extremely injurious.

HEMIPTERA HOMOPTERA.

Fam. FULGORIDÆ.—(1) *Pæciloptera acuta*.—On mango and coffee trees, especially in wet districts, and on forest trees up to 2,000 feet. Badly affected trees have the foliage entirely black from the fungoid growth on the excretions of the insect. A natural enemy known in this country. The species was probably imported about twelve years ago.

(2) *Fulgorid of the sugar cane*.—Probably a recent importation, since the species has only come into prominent notice during the last year or two. It is commonly known as the sugar cane leaf hopper, being similar in appearance to the *Jassidæ*, which are more correctly termed leaf hopper. It would appear to be different from any of the three species recorded as injuring cane in Java. Seed cane recently imported from Queensland contained eggs abundantly and some immature forms. The larvæ of a Fulgorid very similar to and perhaps identical with the Hawaiian one. The eggs are laid either in the leaf or in the stem of the cane beneath the surface in a small chamber formed by the ovipositor of the parent. A minute scar marks the situation of this chamber. When badly affected the leaf becomes either spotted or entirely red, and the usual black fungoid growth follows the attack. The natural enemies to this Fulgorid at present are a recently (and accidentally) imported Reduviid bug, now becoming very numerous, and the various kinds of spiders, which are usually abundant in the cane fields.

Fam. APHIDIDÆ.—Three or four species of Aphis have been imported with plants, but the introduced Coccinellids generally keep these fairly in check. The larvae of *Chrysopa microptha* and *Xanthogramma grandicornis* also do excellent service, but the latter is itself subject to the attacks of hymenopterous parasites. Certain species of Braconid hymenoptera and additional species of Syrphidae might advantageously be imported to assist the above-mentioned enemies of Aphis.

Fam. COCCIDÆ.—No complete list of Hawaiian scale insects has been published, but the species may be estimated as numbering from 50 to 75. Owing to the introduction of ladybirds and hymenopterous parasites very few of these species now do any serious damage, the ravages of *Icerya*, *Pulvinaria*, and others being things of the past. Some scale insects formerly ubiquitous and often in myriads on a single tree, as a few years since was *Ceroplastes*, now require hunting for. Apart from the ladybirds the Chalcid parasites of the genera *Encyrtus*, *Tomocerus*, *Coccophagus*, etc. have done excellent service.

At the present time probably the two most injurious scale insects are the purple scale, *Mytilaspis citricola* of the citrus trees and the white *Eriococcus* of the alligator

pear, guava, and other trees. Though the male scale of the latter is readily eaten by several ladybirds, a good enemy for the female is much needed.

One scale insect (*Orthesia insignis*) has been lately spread by some landowners over the land in the hopes that it will destroy the lantana. The wisdom of this course is very questionable, as the *Orthesia* is well known elsewhere to be a most destructive insect, attacking a great variety of trees other than lantana. It is said to be particularly injurious to rutaceous trees, of which, as is well known, a large part of the Hawaiian forest consists.

HEMPTEROPTERA.

Fam. REDUVIIDÆ.—A brightly colored Reduviid bug imported accidentally within the last few years has now become extremely common. It does good work in preying on many injurious insects, such as plant lice, the cane hopper, etc. At the same time it destroys to some extent the beneficial ladybirds, piercing them through with its beak.

DIPTERA (TWO-WINGED FLIES).

The injurious Diptera consist entirely of imported species and include the usual species infesting stock, the horn fly (*Hæmobia serrata*), imported during recent years, being now the worst and extremely numerous. The *Ædrys ovis*, attacking sheep, and two or three undetermined botflies, attacking cattle, have been imported with stock as in other countries. The two species of *Culex*, or mosquito, one of which is diurnal, the other nocturnal, are excessively numerous on the lowlands and up to moderate elevations in the mountains. In some districts of the islands where they are very troublesome they could be practically exterminated by the usual remedies with comparatively small trouble, but in places where are extensive taro patches, rice fields, and swamps, their extermination is probably impracticable. Fortunately the *Anopheles* mosquito is absent from the islands, and the true intermittent or malarial fever is consequently not known except in the chance case of a person just arrived from other countries with the fever still in the system.

Fam. TRYPETIDÆ.—Some five or six years ago a fruit fly was introduced, which practically put an end to the raising of melons, cucumbers, etc., unless these were so guarded that the fruit was inaccessible to the fly. This species was described at Washington as *Dacus cucurbitæ*, from Honolulu. Its true home is, no doubt, either Japan or China. At Hongkong a species is found almost identical in size, color, and form, and which only differs in having an additional pair of bristles on the scutellum. Parasites for the melon fly could, no doubt, be procured from that country.

Fam. ORTALIDÆ.—*Euxesta annona*.—Larva on cane attacked by other insects. An introduced species.

Orthoptera, crickets, grasshoppers, etc., collectively known as "Uhini" or "Unihi" in Hawaii, and the roaches as "Elelu."

The native insects of this group are of no importance economically, but some of the imported ones are more or less injurious. Of nearly a score of Blattidæ (roaches) all but one are certainly imported. Most of these are parasitized by two species of *Evania*, and are consequently much less numerous than they otherwise could be. The *Eleutheroda dytiscoides* sometimes kills the branches of cypress and other trees, gnawing off the bark. The grasshopper (*Oryza velox*) and the locustid (*Xiphidium lucum*) frequently swarm in cane fields and grass lands, and must necessarily do a certain amount of damage. They have no natural enemies of importance.

NEUROPTERA.

The foreign dragon flies or Pinau (*Pantala*, *Anax*, and *Tramea*), which are natural immigrants, are of considerable value in destroying mosquitoes in all stages and the winged adults of Termites. Additional species, especially such as would live in brackish water, might advantageously be imported. The *Chrysopa microphyta*, as already noticed, feeds on many kinds of scales, plant lice, etc., and other species of similar habits might well be introduced.

HYMENOPTERA (BEES, WASPS, ICHNEUMON FLIES, ETC.).

The beneficial parasitic Hymenoptera have already been noticed under various pests. It remains to call special attention to the native wasps (*Odynerus* and allied forms), since they are not only of extreme importance for the protection of many forest trees, but also for the preservation of many forage plants. Existing in all seasons in millions on each island of the group, and continually storing up caterpillars for their young, the extent of their services is known only to those who have

specially studied the matter. Many of the caterpillars destroyed are of the most hidden kinds, and such as are not subject to the attacks of birds. At present these wasps have no enemies, the native birds not feeding on them in any stage, or at least only on very rare occasions. For this reason the importation of all birds which live for food along dead branches of trees (in which the white grubs of most of the forest-frequenting wasps are placed) is carefully to be avoided, as well as of such insectivorous birds as are liable to feed on these insects when in the mature state. Similarly, no insect parasite which might possibly attack the larva of these wasps should ever be introduced into the islands.

Megachile palmarum (leaf cutter or tailor bee).—Disfiguring many ornamental plants and shrubs by cutting out oval and circular pieces from the leaves. Of comparatively recent introduction, now extremely numerous. No insect parasites.

FISHERIES.

A law forbidding the use of nets in fishing with a mesh under a certain size is vital to the protection of the sea fisheries.

The use of small-mesh nets and the use of dynamite is seriously injuring the fishing interests of the Territory.

As Chinese and Japanese fishermen are mainly responsible for the injury caused by the use of a small mesh, a remedy may be found in the provision of the organic act, section 95, which opens all sea fisheries to citizens of the United States, the implication being that those who are not citizens are without fishing rights. Measures have been taken to subject the fishing privileges of noncitizens to certain strict regulations in regard to the size of mesh of fishing nets and the use of dynamite.

Honolulu fish market.—Fish exposed for sale, 2,571,796; fish condemned, 31,650, or 1.23 per cent.

Hilo fish market.—Fish exposed for sale during eleven months to July 1, 582,077; fish condemned, 1,409, or 0.24 per cent.

The disparity in the percentage of fish condemned in Honolulu and Hilo can hardly be accounted for, except on the ground of greater strictness on the part of the Honolulu inspectors.

Eighty-eight kinds of fish by the Hawaiian nomenclature were recorded at the Honolulu market and 76 kinds at the Hilo market. Both markets had five kinds of other marine animals exposed for sale as food, such as turtles, squid, crabs, crawfish, and sea urchins.

CORPORATIONS.

On June 30, 1901, there were 350 corporations in force.

Corporations filed from July 1, 1901, to June 30, 1902.

RAILROAD ENTERPRISE.

The Hawaii Railway Company operates 20 miles of 3-foot track in North Kohala, island of Hawaii. Weight of rails from 20 to 35 pounds per yard. Rolling stock, 4 locomotives and 80 cars. Business of the road consists mainly in carrying plantation supplies and sugar, includ-

ing lighterage of freight and loading of sailing vessels at the port of Mahukona. Freight is 10 cents per ton per mile. Capitalization, \$50,000; working capital, \$85,000. Business satisfactory.

The Oahu Railway and Land Company was incorporated in 1889 for the purpose of building steam railroads on any part of the island of Oahu, and to this end a franchise was granted for fifty years.

The line extends around the southern side of the island to Kahuku, the northernmost part of the island of Oahu, a distance of 71 miles. Including branches and sidings the road has in operation a total of 84 miles.

The company controls about 80,000 acres of pasturage and sugar lands under from forty to fifty year leases. On these lands are located Ewa and Kahuku plantations and a portion of Honolulu and Oahu plantations.

There are six sugar plantations on the line of the road, with an aggregate yield at present of 95,000 tons of sugar. All of the freight to and from said plantations is at present carried over the railroad.

The track is 3-foot gauge, 48-pound rails; 12 locomotives are in use and 276 cars. The number of passengers carried from July 1, 1901, to July 1, 1902, was 437,645. The number of tons of freight hauled during the same period was 308,534.

During the past two years the company has made extensive improvements on its water-front property, constructing 4,000 linear feet of wharfage with a depth of water 30 feet. The same are equipped with two warehouses having a storage capacity of 10,000 tons each, and provided with electric conveyers capable of delivering to vessels lying at the docks 250 tons of sugar per hour.

The Hilo Railroad Company was chartered May 28, 1899; capital stock, \$1,000,000; authorized capital, \$10,000,000; \$850,000 6 per cent coupon 1-20 bonds have been issued.

The road has been constructed from Waiakea at the east side of Hilo Harbor, to Kapoho, in the district of Puna, a distance of 24 miles. On this line, and 7 miles out from Hilo, is the Olaa Sugar Company's mill. From this point the railroad runs through Keeau and Olaa to the 22 milepost on the Volcano road, 9 miles from the Volcano House. The elevation of this terminus is 2,300 feet. This part of the line is nearly constructed, and will probably be finished by January 1, 1903. The company intends to extend the railroad along the beach at Hilo to the post-office block north of Waianuenue street and to the wharf, with a branch to Hawaii mill. The location of this extension has been approved by the Territory of Hawaii in accordance with the terms of the franchise of the company.

The railroad is of standard gauge, with rails weighing 60 pounds per yard. Equipment consists of 3 Baldwin locomotives, 1 Schenectady locomotive, and 60 cars.

The company is also equipped with a first-class machine shop and foundry capable of doing any kind of plantation or railroad work.

Kona-Kau Railway.—Prior to the incorporation of the Kona-Kau Railway Company there had been two railway companies for the island of Hawaii incorporated, which contemplated the extension of railroads substantially around the island with the exception of Kona and Kau districts. The Kona-Kau Railway Company plans eventually to connect with such roads, thus effecting a continuous line of rails around the island of Hawaii.

Preliminary surveys have been made of the whole length of the proposed line of this company about 120 miles. Between 25 and 30 miles have been surveyed, located, and mapped, and subject to the approval of the governor, are ready to be contracted for. About \$50,000 have already been expended.

The seacoast terminus of this road will be at Kealakekua Bay. The level of the main line will approximate 1,400 feet. It will traverse the Kona and Kau districts at about that level.

Prospects are favorable for the beginning of the work of construction early next year.

STREET RAILWAYS.

I have not been able to obtain a report from the Hawaiian Tramways Company, Limited, of their year's work. The governor's report of 1900 is approximately applicable to this company for the past year except as to its income, which has probably fallen off somewhat, owing to the competition of the Honolulu Rapid Transit and Land Company.

The latter company began operations on the 31st day of August, 1901, with a track mileage of 4.4 miles, and constructed and put into operation within a year 7.31 additional miles, making a total of 11.71 miles. An extension to Waikiki, a populous suburb on the seashore, is under construction. Since this company began carrying passengers no interruption through any defect in the steam or electrical equipment has occurred.

The following table furnished by Mr. Ballentyne, the manager of the company, gives the monthly results for the first year's operations:

Month.	Mileage.	Passengers.	Earnings.	Expenses.	Net earnings.	Miles in operation.
1901.						
September.....	24,938	201,922	\$10,001.25	\$4,740.14	\$5,261.11	4.40
October.....	29,082	192,267	9,327.66	5,608.07	3,724.59	6.17
November.....	38,487	214,286	10,446.15	6,464.44	3,980.71	7.15
December.....	42,694	270,683	13,125.90	7,454.30	5,671.60	7.96
1902.						
January.....	47,775	277,891	13,411.25	8,431.06	4,980.17	7.95
February.....	48,567	269,819	12,430.05	7,801.45	4,628.60	7.92
March.....	47,817	268,902	12,626.35	7,565.96	5,060.39	7.94
April.....	46,786	270,212	12,976.70	7,857.26	5,119.44	7.94
May.....	48,621	283,133	13,627.60	8,058.65	5,568.95	7.94
June.....	51,663	300,874	14,516.10	7,966.49	6,549.61	9.22
July.....	67,736	345,246	17,016.40	10,116.51	6,899.89	11.71
August.....	71,506	345,056	16,944.70	9,420.18	7,524.52	11.71
Total.....	556,433	3,265,233	156,357.40	90,904.63	65,452.77	11.71

^a Average.

Average operating expense to earnings, 58.1 per cent.
Average expense of carrying passengers per head, 2.8 cents.

EDUCATION.

The report of the superintendent of public instruction, Mr. Alatau T. Atkinson, for the past year is very concise and yet so full that after incorporating the greater part of it in my report there is little left for me to say on this subject.

I would call attention to some interesting deductions drawn from Mr. Atkinson's figures.

The number of pupils in the public schools is 13,189, showing an increase of 6,041, or 84½ per cent, over the number in 1892, which was 148.

The number of pupils in private schools is 4,329, showing an increase of 1,317, or 44 per cent, over the number in 1892, which was 3,012.

The number of pupils in all schools 17,518, showing an increase of 358, or 72 per cent, over the number in 1892, which was 10,160.

In the public schools there is an average of 35 pupils to one teacher, and in private schools an average of 19 pupils to one teacher.

Of the teachers in the public schools 72½ per cent are women and 7½ per cent are men; of the teachers in private schools 64½ per cent are women and 35½ per cent are men, while of the teachers in all schools 69½ per cent are women and 30½ per cent are men.

Of the pupils in the public schools 55 per cent are boys and 45 per cent are girls; of the pupils in private schools 53½ per cent are boys and 46½ per cent are girls, while of the pupils in all schools 54½ per cent are boys and 45½ per cent are girls.

Hawaiians and part Hawaiians make up 24½ per cent of the teaching force in public and private schools, while in the public schools alone they form 44½ per cent of the teaching force. Among the pupils of all schools Hawaiians and part Hawaiians form 44½ per cent and in the public schools 46½ per cent.

[Extract from the report of the superintendent of public instruction.]

The public schools of the islands are 143 in number, while the private or independent schools are 54. This by no means gives the number of school buildings. Many of them are being taught in several buildings. Thus the normal school has three separate buildings, the Ainakea School in Kohala has two, so has the Makala School in the same district, the Royal School has four, and so forth. By the 143 schools is meant 143 schools under the charge of 143 principals. These schools vary in size from 600 in some of the city schools to an enrollment of 15 or 20 in very remote and isolated villages.

The total enrollment in all schools of the Territory is 17,518. The enrollment in the public schools on June 20 of this year, when the schools closed for vacation, was 13,189, the largest number ever reported. In 1892 the enrollment was 7,148, so that there has been an advance of say 6,000 during the decade. These pupils are instructed by 380 teachers. The enrollment of the private or independent schools is 4,329 as against 3,012 in 1892, an advance of say 1,300 in the decade. These schools receive instruction from 229 teachers. The accompanying table shows these facts:

Number of schools, teachers, and pupils in the Territory of Hawaii.

	Schools.	Teachers.			Pupils.		
		Male.	Female.	Total.	Male.	Female.	Total.
Public schools.....	143	104	276	380	7,233	5,966	13,189
Private schools.....	54	81	148	229	2,318	2,011	4,329
Total.....	197	185	424	609	9,551	7,967	17,518

The nationality of pupils in the schools is varied, there being no less than eleven divisions. The comparative table will show that while the Hawaiian school children of unmixed blood have somewhat decreased, the Hawaiian children of mixed blood have increased. Ten years ago, in 1892, the number of Hawaiians of unmixed blood numbered 5,353, and the Hawaiians of mixed blood, or part Hawaiians, reported 1,866 or 7,219 in all. At the present time, 1902, there are 4,903 Hawaiians, and 2,869 part Hawaiians, making a total of 7,772, an increase of 500 children who claim Hawaiian ancestors.

In the same period of time the Portuguese children attending school have increased from 2,253 to 4,124, or have practically doubled, the increase being close on 2,000

during the ten years. The increase of Portuguese children attending school has been four times that of those of Hawaiian descent. On the other hand, if we eliminate the Hawaiians of pure blood we find the increase of the part Hawaiian to be very close to the increase of the Portuguese, the part Hawaiian showing an advance of 1,296 children in school during the ten years. This increase, of course, does not come from importation, but from the natural increase of families born and brought up here. On the other hand, among the Japanese a number of children were born in Japan and brought here.

Some idea of the increase of Japanese population can be gathered from the fact that in 1892 there were but 60 Japanese children in school, while in 1902, ten years later, there were 1,993. Chinese children have increased in the decade from 353 to 1,395. These form the main races from which our schools are recruited.

The Porto Ricans, though only about two years in the country, show up to the number of 596.

As these races are mingled in school, there being no government school devoted to any special race, the problem of teaching these pupils is no easy one. The whole mass is taught in the English language, and that we should have the success which has attended our efforts argues well for the system which has been instituted and carried on for the last fifteen years. Up to the year 1887 there were quite a number of public schools taught in Hawaiian. By continued petitions from the parents these schools were gradually converted into English schools. The last school taught in Hawaiian was changed into an English school in 1901. This was on the island of Niihau. One of the young Hawaiians on that island, the grandson of the native schoolmaster, came to Honolulu, was educated in English, and has returned to the island to teach the future generation of Niihau Islanders in the English language. The following is the table of school children, by nationalities:

Nationality of pupils attending school in the Territory of Hawaii.

	Public.	Private.	Total.
Hawaiian	4,146	757	4,903
Part Hawaiian	1,993	876	2,869
American	447	365	812
British	143	97	240
German	155	182	337
Portuguese	2,876	1,248	4,124
Scandinavian	74	24	98
Japanese	1,785	208	2,003
Chinese	981	464	1,445
Porto Ricans	539	57	596
Other foreigners	100	51	151
Total	13,189	4,329	17,518

To instruct this heterogeneous mass of pupils the public schools employ 380 teachers and the private schools 229. This gives an average of 34 pupils to each public school-teacher and an average of 19 pupils to every teacher in the private schools. The public school work, therefore, is a great deal harder than the work in most of the private schools.

Of the nationalities employed in the teaching force of the public schools 58 are Hawaiians and 59 are part Hawaiians, making 117 teachers of Hawaiian descent, everyone of whom has passed through the schools of the Territory, and the majority holding certificates from the department of education, obtained by examination from the territorial normal school, after a three years' course. American teachers, however, head the list with 188 individuals. Of these, while many come from the mainland, a large percentage is supplied from those born and brought up on the islands, and some of the most useful and progressive of our teachers are the product of our own public schools and normal school. The Portuguese and Scandinavians employed as teachers in the public schools have nearly all been brought up in the territorial schools. They are the descendants of immigrants who came here as laborers in the first instance. They all earn good salaries. There is a case here of a Portuguese young lady whose parents came to work on the plantations, receiving a wage of \$20 to \$25 a month. She distinguished herself in school, studied and passed examinations for a first-class certificate, and, having occupied positions as assistant is now principal of a large school at a salary of \$1,000 a year and a good prospect for future advancement.

The private schools employ more teachers of foreign parentage than the public schools. They employ only 32 teachers of Hawaiian blood, and very few of the

teachers have been educated in the Territory. The Portuguese teachers in this employ have been drawn from the Portuguese colony in Jacksonville, Ill., and are of course Protestants. The majority of the Portuguese employed in the public schools are Roman Catholics. The following table gives the nationalities of the teachers in the two classes of schools in the Territory, and likewise the totals. Out of a total of 609 teachers, 185 are males and 424 are females:

Comparative table of nationality of teachers.

Nationality.	Public schools.	Private schools.	Total.
Hawaiian	56	21	79
Part Hawaiian	59	11	70
American	188	141	329
British	44	12	56
German	8	8	11
Portuguese	16	7	23
French	1	9	10
Scandinavian	10	5	15
Belgian	3	3
Japanese	5	5
Chinese	6	6
Other foreigners	1	1	2
Total	380	229	609

In the following table the distribution of the public and private schools, together with the teachers and pupils, is given according to the various islands. It will be noted that the bulk of the private schools is to be found on the island of Oahu, and practically in the city of Honolulu. These private or independent schools receive their support from endowment estates, as Oahu College, with its preparatory and kindergarten attachments, to which institutions lands and money have been donated and willed, and also the Kamehameha schools for boys and girls, which receive their income from the Bishop estate lands, left for the purposes of education, by the late Bernice Pauahi Bishop. Others are supported by religious bodies, as the St. Louis College by the Roman Catholics, and certain seminaries by the Protestant denominations. There are also a few small schools kept for profit by their teachers.

Distribution of schools, pupils, and teachers in the Hawaiian Islands.

PUBLIC SCHOOLS.

Island.	Number of schools.	Teachers.			Pupils.		
		Male.	Female.	Total.	Male.	Female.	Total.
Hawaii	56	37	91	128	2,367	1,970	4,337

Total	54	81	148	229	2,318	2,011	4,329

The next table shows the ages of pupils in the schools, giving private schools, public schools, and also the totals. Of the 17,518 enrolled pupils, 15,525 are of regular school age. The pupils below school age are chiefly in the kindergarten schools, while those above school age are in such institutions as Lahainaluna Seminary, Oahu College, St. Louis College, the high school, the normal school, together with sprinkling in the higher classes of various large schools throughout the group.

Ages of all pupils in all schools of the Territory of Hawaii.

Age.	Public schools.			Private schools.			Total, public and private schools.

Above 15 years.....	288	226	514						

Besides the regular course of study attention is given to industrial work, drawing and sewing. The results of some of the work have been shown at Buffalo and Charleston. The exhibit at the latter gained a first-class medal. Effort is being made to have all pupils, whether boys or girls, taught sewing. There will in the future be a steady increase in all this style of working. Besides teaching the brain to think and the tongue to speak, we must have the fingers to work.

Number of pupils in sewing, agriculture, manual work, drawing, and tonic sal fa in public schools.

THE SCHOOL SYSTEM OF HAWAII.

The following sketch of the school system of the islands, which was prepared recently, will, with the tables furnished above, give a clear and comprehensive idea of the plans which have been followed and which are now being carried out in the Territory:

The Hawaiian Islands, now comprising the Territory of Hawaii, have had for more than two generations a well-organized and efficient public-school system. This system was originally the work of some of the ablest of the men who made their homes here during the first half of the nineteenth century, and has been carefully developed and built up to fit peculiar local conditions. Like all systems of human devising, the Hawaiian school system is capable of further advance and improvement as experience may show the same to be desirable and practical. But such advance should be on lines already wisely laid down by those who were and are thoroughly familiar with existing conditions. Any radical reorganization of our school system, however well meant, could only result in grave disaster to the educational interests of the Territory.

HISTORICAL.

The educational history of this archipelago extends over a period of nearly eighty years. Soon after their arrival, in 1821, the members of the first company of American missionaries interested themselves in educational matters, the first spelling book having been printed in 1822. This may be regarded as the first step toward popular education in these islands, but in the beginning it was an education of adults rather than children. Between the years 1823 and 1827 a peculiar system of schools sprang up and spread rapidly over the islands, and flourished for about ten years. The chiefs and their immediate attendants were the first pupils. From 1830 to 1840 the American missionaries maintained model schools at each of their stations. From this time the attendance of adults fell off rapidly, and the principal attention then forth was paid to the education of children.

In 1831 the missionaries established Lahainaluna Seminary on the island of Maui, chiefly as a training school for native teachers and preachers. Industrial training from the first a prominent feature in the curriculum. A printing press and book-dery were attached to the school, at which numerous text-books were published, and in 1834 the first newspaper ever printed in the Pacific Ocean, the *Lama Hawaii* (the Light of Hawaii), was issued. Maps and illustrations for text-books were also carved on copper by the pupils. This school is still in existence, having become a part of the public-school system. Industrial training is, as heretofore, a prominent feature.

A few years later boarding schools for girls were established at different points, several of these being still in operation. In 1839 a boarding school for boys was established in Hilo, Hawaii, and in this school manual labor has always been a leading feature.

The institution now known as Oahu College was originally founded by American missionaries in 1841 for the education of their own children, and was chartered in 1849 as a public institution. A new charter, providing for a college as well as a preparatory school, was obtained in 1853. This institution is well equipped as to both buildings and apparatus, and has a considerable endowment.

What are known as the Kamehameha schools were established under the will of the late Mrs. Bernice P. Bishop, an Hawaiian lady of the highest rank, wife of C. R. Bishop, of the banking house of Bishop & Co., she having left the bulk of a large property in the hands of trustees for that purpose. Mr. Bishop, being possessed of ample means, has supplemented his wife's bequest with large and repeated gifts from his own fortune.

Having had ample means at their command, the trustees have been able to organize and equip the schools on very liberal lines. In addition to a large boarding school for girls, there is a boys' school combining manual and technical instruction with the ordinary school branches; also a preparatory department. Commodious and well-equipped workshops, with steam power, electricity, and the best mechanical appliances, enable this school to give a thorough training in various departments of wood and metal working, and the boys show a very satisfactory degree of interest in their work and of capacity for acquiring proficiency therein. The pupils in these schools are all in whole or in part of native blood.

PUBLIC SCHOOLS.

The history of our public or Government schools extends over a period of sixty years, the first school law having been enacted in 1841 by the King and chiefs in council. This somewhat antedated anything corresponding to our ideas of modern constitutional government, and the inspiration of those taking this action doubtless came from their foreign teachers and friends.

In 1843 a department of public instruction was organized and the official at the head thereof given the rank of a minister of the crown. This position was first held by Hon. W. Richards, and at his death, in 1847, he was succeeded by Rev. R. Armstrong, the father of the late Gen. S. C. Armstrong, of Hampton. General Armstrong was born in Honolulu, and received his early education here.

In 1855 the department was remodeled and placed under a board of education, whose president exercised the same powers and was charged with the same duties formerly belonging to the minister of public instruction.

In 1896 the administration of the public schools was again raised to the rank of an executive department, to be presided over by a minister and a board of commissioners, it being provided that the minister of foreign affairs should be ex officio minister of public instruction.

The act of Congress providing a Territorial government for Hawaii made a change in the title of the head of the department, who is now known as "superintendent" instead of "minister."

Neither of the last two changes named made any material difference in the educational system as such, nor in the everyday administration of its affairs.

FURTHER FACTS.

The following additional facts concerning the Hawaiian public school system are important:

I. The sole basis and medium of instruction in all public schools is the English language.

II. Tuition in all the public schools is absolutely free. Pupils buy the text-books needed, but these may be provided by the department free in cases of extreme poverty.

erty. Text-books are imported by the department in large quantities and sold at cost.

III. School attendance from 6 to 15 years of age is compulsory. Children of those ages are not required to attend government schools; parents can send their children to private schools if they so prefer, but to some school taught in the English language they must go, and that with a fair degree of regularity. A system of truant officers or school police enforces that provision of the law in the country districts as well in Honolulu.

IV. Teachers' salaries are regulated by a carefully prepared schedule, and based on (a) grade and size of school, (b) class of certificate held, and (c) length of satisfactory service. The schedule is uniform for all, and makes no account of race, color, nationality, party politics, or religious belief. Neither are salaries affected by sex. Men and women filling corresponding positions and having equal certificates and experience receive the same pay.

V. Examinations of candidates for teachers' certificates are held at least once a year, generally during the latter part of the summer vacation. These examinations are open without cost to all who choose to present themselves, and certificates are issued of three classes, according to the average percentages obtained by candidates. In the matter of scholarship and qualifications, as in that of salaries, the rule of standard is the same throughout the Territory.

VI. The department takes a justifiable pride in the fact that its teachers and employees are paid regularly and promptly. Warrants on the treasury for salaries are dated on the last day of each month, and are always paid on presentation.

INSPECTORS.

There is a regular system of inspection, the Territory being divided into three circuits. This enables visits to be made to each school at least three times a year. The inspectors also hold meetings of the teachers for the purpose of giving advice and practical illustration, and of promoting in every way possible the interest in education.

SANITARY INSPECTION.

Under a rule of the board of health, all children attending school must be examined by a physician, and must be pronounced free from any contagious disease. A rule of the department of education requires that all teachers must produce a medical certificate that they are free from any infectious or contagious disease, and especially from tuberculosis.

SPECIAL SCHOOLS.

With a view of supplying teachers from among the pupils born and brought up on the islands, a normal school has been established. This had its commencement some ten years ago in a small normal class taught in the afternoons. From this small beginning has grown what promises to be one of the most important educational institutions on the islands.

THE NORMAL SCHOOL.

The total enrollment of the normal school for the year 1901-02 is 92. This is an increase of more than 40 per cent on the enrollment of the previous year. Of this number 60 are Hawaiian or part Hawaiian, 10 are Chinese, while the remainder are of American or European extraction. Eight nationalities are represented in the school.

There has been a marked improvement in the general character of the applicants for admission to the normal school, and as a result of this the standard of admission and consequently of graduation has been raised. This improvement argues well for the schools of the country. At the close of this year 22 were recommended for certificates.

The following are the departments into which the work of the normal school is divided: Theory of art of teaching, geography, mineralogy and observational astronomy, nature study and agriculture, mathematics, history, English and expression, work, music, drawing.

Each teacher, in addition to giving instruction in the subject-matter of his particular department, also instructs the pupil teachers in the correct use of the spoken and written words that are necessary to express the thoughts that are aroused by study of the respective subjects.

The school day is divided into three parts—(a) 9 to 10.30, (b) 10.45 to 12, (c) 12.30 to 2. Each pupil teacher spends one-third of the day in the training school, where he takes charge of a class under the supervision of the training teacher. The remaining two-thirds of the day are devoted to the study of academic subjects.

TRAINING SCHOOL.

There are seven rooms and five grades in the training school. Each grade is in charge of a teacher specially trained for the work. The total enrollment for the spring term of this year was 286. This number is made up of the following nationalities:

Nationality.	Boys.	Girls.	Nationality.	Boys.	Girls.
Hawaiians.....	11	29	Scandinavians.....	1	2
Part Hawaiians.....	14	24	Japanese.....	40	14
Americans.....	4	7	Chinese.....	14	20
British.....	3	1	Porto Rican.....	1
German.....	4	1	Other foreigners.....	2	4
Portuguese.....	38	52			

An effort has been made to have representatives of as many nationalities as possible in the training school.

As already stated, each training pupil has charge of a room for one-third of each day of the school year. This charge implies the arrangement of the subject-matter, the outlining of lesson plans, the care of the school property, and the supervision of the school grounds. In this way the pupils are prepared to take full charge of any school to which they may be appointed.

The training teachers have the general supervision of the room. They direct the pupils in the arrangement of the subject-matter, suggest the method of presentation, correct the lesson plans, and keep the record of the ability of the pupils to teach.

HIGH SCHOOL.

This institution is carried on by a corps of 7 teachers, and contains 75 pupils, who are going through the usual high school course. Attached to the high school is a grammar school in charge of 5 teachers and having an enrollment of 203 pupils. To this has been added for the ensuing term an additional room which will contain about 60 pupils. The graduates from the high school pass straight to various universities and colleges on the mainland, and acquit themselves as well as pupils of the same class who are educated at Oahu College, which is an independent establishment carrying on the higher education. High school studies are taught in some of the older classes of the large country schools, but Honolulu at present contains the only high school carried out on a regular course and giving a diploma at the end of the period of study.

The nationality of the pupils in the high school is a matter of interest. There are 1 part Hawaiians, 41 Americans, 11 British, 5 German, 1 Portuguese, 4 Japanese, 2 Chinese, and 2 foreigners of unclassified nationalities. The teachers are all Americans, save the teacher of foreign language, who is a Scandinavian.

In the grammar-school attachment nationalities are as follows:

Hawaiians.....	2	Portuguese.....	20
Part Hawaiians.....	41	Scandinavians.....	4
Americans.....	77	Japanese.....	5
British.....	31	Chinese.....	4
German.....	16	Other foreigners.....	3

The total number of boys in the high school is 29; girls, 46. In the grammar-school attachment there are 80 boys and 123 girls. The teachers in the latter school are all Americans.

LAHAINALUNA.

The history of this establishment has already been dwelt upon. During its long career it has had many ups and downs, but it seems now to have taken an upward

course. The idea of the school is that there should be higher education connected with industrial training. The boys board and sleep at the school, and in a measure raise their own food, though not entirely. There are 4 teachers in charge, all of whom assist in the industrial work as well as in the work of the school.

The present enrollment is 45, of whom 32 are Hawaiians, 10 part Hawaiians, 2 Chinese, and 1 Chinese. Twenty-three boys are in the fourth year of the grammar course and 22 are in the high-school course. Twenty-nine boys are engaged in agriculture and 22 are engaged in printing, carpentry, and other manual work.

The hours for work and for study are closely followed. A bell calls the boys at 5.45 a. m., and another at 6 o'clock is a signal for them to start to work. This work is either agricultural or in the shops for most of the boys, though a few have other duties as stewards, wagon boys, pig feeders, etc. At 7.30 this work is ended, and breakfast is called, and at 8.30 classes begin. These continue until 12, 3 teachers hearing classes and 1 working in a shop. From 12.35 until 2.30 2 teachers are conducting recitations and 2 shopwork. At 3 o'clock the boys return to work similar to that of the morning and continue it until 5 o'clock. 5.30 is the supper hour, after which the boys are at liberty until 6.45. From 6.45 until 8.15 the boys study together, a teacher being present each evening. At 9 o'clock a bell gives the signal for all boys to go to their rooms.

The entire morning and afternoon working time of the boys is seventeen and one half hours per week. Those who do agricultural work, however, have to use part of the hours of this time for cleaning taro and pounding poi, and four hours more for collecting wood to cook the taro, which very materially lessens their time for other work.

The food supplied the boys is simple, being poi and fresh beef three times a week, sweet potatoes in season, bread and coffee once a week (Sunday morning). One of the boys is the baker. Besides what food has been mentioned, each boy supplies himself with dried fish, and this completes the regular bill of fare. In the matter of life in the dormitories, the boys are given a large degree of freedom, the room being inspected often enough to see that they are kept clean and orderly, and the furniture cared for, but no teacher remaining in them over night.

BOYS' REFORMATORY SCHOOL.

Under the Hawaiian system the reformatory school for boys is under the charge of the department of education, and before the coming year is completed there will be most probably an industrial school for girls ready. At present the boys' school is in Honolulu, but during the next few months it will be moved to a tract of land at the north end of the island, and it will become possible to give the boys thorough training in agriculture, farming, fishing, and dairy work. The present boys' reformatory school buildings will be used for the industrial schools for girls.

On November 1 of last year there was a change of management, and since that date there has been a considerable increase in the establishment. On November 1 there were 47 boys on the muster roll.

Of these 5 boys were in jail for escaping from the school, and 1 had escaped and was not yet captured, so that there were in school at that time 41 boys. Since that date 37 boys have been committed and 21 boys released, leaving on the muster roll at this date 63 boys. Of this number there are: In school, 60; in prison, 2; in Queen's Hospital, 1; total, 63.

Nationality of boys.

Hawaiians	34	Americans (colored)

Daily programme.

5 a. m.—Rise; arrange bedclothing; prayer.

5 to 7 a. m.—Cook breakfast; sweep rooms; clean yard, etc.

7 to 7.30 a. m.—Breakfast.

7.30 to 8.30 a. m.—Wash dishes, dining hall, etc.; work.

8.30 to 9 a. m.—Bathe; change clothing; make beds.

9 to 12 m.—In school.

12 to 1 p. m.—Dinner; clean up dishes and dining hall; play.

1 to 2 p. m.—In school and knife workshop.

1 to 4 p. m.—Boys in carpenter shop.

2 to 4 p. m.—Work.

4 to 4.15 p. m.—Clean yard; water plants.

4.15 to 5.15 p. m.—Play; bathe and change clothing.

5.15 to 5.45 p. m.—Supper.

5.45 to 6.30 p. m.—Wash dishes; sweep dining hall.

6.30 to 7.30 p. m.—Study hour; singing; reports of conduct.

7.30.—Retire.

NOTE.—When the days are shorter there is some change in these hours. Saturday is a half holiday.

Bill of fare—inmates' dining hall.

	Breakfast.	Dinner.	Supper.
Monday.....	Rice and sugar, coffee and medium bread (alternately).	Beef, sweet potatoes, bread, bananas, vegetables.	Tea and medium bread or rice and sugar.
Tuesday.....	Rice and sugar.....	Beef, bread, poi, vegetables.	Poi and salmon.
Wednesday.....do.....do.....	Do.
Thursday.....do.....	Same as Sunday.....	Do.
Friday.....do.....	Same as Monday.....	Tea and bread.
Saturday.....do.....do.....	Poi and salmon.
			Do.

On important holidays buns, cake, or pudding is served.

AGRICULTURE.

Though the grounds are limited and the soil very poor, by carrying soil and using manure a crop of vegetables has been raised and another crop planted. Small quantities of beans, corn, cabbage, tomatoes, and sweet potatoes have been raised. This garden, besides the planting of a hedge, cultivation of flowers, ferns, etc., is all the agricultural work practicable under the present conditions.

CARPENTRY.

Five boys work in the carpenter shop from 1 to 4 every afternoon except Saturday and Sunday. The instructor is here only during those hours, so that it is not possible for him to take charge of more than one class.

Since the 1st of November last the following articles have been made in the shop: 7 teachers' desks, 3 wardrobe boxes, 2 bookcases, 1 screen frame, 1 curtain pole, typewriter table, 1 bureau, 6 sewing chests, 1 sand table, 22 screens for windows, screen doors.

Besides the work done in the shop the boys have built and repaired fences, repaired and painted buildings, and done carpenter work for the Kaimulani school.

KNIFE WORK.

Fifteen boys are in the knife workshop under the instruction of one of the guards from 1 to 2 p. m. on working days. They have made clothespins, paper knives, checkerboards, bread boards, brackets, and picture frames. For this work such lumber has been used as could be picked up, viz, kerosene cases, cigar boxes, etc.

SEWING.

Two boys are employed in the sewing room making sheets, mattresses, shirts, pants, nightshirts, pillowcases, etc. On Monday afternoons all the boys have practice in sewing, mending their clothes, sewing on buttons, etc.

MAINTENANCE.

The present appropriation of \$2,750 per year for the general expenses of the school, including food, clothing, fuel, light, material, medical attendance, etc., is altogether inadequate for the support of the present number of boys. Two hundred and twenty-nine dollars a month, or \$3.63 for each boy, is very much lower than expended in any other part of the States in similar institutions. In the Boston parental school the cost per boy per week is \$3.68. In the Indiana reform school where there are over 500 boys, the cost per capita is about \$10 per month. Here where food supply and material of all kinds is much higher than in the East, there should be a much more liberal appropriation for this school. It is to be hoped that after the school has been moved to the farm at Waialea that it will soon be self-supporting, but that will take two or three years.

BOARD OF HEALTH.

PURE FOOD, DRINK, AND MEDICINE.

The report for the past year of the food commissioner and analyst to the board of health shows a diligent inspection throughout the year of foods, drinks, and medicines offered for sale in Honolulu.

samples of milk have been taken from milk wagons on the street daily with the exception of Sundays and holidays. Of these, 122, representing 22 dairies, were below standard, as were also 10 taken from restaurants and 4 from individuals.

The average of the analyses of samples of milk taken at dairies was found to be: By dairies, total solids, 12.27; butter fat, 3.62 per cent. By number of cows, total solids, 12.36; butter fat, 3.74 per cent. A similar agreement between these two averages has been found in former years." (Report of food commissioner and analyst.)

Twenty-eight samples of drugs were examined, of which 13 were adulterated or below standard.

One hundred and seventy-six samples of food besides milk were examined, of which 56 were adulterated or below standard.

Six cases have been prosecuted—3 for sale of adulterated milk, 2 for sale of adulterated coffee, and 1 for sale of adulterated sausage. Convictions were obtained in all but the last. These, with 3 convictions in cases begun the year before, make 8 convictions during the year. One defendant was fined \$100 and sentenced to thirty days' imprisonment, 1 was fined \$100, 3 were fined \$50 each, and 3 \$25 each.

LEPROSY.

The policy of segregation of lepers was adopted by the enactment of special statutes with this object in view in 1865. The leper settlement on the island of Molokai was established in the year 1866, during which year 141 patients were sent there.

The policy of segregation was loosely carried out for a number of years after the establishment of the settlement. During the first ten years the patients admitted averaged 114 per annum, and the greatest number admitted in any one year was 183. In 1873 a stricter enforcement of the law was carried out, and 487 patients were sent to the settlement. Thereafter until 1887 the law of segregation was only partially enforced and the number of admissions during those years averaged 141 per annum, and the largest number admitted in any one year was 301.

Since 1887 the law has been vigilantly carried out. The number admissions in 1888 was 579; in 1889, 308; and in 1890, 202; and from that year to the present time the admissions have decreased in number though not regularly from year to year; but taking the twelve years beginning with 1890 and ending with 1901, in sections of three years each, we find the number of admissions to be as follows:

1890 to 1892, inclusive	
1893 to 1895, inclusive	
1896 to 1898, inclusive	
1899 to 1901, inclusive	

From these figures it would appear that with strict segregation the disease has steadily diminished, while, without strict segregation, it shows a tendency to spread.

The following table gives the average number of patients at the settlement for three periods of ten years each, with the average death rate for the same periods:

	Average number of patients.	Average number of deaths.	Per cent.
1871 to 1880, inclusive	648	135.4	20.9
1881 to 1890, inclusive	823.5	144	17.5
1891 to 1900, inclusive	1,096	124.5	11.3

These figures show a marked decrease of the death rate for the last decade, which is undoubtedly largely due to a general improvement in conditions at the settlement pertaining to comforts of life and care of the sick.

The number of patients at the settlement at the end of 1901 was 915 and on the 30th of June, 1902, 915.

During the year ending June 30, 1902, 132 persons have been examined, of which number 83 were found to have the disease, 31 were suspicious cases, and 17 were discharged.

DEPARTMENT OF THE ATTORNEY-GENERAL.

The employees of the attorney-general's department number 315, of whom 228 are Hawaiians, the remaining 87 being mainly Americans.

The appropriations for the support of the department for the biennial period from June 30, 1901, to July 1, 1903, aggregated \$620,719.95, of which \$315,525.23 have been drawn on account of the first half of such period, leaving a balance of \$305,194.72 for the second half.

The high sheriff reports that an electrical police-alarm system, which has been recently installed in Honolulu at a cost of \$20,000, has added much to the effectiveness of the police force of that city.

He also reports a decrease in the number of arrests in Honolulu for all offenses for the past year over the year before of 323, and that the arrests for drunkenness had fallen off, as compared to the previous year, by 728. This decrease in the number of arrests for drunkenness, the high sheriff attributes to the policy of the government of issuing a considerable number of licenses for the sale of beer only. These licenses having been recently declared unconstitutional by the local federal court, a further opportunity will be afforded of studying their influence on drunkenness.

The attorney-general, in explaining a deficit in the pro rata expenditures of the appropriation for "incidentals—civil and criminal expenses," makes the following brief reference to the work in his department, as affected by the new political conditions. He says:

This appropriation was reduced by the last legislature, which reduction, in the light of subsequent and unforeseen events, has proved to be unfortunate. The court and opinion work of the department has doubled since the days of the Republic. Grave constitutional questions have arisen; extended sessions and special sessions of court have become the rule. During a great part of the past year two terms of the circuit court have been running at the same time. In June there were three—one in Hilo, one in Wailuku, and one in Honolulu. The terms have not only been much more numerous, but also much longer than formerly. The transition, habeas corpus, and fishing-right cases—exceptional matters—have taxed the department severely in both time and money. I have employed outside counsel when imperatively necessary, and have spent during the year \$1,509.25 therefor. If I had not done so important interests of the Territory must have gone by default. These and other extraordinary demands fall mainly upon the appropriation for incidentals—civil and criminal expenses.

Number of arrests made throughout the Territory of Hawaii, and disposition of same by the district courts, for the year ending June 30, A. D. 1902.

MILITARY.

Under the laws of the republic of Hawaii, providing for the National Guard, and which were continued in force by the organic act, one regiment was organized under the republic, which force has been continued to the present time.

The following statement taken from the annual report of the colonel commanding—Col. J. W. Jones—presents the condition of the regiment and its operations for the year ending June 30, 1902.

Of the 9 companies making up the regiment, Company C is Portuguese; Company D is about two-thirds Hawaiian and is located at Hilo, island of Hawaii; Companies E and G are Hawaiian; Company H is mainly Hawaiian; Company I is about one-half Hawaiian and is located at Wailuku, island of Maui. The rest of the officers and enlisted men are mainly Americans, with a representation of Germans, British, and perhaps other nationalities.

Strength of the First Regiment National Guard, Hawaii.

Field and staff officers	12
Noncommissioned staff officers	6
Officers and enlisted men:	
Company A	60
Company B	62
Company C	64
Company D	64
Company E	61
Company F	67
Company G	66
Company H	54
Company I	55
Hospital Corps	14
Total	561

EFFICIENCY.

The exercises and evolutions practiced are those prescribed in the Drill Regulations and Manual of Guard Duty adopted by the United States Army. The work for the year has been as follows:

Regimental, battalion, and company drills; parades, practice marches, field exercises with ball cartridge; encampments; competitive drill; muster and inspection, and target practice.

Number of drills, etc., from July 1 to December 31, 1901..... 183
 Number of drills, etc., from January 1 to June 30, 1902..... 277

Total..... 460

	Number.	Possible.
Attendance from July 1 to December 31, 1901.....	5,993	9,450
Attendance from January 1 to June 30, 1902.....	10,852	15,440
Total.....	16,845	25,290

Percentage of attendance, 66.8 per cent.

The percentages awarded by United States Army officers acting as judges to companies taking part in the competitive drill on May 10, 1902, are as follows: Company F, 98 per cent; Company G, 93 per cent; Company E, 95 per cent; Company B, 90 per cent; Company A, 75 per cent.

The firing during the field exercises was at a position outlined by breastworks and was very accurate and effective.

The following is the record of medals won during the semiannual shoots for 1901-2, at 200 yards, offhand, 10 rounds per man: Gold (for 45 or better), 9; silver (for 40 or better), 45; bronze (for 35 or better), 98; total, 152.

There have been received from the United States War Department 18 cases, 1 bundle, and 3 packages quartermaster stores; 69 cases ordnance and ordnance stores.

FIRE CLAIMS COMMISSION.

The fire claims commission of five persons, appointed under the authority of act 15 of the session laws of 1901, being "an act to provide for the ascertainment and payment of all claims which may be made by persons whose property was destroyed by fire in the years A. D. 1899 and 1900, under orders of the board of health," began to take evidence in proof of such claims in May, 1901. It continued in session until June, 1902, with the exception of three months taken for giving the clerk an opportunity of keeping up with his work of entering claims adjudicated by the commission.

The number of claims filed was 6,748, amounting in the aggregate to \$3,175,132.90. All of these claims were heard and adjudicated, the aggregate of the awards amounting to \$1,473,173.

The following table gives the number of claims of, aggregate amounts claimed by, and aggregate amounts awarded to the different classes of claimants:

Nationality.	Claims.	Amount claimed.	Amount awarded.
Japanese	2,574	\$639,742.99	\$333,730.10
Chinese	3,728	1,761,112.04	845,490.80
Hawaiians	278	342,526.84	144,242.50
Portuguese	19	81,658.47	24,117.45
Other nationalities	128	272,829.76	125,602.15
Fire insurance companies	21	77,262.80
Total	6,748	\$3,175,132.90	1,473,173.00

The legislature by its said act 15 appropriated \$1,500,000 for the payment of such claims, limiting the expenditure to \$500,000 per annum, but providing no means by which the money appropriated might be obtained, except that it set apart the amount due the Territory from the Federal Government for advances made by the Territory on account of interest on that part of the Hawaiian debt assumed by the United States as a special fund for a partial payment of such claims. Such advances amount to \$151,640.79, and have not as yet been returned to the Territory by the Federal Government.

Under the organic act the legislature is without authority to authorize a loan for the payment of such claims, and should such legislation be enacted the President of the United States is without authority to confirm the same.

The legislature appropriated \$17,400 for the expenses of the commission, dividing the same into specific items, such as pay of commissioners, counsel for the Territory, clerk, stenographer, interpreters, bailiff, incidentals, and government witnesses.

This appropriation is accounted for as follows: Appropriation, \$17,400; drawn, \$14,982; balance, \$2,418.

The appropriation was insufficient for the work of the commission; but the unexpended balance of \$2,418 could not be used, as it represented specific items of the appropriation, such as pay of government witnesses and pay of interpreters, which items did not exhaust the amounts appropriated for them.

In this emergency, as an indefinite adjournment of the court would have been extremely unfortunate, a number of business houses of Honolulu advanced \$4,000 to the commission and the work went on. Later, as still more money was required, the commission adopted a scale of fees for certificates of awards to be paid by those desiring such certificates. The following schedule of fees was adopted:

Certificates of award:

\$50 and under	\$0. 25
\$100 and under 50
\$500 and under	1. 00
Over \$500	4. 00

Enough was realized by these fees for further requirements and the reimbursement of the loan from the business houses, with interest. Before this was carried out, however, and since the close of the finan-

cial year, legal proceedings have been brought to test the legality of the action of the commission in charging such fees.

In the month of April last the Chamber of Commerce and the Merchants' Association of Honolulu passed a joint resolution favoring payment by the Federal Government of the awards made by the claims commission, and authorized Mr. J. C. Pratt, a member of such commission, to proceed to Washington, as their representative, to present the same, and to urge the enactment of such legislation as Congress as should grant the relief suggested.

The Congress having this matter brought before it late in the session gave it such consideration as the pressure of other matters permitted, with the result that the Senate Committee on Pacific Islands and Porto Rico made a unanimous report recommending that an amendment be made to the House deficiency appropriation bill, appropriating \$1,000,000 for payment of a part of such awards, and authorizing the Territory of Hawaii, through the governor and secretary, to issue bonds in the sum of \$500,000 for payment of the balance. After reference of this report to the Senate Committee on Appropriations and a favorable report by such committee, the amendment was passed without opposition by the Senate, but failed to pass the House.

A bill providing substantially the same relief as embodied in the Senate amendment was subsequently favorably reported by the chairman of the Senate Committee on Pacific Islands and Porto Rico.

Some kind of action by Congress is essential to the payment of the awards in question, inasmuch as the Territory can not furnish funds for the purpose except by borrowing, and borrowing for such an object is not permitted by the act organizing the Territory.

The efforts of the government of the Republic of Hawaii to suppress the plague epidemic were in the public interests of the United States. Such efforts cost \$720,488.07 and large unestimated losses to the business interests of the group. The Hawaiian Islands were at the time under the control and government of the President of the United States. Immediately subsequent to the suppression of the plague the act creating the Territory of Hawaii was enacted, whereby Hawaii lost its customs revenues, worth at that time \$1,200,000 per annum or 38.7 per cent of its entire current revenues.

With these important reductions of the public income the Territory is unable to meet its current expenses without borrowing, much less will it be able to pay these awards, or any substantial portion of them without prejudice to the general administration of its affairs.

It is nevertheless important upon every consideration that the awards be paid without delay, and I would recommend that the Federal Government assume the whole payment thereof.

WIRELESS TELEGRAPHY.

By the courtesy of the Interisland Telegraph Company, Limited, am able to furnish the following information on this subject:

In March, 1901, this company opened communication between the islands of Oahu, Molokai, Lanai, Maui, and Hawaii. The service was at first unsatisfactory, but improved as the operators became more accustomed to the work. In July, however, the coherers began to wear out and the service eventually broke down.

There were serious difficulties in the way of procuring new coherers, and after many experiments the manager, Mr. Cross, succeeded in introducing them here, and the company recommenced operations in the middle of this year, since which time the line has been in successful operation. As the system at present can not more than pay expenses, it is financially assisted by the business men of Honolulu, who recognize its vital importance to the business interests of the country.

The present stations are Waialua, Oahu, the westerly point of Molokai, Lanai, Lahaina, Maui, and Mahukonu, Hawaii.

The ocean distances telegraphed over are approximately as follows: Waialua to Molokai, 29 miles; Molokai to Lanai, 15 miles; Lanai to Lahaina, Maui, 8 miles; Lahaina to Mahukonu, Hawaii, 60 miles.

The weather in these ocean channels during the prevalence of the trade winds, which continue the greater part of the year, is characterized by winds of varying velocity, sometimes approaching to the quality of gales, occasional showers, and low-lying clouds. The ocean in the first and last of the channels mentioned is generally stormy.

Since the line has resumed operations, all messages transmitted reach their destination, though sometimes in a somewhat mutilated form.

RECOMMENDATIONS.

It is recommended:

That an expert forester be maintained in the Territory for a sufficient time to enable him, acting with the Territorial government, to organize and establish a system for the management, conservation, and development of Hawaiian forests;

That the payment of the full amount of the awards made by the fire claims commission be assumed by the United States;

Or, in the alternative, the Territory of Hawaii being under conditions differing from those of any other Territory of the United States, and carrying on at its own expense a system of light-houses, the dredging of harbors and the maintenance of buoys, duties usually performed by the Federal Government, and the expense of these enterprises, together with the payment of the aforementioned awards when taken with the loss of the tariff revenues formerly enjoyed by Hawaii amounting at the time of the inception of the Territory to about \$1,200,000, being too great for the Territory to assume, that the customs receipts collected at the ports of the Hawaiian Islands be paid to the treasury of the Territory;

That the payment of taxes for the year previous to a regular election for Delegate to Congress and senators and representatives of the territorial legislature, and before the end of such year, be made a prerequisite to registration for voting at such election, except as to such taxes that may be in litigation;

That a Federal building for the accommodation of the Federal court, post-office, and revenue officials be erected in Honolulu;

That a building or buildings for the accommodation of the Federal court, custom-house, and post-office be erected in Hilo;

That light-houses be erected at Honolulu Harbor, Oahu, Makapuu Point, Oahu, Kahului, Maui, Ouna, Kailua, Kawaihae, and Mahukonu, Hawaii; and Kalaeokalaau, Molokai; and that the Federal Government assume the management of all Hawaiian light-houses;

That the Federal Government assume the care of all Hawaiian harbors and the work of improving the same;

That a breakwater be constructed for the protection and improvement of Hilo Harbor, Hawaii;

That the Hawaiian silver coins be received in exchange for United States silver coins of like respective denominations;

That a limited immigration of Chinese laborers be permitted, conditioned upon their engaging in agricultural work for hire only during their stay in the Territory and subject to deportation at their expense upon their ceasing to do so;

That legislation be enacted placing in the executive of the Territory authority to dispose of the waters belonging to the public lands—lease or license;

That section 80 of the "act to provide a government for the Territory of Hawaii" be amended so that the governor may suspend an officer in regard to the removal of whom the advice and consent of the Senate is necessary, until the next succeeding session of the Senate and may, except in case of the auditor, appoint a person to fill the office in question pro tem. until the matter of the removal of the suspended officer is settled, or may remove any of such officers.

Estimates for appropriations.

LIGHT-HOUSES.

Honolulu Harbor, Oahu	\$4.

Respectfully submitted.

SANFORD B. DOLE,
Governor of the Territory of Hawaii.

The SECRETARY OF THE INTERIOR,
Washington, D. C.

EXHIBIT Z.

Summary of the expenses of the subcommittee of the Committee on the Pacific Islands and Porto Rico under Senate resolution No. 260, first session Fifty-seventh Congress, investigating the general conditions in the Islands of Hawaii:

Freight	\$1,516.18
Passage	22.30
Travel on steamships	540.00
Board and fares, meals, portorage, etc	338.25
Printing 456 pages of the 601 pages of testimony taken by the subcommittee in Hawaii	577.16
Mr. Brown, assistant sergeant-at-arms	72.00
Advertising, notice given on arrival of committee in Honolulu	4.90
	<hr/> 3,070.79

In addition to the above, Harry C. Robertson, secretary to the subcommittee and at present clerk to the Committee on Coast Defenses, United States Senate, performed extra services, as follows: Reporting 145 pages of the printed testimony, and also prepared indexes to 601 printed pages of the testimony taken by your subcommittee, and — pages of letters, petitions, memorials, and exhibits, as well as by parts 1, 2, and 3 of the report of the committee, also indexed the report of the subcommittee of 176 pages, for which extra service he has not been paid, and your committee consider the same of reasonable value of \$500, and recommend that he be paid that sum for such extra services.
